WORLD OF INDIAN FINANCE

Calcutta, Friday Evening.

Credits have been even easier than in early weeks. Interbank call money is quoted ½ per cent. both in Clive Street and Hornby Road; but this is purely a nominal rate. By every token, demand for money has slackened off considerably. The consolidated statement for Scheduled Banks as on September 20 shows a sudden fall of nearly Rs. 4 crores under the head Advances. Secondly, advances in the case of the Imperial Bank have dropped in this quarter from Rs. 27.29 crores to Rs. 21.33 crores. Thirdly, applications for Treasury Bills continue to be for colossal amounts. Against the Rs. 2 crores on offer, tenders came to Rs. 9.55 crores on September 17; on September 24, tenders amounted to Rs. 6.08 crores. Fourthly, though the applications this week were 35 per cent. less than in the last week, there has been keen competition in rates, so much so, that the average discount rate on accepted tenders has come down from 0-14-11 per cent. per annum on September 17 to 0-11-10 per cent. per annum on September 24. Fifthly another indication of slack money conditions is the huge sales of intermediate Treasury Bills during the last week. The press *communique* issued on September 17 announced that Treasury Bills at the tap-rate would be sold from September 18 to September 23. As much as Rs. 5.60 crores was received on one single day, that is, September 18. There are, however, reasons to think that only a small portion of the intermediate treasuries sold on September 18, could have come to the outside banks. The weekly return of the Imperial Bank as on September 20, shows an increase in investments from Rs. 33.05 crores to Rs. 38.65 crores. It is clear that the Imperial Bank must have taken a substantial slice of the intermediate treasuries sold last week.

Even in spite of this big-sized operation, the cash balance of the Imperial Bank stands at Rs. 25½ crores. It stands to reason that the Bank would like to invest some more portion of its surplus funds in Treasury Bills. We shall not be surprised if the statement of the Imperial Bank which will be issued next week affords confirmation of this forecast. So far as the banks in general are concerned, they were not prepared for such a sharp and drastic decline in the average rate of accepted tenders. Which means, that the rate at which they would have tendered to the Reserve Bank should have been such as to make them 'miss the bus'. So far as exchange banks are concerned, the present yield on Treasury Bills cannot prove attractive in respect of operations for utilising London funds. The competition hereafter will thus be limited to the resources that banks have from local sources. This means that the applications on the tender day may not be so large as has been the case in recent weeks. Nor can we look forward to such a sharp break in rates as occurred this week. It may well be that the average rate would tend to stabilise itself roundabout ·70 per cent.

The ways and means position has been considerably strengthened; and the meeting of the interest payments and maturing loans should cause no strain whatsoever. In view of this certainty of continued ease in the money market, it is surprising that the authorities should consider it hazardous to lend support to the securities market. Support to the securities market means, in existing conditions, support for 3½ per cent. Rupee Paper. All other securities are maintaining their prices.

If we charge the authorities with a total lack of appreciation of market psychology, they turn round and say that they keep themselves well informed and that they are in touch with people who are competent to gauge market conditions and developments. This is, in fact, the kind of reply which Sir James Grigg gave to Mr. S. Satyamurti who raised a question in the Assembly with pointed reference to the views advanced in the columns of *Indian Finance* as regards the last New Loan. *Indian Finance* was of the view that the issue price of Rs. 96-8 was unduly low and that this unduly low price meant a loss of Rs. 37½ lakhs to the Treasury. What about it?—asked Mr. Satyamurti. To which Sir James replied that there was nothing like this "alleged loss." He also said that he consulted a few people who are in the know about market conditions; and that his deciding on Rs. 96-8 as issue price was based on such advice. The market would like to know who were the advisers that misled the Finance Member in this way. A day prior to the issue of the loan, there was not one member in the business world who would have suggested an issue price lower than, say, Rs. 98-8. Even the papers, which turned apologists for the Government after the event were themselves suggesting Rs. 99 as the proper issue price for the loan.

The utter indifference to criticism which the Finance Member enjoys is due to the fact that he is not answerable to anybody for the loss or damages which his actions might cause. We have no doubt in our mind that the issue of the New Loan at Rs. 96-8 inflicted a wanton loss of Rs. 37½ lakhs on this country. The fact that, even after the serious debacle in 3½ per cent. Rupee Paper, the New Loan is still standing at a satisfactory premium proves conclusively that the Finance Member fixed the issue price too low.

The weekly returns pertaining to the money market, issued this week, show considerable changes; it is not every change that is intelligible. The consolidated statement of Scheduled Banks shows a rise in Demand Liabilities from Rs. 114.64 crores to Rs. 118.07 crores. Is this increase due to the bringing in of funds from London for investment in Treasury Bills? Time Liabilities show no material change. Notes held in India by Scheduled Banks have suddenly fallen from Rs. 6.49 crores to Rs. 4.98 crores. Does this mean that banks are getting accustomed to keeping lesser cash balance in the till and maintaining larger balances with the Reserve Bank? This may be partly true as balances held in the Reserve Bank have gone up from Rs. 35.92 crores to Rs. 38.52 crores. Advances in India show a drastic shake-out from Rs. 88.71 crores to Rs. 84.92 crores. No light is thrown on this puzzle by the statement of the Imperial Bank. Advances are down from Rs. 21.91 crores to Rs. 21.33 crores in the case of the Imperial Bank. This means that by far the greater portion of the fall in Advances is accounted for by banks other than the Imperial Bank. As we have said, Invstments of the Imperial Bank have gone up from Rs. 33.05 crores to Rs. 38.65 crores. The Imperial Bank must have, presumably, taken a good whack of Treasury Bills. The statement for the Banking Department of the Reserve Bank shows a rather heavy fall in Investments from Rs. 6.05 crores to Rs. 5.43 crores. Has the Reserve Bank been selling securities at a time when it ought to have been lending support to the market? Another mystifying item is the unusual jump in Other Assets from Rs. 36.93 lakhs to Rs. 2.47 crores. Other Assets, like an overcoat, may cover a multitude of sins. This increase is truly mystifying. Turning to the statement of the Reserve Bank for the Issue Department sterling securities show an increase of Rs. 1 crore and rupee securities a corresponding decrease. This means that the policy of reducing *ad hoc* securities continues to be in full force. Rupee coin shows another bulge, this time from Rs. 65.90 crores to Rs. 57.54 crores.

The next issue of "Indian Finance" will be sent out on Thursday as Friday and Saturday are holidays. There will be no issue on October 12 on account of the Puja holidays.

Editor.

The exchange market has been firm. There have been bills for distant positions mainly on gunnies account. On the weekly sterling tender day, applications for £190,00 at 1s. 6 1/8d., were received and allotted in full.

The closing rates are: 1s. 6 3/32d., September-November T.T.; 1s. 6 1/8d., December-March T.T.; and 1s. 6 3/32d., April-December T.T.

3 months bill may be quoted 1s. 6 7/32d., right through till Decmber 1936.

Credits are absolutely unlendable; the nominal rate is ½ per cent.

Firms' money for call, three days' notice and seven days' notice quoted ⅜ per cent.; onemonth, twomonth and threemonth deposits quoted ¾ per cent.; fourmonth deposits 1 per cent.; and twelvemonth deposits 2 per cent. But banks are reluctant takers of term money as well as of call money.

Thursday Evening.

The decline of sterling has gone farther in the earlier part of the week under review. The sterling-dollar rate came down to 4.91½ on September 23, from 4.91 13/16 on September 20. The sterling-franc rate has likewise fallen to 74.57 from 74.68 at the beginning of the period under review. There has since then been a shade of firmness in sterling, the dollar falling to 4.92 1/16 and the franc to 74.60.

Despite the later developments, it is clear that the seasonal decline in sterling is well under way. Though the term seasonal, doubtless, explains the phenomenon at present at work, it is well to note that special factors have also been in operation. There is first the marked strength which the dollar has of late shown. It will be easily recognised that the strength of the dollar in this part of the year is, to some extent, a part of the phenomenon referred to in the seasonal decline of sterling. But in addition to the seasonal demand for dollar, which emerges in this part of the year from Great Britain and from the Continental countries, there is also to-day a flight to the dollar which must explain, in large part, the changes that have occurred in the international exchanges. Only a short while ago, the world witnessed a flight from the dollar, which was inspired by fear of the new taxation proposals of Mr. Roosevelt and, one might also add, the share-the-wealth-campaign conducted with such energy and even apparent success by Senator Huey Long. But during the last fortnight, there have been changes on both sides of the Atlantic. The taxation proposals have been carried to the Statute Book, Senator Huey Long has been assassinated probably by a hireling of his political opponents, and for the present there must be a serious check to the campaign conducted by the late Senator. On the other side of the Altantic the war scare has made the Continential currencies more unsafe than ever.

The change in the international exchanges has also brought about a change in the outlook of the precious metals. The last week of August witnessed a significant decline in the sterling price of gold, the lowest price touched being 139s. 9½d. on August 27. The reason for this decline was examined in these columns in the issue of August 31 last.

It was observed then that the Continental investors who were apprehensive of the stability of gold currencies and, therefore, transferred their funds to London, were eventually forced to sell their gold holdings owing to the unexpected prolongation of the agony of the gold standard countries. As a part of their resources must have been borrowed and as the loans must have come for repayment, they initiated a selling movement of gold, which, on account of its coincidence with the higher sterling exchanges, accentuated the downward movement of the London price of gold. The reasons, which brought about the decline, have not only disappeared, but the trends may also be said to have been reversed. In the first place, the upward movement of sterling came to a halt nearly three weeks ago; and during these three weeks sterling has steadily come down. On the Continent the reappearance of the war scare has also helped the official movement of gold. It has now become a matter of comparative indifference whether the position of the gold currencies is technically sound or whether the movement for devaluation in those countries is gaining ground. The re-commencement of active hostilities has its obvious dangers to the stability of any currency; and in so far as the threatened war between Italy and Abyssinia has every potentiality of developing into a second world war, there is hardly any country in the world whose currency may be said to be altogether free from the threat of forced depreciation. In addition to the threat of depreciation they are also other dangers. The dangers referred to account to a large degree for the efflux of funds to countries like the United States. In as much as Sir Samuel Hoare's statement at Geneva has lessened the possibility of Britain being able to stand outside the sphere of war, sterling must also be deemed to be under the same cloud as hangs on the Continental currences. The decline of sterling, which occurred during the last two weeks, is due, to some extent, to the fear of war; so that it might be said that what time sterling has declined and has led to an automatic increase in the London price of gold, there has also been the re-emergence of the Continental demand for been the re-emergence of the demand for gold.

The fortunes of sterling have also of late come to be linked with movements of sterling. The public is aware of the fact that the purchases of silver in London have, for a long time, been regarded by the American Government as an insidious means of preventing the depreciation of sterling or the appreciation of the dollar. When sterling was ruling high, the American Government availed themselves of the opportunity of effecting their purchases of silver at a low rate, for at that time they stuck to the American price and insisted on getting their silver at the sterling price determined by the ruling sterling-dollar rate. The silver market was then disrupted by this decision of the American Government. After this a change may be said to have occurred since the resumption of the depreciation of sterling. For it is known that the American Government allowed the silver market to improve, in as much as it was necessary for them to effect large-scale purchases to prevent sterling from coming down to lower levels.

OUR BALANCE SHEETS TELL THE TALE

Founded in the wake of Swadeshism, the "NATIONAL" of Calcutta has grown from strength to strength with the result that it is to-day one of the leading Life Offices of the East. During nearly thirty years of buisness-building it has been able to accumulate assets worth more than Rs. 2,50,00,000 despite the fact that within so short a period a sum exceeding Rs. 1,30,00,000 has been paid away by way of Claims to the Policyholders and their beneficiaries. These are facts which merit the earnest consideration of those who do not want to gamble with the savings of a life-time. Why not yours?

You have only to let us know your requirement and leave the rest to us.

NATIONAL INSURANCE CO., LTD.
NATIONAL INSURANCE BUILDING
7, Council House Street, CALCUTTA

BUY

CENTRAL BANK'S 3 YEARS CASH CERTIFICATES

FREE LIFE INSURANCE POLICIES

Every Rs. 91/- deposited will bring you Rs. 100/- after three years which works out at the rate of 3¼ per cent Compound Interest.

RECENT JUTE DEVELOPMENTS

A general meeting of the Indian Jute Mills Association has been called for on September 30 to consider the following resolution recommended by the Committee of that body:—

> That the requisite six calendar months' notice required by clause 2 of the agreement dated the 21st January, 1933, and made between the Indian Jute Mills Association and the outside mills be given by the Association to the outside mills, *viz.*, The Adamjee Jute Mills Ld., The Agarpara Co., Ld., The Gagalbhai Jute Mills Ld., The Ludlow Jute Co., Ld., and to the Shree Hanuman Jute Mills, on the 30th September, 1935, to terminate the said agreement as from the 31st March, 1936.

According to the Articles of Association, a majority of 75 per cent. of the members present is necessary to pass the resolution. It is believed that the resolution will be passed with the necessary majority and the notice will be despatched on the same day.

* * *

The Committee have submitted to the members a memorandum setting forth the reasons which have compelled them to take this step. In the opinion of the Committee, "it is essential, for two reasons, to terminate the existing arrangement at the earliest possible moment. In the first place, it is obviously undesirable that the industry should continue to be exposed to the ill-effects of similar action on the part of one individual mill. In the second place, the communication recently received from the Government makes it clear that the policy underlying the existing working agreement is not in their opinion such as to lead to the rehabilitation of the industry on sound lines. The termination of the existing agreement with the outside mills is, therefore, the first step towards the continuance of negotiations having as their object the formulation and introduction of a scheme which will embrace all mills in India and will satisfy the conditions laid down in the concluding paragraph of Government's memorandum."

* * *

So far as the members of the Association are concerned, a notice of three months only is necessary to alter or terminate the present working arrangement between them. This notice can be given at any time before the 1st of January, 1936, so that like the outside mills, member mills may be free from restriction regarding working hours. It seems certain now that, unless a miracle happens between to-day and the 1st of April, 1936, there is bound to be unrestricted production by all jute mills. Before discussing the effects of unrestricted production, we would like to set forth the various reasons which have compelled the industry to have recourse to this drastic step.

* * *

It is well known that, for sometime past, the Jute Mills Association had been watching with grave concern the developments that were taking place in the industry. As a result of the profitable trading conditions maintained and encouraged by the very favourable treatment that was accorded to the outside mills during the last three years, several new jute mills were started both in Bengal and outside the province. These concerns were growing fast both in number and size. Not being subject to any restriction, the production of such unregulated concerns has assumed fairly large proportions. Besides this, some of the outside mills, which were not members of the Association, but were parties to the working agreement, put forth, from time to time, demands for special consideration. Even recently, one of them requested to be allowed to instal an additional complement of 150 looms. On the other hand, inside the Association itself, several members felt discontented with the arrangement arrived at in 1931. In their opinion, the present policy was wrong. It not only gave the outside mills very great advantage over the member mills, but prevented the members from being ever able to partake in any increased demand for jute goods. Those who entered the field late were expanding rapidly, whilst concerns of older standing had to be content for ever with their present capacity. During the last twelve months, a considerable number of members veered round to this point of view. They felt that the present arrangement should not continue any more and that a new arrangement should be made wherein all parties should work on equal terms and it should comprise every mill in India.

* * * *

The Committee of the Association have always been opposed to taking any drastic steps. They tried their utmost to bring about an amicable settlement of the various viewpoints by negotiation and by requesting the Government to help them by legislation. The Government of India refused, in effect, to come to the aid of the industry. In the meantime, one of the signatories to the 1931 agreement took over the management of an existing mill which was outside the working arrangement; and considerable expansion was planned. Another outside mill threatened to resign unless the mills that were outside the agreement joined it by the 21st of September. Some of the members of the Association threatened to resign unless the terms of the present agreement were changed. What could the Committee do in these circumstances? The only alternative left to it was to relieve everybody from the present agreement.

* * *

Unregulated production is bound to lead to a cut-throat competition amongst the mills. Prices of manufactured goods will come down further. Many mills will be faced with the alternative of closing down or working at a loss. The price of jute shares will experience further serious depreciation. How can all this be avoided? Only in two ways. Either by the help of the Government of India or by a voluntary arrangement between all the mills.

* * *

The Government of India have laid down certain conditions which must be satisfied before the industry can hope to get their help. It is too much to expect the industry to be able to carry out rationalisation on the lines suggested by the Government of India. Dr. Nemenyi, in his speech delivered recently at the Rotary Club, discussed, in a very able manner, the difficulties in the way of rationalisation on lines proposed by the Government.

* * *

The only alternative left before the industry is a mutual arrangement between all mills. We believe it is not an easy task. In the present circumstances, there are very few chances of such an arrangement being prepared to work on equal terms with the Association mills. It is only when every mill starts working at a loss and has to go out hunting for buyers of its production, that such an arrangement can be expected. Such a stage may not be reached for at least the next twelve months. It is possible now for any mill, if it so desires, to secure its profits for the next twelve months. It is futile to expect these concerns to agree to give up their privileges in these circumstances. Even with the prospect of cut-throat competition before them, several mills are planning extension of their present productive capacity, so that if any legislation is passed in future, they may get a bigger share. And who knows good may not come out of this evil ? Under the stress of keen competition, mills may have to carry out a drastic overhauling of their present methods. Assured profits place a premium on inefficiency. Good management or intelligence counts for very little where it is easy to make profits. With restriction abandoned, the position of the jute industry will become like that of the cotton industry. We find in the cotton industry that, whilst on the one hand, some old concerns are being closed down due to losses, others are working double shift and even new mills are being erected. In the jute industry, too, abandonment of the present agreement may not mean that every mill will start working the maximum number of hours that it can work. Some will work full time, some will work as at present and some will close down entirely. It will all depend on the conditions and circumstances of each individual mill. Rationalisation as suggested by the Government will be achieved not voluntarily, but by the ruthless process of elimination of the weak and the survival of the fittest. Mills with a lower cost of production and a better sales organisation will be able to survive. It is quite possible there may be a radical change in the organisation of the whole jute industry.

* * *

One thing is certain. If the industry once engages itself in a cut-throat competition, even if some arrangement is arrived at later on, for a number of years nobody will dare to invest his money in the jute industry ; and with all attractions gone, any arrangement arrived at will be loyally carried out by all. Even without Government help, the future of the industry will, if this materialises, be assured for a number of years. No dog, which only barks but never bites, can ever command respect.

* * *

This is, as we have said, a painful process during which the entire economic fabric of Bengal will be torn to shreds. Is all this harm and loss necessary? Cannot some of the public bodies or public leaders take the initiative in bringing the industry, the Government and the other interests together for a common line of action on lines somewhat similar to those suggested by *Indian* if planning for jute trade is taken on hand seriously. We repeat that the scheme for jute is as follows:—

(1) Compulsory restriction of jute by State Legislation.
(2) Minimum price for jute.
(3) Provision of facilities for warehousing and finance.

We repeat that the jute industry can be easily planned as under:—

(1) Restriction, by legislation, of working hours of all jute mills in India.
(2) Restriction, by legislature, of any additional mill or additional productive plant.
(3) Enhancement of the duty on raw jute.

ECONOMICS AND MARXIAN MATERIALISM

Marxism is generally known as a religion of the revolutionary with doctrines which are largely determined by the Communist programme of action. The establishment of the Soviet Government in Russia and the economic distress in the rest of the world have helped during the last few years a fresh appraisal of the teachings of Karl Marx. Labour leaders, who believe in evolutionary socialism, have made various attempts to utilise the Marxian method for a deeper and a more accurate understanding of the trends of contemporary history. Even in the days shortly following the death of the prophet of Communism, there were many among his opponents who recognised the distinction between Marx the revolutionary, Marx the scientist and Marx the philosopher. If Marx had something of the true scientist in him, it is sheer commonsense that his opinions regarding the future of society should not blind his co-workers to the value of his work. There is no doubt that Marx was far from a mere demagogue, out to secure the plaudits of the plebian by playing on his weaknesses. To him at any rate, his revolutionary ideas followed from a system of thought. His thoughts were based on his study of science and of history. It is a different matter that his methods were out of the common. But the use, which Marx made of his stock of knowledge and the manner, in which he pressed it into the service of his revolutionary programme, have driven many unthinking minds to fight shy of Marxism in all its aspects. Despite all the progress of science, mankind cannot pretend to a surfeit of knowledge ; and now that our accepted teachers in social affairs have been discredited by the parlous state of human civilisation, it should be at least permissible to turn to sources which we have long disdained.

* * *

Academic circles in Soviet Russia have apparently taken advantage of such a situation to present Marxism, not in the familiar and less respectable form of proletarian partisanship, but as a philosophy, a new orientation of methods of observation and reasoning.

It is natural some extravagant claims should be registered in writings like this. In the preface to *Marxism and Modern Thought* by Bukharin and others (Routledge, pages 342) the authors claim that the volume is an instance of the advantages of collective work which academic institutions in more individualistic countries may envy. The authors obviously ignore the more imposing results of the co-operative endeavours of academicians in the bourgeois countries. At one point, the communist scientists go so far as to suggest that the rest of the world is disabled for further contributions to science by its bourgeois outlook, which is essentially unscientific. The charge easily lends itself to the retort that the boot is on the wrong foot. There are other exaggerations of this kind. Nevertheless, the writers have succeeded in their primary purpose of showing that the methods which Marx adopted in his studies and the more important conclusions, which he reached thereby, have a vital relation to modern thought in all its branches. There is, indeed, need to reclaim Marxism from the prejudice created by the nefarious activities of Communist conspirators. For to Marx belongs the credit of attempting to derive guidance for life from knowledge. To him a theory mattered nothing, it could not be usefully applied in practice. Though this took him to the extreme of putting revolution on the apex of his thought, it has, doubtless, its uses in urging him to look for the relation between various branches of science. Neither Marx nor Engels ever overlooked the bearing of any law or science on what they thought or preached. They were almost alone among their contemporaries in their proper appraisement of Darwinian biology, while at the same time they were keenly conscious of the light which biologists could throw on social problems. Marx himself started as a student of philosophy and as a follower of Hegel ; and the creed which is known by his name bears the traces of Hegelianism.

* * *

Marxism is thus firmly based on science ; and its tenets, considered apart from the exhortation to violent revolution, constitute a sysem of philosophic thought. Bukharin in his opening essay on "Marx's Teaching" presents a most complete exposition of Marxism, from the philosophical and the scientific standpoint. He leads up to the claim that the Marxian method of materialistic dialectic constitutes the best method of scientific investigation. The scientists bring out in great detail the relation between Marxism and modern science. The greater part of the volume is for this reason a sealed book to the lay reader. But it is easy to detect the claim that the progress of science depends on the acceptance by the scientist of dialectical materialism as *the* creed and of materialist dialectic as *the* method of investigation. The writer on "Bourgeois Historical Science" is on comparatively firmer ground, as the disastrous consequences of flouting the economic interpretation of history are most apparent in the works of bourgeois historians, though it is more than one can say where a historian would be ultimately led by the acceptance of teleology in any form. The authors of the volume protest loudly against teleology ; but it is difficult to see how the economic interpretation of history in its actual working is different from the reading of a final cause into the vicissitudes of human societies.

* * *

Despite defects, which follow largely from propagandist zeal, the book is important for its forceful presentation of philosophical materialism. Bukharin leads a frontal attack on traditional philosophy when he examines the relation between subject and object and invalidates the assumption that the subject is a free subject able to think his own thoughts, untrammelled by the natural influences of his environment. Nor is the object a mere unchanging world of nature. The subject is socialised man, who is born to the heritage of human history, who is in part a slave, and in part a master, to the world of nature around him.

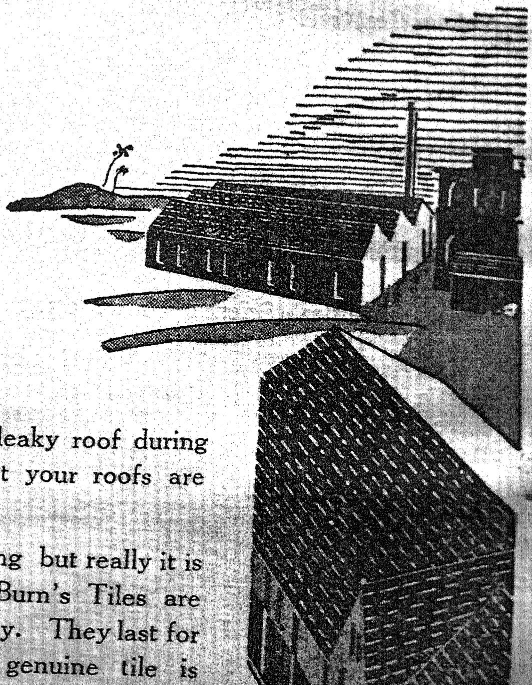
BURNS ISSUE A WARNING



There are few discomforts so great as a leaky roof during the monsoon. You are warned to see that your roofs are fully repaired before the rains set in.

That sounds like an expensive undertaking but really it is not if you use Burn's Raneegunge Tiles. Burn's Tiles are neat, free of upkeep costs and easy to lay. They last for ages. But beware of imitations. Every genuine tile is branded "Burn," and is made at The Potteries, Raniganj.

POTTERY DEPARTMENT

BURN & CO.

12, Mission Row, CALCUTTA

> The object is a changing object, for throughout history man is asserting his progressive dominion over nature. Object and subject are a unity, for society is not a supernatural quantity. But this is not an identity ; object and subject are opposed. The struggle of these opposites drives on history, while these opposites interpenetrate one another (the process of the influence of nature on society, the process of the "humanising" of nature) ; society has in the last resort grown out of nature but it is not dead matter and not a biological species. It is matter with a specific quality in that its relation to nature is an active relationship, practical and theoretical. Theory and practice are a unity but a contradictory one. The contradiction between its form and content (productive forces and productive relations) expressed in the opposition of classes (in class society) is the motive force of historical development.

And so on. But this indicates the main principles of Marxism, its insistence on the historical and social character of the subject, the fact of change in nature, the opposition of subject and object as the motive force of history, the conflict and the unity of opposites, the causes of evolution through antithesis, thesis and synthesis, in fact, the whole form and content of dialectical materialism.

* * *

The human value of this system of thought can hardly be under-rated. To our mind, it provides the clue to the paramount task of unifying human knowledge and deriving from it a practical guidance to life. As we pointed out at length in these columns last week, the open mind of the scientist has left the problem of values in the cold. Traditional philosophy dwells in even colder abstractions ; and in so far as it seeks to guide practical life, it has little to offer beyond the exhortation to treat the world of reality with indifference. If philosophy is a synthesis of knowledge yielding a rule of life, then Marx's dialectical materialism has something to recommend itself to those who put the welfare of human society above the satisfaction of fastidious intellectualism. It seems to us that materialism, in the sense, not of the lower satisfaction of life in "this world", but of the realisation of all the true individual and social values which we can apprehend in every stage of evolution is more worthy of man's allegiance than the cult of renunciation in the variety of its religions and philosophical forms. A science of values—despite the oxymoron—is clearly needed. And Economics, which has gone about like the bee in the folk tale, asking others for its name and identity, can do no better than take upon itself the task of appraising the conclusions of other sciences from the standpoint of the good of social man.

OTTAWA PACT

The Ottawa Pact has become the bugbear of the conscientious economist. It is true that economic science can have nothing but hard words for any attempt to canalise world trade or in any manner to divert trade from its normal channels. Indeed, when the proposals were first published, economists both in India and England unanimously condemned it as inexpedient, unwise and unscientific. They expressed their apprehension that such artificial measures are fraught with grave danger to the trade of each Empire nation, the Empire and world trade as a whole. Their reasoning, which was based on the findings of economic science, can hardly be invalidated by anything that has happened or can happen since. But the controversy has unfortunately been shifted to a new plane. Now that we have had two years of the working of the Ottawa Pact, its opponents are called upon to demonstrate the correctness of their views, by detailing the harm which the Pact has done to India and other signatories to the Pact during the two years of its working. Some at least of those, who throw this challenge, ought to know what an unfair duel they are calling their opponents to. It cannot be lost on them that during these years the conditions of world trade have been such that causes and effects can by no means be isolated. The orthodox economist might well refuse to fight on a ground of the politician's choosing, stick to his own *a priori* theories and continue to condemn the economic heresies of Ottawa. But we wonder whether such a privilege which the academician might rightfully claim is not denied to us ; and whether it is not our bounden duty to subject the report of the Commerce Department to a detailed analysis. At the moment, the lack of a full text of the publication and the garbled nature of the reports to hand leave us little choice in this matter.

* * *

A few remarks preliminary to a later examination may be quite pertinent. It is noteworthy, in the first place, that on this occasion, the official report does not bear the signature of Dr. Matthai, who is now the successor of Dr. Meek in the office of the Director-General of Commercial Intelligence. Secondly, the report, we are told, does not contain any expression of opinion, the Government being content to present facts. It may be easily imagined that "facts" properly selected are often better propaganda than opinions. Doubtless, methods of calculation other than those adopted by the official authors would be necessary for a proper appraisement of the experiences of the last two years. But it may be readily admitted that, in most cases of preferred articles on either side, there is a fair increase of offtake. It must be admitted, too, that those, who condemn the Ottawa Pact for the restrictions on Indian imports in foreign markets, are guilty of either ignorance or intellectual dishonesty. The fact is the Ottawa Pact, designed in defiance of economic principles, has thriven in a world of uneconomic practices. The changes in trade figures can prove or disprove nothing. But responsible opinion,

both in India and England, must recognise that the Ottawa Pact is far removed from the vital requirements of either country. Mr. Lees-Smith, writing in the *Political Quarterly* aptly points out that "Imperial Preference, since the Ottawa Conference revealed that the basis for a good bargain does not exist, has sunk to one of the minor issues of politics." We cannot say as much in India as Imperial preference is the cover behind which our fiscal policy is being increasingly distorted. Nationalist opinion must agitate on the modelling of a correct economic policy rather than waste its energies on the evils of Ottawa.

THE COST OF COAL

In the Part dealing with railways, the report of ths Public Accounts Committee for 1934-35 which Sir James Grigg presented to the Assembly, it is suggested that railways should work their collieries and wipe out the loss of Rs. 12 lakhs incurred by buying coal in the market. This suggestion reintroduces the question of the validity of Government competition with private enterprise. After a brief spell of post-war prosperity, coal has fallen on evil days since 1923. The larger collieries, with accumulated reserves, have been pulling hard against the stream of depression. Small collieries have mostly had to close down. The embargo placed on the export of coal during and after the war, principally in the interest of railways, lost subsequently many of India's oversea markets; and the increased output of railway collieries effectually throttled the industry. The official plea for starting railway collieries, that during the war the industry exploited railways is not convincing. Conditions, such as existed during the penultimate stages of the war, should not motivate retaliatory measures, as Government competition is nothing else but retaliation. All prices reached abnormal levels in 1915-18 and coal swam in good company on the food of inflated quotations.

Railways consume more than 34 per cent. of the total consumption of coal; and this patronage is the well in the industry's desert. By way of patronage or protection, Government, uneasy in conscience, bought more coal, restricting the output of railway collieries, reaching the figure of 30 lakhs of tons a year. On this subsidy, the industry has continued to eke out an existence, always however under the menace of its withdrawal. Now that the menace has materialised in the report of the Public Accounts Committee, the industry is apprehensive of its future existence. A case for economy which would eliminate the loss of twelve lakhs of rupees a year has not been made out by Government. The average cost of production of railway coal is in the neighbourhood of Rs. 3-10 per ton against an average price of Rs. 3-4 for market coal. Even with increased production, railway coal cannot quote below Rs. 3-2 a ton; railways have been buying for 1935-36 market coal at Rs. 3 a ton. These quotations rebut the contention of the Public Accounts Committee that buying outside coal is a loss to railways.

The withdrawal from the market of Government's purchase of thirty lakhs tons of coal would ruin a prime industry of Bengal. A wiser policy in the interests of the country would be to foster, *pari passu* with progressive restriction of railway coal output, the industry by larger purchases. The quality of coal, with the exception of Giridih, mined in railway collieries is obtainable in the market at prices ranging from Rs. 2 to Rs. 2-6 a ton. The use of first-class coal on railways, when second-class coal is adequate, is in itself economic thriftlessness.

HEALTHY YOUTH

'Eavesdropper' writes:—

The progress of the Lake Club is the most impressive tribute to the vigour, enterprise, sportsmanship and Ariel-like adaptability of the youths of Calcutta. It is all so invigorating to the body and pleasing to the mind —to see the 'boys' taking alike to serious sports and to lighter 'sport' with utter abandon and zest. The place overflows with spirit and spirits. It may upset the equilibrium of the orthodox which is another word for the narrow-minded. But when the lads are equally at home in aught that calls for grit, pluck and stamina and in those that pertain to fun and frolic, there is nothing wrong with them or their associates; thus are able-bodied and healthy-minded men and women made.

INDIAN OXYGEN &
ACETYLENE CO., LTD.

WITH Works at Calcutta, Bombay, Lahore, Jamshedpur, Cawnpore and Colombo for the production of Oxygen and Dissolved Acetylene, and with the erection of Works in other parts of India and Burma under consideration, the Indian Oxygen & Acetylene Co., Ltd., is in a position adequately to supply the needs of local industry.

The Company compresses Industrial Gases of high purity and in conjunction with the British Oxygen Company Ltd., London, retails the Rarer Gases.

All types of welding, metal cutting, brazing and lead-burning apparatus are stocked in the various Works, and expert welders are available for the purposes of demonstration and tuition.

Your enquiries will receive immediate attention.

Scene: Grosvenor House, London.

Occasion: Reception by Sir Alexander and Lady Murray.

Personae: Most of the Britishers retired from India and most of the Indians present in London.

Enter Sir T. Vijiaraghavachariar.

Bustle, rush and excitement.

Englishmen and Indians, those who had been officials and those who had been in business—everyone took a bee-line to the rose and gold headgear which stood out in the crowd. "How do you do, Dewan Bahadur?"—"when did you land in London, Dewan Bahadur?"—"How long is your stay here, Dewan Bahadur?"—"How is everything with you, Dewan Bahadur?"—"What a treat to see you again, bright and gay and full of spirits as ever?"—"you are a tonic, yes, you are"—"Isn't he a darling?"—these are amongst the tributes which hundreds paid out of affectionate regard. He has some name—both literally and metaphorically. The homage paid to his universal popularity is a measure of the metaphorical glory of name. As for the lengthy and tough quality of his literal name, sundry devices have been discovered to get over the difficulty. He has been a belted knight for, perhaps, a decade. But the world remembers him as Dewan Bahadur because it is so convenient a substitute for a name which strains the powers of pronunciation. But the girls in Canada found a happier and apter style of address. Sir T. Vijiaraghavachariar was frankly asked by some of these: "Yours is so longish a name. By what pet-name may we call you?"

"You may call me 'my dear,' my dears. I don't mind it. Not a bit"—he said.

He was ever after addressed as "My dear" by the Canadian fairies. So great a rage was he that over three thousand of the young things whose imaginations and affections he hal captured presented, on his departure, an address to "My dear."

From that day, he is known as "My dear" amongst flappers all over the world—and he knows a good bit of the world—and as "Dewan Bahadur" amongst mere males and older females. Yes, he is equally at home, cooing and sparkling with saucy epigrams and sprightly stories amidst a bevy of girls, and propounding the mysteries of the *Vedanta* and dilating on the teachings of the *Gita* to an audience of dear old grandames who fussily pretend to insatiable curiosity on matters spiritual. Yes—he is the same whether he is accosted by an ex-Viceroy or waylaid by a shy, shamefaced youth in search of employment. His is a well-proportioned, well-balanced, well-poised personality.

He is versatile; but he scorns to be an expert. He has a link with every human, so big a human is he—but he hates to be suspected as a super-human. He has a thirst for every manner of information, for every branch of knowledge—but he has no use for information and knowledge which cannot be translated into practical measures calculated to advance human happiness and increase human well-being. He is of the world—but not worldly. He is an idealist—but his idealism is tempered by that practicality which is itself another facet of idealism because it is not commercially-motived. He has consummate tact—but it is not the tact which springs from diplomacy that is, not infrequently nor improperly, confused with duplicity; his tact has its roots in a sincerity of nature, breadth of outlook and depth of understanding. He appreciates the need of give and take in life but this principle means for him not a materialistic but a philosophic conception. He knows when to compromise—but also how far, and how far alone, the spirit of compromise should take him. He compromises in details—but is firm in principles. He has a personality that agrees and coheres with all that it meets with—nevertheless, it is definite, firm, clear-cut and affirmative. Philosophers talk of 'identity in difference' as the highest ideal. Carlyle keeps reiterating that the aim of life is to clear away what is temporary, trivial and terrestrial and to perceive whatever is permanent, universal and eternal. Sir T. Vijiaraghavachariar is a practical philosopher—one after Carlyle's own heart—one whose daily task has inspired and fostered the growth of this feeling of 'identity in difference' as part and parcel of his being and nature.

In the crescendo of his career, Sir T. Vijiaraghavachariar was called upon to tackle, in the last six years, a task which was eminently suited to his genius, which drew out the best in him and which, as he is about to retire after a thirty-five years' service, makes everyone, official and non-official, wonder if anyone would be found at all who could continue the work in the same tempo. This thought was uppermost in the mind of Mr. Chunilal Bhaichand Mehta, who, speaking at the last meeting of the Governing Body of the Imperial Council of Agricultural Research, deplored the "rule that an officer should retire at the age of 55." He added "Although extensions have been given to Sir Vijaya, I think further extensions in this case should have been more helpful to us." Sir Purshottamdas Thakurdas, the Vice-President of the Indian Central Cotton Committee, moved the resolution expressing appreciation of Sir Vijaya's work and said: "It is this sort of man we want as the head of any administrative committee for some years." An even more impressive testimony is conveyed in the following passage:

KNOWN ROUND THE WORLD
LIVERPOOL LONDON GLOBE

BOMBAY: FORBES BUILDING, HOME STREET

"If we had a few more men like him as the head of the various administrations, the care of which has been transferred to popular control, we would have less of the mess that we hear of, in some other departments and places." Mr. Coleridge, a member of the Indian Cotton Committee, spoke with real feeling and in language that beautiful feeling makes beautiful. He was always struck with Sir Vijaya's high standard of charm, tact and wit and concluded: "I do not know who is going to succeed you. To me, the future meetings of this Committee would be rather dull compared with what they have been since I sat here under your able guidance". Mr. Carpenter, (Imperial Agricultural Council, Governing Body), was perfectly certain that "if he (Sir Vijaya) had not been there, the Research Council would not be in the position in which it is to-day to serve the country and to infuse enthusiasm in members of the Legislative Assembly and other bodies". It is this public appreciation of the work of the Council which has enabled it to 'go on from strength to strength'. As was to be expected, Sir Shunmukham handed in the biggest bouquet; and he had special title to do so. The eloquent tribute of the present Dewan of Cochin to a former Dewan of Cochin deserves to be quoted in full:—

> "I distinctly remember the sceptical spirit with which the Government of India's announcement of the creation of the Council was received in those days. There were those who thought that the Imperial Council of Agricultural Research was going to be another useless body of ornamentation of the machinery of the Government of India; and if to-day those fears have been belied and if the Imperial Council of Agricultural Research has now come to occupy such an important place in the machinery of the Government, it is, in no small measure, due to the lead that has been given in its early years by Sir T. Vijayaraghavacharya."

That Sir Vijaya's leadership in the Imperial Agricultural Council has been inspiring and distinguished, is, as Sir Shanmukham would say, no matter for surprise to those who know his past record of resplendent service. That he has made his colleagues and staff realise the fervour that is infused in those who deem their task a mission, is an achievement which only Sir Vijaya is capable of. And in achieving this, he has fulfilled the purpose and aim which Lord Linlithgow had in mind when he planned the Council of Agricultural Research. His Lordship visualised his main problem as one of "devising some method of *infusing a different spirit* into the whole organisation of agricultural research in India and of bringing about the realisation on the part of research workers in this country that they are working to an end which cannot be reached unless they regard themselves as partners in a common enterprise". It was a happy omen that the Council was launched in the regime of Lord Irwin whom I had once described as the Farmer-Viceroy. At the same time, there were the usual Doubting Thomases who could not see any concrete or possible use for the Agricultural Council. It was a blind alley; it might lead somewhere, it might also lead nowhere. The task entrusted to Sir Vijaya was thus purely in the nature of pioneering work. Any other man would have quailed before such responsibility. He had to contend against a general scepticism that the entire scheme was a make-believe, an eye-wash, a window-dress affair. He had to convert a new administrative machinery and train the men, as the parts were fitted in, to work the machinery. He had to lay down the policy, enunciate principles, tackle each new situation as it arose, discover experts and encourage them, and translate the work of experts into practical measures. He had to be in touch with developments and conferences in international agriculture. He had to be here, there, everywhere. He had to combine the businessman's practicality with the fanaticism of the missionary; and he had to make this blend popular and acceptable to those who worked with him and under him. He did all this, and achieved a measure of success so astounding that the Doubting Thomases who predicted certain failure are now nowhere to be seen.

Sir Vijaya's self-confidence and confidence in his mission were responsible for this heroic performance. From the start, he felt that the Vice-Chairmanship of the Imperial Council of Agricultural Research was the most covetable post under the Government of India. It was a new job, but also a big job.

I, for one, would have appreciated if Lord Willingdon had set aside red-tapeism and decided on another quinquennium of service for Sir Vijaya. If I remember right, the age-limit for Members of the Executive Council and for High Court Judges is 60; a like age-limit for the Vice-Chairmanship of the Imperial Agricultural Council would have been appreciated by one and all. Above all, Lord Linlithgow, in particular, should have appreciated that the department, which will engage his special concern and parental solicitude, is in charge of one, in whom all the varied sections of the community, European and Indian, official and non-official, have the fullest confidence and through whom the splendid work already achieved may see further and more fruitful expansion.

OLYMPUS

(FROM OUR CORRESPONDENT)

Simla, September 24.

The opinions of *Indian Finance* on the Howrah Bridge and the last Rupee loan figured prominently in the Assembly this week. Mr. Satyamurti, who is apparently a very keen reader of the paper, confronted the Finance Member with them. Sir James Grigg's replies were typical of his manner and method. I reproduce them, not only for their special interest to the readers of this paper but also to indicate the change in the attitude of the Government to the opposition.

Sir James Grigg: The issue price was fixed with reference to the market conditions obtaining at the time of issue, and after obtaining the best advice which it was open to me to obtain.

Mr. Satyamurti: May I know whose advice was obtained in fixing the issue price at Rs. 96/8?

Sir James: No, Sir; that is a domestic matter.

Mr. Satyamurti: Was any expert consulted at all, except the Honourable Sir James Grigg?

Sir James Grigg: Yes, Sir.

Mr. Satyamurti: How many were consulted?

Sir James Grigg: I cannot say, but quite a number.

Mr. Satyamurti: Indian or British?

Sir James Grigg: Both.

Mr. Satyamurti: And did they all agree at fixing the price at Rs. 96/8?

Sir James Grigg: Yes, Sir.

Mr. Satyamurti: With reference to the answer to clause (*c*) was there any loss at all, and if so, what was the loss?

Sir James Grigg: No, Sir. ...

Mr. Satyamurti: Whose opinion is that? Is that the Honourable Finance Member's own opinion or is it based on any expert advice?

Sir James Grigg: Mine, and all informed opinion.

Mr. Satyamurti: May I know what is the informed opinion except the British one?

Sir James Grigg: As I said all informed opinion.

* * *

The following about the Howrah Bridge:—

Sir Muhammad Zafrullah Khan: I am unable to make a guess. The Honourable Member is reminded that under Section 5 of the Howrah Bridge Act, 1926, the matter is statutorily within the competence of the Howrah Bridge Commissioners, subject to the approval of the Local Government.

Mr. Satyamurti: Is it a fact that Herr Hitler has approached the Port Commissioners with an offer to make this on condition that we will spend all the money in India?

Sir M. Zafrullah Khan: I believe, Sir, there is a question put down with regard to that matter, and when that is reached a reply will be given.

Mr. Satyamurti: Have the Government of India been kept informed of the progress of this matter by the Port Commissioners at Calcutta?

Sir Mohd. Zafrullah Khan: I do not understand what the Honourable Member means by progress in the matter. Does he mean as to what tenders were received and what those tenders were and so on?

Mr. Satyamurti: The Progress of all matters connected with the construction of the new Howrah Bridge.

Sir Mohd. Zafrullah Khan: The matter stands thus. Tenders were invited and they were put in to the consulting engineer in London; and naturally nobody else outside could have any information as to what those tenders were.

Mr. Satyamurti: In view of the very great national importance of this great work going to India, if possible, may I know if the Government of India will press the view on the Port Commissioners of Calcutta and see that this work does not go out of this country?

Sir Mohd. Zafraullah Khan: As I have already said in my reply, the matter lies between the Howrah Bridge Commissioners and the Local Government. The Government of India do not, directly, at any rate, come into the picture at all.

Mr. Satyamurti: But will they advise the Local Government that in the interest of the national economy this country, this contract ought not to go out of this country.

Sir Mohd. Zafrullah Khan: I do not think Government would be justified in giving such instructions with regard to these matters to the local government.

* * *

The Comment on the above is needless. Apart from the fact that the Government are in a tight corner on these questions, the Government spokesmen are adopting an increasingly supercilious attitude to the opposition. Three instances of this occurred this week. Firstly, when the Quetta earthquake resolution was discussed. There was no epithet which was not hurled at the Opposition—"Malicious" "false" "detestable." And Sir Henry Craik lost his temper, and Sir Cowasji Jehangir caught the infection. It was a case of real bitterness; and the Opposition lost their ground because of Whip's lack of vigilence and treachery of a couple of members who slipped away unnoticed.

* * *

The other two instances occurred to-day. Sir Muhamed Zafrullah in his characteristic style said that a certain vote of the House was unreasonable and did not deserve consideration. He was challenged by Mr. Satyamurti for showing disrespect to the House and the President directed that those remarks of the Commerce Member be expunged.

* * *

The second instance was when Sir Henry Craik called a Member of the House guilty of professional misconduct in a Conspiracy case before a High Court. From all I have known in the past such reflections were summarily treated and were withdrawn. The Home Member did not do so on the ground that Mr. Shamlal had made personal charges against the Home Member.

* * *

Take the case of the Indo-Burmese Tribunal or the appointment of Sir Otto Niemeyer. The former was argued by the official side as if Burma was special brief of the Government of India, and the latter escaped discussion because Mr. Aney fought shy at the last moment, even though he had secured chance of discussion on an adjournment motion. The short notice questions hardly proved a substitute and the result is that the Government got away with it.

* * *

No wonder that in this atmosphere of hatred and recrimination, the Assembly could carry through no legislative programme. Of the 7 bills of any consequence legislatively, none was passed, this session and all have been put off to the Delhi Session. All the time of the House was taken up by the Criminal Law Bill debates, firstly when government wanted reenactment of the existing law and secondly, when Mr. B. Das' bill for repeal of Criminal Law Amendment Act of 1908 engaged all the three days of this Session reserved for non-official Bills. Mr. Das had a majority of five votes for its consideration and the Bill will now go to Delhi. It will be passed then; but the Council of State will surely kill it.

* * *

The Public Accounts Committee Report has yet to be discussed. It will not prove very controversial, especially as its report has been signed by Members in the spirit of mutual understanding and the one credit of the Committee is that it has been able to arrange a system whereby it shall meet in Delhi to know whether its recommendations have been adopted by the various Departments.

GATEWAY OF INDIA

(From Our Correspondent)

Simla, September 25.

The Poona session of the Legislative Council opened with a jarring note on commercial discrimination. Mr. L. R. Tairsee, discussing the Delimitation Committee's report, asked if it was not discrimination in favour of European business to allot three seats to the European Chamber and one to the Indian Chamber of Commerce. And to blazon out, as it were, this discrimination, the Bombay Presidency Trades Association, with 36 members, gets another seat. The Indian Chamber has a membership of over 600 and the European Chamber 191. The former represents a capital of Rs. 91 crores. The European Chamber was "invited" to choose a member to sit on the Committee, while Sir Purshotamdas Thakurdas was "co-opted". The business of Bombay is predominatingly Indian and the weightage given to European business is another striking instance of those explicit and implicit reservations of non-national interests which honeycomb the Government of India Act. There is no reply, which can be called a reply, to these exposures of the cynical subordination of national to alien preferences. So the debate proceeded from one disability to another, with the cumulative conviction that, so far as the tiresome tribute to the surrender of British overlordship involved in the new constitution is concerned, things are not what they seem or rather what they are alleged to seem. The protest of Bombay national commerce in the Council reflects weakly the strong feeling of discontent. In face of this discontent commercial Bombay on the Indian side is in no mood to acquiesce in the pleadings to work the new constitution for what it is worth.

Ceremonial addresses to students are apt to follow the academic fashion without relation to things of the earth, earthy. Not that the cultural frame-work of such addresses is without value; today, it is of the highest importance that India's culture should be kept pure and undefiled from the inescapable contact of materialism. Reality, however, encompasses us around and, however much the spirit chafes, we cannot obliterate environments. A balance of these two conditions marked Mr. Munshi's address to the students of the Ferguson College, in which he laid on youth, among other obligations, the obligation of acquistion of the science of organisation. The world, Mr. Munshi said, is one gigantic organisation. In business, politics, amusements and even in vice, organisation is achieving amazing results. India lacks this appreciation of the value of organisation.

And having rendered unto Caesar what is Caesar's, Mr. Munshi proceeded to render to God what is God's. "You students", he said, "are not merely to pass your examination or to go into careers and attain success. You are not here so that you may make money in life. Money and the means with which you make it are mere incidents, not essentials of life. These essentials, which you have to acquire during your college career, are two: the equipment to contribute to the civilisation of your times and the fundamentals of culture. The bounds of knowledge and science are increasing and your objective must be to arm yourself with the highest knowledge available, so that you may assist in fashioning the civilisation of your day. As lawyers, doctors or scientists, you have, directly or indirectly, to assist the development of society."

The completion by the end of next month of the drainage scheme sanctioned by the Corporation is a belated work. For twenty years North Bombay has asked for better health and better sanitation. A network of underground sewers about six miles long has at last been laid over a wide area in Dadar, Matunga and Mahim. A huge purification plant of the latest type capable of treating three million gallons of sewage per day, before discharging it into the sea, has been constructed. The plant stands on a vast plot of land specially acquired through Government, about eight acres between Elphinstone Road and Dadar. It has about 40 big concrete tanks. The water from the sewers is to be pumped in to these tanks and subjected to a process of purification to remove the foul smell and the poisonous gases. The harmless fluid will then be discharged into the sea without detriment to the health of the city.

The operation of the plant will immediately benefit the entire population living in the area east of the G. I. P. Railway from Poibavdi right up to Sion. Hitherto this area was not provided with a proper outlet for sewage which used to be discharged into an open storm water channel leading to the Kurla creek. The sewerage, though treated with chlorine, was a source of nuisance to the residents. The work has cost the Municipality about ten lakhs of rupees, the construction of the purification plant alone requiring half that amount.

Among the subjects that will come up before the Council are the Appropriation Accounts of the Local Government. Khan Bahadur D. B. Cooper will move that the report of the Public Accounts Committee thereon "be taken into consideration." The budget for the year contemplated a deficit of Rs. 28 lakhs, but the actual accounts show a surplus of Rs. 17 lakhs, despite the payment of two substantial amounts, one of Rs. 11½ lakhs due to the Government of India on account of debt repayment and the other of Rs. 20 lakhs, being estimated the new revenue from the Lloyd Barrage applied towards the reduction of the borrowings on account of the Barrage.

The improvement over the anticipation of Government was thus Rs. 67½ lakhs, including one or two windfalls which assisted considerably but cannot be expected to come to the aid of the Finance Department again. This improvement is set down by the Accountant-General partly to the retrenchment policy of Government and partly to improvement in their revenue. "The most important sources of revenue of the Presidency are land revenue, excise, stamps and forest", he states, "and these are not likely to expand appreciably in the near future." Indeed, the gap between revenue and expenditure is likely to widen in view of the rapid increase in pensionary charges and other normal increases of expenditure, coupled with a certain loss of revenue to the extent of Rs. 10 lakhs a year, consequent on the abolition of the town duty on cotton with ecect from 1934-35 and a probable fall in the excise from the figures of 1933-34.

The Accountant-General does not gloss over the grave situation, though he looks forward to the separation of Sind as a measure of relief. The separation will release Rs. 65 lakhs which will go a long way to restoring the financial equilibrium of the Presidency.

CLIVE WORKS, CALCUTTA — MULUND WORKS, BOMBAY

SOUTH INDIA

(From Our Correspondent)

Madras, Sept. 25.

The Coffee Cess Bill which has been passed by the Legislative Assembly is the first step to resuscitating the industry in South India. The Bill provides a duty up to a rupee a cwt., but Government do not propose to impose more than a duty of eight annas at the beginning. The proceeds of the duty will be mainly spent on propaganda outside India, on the request of coffee growers, who say that their competitors in world markets are making headway at the expense of Indian coffee through organised propaganda. Practically, the entire acreage under coffee is in South India and the trade is confined, almost exclusively, to South Indian ports. At the end of the last century coffee was an attractive proposition at this end. Then came the bleak years following on pests and Brazil competition. The Post-War period revived the industry and production increased in about a decade from 25,000,000 lbs. to 35,000,000 lbs. The industry feels that its expansion depends on organisation. A good deal of coffee is grown in Cochin and Mysore. Over half the total number of plantations is in Mysore, the largest estates being in Cochin, where the plantations average 166 acres each. Unlike tea, coffee has no organised resources for research and marketing. The Coffee Cess Bill will equip the industry more efficiently to meet world competition. One of the first things the proceeds of the Bill will finance is the improvement in the quality of Indian coffee.

* * *

Rural uplift is now always around the corner, whichever way you turn. That is a gladsome change from the days, a little while ago, when things rural evoked a vague sense of uncertainty and unconcern. The Poonamalle rural health scheme has, for instance, been taken in hand by Government. A group of 25 villages, with a population of about 40,000 in the Sriperambudur Taluq, has been selected for this work. A first class Health Officer will be in charge of the Unit with Poonamalle as the headquarters. The area will be divided into four ranges, each with a health inspector, a health visitor and two midwives. An Advisory Committee will be formed at Poonamalle with the Revenue Divisional Officer of Saidapet as President, the Health Officer as Secretary, with the representative of the Rockefeller Foundation, presidents of panchayat boards and representatives of village as members.

* * *

The Director of Public Health originally proposed that the scheme should be worked for five years, but Government sanctioned a period of 18 months and its further continuance will depend on the results achieved. The scheme, which is estimated to cost Rs. 29,000 in the first year, will be financed by the Government of Madras, from the Government of India's contribution, with a contribution of 40 per cent. from the Rockefeller Foundation of America.

From health to debt is another aspect of rural welfare on which Government is opening its exhaust. The Travancore Agricultural Debts Redemption Committee has submitted its report to Government. The Committee considers that the various estimates of the extent of agricultural indebtedness which have placed the total debt of the country at between Rs. 20 crores and Rs. 25 crores may be accepted tentatively for the purpose of its recommendations. The real burden of agricultural debt has increased very much on account of accumulated interests and the heavy fall in the value of agricultural produce and agricultural land. Hence the measure of relief should be substantial.

One of the main recommendations of the Committee is that, in the case of all debts, relief should be made available by conciliation through debt conciliation Boards to be established by Government. Ordinarily there should be one Board for each taluq, consisting of the Chairman, and two members, all nominated by Government, and including, if possible, one Government Officer. The Board should be an adjudicating body and should settle the debts of the debtor, the amount to be paid by the debtor in discharge thereof, and the manner of paying it. If the parties to the decree agree to the conciliation proposed by the Board, the agreement should have the force of a decree passed by a Court. No appeal or application for revision should lie against an order passed by a Board.

* * *

Where the parties do not agree, the Board may draw up a decision or certificate and file it before a Munsiff's Court, whereupon it would be open to the creditor to call on the debtor to deposit the amount certified by the Board as just and fair cash payment, and the Court should order such deposit, fixing the time for it and also grant such further extensions as deemed fit. The Committee recommends the appointment of special Debt Conciliation Boards for Kuttanad agriculturists, for the conciliation of debts incurred by planters from coastal firms, and for co-operative societies, preferably on the recommendation of the Registrar of the co-operative movement.

The Committee proposes that for three years from the date of the proposed debt relief legislation the maximum rate of interest allowable in law should be six per cent. in the case of secured debts and nine per cent. in the case of unsecured debts. The Committee makes detailed recommendations regarding the rate of interest, recovery by instalments, sale of property in court auctions, mortgage with possession and chitties.

EXCHANGE CLEARING

LEAGUE REPORT CRITICISED

NARROW AND PREJUDICED VIEWS

By Dr. Paul Einzig.

Special for "INDIAN FINANCE"

London, Sept. 16.

In September 1934, on the initiative of the French Government, the League of Nations decided to set up a committee to enquire into the problems of exchange clearing. Such investigation was, indeed, overdue. Ever since 1931 exchange clearing agreements have been jumping up like mushrooms in the form of practical emergency measures without any theoretical background. The writer of this article made an attempt in his book on *Exchange Control* to analyse the system; but he was handicapped by the lack of adequate material about the nature and the working of the various agreements in existence. There was every reason, therefore, to welcome the steps taken by the League, since it provided an opportunity for the collection of material on this highly important development about which so little is known. Needless to say, the League of Nations has a unique organisation for collecting all the data required and is in an excellent position to obtain all the relevant information. In this respect, the report on the *Enquiry into Clearing Agreements*, which has just been published, is by no means disappointing. It contains a wealth of material which is invaluable and indispensable to everybody concerned with the question. Had the League Committee confined itself to the task of producing this material it would have rendered a highly valuable service. Unfortunately, the committee went further. Under the disguise of an impartial investigation, it delivered a violent onslaught on the exchange clearing system. The report shows every evidence of pre-conceived conclusions and the material collected was only used as and when it fitted in with these conclusions.

Indeed, the report of the Joint Committee for the Study of Clearing Agreements is an almost unique example of misrepresentations and sophistries; and every page of it abounds in glaring contradictions. Having once made up its mind to attack exchange clearing, the committee was not particular in selecting its weapons.

From the beginning to the end the report is inspired by the spirit of orthodox *laissez faire* which revolts against the idea of interference with the free movement of trade and exchange. Every now and then we come across the old argument against "diverting trade from its normal and natural channels." The report deplores that, as a result of the exchange clearing system, countries buy goods in dearer, instead of cheaper, markets and condemns the tendency of growing bilateral trade at the expense of triangular trade. So far so good. We are all entitled to our opinions and even though some of those expressed by the report may be antediluvian or what is worse Victorian, this in itself is no ground for objection. We can hardly expect a committee inspired by the orthodox spirit to understand that bilateral trade is better than no trade at all; that the alternative to buying in dearer markets is not buying at all; that trade through artificial channels is to be preferred to a complete cessation of trade. The committee had in front of them all the material showing the circumstances in which exchange clearing agreements came about as a result of the complete deadlock reached in 1931. The financially weak countries were no longer in a position to provide exchange for their imports and the financially strong countries were no longer in a position to collect commercial claims for exports to financially weak countries. The only alternative to the practically complete cessation of trade between them was the establishment of exchange clearing. Instead of duly realising this, the committee sets itself the task of chastising the naughty Governments which established exchange restrictions and import restrictions and urges them to remove these restrictions at once so as to be able to get rid of the obnoxious exchange clearing. Members of the committee were, doubtless, aware that there is no likelihood of their advice being followed. The same advice has been given already innumerable times ever since 1931, by various international gatherings and was of no avail. Restrictions have gone on increasing ever since. As the Governments are rightly or wrongly convinced that it is to their interest to defend themselves by such means, there is no reason to believe that they will reverse their policy in order to please the League Committee.

The one-sidedness, with which the League Committee dealt with its subject, is in itself open to criticism. It is calculated further to reduce the number of those who expect impartiality from Geneva. The report does not make the slightest effort to suggest improvements on the existing system and devising methods which facilitate its application. In this respect, the League Committee appears to have followed the example of the Board of the Bank for International Settlements, which decided to keep aloof from exchange clearing for fear that, if its results improved, the Governments might be tempted to retain it. In the main text of the report, the question of multilateral clearing is decided to keep aloof from exchange clearing for hardly relevant paragraphs are devoted to that subject. And yet it is exactly in that direction that the League of Nations could have fulfilled a useful task. In allowing itself to be influenced by doctrinaire considerations rather than by a desire to help, the League has certainly missed an opportunity of increasing its influence and prestige.

In its efforts to discredit exchange clearing, the committee was at pains to blame that system for various disadvantages which had nothing to do with it. Exchange clearing is debited with all the adverse consequences of an overvalued currency. Since the exchanges of most countries, which have extensively adopted exchange clearing, are overvalued, this method is eminently suitable for discrediting the system. And yet the evils these countries suffer from would be the same, if, instead of bolstering up their currency with the aid of exchange clearing, they had done so with the aid of other methods on defence. This does not, however, prevent the committee from holding exchange clearing solely responsible for the consequences of an overvalued currency.

Another method applied by the report is to blame exchange clearing for the difficulties arising from the fact that all countries have not adopted the system. Every now and then we come across complaints about the adverse effects of the system upon those who keep aloof from it. But surely these countries have only themselves to blame if they are victimised as a result of exchange clearing agreements. The remedy lies in their own hands and the system can hardly be blamed if the arguments are too shortsighted or stubborn to apply it.

The report appears to be working on the false assumption that, but for the existence of clearing agreements, strong countries would continue to export freely to weak countries, irrespective of whether they stand a chance of ever being paid for their exports, and that the monetary authorities of the weak countries would supply their importers freely with the exchange they required. It is only on the basis of such obviously false assumptions that

(Continued on next page)

LATEST SURVEY BY LEAGUE OF NATIONS

SIGNS OF DEFINITE PROGRESS

U.S. A.'S KEY POSITION

BY FRANCIS WILLIAMS

City Editor: The "Daily Herald," London

Special for "INDIAN FINANCE"

London, September 16.

It is satisfactory to know that, according to the latest survey of the World Economic situation made by the League of Nations experts, the signs of economic improvement at the present time are more encouraging than at any preceding period since the depression began.

That does not, of course, mean that we can all sit back and await prosperity; and that investors can simply leave their money alone and expect it to grow.

But it does seem to suggest that, even although slowly, a definite progress is now being made in all parts of the world, with the exception of Italy and Germany, where, so far as one can gather even apart from war, economic conditions are worse than ever, and of the gold bloc countries, which are now paying heavily for their deflation.

The League experts, I see, believe that the key to the world situation lies at the moment with the United States, which suggests that the wise investor will keep a watchful eye on the outlook there whether he is particularly interested in U. S. securities or no.

It is suggested that if the recovery in the U. S. heavy industries gathers way, the gold and banking resources are clearly sufficient to support a great credit expansion which will communicate itself to other areas, particularly to the United Kingdom and the sterling group generally.

So far as the United Kingdom itself is concerned, there do not, at the moment, seem to be any immediate signs of a check to recovery. The latest trade returns are very satisfactory and would have had probably a substantial effect on markets but for the depressing international political outlook.

Although, as stated, there is no obvious check to recovery here, that recovery is only proceeding at a slow pace; it seems unlikely that it can go on very much longer or very much farther without an increase in international trade.

That, I see, is also the conclusion reached by the League Experts who point out that the increase in industrial activity up to now has not been accompanied by a commensurate increase in international trade.

Moreover, the industrial activity itself has been based to so substantial an extent upon building activity that it is not so firmly based as one might wish.

Internationally, the situation, of course, remains as over-clouded as ever; and, once again, one can only repeat that, for the time being, the best advice to invstors is to stick to safety first securities and if they speculate at all, to speculate in shares of companies operating mainly in the home markets.

(Continued from the previous page)

it is possible to arrive at the equally false conclusion that exchange clearing tends to reduce the volume of international trade. The worst that can happen, if exchange clearing fails completely, is to arrive at a state of affairs which would have existed, if exchange clearing had never been introduced at all.

In its zeal to make out the strongest possible case against exchange clearing, the committee overlooked some rather glaring contradictions in the text of the report. On page 16 for instance, it reproaches exchange clearing with tending to raise commodity prices as a result of diverting purchases from cheaper to dearer countries and as a result of the employment of transit trade instead of direct trade. On the very same page, however, the report declares that "clearing agreements tend to lower the world level of prices." Another piece of inconsistency is the reproach directed against the system that the collection of accumulated commercial claims through clearing entails the suspension of exports from the creditor to the debtor country. In other parts of the report the committee expressed its pious hope that creditor countries should be willing to accept the unfavourable trade balance in relation to their debtor countries. Again on page 36, it is stated that weak countries tend to increase their purchases in countries with which they have clearing agreements in order not to have to spend their foreign exchange reserves. In the very same paragraph the report states that exchange clearing agreements have accentuated the shortage of foreign currency.

Most amazing of all, the committee expressed two diametrically opposing opinions on the effect of exchange clearing agreements upon the volume of trade between the contracting parties. On page 46 it is said "clearing agreements tend to eliminate or restrict any impulse or movement towards increased trade between the two parties." On the other hand, on page 49 it is stated, "clearing agreements artificially stimulate trade between the contracting parties."

Week ended Sept. 14, 1935

GREAT BRITAIN

WIDESPREAD RECOVERY

Employment reached a new high record in August, according to the Ministry of Labour returns. On August 26 there were 10,424,000 insured workers in employment, an increase of 43,000 on the last month and of 224,000 compared with August, 1934. At the same time, there was a reduction of 24,977 in unemployment. The total on the register was 1,947,964, a decrease of 188,614 compared with August, 1934. Of this total, 1,533,259 were wholly unemployed and 334,419 temporarily stopped, and 80,286 were men and women normally in casual employment. There were, however, more workers wholly unemployed than in July: the decrease was due to a reduction in the number temporarily stopped.

The improvement benefited every industry with the exception of tailoring, distribution and dock and harbour services. In coal mining there was a reduction in unemployment, compared with July, of 37,350: in jute, 9299—a decrease in the number temporarily stopped, after the local holidays; in iron and steel, 2,835; in building, 2,811; in general engineering, 2,722; wool, shipbuilding and the motor trades also showed reductions of more than 1,000. Unemployment in the tailoring industry, however, increased by 6,921; in distribution by 6,124, and in dock and harbour service by 2,082.

Regionally, the gains were not quite as evenly spread as they have been in recent months. In the North-Eastern area and Scotland the improvement was most marked; unemployment fell by 18,329 and 14,572 respectively. In Scotland, however, most of the reduction was normal and seasonal, after the holidays in July. In the Midlands, there were 6,403 fewer unemployed, and in London, 1,978. In the North-Western area, however, (and, here, perhaps, local holidays are again significant), unemployment increased by 10,763, while the South and Wales both showed increases.

A fall of more than £10,000,000 in Bank advances, which form a reliable index to industrial recovery, is a disappointing feature of the clearing banks' average figures for August. The advances which had been rising steadily for some months have fallen back to £764,000,000. From the earnings point of view, this was largely offset by increases of £13,200,000 in discounts and £3,300,000 in the total of money at call. Both movements are mainly due to the seasonal increase in the amount of Treasury Bills outstanding, which not only enables the banks to increase their bill portfolios, but also leads to a better demand for funds from discount market quarters.

Although it is not unusual for cash holdings to increase at this time of the year owing to return of currency after the holidays, this item actually dropped £6,100,000 during the month. The contraction in the credit base was not reflected in a similar reduction in deposits; for, while total deposits fell back a little over £6,000,000 from the previous month's record figure, the cash ratio was actually down from 10.87 to 10.59 per cent.

The production of iron and steel in August was well maintained, only small increases, wholly seasonal, being shown in both cases. Total steel production for the month at 759,900 tons was actually 43,000 tons below the July figure, but the daily average was very little lower at 29,230 tons for the twenty-six working days due to the August holiday, compared with 29,750 tons for the twenty-seven working days in July. Last year a decline of over 51,000 tons was shown in tht August production compared with July, and the daily average for August this year is well above last year's August daily average of 25,650 tons. Pig-iron production for August shows a decline on the July figure of but 3,900 tons at 543,400 tons, the daily average for the 31 working days at 17,530 tons comparing with 17,650 tons in July. In August, 1934, the pig-iron production was 503,300 tons, compared with 528,300 tons in the previous months—a decline of 25,000 tons. The month's production included 128,200 tons of hematite, 267,500 tons of basic, 122,200 tons of foundry and 13,700 tons of forge pig-iron.

The working of the Anglo-Italian Payments Agreement and the progress of transfers under it are still the subject of very careful consideration in Whitehall. Some anxiety is being caused by the steady growth of the balance outstanding, which has, after a small decrease, risen to £2,000,000. A slowing up of British exports to Italy rather than an increase in the rate of payment accounts for the earlier decline; and, even if the slowing up continues, it is not likely to put right the situation, since Italian exports to Great Britain are falling rapidly. Serious consideration has been given by the Board of Trade to all the methods by which the Agreement might be made to work better. There is a possibility that it may be made compulsory for British debtors of Italian traders to pay their debts into a sterling account similar to the lire account for Italian debtors. It is doubtful, however, whether this measure alone would be sufficient to improve matters.

The Commercial Secretary to the British Embassy at Rome (according to the Department of Overseas Trade) calls attention to a *communique*, issued by the Foreign Exchange Control Department, which intimates that Italian importers may no longer expect imports to be permitted merely on the grounds that the goods concerned were ordered or had arrived before a license had been obtained. United Kingdom firms are warned not to despatch goods to Italy until an assurance has been received that the corresponding import permits are actually in the hands of the Italian customer. This warning applies, of course, equally to United Kingdom merchant firms which arrange for shipment against payment in London, of goods direct from Europe and foreign markets to Italy.

Give us this day our daily bread is an old prayer in a new setting. Giving food daily to millions of unemployed is one of the major perplexities of many Governments, while experts insist on a special kind of daily food. Gone are the days when food would gladden the palate rather than vitalise the body, when the cunning of the *chef* would evoke throaty appreciation at the master's table. Gone also are the days when diet was a personal matter of money and motive and mastication. So Sir John Orr would have it in a paper on nutrition and agriculture he read at Norwich. England needs, Sir John said, a "national food policy into which both agricultural and public health interests can be fitted and reconciled." Investigation has shown that potatoes and bread are popular suppliers of energy. In the case of more expensive suppliers of energy, *viz.*, milk, eggs, fruit and vegetables, comsumption rises uniformly with income. Not till one reaches incomes of a pound a week is "diet according to modern standards, adequate for maintaing health." Sir John Orr stated that there are 20,000,000 people in Great Britain below this diet level. I will not follow Sir John in his explorations into the solution of health-cum-agricultural problems. There are few things, nearest the heart's desire, the reforming expert has not desecrated. To live, to suffer, perchance to die, on planned diet wrenches the last link with intimate personal predilections. Both mind and body rebel.

Air Mail Week

Sir Samuel Hoare's speech at Geneva has had, on the whole, a good press. Things were wobbling at the League of Nations and nothing was materialising from the prolific peace gestures of Britain and France. Sir Samuel Hoare's carefully considered case for bearing collectively the burden of the League's responsibility, no less than his clear statement of Britain's attitude, steadied European vacillation and informed Italy of the consequences of pursuing a policy of defiance. There are rumours that the quick decision of the Cabinet to develop a strong initiative was due to Italy's extravagant demands, which included the surrender of Malta and Cyprus and a virtual domination over Egypt. Il Duce, it is said, cherishes ambitions of colonial expansion which would restore the glory and the glamour of the old Roman Empire. Sir Samuel's speech and the movements of the home fleet on the Mediterranean quickened Europe's perception of the gravity of the situation and, when M. Laval ranged himself on the side of Sir Samuel, the odds were decisively against Italy. All the same, there is little hope that the crisis has been negotiated, unless Italy is ultimately deterred by the combined oppositon of France and Britain. France's apprehension that taking sides with Britain might drive Italy into an alliance with Germany, has, it seems, been allayed.

U. S. A.

STAGES OF THE NEW DEAL

With the adjournment of Congress on August 27 the New Deal may be said to have entered the third stage. The Deal commenced with a spate of emergency legislation and the assumption by President Roosevelt of dictatorial powers in the Summer of 1933. The two years that have elapsed have clarified the involved issues that have engaged the attention of the President, Senate and the House ; and it is possible now to get a true perspective. The President, despite some rebuffs, has achieved his major purpose of consolidating the legislative basis of his policy. It is true that he has done so by devious means of compromise and conciliation: that is evidence of the President's sagacity rather than proof of vacillation. Replying to a correspondent, President Roosevelt wrote, a little before Congress adjourned, that the legislation part of his programme was practically complete.

He has not departed, he said, from his original aims which were "to seek a wise balance in American economic life, to restore our banking system to public confidence, to protect investors in the security markets, to give labourers the freedom to organise and protection from exploitation, to safeguard and develop the national resources, to set up protection against the vicissitudes of old age and unemployment, to relieve destitution and suffering and to relieve investors and consumers from the burden of unnecessary machinery." The President added that "it seemed to Congress and to me better to achieve these objectives as expeditiously as possible, in order that not only business, but the public generally might know those modifications in conditions and styles in economic enterprise which are involved in our programme."

The Acts passed by his year's Congress may be regarded as the second instalment of the New Deal. The list of Acts is long and most of them cut through the separation of powers which is the ruling dogma of American constitutional law. There was violent disagreement between the Senate and the House over the principles and operations of the President's unprecedented legislation and, in some cases, the final text was not agreed upon until the last hours before adjournment of Congress. And Congress spent considerable time during the current session in bringing the more important Acts within the bounds of constitutionality laid down by the Supreme Court in the Schechter case. The A. A. A. Amendment Act, the Frazier-Lemke Farm Mortgage Act, the Work Relief Act, the Social Security Act, the Guffey-Synder Coal Act, the Magner-Connery Labour Relations Act, the Banking Act and the Public Utility Holding Act are the more important of a collection of legislative measures which Congress passed solely to implement the President's schemes.

The third stage opens on the prospects of substantial and widespread recovery, which depends on two factors. The first is the continuance of the present strong upward tendency in business activity. For nearly six months, the trend has been steadily upward. There is as yet no indication that trade is in a seriously overbought condition. And it might be intelligent anticipation to rule out any apprehension of a sudden relapse. The second factor is the fate of the basic New Deal Acts in the Autumn session of the Supreme Court. The Court veto on the N.R.A. had comparatively little political effect. But if the Agricultural Amendment Act were to be declared unconstitutional, the political reactions would be a severe setback to President's vote-pulling popularity. The Act is popular with the farmers who have great power in Congress and whose votes are essential to the President's re-election.

The political situation is obscure. There has been a great deal of confident prediction that, with Congress away, there would be a period of real recovery, with renewed investment activity and more assured purchasing. The conduct of the various markets since the adjournment of Congress partly confirms this view. The Administration's attempt to reduce the amount of its largesse to cotton growers raised doubts in the cotton futures market. The belief that farm prices are unduly high and that the people will insistently demand elimination of Government action designed to raise prices of food products introduces an element of uncertainty. For some time political uncertainties have made market prices incalculable ; and every prospect of a continuance of the disturbance upset investors. It is a fact that the public have paid only casual attention to the details of the complex measures that have been framed at Washington and, now that their implications are progressively in evidence, it is possible that political resistance to the New Deal might harden.

The killing in public of Huey Long, Senior United States Senator and dictator of Louisana, throws in a lurid limelight the foul spots of American public life.

His murderer, who has shot dead by the Senator's bodyguard, appears to have been possessed by political hatred: and there is little doubt that he was the agent of others, who in the approved method of American film gangdom, hired the services of a murderer. The crime removes from American politics a powerful personality, who made a not too scrupulous use of his power. Till 1928 when he was elected Governor of Louisana, Long's career was not different from that of the ordinary American politician. Once in office, his great gift of enlisting personal affinities became conspicuous. Save President Roosevelt, there is no one in the United States, whose death could at the present time be more inopportune. He inspired passionate loyalty or intense hatred—extremes of reaction singular to many of the greatest names in history. Across the Atlantic, there might have been mistaken impressions of the man. His picturesque antics, his buffoonery and vulgarity threw, at long distance, grotesque shadows. At home in the fierce light that beats on personalities, he showed up more accurately. A great organiser, a great lawyer and a great public speaker, he possessed indisputable qualities of greatness. If he was ruthless he was sincere; he had sympathy without sentimentality. Once a collaborator, President Roosevelt later had in Huey Long his most powerful adversary. Long made no secret of his charge that President Roosevelt is a traitor to the cause of the Left; and his "share-the-wealth" movement was being organised, ten million strong, for the express purpose of securing the President's defeat at the polls, without any thought as to whether Long or a Republican would be returned. His tragic death removes the most formidable obstacle to President Roosevelt's dictatorship. The Left revolt within the Democratic Party will be less and less of a problem for the President. The United States throws up all sorts of figures. Huey Long will long be remembered as one of the compelling kind.

ITALY

DUCAL DECREES

Sir Samuel Hoare's speech at Geneva had its due share of attention from the Italian nation. With that portion of the speech dealing with the respect for the Covenant and the willingness to stand by the obligations resulting therefrom, neither the Duce nor any official of the State appear to have bothered themselves. It is much in the nature of a foregone conclusion. Nor was there any expectation that the demands of Italy would be met. It is the portion relating to the distribution of the raw material resources that has enjoyed the greatest interest. "The view of His Majesty's Government is," says Sir Samuel, "that the problem is economic, rather than political or territorial. It is the fear of monopoly of the withholding of essential colonial raw materials that is causing alarm." That the essentially warlike nations at the present time are those that happen to lack colonies and which are dependent upon foreign raw materials and foodstuffs is an obvious, but significant, fact. In view of the monopolistic position that these countries occupy and the consequent fear that they engender in the minds of the nations that do not possess colonies, Sir Samuel has advocated a "free distribution of such raw materials among the industrial countries which require them." What exactly this would mean, reduced in terms of practical deals between the nations, it is not easy to understand. The Committee of Five is still in session; and it has to be seen, if the report, that it will bring out ere long, contains any acceptable solutions. In case the report is not found favourable, as the present signs portend, the League will have to take a decision on the crucial articles 11 and 16 of the League that provide for the application of economic, financial and military sanctions. Enforcement of sanctions of whatever kind will mean War—a war of a wider scope and greater destruction. This, Italy, of course, regrets, as much as the rest of the world, but thinks that the League should not attempt a mere colonial expansion into a world war of the first magnitude.

But it is not that the Ducal brain has not foreseen the developments at Geneva: he is preparing his nation even for the contingency of a rigorous application of 'sanctions' against Italy. The suspension of the clause requiring 40 per cent. gold cover for the note issue is only the beginning of many others with a view to consolidate the economic position for the coming event. Among the new decree laws that were issued about the end of August in Bolzano is one that limits variable dividends distributed by commercial and industrial companies and firms. No dividend higher than 6 per cent. of the paid up capital, or the average dividend paid in the last three years may be distributed in the next three years. The excess profits should be invested in State securities, which will be the property of the individual concerns but will be unsaleable for a period of three years. Another of the decrees imposes a tax of 10 per cent. on all dividends, interest coupons, bonuses and benefits accruing to bearer shareholders and to debenture holders and bondholders. Still another makes it compulsory for the Italian citizens living in Italy to cede against cash all credits held in foreign countries and to sell them against nine-year 5 per cent. Treasury bonds, the rate of exchange to be the price current on August 28, 1935. This applies also to the Italian securities held by Italian citizens in foreign countries. Already it has been made compulsory to declare the amounts so held; and it is reported that most of them have been sold by agreement to the Treasury.

The effects of these decree laws on the markets will be varied. The excess profits were utilised during the last war, when similar restriction was promulgated for expanding the capital equipment of industries. The non-distributable profits were thus used to strengthen the position of the industry. This is not possible now or at any rate, to that extent as was possible during the last war. Further, the industries being under the direct control of the State organisations, establishment of new plants or additions to existing plants should have the prior certification of the State. The present circumstances do not warant a very liberal grant of these concessions as it is necessary that the State should have funds for the Ethiopian war. Similarly the exemption of the State securities from the 10 per cent. tax, reminiscent of the 15 per cent. tax during the last war, will have the effect of steadying the securities in the market and thus drawing funds. Moreover, since the decree provides for exemption if the holder of the security registers himself as such, there may be a large number of registrations, with the result that the yield from income tax is likely to be steadied. Tax evasions may be reduced to some extent; and the variable dividends and private fixed interest securities will be raised to the same status as the State securities.

In addition to these means for ensuring financial self-sufficiency, the Duce has taken measure to ensure sufficiency of raw materials and supply of metals. Coal, tin, copper and nickel are already State monopolies; and the demands of the industries are being met only partially on a national basis. Industrial autarky is fast growing; and though this is one of the avowed aims of Fascism, the pace at which it has developed has received acceleration due to the present political and colonial programme.

JUTE AND JUTE GOODS

JUTE

Calcutta, September 26, 1935.

Throughout this week jute was steady with a rising tendency. At the closing time, however, weakness seems to have set in and prices in the futures market are more than a rupee below the highest touched on Wednesday.

Mills are reported to have done about a lakh of bales at about Rs. 4 and Rs. 5 for 4's and 3's Jat Districts. At the close there are sellers at these prices, but mills are holding off.

Demand from overseas during this week has been much better than for some time past. Shippers are, however, reluctant to make any large offers for forward positions due to apprehended rise in insurance and freight rates.

Upcountry imports show considerable increase and although the market in Calcutta has improved, prices in the mofussil do not show any change. It is expected that during the next month imports will be rather heavy and prices may give way further under pressure of heavy imports.

September covering has also been completed. Unless there is any large buying by mills and shippers, prices during the next fortnight or so are likely to decline.

The market is awaiting with considerable interest the announcement by the Government of Bengal regarding their programme for restricting the next year's crop. For the last one or two years rumours have been afloat in the market that this announcement will be made very shortly and that the Government will aim at reducing the size of the next crop even below that of the present one.

The loose jute section has been steady and small business has been reported daily in Indian Jat 4's on the basis of Rs. 4-12 and Rs. 5 per maund. At the close, the market is quieter with sellers showing more disposition for business, but buyers are holding off.

The Pucca Bales section ruled firm in sympathy with the loose jute market and a fair business was reported on the whole. Old crop Firsts for shipment this month were done at Rs. 29-8 per bale and new crop Reds, Firsts, Lightnings and Hearts at Rs. 34-8, Rs. 31, Rs. 27 and Rs. 22-12 per bale respectively. A good business has been done in Tossa and Daisee assortment for shipment to Port Said during December at Rs. 27-6 and 25-4 per bale respectively. Shippers also bought old crop Lightnings and Hearts at Rs. 26-4 and 21-12 per bale. Later in the week old crop Firsts were done at Rs. 30-8 to Rs. 31-12 per bale and New Crop Lightnings and Dundee Daisee assortment at Rs. 28 per bale. At the close the market was rather quieter, the nominal quotation for Ready Firsts being Rs. 31-12 per bale.

The futures market assumed a firm tone during the week and a rise of more than Rs. 3 was recorded. The highest price touched was Rs. 33-2- for September delivery and Rs. 33-12 for December, and the lowest rate was Rs. 29-14 for September and Rs. 30-12 for December. The market is quieter at the close and prices show a declining tendency.

JUTE MANUFACTURES

Calcutta, September 26, 1935.

The hessian market has been dominated entirely by the events in the Jute Mills Association during the week under review. At a meeting of the Committee of the Association held on September 23, it was decided to call a special general meeting of the Association on September 30, to consider and, if thought fit, to pass the following resolution:—

> "That the requisite six clear calendar month's notice required by clause 2 of the agreement dated the 21st January, 1933, and made between the Indian Jute Mills Association and the outside mills *viz.*, The Adamjee Jute Mills, Ld., The Agarpara Co., Ld. The Gagalbhai Jute Mills Ld., The Ludlow Jute Co., Ld., and to the Shree Hanuman Jute Mills, on the 30th September, 1935, to terminate the said agreement as from the 31st March, 1936."

It is believed that the recommendation of the Committee is sure to go through in the general meeting and that the requisite notice will be despatched the very next day.

There seems to be some doubt in the minds of the gunny traders regarding the agreement between the members themselves. The working arrangement between the members of the Association is subject to alteration or termination by giving three months' notice. It is certain that the notice to terminate the present agreement with the members of the Association will be given before the 1st of January, 1936, so that the Association mills might also be free by the 1st of April, 1936, to work as many hours as possible as the outside mills.

North American demand, which had been very brisk for some time past, fell off towards the closing of the week. It seems that the recent heavy buying from North America was not due to any sudden increase in consumption, but was attracted mainly by low prices and the uncertainty regarding the outcome of the dispute regarding the restriction of production among the mills.

South American news are not encouraging. It is said that there is again drought and unless rain falls soon, the crops will be a complete failure. Locusts damage is also reported.

It is expected that at the end of this month the stock position will show a reduction of 2½ to 3 crore yards.

It is expected in some quarters that owing to the large business done by the North American buyers for near positions, near goods may command a premium over distant positions.

When unrestricted production begins from April next, prices are bound to give way considerably. The only thing that can prevent a decline in gunny values is a rise in jute prices.

Higher prices were paid for hessians and a considerable business from mills to both Shippers and Bazar dealers has been reported. 11 Porters Jan./June sold at Rs. 10-2 basis, Nov./March at Rs. 10 and Oct./Sept. at Rs. 9-14. Earlier in the week 40 in. 8 oz. sold at Rs. 7-8 and Rs. 7-11 for September shipment. 9 Porters April/Dec. sold at Rs. 7-12 and Rs. 7-14.

Heavy goods have been in better demand during the week and prices were fully firm. A moderate general business was put through in Liverpool Twills April/Sept. at Rs. 25-4, Jan./Mar. at Rs. 25-12, B. Twills Jan./March shipment at Rs. 22-12, Cornsacks Ready at Rs. 22-8, Cubans April/Sept. at Rs. 28-8, Sugar Twills April/June at Rs. 25-4 and Heavy Cees Jan./June at Rs. 22-12.

JUTE BREVITIES

Flax in Substitute of Jute.

The Polish Government is encouraging the development of the indigenous flax industry by substitution of coarse linen sacks instead of jute for the packing of monopoly products such as salt, sugar, tobacco, etc. and the use of linen, wherever possible, for army clothing and equipment. Jute and hemp manufacture was reduced in 1934; and many spindles added in 1931, 1932 and 1933, are idle. The chief organisation of Polish agriculture is urging the Government to increase the import duty on jute and cotton by 10 per cent. and fix a maximum on importation of jute.

* * *

Poland's Jute Trade for First Six Months.

Imports of raw jute into Poland during the first half of 1935 rose considerably, amounting to 6,714,900 Kg. valued at 2,996,000 zl., and compared with 5,176,200 Kg. last year, when the value was 2,242,000 zl. Re-exports amounted this year to 41,200 Kg., compared with 47,400 Kg., previously, so that retained imports show an increase this year of 81,600 Kg.

Exports of yarn during the period under review showed a considerable decline as compared with the corresponding period last year, amounting to 31,600 Kg. valued at 30,000 zl., and compared with 408,600 Kg. valued at 359,000 zl. Imports of yarns were negligible amounting to only 3,300 Kg. this year against 5,600 Kg. in 1934, valued at 3,000 zl. and 5,000 zl. respectively.

Exports of jute cloth totalled 1,255,000 Kg. valued at 947,000 zl. whereas as last year during the corresponding period such exports were only 769,600 Kg., valued at 517,000. Poland's most important markets for jute cloth are the United States, Turkey, Germany and Switzerland. Imports also increased somewhat to 114,600 Kg., valued at 148,000 zl., having been 66,000 Kg., valued at 104,000 zl. last year. Exports of sacks were down, amounting to 103,600 Kg., valued at 96,000 zl. against 165,400 Kg., valued at 134,000 zl. during the corresponding period last year.

* * *

Improvement of Hungarian Jute Industry.

The Hungarian jute industry shows considerable improvement in employment, which has been brought about by the activity of the newly formed cartel.

During the first half of 1935 imports of raw jute into Hungary were valued at 1,900,000 pengo, compared with only 800,000 pengo during the corresponding period last year.

* * *

Jute Trade of Czechoslovakia.

Imports of raw jute into Czechoslovakia during the first half of 1935 totalled 16,411 tons valued at 33,328,000 Kr., as compared with 16,308 tons valued at 32,763,000 Kr. during the corresponding period in 1934.

Yarn imports increased to a relatively high degree. Exports of yarns rose considerably amounting to 860 tons, valued at 2,740,000 compared with only 260 tons during the same period of 1934, when the value was 1,081,000 Kr. Exports of goods of flax, hemp and jute totalled to 13,046 tons against 11,386 respectively.

* * *

Amended Duty on Jute Goods.

Under the amended customs of British North Borneo imports of jute and jute goods are dutiable at a rate of 7½ per cent., British Preferential and 15 per cent. General.

* * *

Raw Jute Exports.

According to the returns received in the Department of Commercial Intelligence and Statistics, the total exports of raw jute from Bengal during August, 1935, amounted to 241,069 bales of 400 lbs. each, of which 234,063 bales were exported from Calcutta and 7,006 bales from Chittagong. The total exports from Bengal in the months of August, 1933 and 1934 were 266,174 and 262,489 bales, the shipments from Calcutta being 263,027 and 248,668 bales respectively.

COTTON AND COTTON GOODS

COTTON

Calcutta, September 26, 1935.

Sentiment in all cotton markets underwent a startling change during the week under review. Exciting trading was witnessed in Bombay, where feeling became so rampant that operators, in addition to their local purchases, indulged in heavy buying in Liverpool and New York Exchanges. On heavy buying and applying of *teji* options, prices marched steadily upwards, Broach April-May touching as high a rate as Rs. 210. The immediate reason for this hysterical buying of a general nature was the unexpected development of the Italo-Abyssinian affair. The uncompromising attitude of Italy in rejecting the final offers of the League Committee created a grave deadlock heading for a crisis. All other considerations were relegated to the background by the bazar operators. Those exporters, who have been selling last week by way of straddling against Liverpool purchases, appeared as free buyers. Speculators, Japanese interests, Commission Houses and exporters, all joined in the buying campaign. As a consequence, prices flared up and Broach April-May spurted to Rs. 210 at one time on 23rd instant. Later, as the reports from the Continent indicated that there are chances of further negotiations leading eventually to a peaceful settlement, the frenzied buying subsided. The market reacted on selling pressure, Broach April-May receding to Rs. 205 on the 24th. Towards the close, however, a slightly steadier feeling was in evidence and Broach April-May closed at Rs. 207-4.

Oomra December-January moved from Rs. 186-8 to Rs. 189, but declined to Rs. 188-12 at the close. Bengal December-January improved to Rs. 141-12 and closed at the same rate.

The heavy hedge-selling operations of last week continued during the current week also in America. The tense political developments in Europe pointing to an immediate outbreak of war entirely changed the situation. There was a strong general belief that in the event of a war the traffic interruptions in Suez canal would furnish an excellent stimulous to American cotton. Japanese and Continental interests rushed into the market as free buyers. Spot houses and speculators gave free support to the market absorbing all hedge sales. Reports of unfavourable weather and the strength of the dollar also contributed to the upward march of prices. Prices registered a sharp rise, October touching 10.69. Towards the latter part of the week renewed hopes of a peaceful settlement of the Italo-Abyssinian dispute and reports of favourable weather conditions and the resultant improvement in crop prospects imparted an easier tone. On increased hedge selling and less support from buying interests, the market assumed a sagging tendency. October receded at the close to 10.56 and spot rate which rose to 11.00, closed at 10.90.

In tune with the activity in the New York market during the early part of the week, the New Orleans market also put up a fine show, October rising to 10.58 and spot rate to 10.88. Later on, the market evinced a downward trend in sympathy with the weakness in New York and October and spot closed at 10.48 and 10.80 respectively.

An active market was witnessed in Liverpool. Considerable support was forthcoming through buying orders placed by Bombay traders, Continental Houses and speculators, as a result of which prices soared high. October touched 5.98 on Monday. There were heavy hedge-selling and profit-taking operations. The market reacted towards the close on better political situation and reports of favourable weather. October and spot closed at 5.89 and 6.37 respectively.

The Egyptian section ruled strong. There was a great demand for the Egyptian cotton and a rise of 21 to 23 points was recorded in prices. Egyptian Sakel spot improved to 8.52 and October to 8.13, but closed at 8.41 and 7.99.

Weather conditions being unfavourable, the 1935 cotton acreage in Manchuria is estimated to be 30 per cent. lower than the 228,000 acres estimated for 1934.

The 1935 cotton crop in China has been privately estimated at 9,600,000 piculs (1 piculs=133 lbs.) against 11,200,000 piculs during the 1934 season.

Calcutta, September 26, 1935.

A slight improvement in the local piecegoods market has been noticed during the week under review. Since our last report the raw cotton market assumed a firm tone and an advance of more than Rs. 10 was recorded in the price of Broach cotton. This has restored some confidence in the market and a few importers have been able to book satisfactory orders. Dealers are hopeful of an improvement in the demand during the next few weeks with the approach of the Poojah season, as up till now the usual demand has not appeared.

The demand for Indian mill-made goods has been well maintained. A moderate business has been done in greys, light whites, fancies and some seasonal sorts, but most of the sales have not been satisfactory so far as prices are concerned.

In the Lancashire section, there has been improved enquiry for white dhooties, sarries and medium and fine mulls, but once again the price factor proved to be the stumbling block in the way of transacting bulk business. The bulk of the week's transactions was confined to umbrella cloths. The firmness of prices at the other end is attributed to be the cause of restricted business in this section and some concessions to buyers may go a long way in restoring better business.

Bulk orders have been conspicuous by their absence in the Japanese section. The week's transactions were of a retail nature. Miscellaneous sales from stocks resulted in grey shirtings, grey dhooties, white shirtings and printed sarries.

With the advent of a better tone in the raw material market, the yarn market remained very active during the week and bazar values have registered an all-round advance. Demand for coarse and medium yarns has been on a better scale and higher prices have been secured by the manufacturers. Fine counts of carded Egyptian reject variety from 70s. to 100s. for September-October shipment were done in the Lancashire section, but the total quantity would not be more than 20 bales.

In Bombay, the movement in Indian and Japanese cloths has been steadily improving, but English goods have been facing disappointing times. Better prices are realized for Japanese goods, but in indigenous goods sales effected have been in demand, while the off-take in greys has improved. in local goods. More of fancy and bleached goods have been in demand, while the off-take in greys have improved. Forward sales by the mills have been possible in grey shirtings and grey *dhooties*. As regards British goods, merchants have found it difficult to clear a few pieces. Arrivals are declining and forward trade is made more difficult by the approaching war crises. Dealers view the future with much anxiety. Inquiry for Japanese goods have improved. A moderate turnover in white shirtings, white mulls and greys resulted and better prices have been realized. Stocks of piecegoods at the end of August have increased by some 1,986 packages to 38,095 packages. About 19,318 packages have arrived during August, while 17,332 packages have been delivered. Of the arrivals nearly 15,292 packages are from Japan, and only 2,040 packages came from British and Continental ports. The yarn section also showed some improvement in off-take as well as prices. Stocks of yarns at the end of August declined by 311 packaged, amounting 1,848 packages. The arrivals during August totalled up to 4,905 packages, while clearances came up to 5,216 packages. Of the total arrivals 2,862 packages have been from Japan.

* * *

During June, 1935, the cotton mills in Bombay City produced 24,427,000 lbs. of yarn and 20,426,000 lbs. of woven goods compared with 14,622,000 lbs. of yarn and 10,712,000 lbs. of woven goods during June, 1934. The Ahmedabad mills produced during June, 1935, 13,245,000 lbs. of yarn and 12,524,000 lbs. of woven goods, compared with 14,848,000 lbs. of yarn and 15,849,000 lbs. of woven goods during June, 1934.

* * *

In the twelve months, April, 1934, to March, 1935, the mills in India manufactured 1,001,000,000 lbs. of yarn and 737,000,000 lbs. of woven goods, compared with 921,000,000 lbs. of yarn and 646,000,000 lbs. of woven goods during the corresponding period in 1933-34.

BULLION

GOLD

Calcutta, September 26, 1935.

With wide fluctuation in the cross rates, the gold market evinced a better tone in spite of restricted business. The rate for first settlement improved to Rs. 35-1-3 on September 20 in sympathy with the firmness of the Franc and Dollar in terms of Sterling and on the disquieting political situation. Towards the close, the market assumed a quiet tone as fresh support was not forthcoming from buyers. There was, however, no aggressive selling pressure. The increase in the war risk Insurance premium on shipments of gold discouraged fresh business. There was also some increase in the Franc and Dollar cross-rates and prices declined. Ready closed as Rs. 34-14-0, first settlement at Rs. 34-14-6 and second settlement at Rs. 34-15-0.

Stocks at the week-end amounted to 1 lakh tolas and the daily offtake was unchanged at 3,000 tolas. Arrivals from upcountry ranged between 10,000 and 15,000 tolas a day. Shipments of gold per s.s.*Maloja* amounted to 124.66 lakhs. Total imports during the week amounted to 4,37,813 in bar and coin.

The Calcutta market remained quietly steady and, though prices moved up in consonance with the cross rates, there were no active operations in the market. The closing price for bar gold per tola was 34-14-0. The rate for Sovereign was unchanged at Rs. 22-6-0.

The rate for gold in London steadily improved from £7-0-11 to £7-1-6 on Monday, when the Franc rate receded to 74.57 and Dollar rate to 4.91½. The same rate was maintained on the following day in spite of some appreciation in the cross rates. A drop of 5d. was witnesed at the close, the price declining to £7-1-1.

The London-Paris cross rate declined steadily from 74.82 to 74.57 in the course of the week and closed at 4.74. The London-New York cross rate declined from 4.93 3/16 to 4.91 3/16, but closed at 4.92 7/8.

The exports of gold from U. K. during the week ended September 13, 1935, amounted to £2,057,000 of which £1,470,000 came from U.S.A. and £432,000 from the Netherlands. The imports of the metal into U. K. during the same period amounted to £3,489,000, including £1,765,000 from South Africa and £1,413,000 from India.

The s.s. "Ranchi" which sailed from Bombay on the 7th September carries gold to the value of £330,000 consigned to London. ,

The Transvaal gold output for August 1935 amounted to 929,331 fine ounces as compared with 927,803 fine ounces for July 1935 and 881,861 fine ounces for August 1934.

SILVER

Calcutta, September 26, 1935.

The tense political situation in the Europe imparted some steadiness to the silver market in Bombay. The trading was narrow and, except for some scattered buying by chokseys and covering by shorts, the operations were of a colourless nature. The market was, however, free from any aggressive selling pressure and a steady tone was maintained. The rate for first settlement improved to Rs. 67-3 on September 23. On the following day, on receipt of encouraging advices from London, the market evinced an active tone. A few buying orders pushed up prices, first settlement improving to Rs. 67-13. A steady tone was in evidence at the close when prices stood as follows:—Ready Rs. 67-3 first settlement Rs. 67-5 and second settlement Rs. 67-10.

The Calcutta market was also steady and the rate improved to Rs. 66-10. The closing rate was slightly easier at Rs. 66-8.

In London, price fluctuations were somewhat irregular. The absence of American buying last week was compensated. America appeared as a buyer at every decline. India was both buyer and seller. Speculators and China sold throughout the week.

The spot rate fluctuated in a zig-zag way. Opening at 29 3/16d., the rate improved by ⅛d. on the following day, again receding to the former price on September 23. A rise of ⅛d. was again witnessed on the next day, but at the close the price again declined to 29 3/16d. The forward rate improved from 29¼d. to 29⅜d. and closed at 29 5/16d.

The spot rate for silver in New York was unchanged throughout the week at 65⅜c. per oz.

The London-Shanghai T. T. declined from 1-6¾ to 1-6 9/32 at the close.

The exports of silver from U.K. during the week ended September 13, 1935, amounted to £1,430,000 of which £1,404,000 was shipped to U.S.A. and £20,000 to Iidia. The imports of the metal into U.K. during the same week amounted to £649,000 to which Japan, the Soviet Union, India and Australia contributed respectively £317,000, £105,000, £22,000 and £114,000.

London—Air Mail week ending September 11.

The market has been slightly firmer in tone, the Indian Bazaars and China having given support, whilst there has also been some speculative demand for forward delivery ; as America did not press, prices for cash and two months were quoted level for most of the week.

Indian and China have also sold, but the American Government although not always willing to follow upward movements, have made further purchases for prompt delivery.

No important change is looked for in the immediate future but the undertone of the market is good.

The following were the United Kingdom imports and export of silver register from mid-day on the 2nd September to mid-day on the 9th September :—

TEA

CALCUTTA AUCTIONS

Calcutta, Sept. 26, 1935.

The total offerings at the Calcutta Auctions of teas for export on September 23, amounted to 23,300 packages, of which 22,600 packages sold at an average price of 9 annas 5 pies, which is 1¼ annas more than the average price realised during the corresponding sale last year. Quality, although of ordinary description, was about average for the time of the year. Assam quality showed some improvement. There was a strong demand for all kinds. Common and medium sorts recorded an advance of about 3 pies. Useful liquoring Assams were in request and prices for these were 3 to 6 pies dearer. Tippy teas met with strong demand at advancing rates. All descriptions of Fannings were particularly strong at prices 3 to 6 pies higher than last rates.

At the auctions for internal consumption on September 17, the total offerings amounted to 18,000 packages of which 9,800 packages were Dusts, the remainder being leaf and other grades. Except for poorest sorts, which were not well supported, Dust teas met with a strong demand with prices fully firm and occasionally dearer. Other grades met with good competition and last week's rates were fully maintained for all grades. Fannings were in particular request and prices for these registered an advance of 3 pies.

The following are the full particulars of sale No. 16 :—

LONDON AUCTIONS

The offerings for the week ending September 26, at the London Auctions comprise 48,511 packages of Inlian, 23,563 of Ceylon and 7,704 of Java teas.

Indian Tea.

At the auctions of Indian Tea on September 23, the toal offerings amounted to 26,100 packages. The firm conditions of last week continued and teas of all grades met with strong competition. A farthing to a half-penny per lb. advance was recorded for teas up to 13d. per lb. Medium teas were dearer, while fine teas mostly showing a seasonal decline in quality were about steady. Southern Indian teas shared in the advance.

The following were the lowest prices fetched during the auction :—

Common Pekoe last auction 11d. September 23, auction 10¾d. lb.; Common Broken Pekoe last auction 10½d. September 23, auction 11¼d. lb.; Common Orange Pekoe last auction 10¾d. September 23, auction 11¼d. lb.; Common Broken Orange Pekoe last auction 11d. September 23, auction 11½d. lb.; Common Broken Pekoe Souchong last auction 10¾d. September 23, auction 11d. lb.

The following were the value prices :—

Clean Common Pekoe last auction 10⅞d. September 23, auction 11⅛d. lb.; Clean Common Broken Pekoe last auctoin 11¼d. September 23, auction 11⅜d. lb.; Clean Common Orange Pekoe last auction 11⅛d. September 23, auction 11½d. lb.; Clean Common Broken Orange Pekoe last auction 11½d. September 23, auctiin 11⅜d. lb.; Clean Common Broken Pekoe Souchong last auction 11d. September 23, auction 11d. lb.

Ceylon Tea.

At the Ceylon auctions on September 24, the total offerings amounted to about 23,600 packages. There was an active demand at generally firmer rates.

The following were the lowest prices fetched during the auction :—

Common Pekoe last auction 11¼d. September 24, auction 11⅝d. lb.; Common Broken Pekoe last auction 11½d. September 24, auction 11¾d. lb.; Common Orange Pekoe last auction 11d. September 24, auction 12d. lb.; Common Broken Orange Pekoe last auction 11¾d. September 24, auction 12½d. lb.;

The following were the value prices :—

Clean Common Pekoe last auctoin 11⅝d. September 24, auction 12d. lb.; Clean Common Broken Pekoe last auction 11½d. September 24, auction 12d. lb.; Clean Common Orange Pekoe last auction 11⅞d. September 24, auction 12¼d. lb.; Clean Common Broken Orange Pekoe last auction 12⅛d. September 24, auction 12¾d. lb.

Java & Other Teas.

At the auctions on September 19, 8,000 packages of Java and other teas (including Sumatra) were submitted for sale. As usual there was a good demand Tippy teas were irregular.

The following were the lowest prices fetchel during the auctions :—

Common Pekoe last auction 8¼d., Sept. 19, auction 9¼d. lb.; Common Broken Pekoe last auction 8½d., September 19, auctions 8¾d. lb.; Common Orange Pekoe last auction 8¾d., September 19, auction 9¼d. lb.; Common Broken Orange Pekoe last auction 8¾d., September 19, auction 9d. Common Broken Pekoe Souchong last auction 8¾d., September 19, auction 8¾d. lb.

The follwing were the value prices :—

Clean Common Pekoe last auction 8⅞d., September 19, auction 9¼d. lb.; Clean Common Broken Pekoe last auction 8⅞d., September auction 9d. lb.; Clean Common Orange Pekoe last auction 9½d. September 19, auction 9⅞d. lb.; Clean Common Broken Orange Pekoe last auction 9½d. September 19, auction 9⅞d. lb.; Clean Common Broken Orange Pekoe last auction 9⅛l., September 19, auction 9⅜d. lb.; Clean Common Broken Pekoe Souchong last auction 9d., September 19, auction 9d. lb.

Tea Average.

The following were the average prices of tea in the London market during the week ending September 19, as compared with the previous week :—

	Week Ending Sept. 12 lb.	Week Ending Sept. 19 lb.
Indian Tea (Southern) ...	11.54d.	11.32d.
Ceylon Tea ...	14.06d.	14.54d.
Java Tea	10.50d.	10.77d.
Sumatra Tea ...	9.30d.	9.79d.

The following figures of tea exports taken from the Calcutta Customs daily entries and received periodically from Chittagong are issued by the Indian Tea Association.

Quantity of tea entered for export to United Kingdom for the first htlf of September 1935.

Calcutta Black 9,806,307 lbs.; Green Nil.

Chittagong Black 5,286,514; Green Nil.

Quality entered during the corresponding periol last year.

Cittagong Black 32,595,455 lbs.; Green Nil. Total 90,742,938. lbs.

Total frm April 1, 1935 to September 15, 1935. 105,119,432 lbs.

SUGAR

Calcutta, Sept. 26.

From quiet but steady conditions during the earlier part of the week, the local sugar market has firmed up towards the close of the week, prices recording a small rise both in Java and Desi sections. Java Refined Ready closed at Rs. 10-8-0 and Steamer at Rs. 10-2-0. Java White Ready and Steamer were quoted at the close from Rs. 9-8-0 to Rs. 9-14-0.

In the Desi section, White sugar (1st Crystal) improved to Rs. 9-5-0 to Rs. 9-10-0, while Brown sugar (2nd Crystal) were quoted from Rs. 9-2-0 to Rs. 9-6-0.

The disturbed foreign political situation gave an impetus to traders in Bombay, where conditions were firm. Owing to fears of supplies being stopped from Europe in the event of a war, there was increased buying in Java on Indian and Far Eastern account. About 35,000 tons of Nivas have been sold at from F 3.75 to F 3.85. Last week's transactions in Bombay amounted to about 4,100 tons.

The Cawnpore market has been firm for old as well as new crop and closed at an advance of 1½ annas. Demand for spots was on a large scale and sellers are reported to be reserved. Stocks of Desi sugars were negligible and Kesar improved to Rs. 14-6-6, while Saraya was quoted at Rs. 13-15.

Arrivals: The s.s. *Karanja* arrived on the 22nd with 2,250 tons and s.s. *Begum* is due on 27th instant with 900 tons.

Stocks in the main ports are :—

(In bags : 10 bags=1 ton.)

MISCELLANEOUS

WHEAT

Calcutta, September 26, 1935.

The local wheat market developed further firmness during the past week and a further rise in prices was recorded. Encouraged by stong foreign advices and influenced by the tense war situation in the Continent large buying orders were placed in the market. The rate for Punjab and Cawnpore Ready improved Rs. 3-7-0, while September and May Beta spurted up to Rs. 3-9-9 and Rs. 3-7-3 respectively. Owing to the big rise in the Australian quotations, Indian wheat is now placed on an advantageous export parity.

The rice market in Bengal is very strong and this fact, coupled with the increasing demand for flour and its by-products, undoubtedly help the wheat prices to be maintained. In view of the possibility of increased export this year to the European countries, dealers are hopeful of better prices in course of time.

In Bombay, the market witnessed greater activity. Prices for Delhi-Cawnpore September delivery imprved to Rs. 4-6-0 and May to Rs. 4-9-9 owing to war rumours and better advices from Chicago and Liverpool. Though considerable buying orders were placed by local interests during the initial stages, the buying subsided on repots of renewed negotiations for a settlement of the Italo-Abyssinian dispute. Prices for September and May declined to Rs. 4-4-6 and Rs. 4-8-3 respectively at the close.

Firm conditions have been ruling in the Karachi market, prices registering a rise of about Rs. 2 per candy. October contract highest touched Rs. 24-0-6, which was the highest rate since the beginning of February. The danger of immediate war, unfavourable Argentine and Australian crop reports and improved trade demand were mainly responsible for the sharp upward tendency of prices. The absence of outside offerings induced the United Kingdom buyers to turn their attention to Indian wheat. A small business of about 10,000 bags was effected to Hull at 30 shillings Sept.-Oct. shipment. Negotiations for further business are progressing and dealers are hopeful of a good export business shortly. Spot sales last week totalled about 60,000 bags, half of which were purchased by Calcutta merchants. Arrivals from upcountry were on a reduced scale averaging about 3,000 bags per day. Exports from Karachi last week totalled 84,590 bags and stocks have been reduced considerably to about 6¼ lakhs of bags.

The imports and export figures of wheat for the three main British Indian ports, as given in the *Indian Trade*

Journal, from April 1 to September 21, compared with the corresponding period of 1934, are :—

Imports—

	(In tons) 1935 Indian	Foreign	(In tons) 1934 Indian	Foreign
Calcutta	10,619	...	103,968	2,968
Bombay	79,812	...	90,192	...
Karachi	181,324	34	285,660	...

Exports

	1935	1934
Calcutta	9	15
Bombay	591	537
Karachi	223	7,374

As regards the wheat markets outside India, a substantial rise was recorded in Chicago. Heavy buying, stimulated by further reports of poor yield of spring wheat and war rumours, pushed up the prices by nearly 8 cents. The rate for September touched the high level of 99¼ and May 100⅛c. Later however, a reactionary tendency set in and prices suffereed a sharp decline. September closed at 99⅞ and May at 98¼.

The prices for Australian wheat for September delivery registered a substantial increase in London. The rate, after touching 31s. 6d. in midweek, declined to 31s. at the close. The tone of the market was dull at the close and operators were disposed to await further events as regards the peace negotiations in Geneva.

Latest U. S. Wheat Crop Estimate.

The Department of Agriculture issues an estimate for the total wheat crop in the U.S. of 594,615,000 bushels, as compared with the August estimate of 607,678,000. The actual 1934 crop was 496,929,000 bushels.

World wheat crop for 1935, as reported by 41 countries, is stated by the Department to be 3,093,139,000 bushels, an increase of 5 per cent. over 1934.

LINSEED

Calcutta, September, 26, 1935.

The firmness which set in during last week continued in the local market and a further substantial rise in prices was recorded. On receipt of encouraging news from foreign centres, there was frenzied buying and prices flared up. The rate for ready improved to Rs. 5, but closed at Rs. 4-13-0. September and May improved to Rs. 5-2-6 and Rs. 5-4-0 respectively.

Considerable activity was witnessed in Bombay earlier in the week. But there was not much buying support in the market towards the latter part of the week. Prices, however, were well maintained and even a further rise was recorded in sympathy with the strength of Argentine linseed.

Very firm conditions were ruling in the London market where both Calcutta and La Plata linseed jumped up by leaps and bounds. Within the last two weeks a rise of £1-5-0 was recorded both in the La Plata and Calcutta linseed in London. Hectic buying on war fears and reports of very unfavourable crop conditions in Argentine was witnessed in the market. La Plata September closed at £10-12-6 and Calcutta September-October at £12-15-0.

Arrivals and exports of linseed during the week ending September 21, 1935 as compared with the corresponding week of 1934 are :—

Market Tendency :—Firm.

MADRAS MARKETS.

Madras, September 24, 1935.

PIECEGOODS

The piecegoods market continues dull with only a small amount of retail business passing. Demand for Deepavali has not yet sprung up though a few upcountry buyers have been enquiring in the market. The failure of another big firm during the week has accentuated the tight money conditions and prices are tending to decline under selling pressure from weak holders. The Manchester market is reported to be steady but dealers in Madras are reluctant to do any forward business in view of the prevailing depression. In the Yarn Section, Japanese Yarns are firmer but Indian and English Yarns remain unchanged. There is no improvement in the demand and offtake continues to be poor.

METALS

The market for both Yellow Metal and Copper continues strong and prices have registered a further advance during the week. Yellow Metal sheets, "Dittmann", "English" or "I.C.C." makes, are quoted at Rs. 146 per Candy of 500 lbs. and Copper sheets at Rs. 174 per Candy. Sterling quotations have likewise advanced to £51 per ton for Copper sheets and £43 and £39-5 per ton respectively for "English" and "Dittman" Yellow Metal sheets. Clearances have been satisfactory owing to active demand from upcountry centres and stocks in Madras have been considerably reduced.

HIDES AND SKINS

The local Tanned Cow hide market continues strong and prices are maintained at the high levels established last week. London quotations are now 2d. above the minimum for heavy and medium weights and 1¼d. above the minimum for Lightweights. Demand has broadened and has now extended to all weights and grades. A considerable amount of business has been done with London during the week under review. Replacement costs have gone up further by the continued rise in raw hides values.

Arrivals of Tanned Buffalo hides are free, but owing to active demand from shippers stocks have not accumulated. Prices for heavy-weights are a shade easier, but Light-weights are dearer by 6 pies per lb. There is a good demand from London and buyers have increased their bids. The market for Tanned Buff Calf skins continues firm and prices are steadily held. Supplies of Tanned Cow Calf are plentiful and prices are a little easier. Demand from the Home market is rather slow. In the Tanned Skins section, there is a good enquiry from London for inferior selections of both Goat and Sheep but the better grades are neglected. London quotations of Tanned Sheep are 1d. to 2d. lower than those done at the last public sales but there are no sellers at these limits. There is a brisk demand from Japan for all grades of Tanned Sheep and as a result the local market is steady. The following shipments of hides and skins were made from Madras during the week-ended September 29, 1935:—To the United Kingdom: 2 bales Raw Goat, 66 bales Tanned Buffalo, 947 bales Tanned Cow, 30 bales Tanned Buff Calf, 71 bales Tanned Cow Calf, 399 bales Tanned Goat and 328 bales Tanned Sheep. To U.S.A., 57 bales Tanned Buffalo, 10 bales Tanned Cow Calf and 9 bales Tanned Goat. To Italy: 1 bale Tanned Goat.

GROUNDNUTS

The Groundnut market opened weak on Monday last and prices sagged to £13-7-6 October and November sellers for Coromandel Machined, C.I.F. North Continental ports, pure basis terms. On Tuesday, there was a brisk demand and £13-7-6 was paid for both October and November shipment. On Wednesday, the market was strong in tune with the firm tone of other commodity markets and values rose sharply to £13-12-6 October and November paid. On Thursday, sellers increased their limits to £14 for October and November positions. On Friday, there was a further improvement and sellers were quoting £14-2-6 for October and November shipment. On Saturday, there was a reaction and prices eased to £14 October and November sellers. Shippers' buying limits which stood at the beginning of the week at Rs. 33-4 and Rs. 33-8 for Machined and Rs. 28-4 and Rs. 28-8 for Ordinary, have now improved to Rs. 35-4 for Machined and Rs. 31 for Ordinary, per French Candy of (240 Kilos), ex-coast godowns. At Pollachi, prices have advanced to Rs. 32 for "Rose" variety Machined and Rs. 31 for "Red" variety Machined, per French Candy, ex-sellers' godowns. Dealers are now covering in their sales for September delivery and are not inclined to commit themselves further in forward contracts.

Arrivals of Groundnut Kernels into Madras for the week ended September 21, 1935 amounted to 18,348 bags or 1,445 Tons against 28,632 bags or 2,254 tons in the preceding week and 22-225 bags or 1,750 tons at the corresponding week of last year.

STATISTICAL INFORMATION

POST OFFICE CASH CERTIFICATES

During the month of August Rs. 76,17,000 approximately were realised by the sale of five year post office cash certificates against Rs. 1,12,22,000 in August, 1934, and Rs. 1,16,01,000 in August, 1933.

Investor's Supplement

Vol. XVI. No. 13 SATURDAY, SEPTEMBER 28, 1935 Price Re. 1

YOUR INCOME FROM 52 GREAT BRITISH INDUSTRIAL COMPANIES

Do you know that by investing about £22 upwards in the THIRD and FOURTH BRITISH FIXED TRUSTS you can become part-owner of 52 GREAT COMPANIES and thus safeguard your capital by spreading it over the leading branches of British Industry?

The 52 Companies are divided into two groups or "Units"—28 in a "THIRD BRITISH" Trust Unit and 24 in a "FOURTH BRITISH" Trust Unit.

THE BRITISH FIXED TRUST Sub-Units provide investors abroad with :

(1) **A SOUND LONG-TERM INVESTMENT in the form of a Bearer Certificate.**

(2) **REGULAR QUARTERLY DIVIDENDS collected and distributed by the Trustee.**

(3) **EXACT KNOWLEDGE of what they hold and its day-to-day value.**

(4) **A MARKETABLE SECURITY.—All the shares are quoted on the London Stock Exchange.**

(5) **PROSPECTS of capital appreciation and increased dividends as trade revives.**

(6) **SERVICES of : (a) The Trustee—LLOYDS BANK LIMITED**
(b) Auditors—PRICE, WATERHOUSE & Company
(c) MANAGERS with limited powers.

Ten Sub-Unit Certificates and upwards (costing around £11) may be purchased in either of the Trusts. The buying and selling prices of the Sub-Units are based on the current market prices of the constituent shares. You may sell your holding at any time you may wish to do so. British subjects not resident in the United Kingdom holding British Fixed Trust Sub-Units are entitled to claim repayment of British Income Tax under certain conditions, particulars of which are given in the booklet.

Coupons may be presented for encashment at the current rate of exchange at the undermentioned Branches of Lloyds Bank Limited.

Write for explanatory booklet and daily quotations to LLOYDS BANK LIMITED at: Bombay, Calcutta, Karachi, Rangoon, Amritsar, Delhi, New Delhi, Lahore, Rawalpindi, Simla, Srinagar (Kashmir),

to the undermentioned Brokers:

Investor's Supplement

TATA STEEL COMPANY---AND NEW CAPITAL

The Bombay market-place has been humming with all kinds of rumours about an impending issue of new shares by the Tata Iron and Steel Company.

It was these rumours which were quickly availed of by bears to hammer down prices of Tata Steel Ordinaries and Deferreds. Mr. K. R. P. Shroff, the President of the Stock Exchange, has declared that, from a scrutiny of the books of brokers, heavy sales by bears are clearly proved.

What is the real truth about this report of new capital issue by the Tata Steel Company ? The Chairman of the Company was, naturally enough, bombarded with anxious queries. And it is as well that he has issued an authoritative statement which reads as under:—

> "It is already known that the Company is conducting negotiations for the establishment, in conjunction with other interests, of a new steel works in India. If the negotiations lead to definite results, the steel company will have to provide its share of the finance required for the new undertaking.

MARKETS DULLY QUIET

(By Special Cable)

(By R. Gordon Cummings)

London, September 26.

Markets are dull and quiet awaiting political developments.

We advice buying Rubbers and Teas.

> "This finance will, however, not be required for nearly a year from now and the expenditure will be spread over a fairly long period. It will be realized that it is not practicable to settle the method of raising the finance so far ahead of the time when the money will be needed.
>
> "When and if the need for raising additional finance arises, the Board will naturally be guided by the best interests of the shareholders and will select the method which will be considered most favourable in the circumstances then existing.
>
> "The Board wishes to point out that the finance could not be provided by the issue of new capital except by a special resolution requiring a 75 per cent. majority of the total voting power of the shareholders.
>
> "There can, therefore, be no question at any time of the Board's taking action in this way which would not command the assent of the shareholders."

The above statement provokes a few questions:—

1. Will the negotiations for the establishment of a new steel works end in success ?
2. If so, what will be the total outlay ?
3. Of such outlay, what is the share to be contributed by the Tata Steel Company ?
4. In the course of how many years, will the Tata's contribution have to be paid ?
5. Will the amount to be paid by the Tatas be such as can be raised by the Tata Steel Company as additional debentures or in the form of shares in the new company for shareholders of the Tata Steel Company on any agreed proportion ?

So far as question 1 is concerned, we are not so sure that the negotiations will meet with success. There are far too many hurdles to be cleared. The desire of each concern to maintain its entity is a point which will be presenting many a delicate problem.

As for question 2, the capital needs of the new plant will be far less than that involved in the Tata Steel Works. The Tata Steel Company had to pay dearly for mistakes, errors of judgment, purchases in the dearest market etc. The new Company will start with the rich advantage of the experience of mistakes made by the Tatas.

Now to question 3. As the total outlay will be comparatively smaller and as the other interests will like to maintain a good stake for themselves, the share of Tatas' contribution may not exceed, say, Rs. 3 crores.

Question 4 is simple. This sum of Rs. 3 crores will be needed in, say, three years. A crore a year is well within the capacity of the Tata Company out of accumulating surplus assets.

This brings us to question 5. Even if the accumulating surplus assets are not fully adequate, the balance could be met by the issue of additional debentures, especially as the Company has, in recent years, been buying up debentures and reducing this liability. Debentures for the requisite amount could be easily raised and at rates of interest which are distinctly favourable.

There are also other methods by which the additional funds could be found without in any way affecting the interests of the holders of ordinary and deferred shares.

MARKETS FIRM

(By Special Cable)

New York, September 26.

Markets closed firm.

Above all, it should not be forgotten that the Tatas, by co-operating in the forming of a new Steel Company, will be making sure that the entire market for the products manufactured or to be manufactured by the Tatas is in the hands of themselves and the new Company.

The new Company is at all thought of because it would strengthen the position of the existing company.

Are the Tatas so purblind that they would deliberately enter into a scheme which weakens the parent Company ?

The question needs no answer. By the new plans, if they materialise—howsoever they materialise—the Tata Steel Company will, if anything, have a future distinctly brighter than is the case in present

Worth-While Investments:

INDIA

SUGAR FACTORY CUM DISTILLERIES

CAREW & COMPANY, LIMITED.

(By "Watch-dog")

Amongst sugar concerns, Carew & Company is specially fortunate in that it is not essentially a sugar manufacturing company. The Company owns a cane sugar factory and a distillery at Rosa, and distilleries at Asansol and Katni. The sugar factory is capable of crushing 600 tons per day and the distilleries turn out all kinds of potable liquor and industrial spirit, specialising in the manufacturing of Rosa Rum of which the company carries a large matured stock. Even with the payment of excise duty on the whole production of sugar, profits for the year ended June 1935 are greater than the year previous and at very nearly the level of 1933 which was the highest during the past ten years.

The excellent record of the company will be evident from the table given below. Profits have been steadily increasing and there has been steady increase in provision for depreciation and allocation to funds.

Year ended	Profit	Depreciation	Allocation to fund	Carry Forward	Dividend % p. annum
	Rs.	Rs.	Rs.	Rs.	Rs.
1925 ...	1,93,403	73,959	30,000	14,708	10
1926 ...	2,83,455	76,881	30,000	31,282	10
1927 ...	2,88,421	74,472	50,000	35,231	10
1928 ...	3,01,374	81,369	40,000	15,236	12½
1929 ...	2,87,368	81,121	40,000	21,483	10
1930 ...	2,88,305	79,560	40,000	30,228	10
1931 ...	2,28,823	78,455	...	20,596	10
1932 ...	2,94,789	75,320	30,000	10,065	12½
1933 ...	3,73,920	75,605	50,000	18,380	15
1934* ...	4,11,049	98,028	55,000	36,401	12
1935 ...	3,47,425	94,836	70,000	18,991	12½

*Accounts shown for 15 months.

The capital, authorised issued, and subscribed is Rs. 16 lakhs in 1,60,000 shares of Rs. 10 each fully paid up.

In July 1928, the company's shares, which were originally of 100 each, were sub-divided into 10 shares of Rs. 10 each.

The General Reserve is Rs. 6,10,000. Bad and doubtful debts are fully provided for and the reserve for taxation is Rs. 35,781.

Sundry liabilities are Rs. 8,17,204.

On the assets side, the net block amounts to Rs. 15,03,408 which is less than the total paid up capital.

Stores and materials amount to Rs. 2,76,371. Stock-in-trade is valued at Rs. 8,29,632.

Outstandings are Rs. 4,48,536. Debts considered doubtful of Rs. 7,183 are fully provided for. Advances are Rs. 2,23,623 and deposits Rs. 12,703.

Sundry investments are Rs. 1,887. Remittance in transit is Rs. 11,248 and cash and other balances are Rs. 45,293.

The total liquid assets are Rs. 18,56,478.

The profits for the year ended June 1935 are Rs. 3,47,425 against Rs. 4,11,049 for the previous fifteen months and Rs. 3,73,920 for the year ending March 1933. The year-end was changed to June from March in 1934. The profits compare favourably with the profits of 1933 which are the highest during the past ten years. The profits would have been higher but for the low price of sugar and the excise duty levied on the whole production of sugar.

The amount set aside for depreciation and allocation to funds are the highest during the past ten years. The former amount is Rs. 94,836 and the latter Rs. 70,000. In 1932, when profits were even at a lower level of Rs. 2,94,789, a dividend of 12½ per cent., which has been declared this year, was given. The depreciation then was only Rs. 75,320 and allocation to funds Rs. 30,000. The directors are pursuing a conservative policy and the dividend has been raised only by ½ per cent. on the 12 per cent. of the previous year. We can look forward to better conditions next year.

At around the price of Rs. 21-4, the yield is 5.9 per cent tax-free. This is a satisfactory yield and the stock is fully worth the current price.

INVESTMENT BREVITIES

The Tata Oil Mills Company reports reduced earnings for the year ended March, 1935. The profits are Rs. 4,584 against Rs. 17,258, which with the amount carried forward last year totals Rs. 13,412. There has been no depreciation this year as against Rs. 25,000 last year.

* * *

For the half-year ended June, 1935 of the Bengal Nagpur Cotton Mills the profit on revenue account is Rs. 25,131 against Rs. 55,698 the previous half-year. Rs. 19,924 as against Rs. 22,895 has been set aside to depreciation. No dividend has been declared as against 5 per cent. the previous half-year. The carry forward is Rs. 10,879 against Rs. 22,698.

* * *

The position of the Ratibaty Collieries has in no way improved. The trading loss for the half-year ended is Rs. 10,186 against Rs. 4,420. After providing for all charges and writing off Rs. 2,700 to depreciation fund as against the same last half-year the debit balance carried forward is higher at Rs. 1,72,789 against Rs. 1,29,883.

* * *

In the case of Samla Collieries the loss on trading is Rs. 25,064 against Rs. 33,706 for the half-year ended June, 1935 and after allowing for all charges and writing off Rs. 50,000 as against the same last year to depreciation the debit balance carried forward is higher at Rs. 4,88,458 against Rs. 4,04,529.

R & W HAWTHORN LESLIE & CO., LTD.

By R. Gordon Cummings

In view of the improving tendency in the shipbuilding industry and the possibility of the British Government spending more and more on armaments should the suggested "Defence Loan" be floated, it should be worth while examining the position of one of the leading shipbuilding companies.

This company, which was registered as far back as 1886, carries on a well managed business of engineers and shipbuilders at Newcastle-upon-Tyne. The authorised capital is £1,250,000, and up to 1932, when 10s. per share was returned in cash, the issued amount was £716,550 in £1 ordinary shares. Owing to the capital repayment the issued and paid up amount is now £358,275 in 10s. ordinary shares. In May last it was decided to repay at 110 per cent. the £104,372 5 per cent. first mortgage debenture stock, thus freeing the company of loan indebtedness.

Not unnaturally earning power has suffered from the depression which has swept over the shipping industry in recent years. Considering, however, the terrible time through which many similar concerns have gone, the profit record of the last few years is remarkably good. Results for the past seven years ended June 30th, 1935, together with the appropriations are appended:—

		Net Profit.	Ordinary Earned.	Paid.
		£	%	%
1929	...	26,617	3.7	3½
1930	...	36,802	5.1	5
1931	...	35,398	4.9	5
1932	...	14,428	4.0	6
1933	...	*L1,193	...	†2½
1934	...	16,157	4.5	4½
1935	...	23,194	6.8	5

* After crediting an undisclosed amount from contracts reserve.

L. Loss.

† Tax free. Paid out of capital gains account.

As will be seen a loss was reported in only one year, but in view of the undisclosed transfer from reserve, it is impossible to state the full extent of this loss. In the case of the 1935 profits, £278 was transferred to reserve, in order, as explained later, to bring this up to £425,000.

Owing to the conservative policy followed for many years, an exceptionally strong financial position has been built up. Figures, after making adjustments for final appropriations, are given below, covering the two years ended June, 30th 1935:—

		1935	1934
		£	£
Assets—			
Property, etc.	...	666,860	640,372
Patents	...	408	454
Liquid assets	...	491,159	565,189
Total	...	1,158,427	1,206,015
Liabilities.			
Capital—Issued	...	358,275	358,275
Debentures	...	...	104,372
Creditors, etc.	...	260,201	199,197
Reserves	...	525,000	534,222
P. & L. a/c.	...	14,951	9,949
Total	...	1,158,427	1,206,015

Following the above mentioned repayment of the 5 per cent. debentures, it was decided at June 30th last to transfer the net balance of £44,722 standing to the credit of leasehold sinking fund to general reserve, which, by adding £278 from trading profits, was brought up to £425,000. In addition there is a plant extensions reserve of £100,000, thus making the above total of £525,000. In passing it is worth mentioning that the leasehold sinking fund was specifically built up as additional security for the debentures and that the balance transferred to general reserve was after writing off therefrom £10,437 premiums on redemption of the debentures.

The fall in liquid assets and the increase in creditors during the past 12 months can be traced to the extensions to fixed assets and the provision of £114,809 for repayment of the debenture stock. Despite these payments the position is still such that there is a surplus of £231,000.

At their current price of 19s. 3d. the yield on the 10s. ordinary shares is the very small one of 2½ per cent. On the face of things the present price is not justified, but when the full position is thoroughly examined it will be found that the ordinary shares are actually cheap. Disclosed reserves and the profit and loss balance now amount to about £540,000, in addition to which there was investment appreciation of £73,479 at June 30th, 1935, making a total of £613,479 surplus available on the ordinary capital. This makes the break up value of the 10s. ordinary shares 27s. each, a figure well above the market price. Purchasers of the shares must, however, be prepared to see temporary fluctuations before obtaining substantial capital appreciation.

BRITISH COMPANIES IN INDIA

By R. Gordon Cummings

One of the outstanding features in the oil market has been a sharp rise of several shillings in Attock Oil shares, fair amount of buying being attracted by receipt of cabled news that a good showing of heavy oil had been struck at a depth of 7,448 feet in the Dhulian test well. It remains to be seen, however, whether this strike will prove oil in payable quantities. It is worth recalling that a sum of £200,000 has been guaranteed by Burmah Oil to enable Attock Oil to carry out deep drilling tests.

Barsi Light Railway Dividend.

In respect of the year ended March 31st last a final dividend of 3 per cent. making, with the interim of 2 per cent. a total of 5 per cent. is to be paid on the £730,320 ordinary stock. In March last the interim dividend was reduced by ½ per cent. As the final payment is also ½ per cent. below that of a year ago, the total reduction in the year's dividend is 1 per cent.

Eastern Bank Interim.

As for the previous four years, the interim dividend on the issued capital is to be maintained at 3 per cent. Last year the interim was followed by a final of 3 per cent. and a special 3 per cent. bonus, making 9 per cent. in all. The issued capital is £2,000,000 in £10 shares, but as only £5 is called up, the paid up amount of capital is £1,000,000. The bank has branches in Bombay, Calcutta, and other Indian towns, and also in certain other far Eastern countries.

Central Provinces Share Issue.

Shareholders of *Central Provinces Manganese Ore Company* are, I understand, shortly to be offered 100,000 10s. ordinary shares at 20s. each, in the proportion of one new share for every ten now held. The purpose of the issue is to provide funds for erecting an 18-miles long ropeway to the Ukwa mine, which it is now proposed to develop. The share premium of £50,000 arising from this issue will be usd to write off the cost estimated at £50,000.

THE WEEK IN THE EXCHANGES

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Friday, Sept. 27, 1935.

The rooms of the Calcutta Stock Exchange remain closed to-day on account of Mahalaya, the fore-runner of Puja Holidays, beginning on Oct. 3. A holiday feeling was too apparent at the counters, and the volume of business transacted in every section was comparatively small.

The Abyssinian crisis continues to be as uncertain as it has been in the past weeks, and news contradictory to each other are being telegraphed day by day. This, coupled with London market advices has kept the Government Securities very erratic, and 3½% Paper was fluctuating between Rs. 88-4 and Rs. 89-11.

The Jute shares were fairly steady due to better commodity market. With regard to the Jute Mills crisis, it is reported that a meeting of the Association will be held on the 30th instant, when the necessary six months' notice to terminate the agreement will be issued. It is also reported that the Sub-Committee appointed by the Stock Exchange Association has decided to submit a Memorial to His Excellency the Governor of Bengal praying for his intervention in the matter.

No change was noticed in other sections. Call money was over plentiful throughout the week under review. Reserve Bank rate was 3½ per cent.

Government Securities.—The market here followed the tendency of the London market, and as better advices were received, the rates steadily improved. 3½ per cent. G. P. Notes were fluctuating most. They opened quiet on Monday at Rs. 88/4, but firmed up as the session progressed, and after having touched Rs. 9/11 on Thursday, closed at Rs. 89/9. Short and medium dated Loans were also very steady, but owing to scarcity of sellers very little business was done. Long dated Loans had also buyers, but here again due to hesitancy of sellers a small business passed. 3% New Loan was very steady at Rs. 97/4, but no transaction was reported on Thursday up to the closing time, although there were buyers. 3 per cent. Loan 1941 at Rs. 102/3, 3½ per cent. Loan 1947-50 at Rs. 102/15, 4 per cent. Loan 1943 at Rs. 107/3, 4 per cent. Loan 1960-70 at Rs. 105/6, 5 per cent. Loan 1945-55 at Rs. 116/7 and 5 per cent. Loan 1940-43 at Rs. 109/6 were the principal closing figures.

Debentures.—As usual, buyers were there for Port Trust and Municipal Debentures, but with very little in offering. 4 per cent. Port Trusts 1907-37 were dealt in at Rs. 101/12 and 6¼ per cent. 1931/50-60 Calcutta Municipals at Rs. 125/2 and these were the only transactions reported this week. Amongst others, small lots of Darjeeling Himalayan Railways Extension at Rs. 100 and Chowringhee Properties at Rs. 100/8 were done. 6¾ per cent. Rohtas Sugars also changed hands at Rs. 100/8 and Rs. 101. There were sellers of Gohpur Tea Debentures at Rs. 99 and Loobah Tea Debentures at Rs. 100, but with nothing offering.

Preference shares.—Sellers being scarce, especially in Jute Mills issues, very little business was recorded in this section, althouglh there were interested buyers. The transactions reported were Howrah "A" Preferences at Rs. 133 (small lot), Hukumchands at Rs. 109 Northbrooks at 145 and Anglo-Indias at Rs. 150/8. Amongst others Bengal Telephones closed at Rs. 14/2, Spencer & Co. (A) at Rs. 10/4, B. I. C. at Rs. 142 and Elgin Mills at Rs. 140.

Other Investment Stocks.—Bank shares like last week, were rather irregular, Reserve Banks faring worst. Imperial Bank Fully paids closed at Rs. 1460 and Contributories at Rs. 359. Reserve Banks after having dropped down to round about Rs. 117 in mid-week, steadied up to Rs. 120 on Wednesday, but there was again another decline on Thursday, and after touching Rs. 118/4, closed firm at Rs. 119/8. The transactions reported in Railway shares included small lots of Howrah Amtas at Rs. 101, Arrah Sasarams at Rs. 56, and Bukhtiarpur Bihars at Rs. 64. More interest was evinced by buyers, but with scrips in very short supply business could not be done. In River transit Companies a small lot of Port Shippings changed hands at Rs. 16, Calcutta Landing and Shipping at Rs. 13/14 and I. G. N. at Rs. 98. In Insurance Companies, Hindusthan Co-operatives again changed hands at Rs. 27, and there are still some buyers for same round about this rate. A small lot of Mahabir Insurance were dealt in at Rs. 2/2, and Tritons were crossed at Rs. 220.

Cottons.—Although slightly more interest was evident in this section no particular change was noticeable. Bengal Nagpurs were done at Rs. 14/4, Kesorams at Rs. 3/9 and New Victorias at Rs. 1/5.

Coals.—The improved conditions reported last week continued, and interest was shown in this section, although the business resulting was small. A good demand was noticed for Western and New Manbhums, while Talchers had buyers round about Re. 1. Burrakurs were marked at Rs. 11/8, Bokaro and Ramgurs were dealt in at Rs. 11/8, Burra Dhemos at Rs. 2/8 and South Karampuras at Rs. 3/10. Equitables had buyers round about Rs. 34, with no business resulting at that rate. Of the smaller shares, Searsoles were wanted at Rs. 1/5 and Ghusick Muslias at Rs. 1/14.

Jutes.—Since Hessians were steady and very big orders have been received from America, jute shares continued to be steady during the earlier part of the session, but at the close the market was reported to be quiet and easier, with the result that the prices of the shares sagged. Howrahs were fluctuating between Rs. 46/2 and Rs. 47/12 (a small lot having been transacted at the latter rate), and closed at Rs. 46/9. Kamarhattys having risen to Rs. 475 on Wednesday closed at Rs. 464, Clives rose to Rs. 25/8 on Tuesday, but closed at Rs. 25, Nationals had buyers at Rs. 22 on Wednesday, and closed at Rs. 21/4. Anglo-Indias were marked at Rs. 382, Cheviots at Rs. 182, Fort Glosters at Rs. 468 and Fort Williams at Rs. 268/8. Sellers having become cautious, no impression was created due to the Indian Jute Mills Association's failure to bring in the non-member mills to terms, and it is anticipated that if the Hessian market continues to be steady, the rates in jute shares will remain firm.

Electricals.—This section was featureless. Bengal Telephones changed hands at Rs. 18/12. Benares Electrics at Rs. 14/4, Bhagalpur Electrics at Rs. 8, and Patna Electrics at Rs. 17/4 were among the transactions. There were sellers for Shahjahanpur, Cuttack, Mozufferpore, Mirzapur and Upper Jumna Electric shares, but buyers were not interested.

Engineerings.—Bengal Irons and and Indian Irons were still going strong, the former closing at Rs. 3/14 and the latter after fluctuating between Rs. 8/1 and Rs. 8/8 closing at Rs. 8/6. A solitary deal in Tata Iron and Steel ordinaries was recorded after a long time at Rs. 134. Indian Standard Wagons closed at Rs. 47, and Arthur Butlers at Rs. 10.

Sugars.—Buyers were predominant in this section, but with few sellers to respond. A small lot in Bulands changed hands at Rs. 11, and Cawnpores at Rs. 31-12. Samastipurs were marked at Rs. 8/6, Balrampurs at Rs. 16/14 and South Behars at Rs. 13/8.

Miscellaneous.—Paper Mills shares were continuing steady, Bengals were wanted round about Rs. 97, Titaghur ordinaries at Rs. 22 and Deferreds at Rs. 9/4. A special term transaction in India Paper Pulps was recorded at Rs. 164. Of the others, Burma Corporations as a result of London support hardened up to

Rs. 6-12 and Indian Wood Products were marked at Rs. 18/8. B. I C. ordy. closed at Rs. 3/6, Indian Cables changed hands at Rs. 4/12 and Indian Rubber Mfg. at Rs. 14/8.

Teas.—Prices were well-maintained and a fair inquiry continued due to excellent commodity sales both in Calcutta and in London. Dufflaghurs improved to Rs. 12, East Indias recorded Rs. 9/14, Bishnuaths Rs 25/12, Batelis Rs. 4/14, Kodalas Rs. 161 and Tezpurs Rs. 9.

Rubbers.—After continued dullness for a long time a slight improvement was reported from the Straits due apparently to the announcement of a further cut of 5 per cent. in export quotas as from 1st October. Kluangs ($1.00 paid up) were dealt in at Rs. 1/10, Jimahs at $1.55 and Kedahs at $2.20.

BOMBAY STOCK EXCHANGE

(*By Wire*)

(From our Correspondent)

Thursday evening.

Money Market.—Money was easy with inter-bank call at ¼ per cent.

Exchange.—The exchange market was quietly steady with banks selling T.T. at 1s. 6 7/64d. upto November ; 1s. 6 1/8d. December/March 1936 ; 1s. 6 3/32d. April onwards.

Securities.—In sympathy with the sterling advices, securities firmed up. 3½ per cent. Paper improved from Rs. 88-4 to Rs. 89-12 at close. Medium-dated and short-dated securities were in good demand. 1951/54 Loan was quoted at Rs. 97-2 ; 1960/70 at Rs. 105/3 ; 1955/60 at Rs. 113-12 ; 1947/50 at Rs. 102-15 ; 1945/55 at Rs. 116-4 ; 1943 at Rs. 107-3 ; 1941 at Rs. 102 ; 1940/43 at Rs. 109-7 ; 1939/44 at Rs. 108-6 ; 1938/40 at Rs. 108-8 and 6½ per cent. Bombay Development at Rs. 100-10.

Shares.—The Directors of the Bombay Stock Exchange have stopped forward dealings until further notice ; but some shares listed on forward have been transferred to cash section.

Textiles.—This section was steady. Gokaks improved from Rs. 160 to Rs. 163-12 ; Colaba was quoting at Rs. 117/8 ; Indian Bleaching at Rs. 98-12 ; Indore Malwa at Rs. 67/8 ; Lakshmi at Rs. 612-8 ; New Great at Rs. 117-8 ; Simplex at Rs. 66-4 ; and Vishnu at Rs. 1,262-8.

Hydro-Electrics.—Tata Hydros were quoted at Rs. 162-8.

Cements.—This section was firm. Katni Deferreds improved from Rs. 1,900 to Rs. 1,965. Okhas were quoted at Rs. 261-4; Uniteds at Rs. 121 and Gwaliors at Rs. 113-12.

Miscellaneous.—On reports of higher dividend, Bombay steams changed hands at Rs. 305-10. Premier constructions were steady at Rs. 75-8. Bombay Telephones were better at Rs. 103-8 and Bombay Trams at Rs. 144/6. Bombay Petrols were quoting at Rs. 2/15 ; Scindias at Rs. 11, Shivrajpurs at Rs. 29-8 ; Alcocks at Rs. 160 and Ahmedabad Electrics at Rs. 147-8.

Banks and Insurance.—This section improved towards the close. Imperial fully paids were quoting at Rs. 1,470, partly paids at Rs. 363-12 ; Barodas at Rs. 97, Central Banks at Rs. 32-14 ; Bank of Indias at Rs. 120; Reserve Banks at Rs. 118-8 and Unions at Rs. 5-5. In the insurance section, Orientals were quoted at Rs. 4,200 and New Indias at Rs. 38-4 and Vulcans at Rs. 6-14.

MADRAS STOCK EXCHANGE

(*By Wire*)

(From Our Correspondent)

Thursday Evening.

Conditions have not been very different from last week and more or less the same level of prices has been maintained. The political developments on the continent have not in any way affected the situation.

In the giltedged section, 3½ per cent. Paper was fluctuating at about the same level. 3½ per cent. 1947/50 was quoted at Rs. 102-14-6, 4 per cent. 1960/70 at Rs. 105/2, 5 per cent. 1945/55 at Rs. 115-13 and 5½ per cent. 1938/40 at Rs. 108-6.

Textiles.—This section was steady and a slight improvement was noticeable. Buckingham and Carnatics were quoted at Rs. 205, Vasanta Mills at Rs. 109, Kaleeswarars at Rs. 277½ and Cambodias at Rs. 13-2.

Banks.—These shares were rather a shade lower. The fall in Reserve Bank shares was marked and they were at one time quoted as low as Rs. 177. Imperial Bank contributories were quoted at Rs. 357, Indian Banks and Indo-Commercial Banks at Rs. 26-12, State Aided Banks at Rs. 11-12 and Travancore Nationals at Rs. 55.

Plantations.—Some enquiry was noticeable for teas and rubbers were unaffected by reports of increased restriction. Tropical plantations were quoted at Rs. 9-4. Cochin Malabars at Rs. 2, Highland Produce at Rs. 16-8 and Malankaras at Rs. 40.

Public Utilities.—Among electricals, West Coast Electrics were done at par, Karaikal Electrics at Rs. 41, Madras Telephones at Rs. 20-4 and Vellore Electrics at Rs. 14-12.

Among others, Coimbatore Cements were quoted at Rs. 188, Spencers ordinaries at Rs. 8-12 and 'A' preferences at Rs. 10-8.

NEW YORK STOCK EXCHANGE

The market closed firm. Motors and Coppers were higher.

	$
American Telephone	138
United States Steel	45½
Anaconda	20¾
General Motors	45¼
National Distillers	30
International Nickel	30
National City Bank	28
Chase Bank	29¼
Sun Life of Canada	395

LONDON STOCK EXCHANGE

There have been slightly improved conditions on the Stock Exchange. Giltedge which were not subject to much selling pressure were slightly higher than last week's levels. 3½ per cent. Indian Stock 1931 was quoted at 93½, 4½ per cent. 1955 at 111, 4½ per cent. 1958/68 at 114½ and Consols at 83¼, 3½ per cent. Conversion at 103¼, War Loan at 103⅞ and Victory Bonds at 112¼.

Among other sections, Rubbers were strong and Teas were irregular. Oils were steady with the exception of Shell Transport and Royal Dutch which were quoted lower. Minings were firm and active. Industrials were featureless.

THE MANGALORE ELECTRIC SUPPLY CO., LD.

NOTICE

The Fourth Annual Ordinary General Meeting of the Shareholders will be held at the Registered Office of the Company, No. 14, Old Court House Street, Calcutta, on Wednesday the 2nd day of October, 1935, at 3 P.M. for the purpose of receiving and passing the Directors' Report and the audited Accounts for the year ended 31st March, 1935, and transacting such other business as may be brought forward.

The Share Transfer Books of the Company will be closed from 26th September, 1935 to 2nd October, 1935, both days inclusive.

STOCK MARKETS SWAYED BY POLITICAL DEVELOPMENTS

NEW ISSUE MARKET RE-OPENS

By R. Gordon Cummings

By Air Mail

Special for "INDIAN FINANCE"

London, Sept. 16, 1935.

With the Italo-Abyssinian dispute still in a state of flux, it is not to be wondered at that Stock Markets have swayed to every minor change in the political outlook. Earlier in the week there were signs of definite recovery but adverse news from Italy on Saturday led to a fairly general setback this morning.

There is still little business about and with bargain hunters holding off until the last possible minute there is not much in the way of support. Only a small amount of selling pressure consequently leads to a disproportionate marking down in prices.

Following a sharp recovery in giltedged stocks the vulnerability of this market was tested again this morning. The result was a fall of anything up to one point in prices, 2½ *per cent. Consols* closing at 82¾, compared with 83¾, 3½ *per cent. Conversion* at 104, against 104¾, *War Loan* at 104⅜, compared with 105⅛, and 3 *per cent. Local Loans* at 93, as against 93⅞. *India Stocks* have declined in sympathy, the 3½ per cent. being 93, the 2½ per cent. 70½, and the new 3 per cent. ¾ discount.

Prices of Foreign bonds, more particularly those of European countries, have been comparatively quiet. The outstanding feature has been a further steady rise in *Brazilian* loans. *German* and *Hungarian* stocks close firm, but French bonds are weaker.

Sentiment in the *Home Railway* market has again been swayed by the latest weekly traffic figures, which were considered disappointing. Rather from lack of support than from any selling pressure, prices of the leading stocks finish lower, *Great Western* being 47½, *London Midland and Scottish* 18⅛, *Southern* deferred 18½ and *London and North Eastern* 2nd preference 20½. The tone in Foreign Rails has been reasonably good, but business has been so small that quotations have hardly been tested.

Comparatively speaking, the Iron, Steel, and Electrical Manufacturing groups have been the most active. Closing quotations are mixed but generally speaking the undertone is firm. *John Brown* are 17s. 3d., *Dorman Long* 21s., *Guest Keen* 31s. 3d., *Hadfields* 18s., *United Steel* 33s. 3d., *Staveley Coal* 43s. 9d., *Stewarts and Lloyds* 32s. 3d., and *Vickers* 17s. In the electrical equipment group *Associated Electric* are 35s. 3d., *British Insulated* 89s., *English Electric* preference 21s., *General Electric* 62s. 6d. and *Siemens* 22s. 9d. The Electric Supply group has suffered from some precautionary profit-taking and nervous selling, with the result that prices are well below the best of recent days.

In the miscellaneous section, *British Oxygen* have fallen to 106s. 3d., *British Aluminium* to 42s. 9d., and *Dunlops* to 41s. 9d. On fears that the Dutch Guilder may be devalued *Unilevers* have received support. Motor shares are easier, while there has been some profit-taking in aircraft issues.

Breweries close reasonably strong, although here again there has been some profit-taking. *Guinness* are 140s., *Distillers* 91s. 9d., and *Watneys* 71s. Building shares are lower, *London Brick* being 81s. and *Eastwoods* 59s.

Oils have failed to hold an earlier improvement. The only item to enliven the week's business has been a rise in *Attocks* of 4s., 6d. to 12s. 9d. on the development cable discussed elsewhere. *Anglo-Iranian* finish at 61s. 3d., *Burmah Oil* at 76s. 3d., and *Shell Transport* at 69s. 6d.

Rubber shares have continued dull, a contributing factor being the possibility of Holland leaving the gold standard. Encouraged by the improving auction figures, Tea shares have again been bought at rising prices. Interest is broadening, and on the theory that the lower grades will soon rise in price, the buying movement has extended to the shares of the Southern Indian Companies.

Business in the gold share markets is small and on lack of any encouraging factors prices have drifted lower. Tin shares keep reasonably firm, while Coppers have moved up in sympathy with the firmer tone for the metal.

Markets and Geneva.

Ample proof of the susceptibility of stock markets to political influences has been given during the past week. Pending the speech of Sir Samuel Hoare and Monsieur Laval prices drifted to lower levels and business was at times almost at a standstill. Although at the present stage the statements on policy of these two statesmen cannot be taken as decisively encouraging factors the sentimental effect on London markets was noticeable. Prices, particularly of gilt-elged stocks, rallied in no uncertain manner, despite a continued paucity of buying orders. For the time being the public chooses to keep out of markets, a policy the wiseness of which is amply justified by to-day's reaction.

Going back a few weeks readers will no doubt remember that when the Italo-Abyssinian dispute first came to a head, I fully reviewed the outlook for securities. Most of my forecasts have come true. There is still a long way to go, however, before it can safely be said that we are definitely out of the wood. Mussolini has the last and final say and nobody knows what attitude he will adopt in the end.

Investors and speculators will indeed be foolish if they are led away by temporary optimism based on somewhat nebulous hopes of a final settlement of the dispute. It may take many months before political unsettlements become a thing of the past.

While moderate purchases of gilt-edged stocks might now be made, I would strongly advise the adoption of extreme care in picking up industrial ordinary shares.

Commodity shares offer the most promising field for the speculator.

Gold shares are worth attention by both investors and speculators.

Employment and Overseas Trade Figures.

Under happier circumstances the unemployment figures and Overseas Trade Returns for August would have led to a sharp upswing in Industrial markets. They have to all intents and purposes been ignored this time.

Compared with the corresponding date of a year ago the latest Ministry of Labour employment returns reveal that at August 26th last the number of persons in employment in the United Kingdom had risen by 244,000 and the number of people on the employment register had declined by 188,614. Since January of this year the total number of unemployed has fallen by 377,000.

The fall in unemployment has been steadily progressing, the number of unemployed persons on the register at August 26th being 24,977 less than at July 22nd. During the last twelve months the coal-mining industry shows the biggest fall in unemployment, the reduction being almost 51,000. The woollen and cotton industries come next on the list, while iron, steel and engineering disclose falls of almost 28,000.

Further marked recovery in trade is revealed in the latest Board of Trade returns, exports for the eight months of the current year to the end of August having risen by £22,647,627 over the corresponding figures of a year ago, while during the same period imports have declined by £301,166 and re-exports risen by £312,350. Owing to the intervention of the holiday period, the August returns are not so good as the July figures. On the August, 1934 returns, there is, however, a decided improvement. Following the recent trend, exports of manufactured goods are still on the upgrade, a decidedly encouraging factor.

New Issue Market Re-opens.

In view of the political and financial uncertainty of the past few weeks it is not to be wondered at that the new issue market has been an almost closed book. Many issues were waiting to be brought before the public, but owing to the uncertain feeling in the City underwriters were loth to enter into fresh commitments.

The ice has now been broken, lists being opened to-day for two fairly large issues. The first of these is a gilt-edged security and there is little doubt that it will be promptly subscribed. In the second case, however, the public offering, in my opinion, is more in the nature of a test of the reactions of the investing public to industrial flotations.

The *African Railway Finance Company* is offering £987,600 2 per cent. debenture stock, redeemable 1947-51, at 98½ per cent. This loan is guaranteed by the British Government under the Trade Facilities Act. The purpose of the issue is to provide funds for the redemption of an almost equivalent amount of 5 per cent. stock. As the present issue is a relatively short-dated one it will appeal strongly to the money-market, which is always on the search for short dated stocks.

Maclean's, manufacturers of a proprietory brand of tooth-paste and other chemical productions, has been turned into a public company with an authorised and issued capital of £1,500,000, equally divided into 6 per cent. £1 preference and £1 ordinary. All the ordinary are being taken by the vendors, but the 750,000 preference are being issued to the public at 21s. each. As pointed out above, the success or non-success of this issue will decide the immediate future of a number of other flotations.

Iron and Steel Production.

Figures of production in the iron and steel industry for the month of August show declines compared with July last. In the case of pig-iron, output has fallen 3,900 tons to 543,400 tons, while production of steel ingots and castings has declined by 43,400 tons to 759,900 tons. At first sight these figures look very disappointing, but they must be interpreted in the light of seasonal tendencies, the month of August being the height of the holiday period.

On making a comparison with August of 1934 it is seen that pig-iron output has risen by 40,100 tons and steel output by no less than 92,900 tons. Production for the year to date is still considerably in excess of that of a year ago.

Owing to the general unsettled state of stock markets, steel shares have failed to respond to these gratifying figures. Holders should not part with their stock until the political troubles are well behind us. Once again I can safely advise a purchase of the leading shares, such as *United Steel, Guest Keen, Stewarts and Lloyds, Baldwins,* and *Burnell.* A possible favouring factor in a continuance of the prosperous state of the industry is the present agitation for the flotation of a Government loan for the purpose of armament construction.

Artificial Silk Developments.

In my market survey of last Monday I drew attention to a sharp rise of 2s. in the price of *Courtaulds* ordinary shares, following the announcement that the excise duty of 3d. per lb. on staple fibre had been removed. Since then, however, Courtaulds and other artificial silk shares have had a moderate set-back on lack of support.

It is worth while briefly examining the future possibilities of the little known product staple fibre. This is a product which can be made from viscose rayon. When manufactured it is in a form eminently suitable for being made up on both cotton and wollen machinery. At present Courtaulds are the only producers in any quantity of the fibre.

Coincident with the removal of the excise duty, Courtaulds have announced a further reduction of 1½d. per lb., thus bringing the reduced price for staple fibre down to 11½d. per lb., a price which should lead to an ever-increasing demand from the woollen and cotton industries, both of which should be able to make profitable use of the fibre in making mixture yarns. It is reckoned that the cotton industry will be in a much stronger competitive position in foreign markets if it whole-heartedly adopts the new yarn.

I need not again emphasise the fact that *Courtaulds* £1 ordinary shares at 54s. 9d. are amongst the most attractive of the British industrial equities. For the speculator there is scope for a few shillings rise in *British Celanese* second preference shares, which have again reacted to 21s.

Caution is advisable when taking an interest in the cotton trade. Only this week the full report of the *Calico Printers' Association* is to hand for the year ended June 30th. As previously announced profits have fallen by almost £122,000 to £42,969. In order to meet the preference dividend, requiring £150,805, it is necessary to take £100,000 from general reserve, and to reduce the carry foaward by £7,837, to £39,826. Despite the adverse results of recent years the balance-sheet still reveals a very strong position, disclosed reserves totalling £1,800,000. The £1 5 per cent. preference units are, in my opinion, a cheap purchase at their current price of 14s. 9d. For those prepared to take risks I can recommend the £1 ordinary units at 8s. 3d.

Some time ago I suggested that *Whitworth and Mitchell* £1 ordinary shares should be worth buying. The report of this textile company for the twelve months ended June 30th is disappointing, profits having fallen from £74,649 in 1933-34 to only £59,249. After payment of preference dividends, earnings on the £500,000 ordinary capital are 6.7 per cent. compared with 10 per cent. The dividend is reduced from 10 per cent. to 6½ per cent., the final payment being 3½ per cent.

During the year liquid resources were further strengthened and they now exceed creditors by £686,672. As the management is finding it difficult to profitably employ surplus funds, a partial repayment of capital may take place in the near future. So far as the outlook is concerned, the chairman is not too optimistic. He points out, however, that orders on hand are better than at the same time a year ago, while improved conditions and better employment at home should benefit the company. On disappointment with the report the ordinary have fallen to 21s. 9d. At this price they give the very good yield of 6⅛ per cent. In my opinion adverse prospects are now fully discounted.

Industrial Dividends and Reports.

An interesting event is the decision of the directors of *British Power and Light Corporation*, which controls a number of important electrical undertakings throughout the country, to institute the payment of interim dividends on the ordinary capital. The maiden distribution in this respect is to be 2 per cent., which goes against a total dividend of 3¾ per cent. for the nine months to December 31st last. A final distribution of at least 3 per cent. is foreshadowed. If this proves to be correct the £1 shares will not look over-valued at 30s. 6d.

Gaumont-British Picture Corporation announces, in a preliminary statement, that net profits for the year ended March 31st last have increased by £28,268 to £720,483. A final dividend of 4 per cent. is to be paid on the ordinary and A ordinary shares, again making 7 per cent. for the twelve months. Although the 10s. ordinary can be bought at slightly over par, I think that they would be well left alone for the time being.

Although I would not have been surprised to learn of an increase in the interim dividend on *Swears & Wells* ordinary shares, I am pleased to hear that the interim is being maintained at 2½ per cent. Current advices indicate that turnover is on the up-grade, so that a final of more than 5 per cent. can be expected. The shares were hardly affected by the announcement.

Probably with a view to more nearly equalising the interim and final dividends, deferred shareholders of *Beecham's Pills* are to receive an interim of 12½ per cent. compared with only 7½ per cent. in 1934. For the whole of the past year the total distribution was 27½ per cent.

To those still sceptical of the scope for recovery in the revenue of Investment Trust Companies, I would point out that almost all of the recent reports have revealed a rise in investment revenue. Only this week one of the big Scottish companies—*Second Alliance Trust*—reports a rise of £5,217 to £180,866 in gross revenue for the year to July 31st last. The dividend on the ordinar,y stock is maintained at 18 per cent., and over £11,000 is added to reserves and undivided profits. Against depreciation of 8.66 per cent. last year the market value of investments is now only about 1 per cent. below book cost. As an offset to this depreciation there is a general reserve of £555,000.

No Change in Tin Quota.

At the quarterly meeting held in Brussels last week the International Tin Committee decided to retain the export quota for the next three months at 65 per cent. It will be remembered that the existing quota was raised from 50 per cent. at a special meeting of the committee on August 9th.

An interesting point given publicity to by the committee is the statement that, contrary to certain press comments, the condition whereby twelve months' consideration must be given to any proposals for the extension of the existing scheme has already been fulfilled and there is no obligation to arrive at a final decision prior to the date of expiry on January 1st, 1937. It will thus be seen that right up to the last minute the Restriction Scheme can be kept in force for a further period beyond the originally agreed term.

Supplies of the metal from the East are still not arriving in any big quantity, with the result that the shortage of stocks is again becoming somewhat acute. It is expected, however, that increasing supplies will shortly be available, and despite the strong tone at the time of writing, a temporary fall in the price of the metal can be looked for. The tin market has a strong appearance, but until the "backwardation" on forward is eliminated there is bound to be a great deal of uncertainty.

Fluctuations in the price are now somewhat academic in relation to the position of the producing companies. A further batch of satisfactory interim dividends to hand shows that the prevailing trend is again for increased payments. The public unfortunately are still rather sceptical of the attractiveness of tin shares. One day they will wake up to the fact that prices have risen against them. Almost any of the leading tin shares can be bought with impunity.

Kaffir Taxation Problems.

One of the contrary factors to the recent depression in the Kaffir gold share market has been the uncertainty of any alleviation in the existing onerous taxation. Repeated agitations have been made to the South African Government for a reduction and also a complete redrafting of the present method of computation. It is now announced that the Union Government has appointed a Departmental Committee to receive evidence and suggestions, and, after analysing these, to make a report to the Finance Minister. The Committee does not, however, include any members of the Mining industry. Influential interests point out that the Committe is confined in its activities to making a report on the evidence put forward, and is not empowered to make any reductions in taxation.

Hopes of an early readjustment are thus dashed, as at the earliest it will be the next Budget before anything can be done. The leading shares made a moderate response to the formation of the Committee, but soon fell into comparative quietude again.

Sooner or later gold shares will again be bought by the public. Now is the time, however, for the bargain hunters to pick up cheap stock. It is impossible for me to even attempt to forecast when the next upward movement will commence. Delay will not be profitable.

Market Pointers.

I understand that negotiations for the purchase of the ordinary capital of *Coast Lines* are practically completed. This company is controlled by the R.M. Realisation and H. & W. Nelson. If the £2,000,000 ordinary capital is sold this will be to the benefit of R.M. Realisation.

Home Railway traffics for last week were relatively disappointing, the aggregate decline of the four main lines being £34,000. The only company to show an increase was the *London, Midland and Scottish,* traffics of which rose by £17,000.

The report of *Electric & Musical Industries* for the year ending this month is expected shortly. It is taken as granted that last year's dividend of 10 per cent. will be maintained. Some of the optimists are going for a possible increase to 12½ per cent.

Associated Newspapers is maintaining the quarterly dividend on the 5s. deferred shares at 6⅔rds per cent., or at the annual rate of 26⅔rds per cent. The deferred shares have moved very little during the last few months and can now be bought at 24s. 6d.

I have noticed some influential buying of *A. W. Consolidated Stock Trust* 5 per cent. income debentures, now obtainable at 17½. Buyers are going for a 100 per cent. rise between now and Christmas.

Australian gold shares remain quiet. Long term speculators will do well by buying *Commonwealth Mining, Gold Exploration and Finance,* and *Great Boulder Mining and Finance.*

A second interim dividend of 22½ per cent. making 45 per cent. to date on account of the current year, has been declared on *Ashanti Goldfields* 4s. shares. This goes against a total of 40 per cent. for the same period a year ago. The shares can be obtained at the bargain of 54s. 6d.

Ordinary shareholders of *Scottish Power* are offered the right of taking up one new ordinary share at 32s. for each six shares now held. As the price of the old ordinary is 41s. A bonus is involved.

During the year ended June 30th last, net profits of *Staveley Coal and Iron* rose by £51,515 to £326,289. I will deal more fully with the figures next week.

WALL STREET IN AIR MAIL WEEK

MARKETS AGAIN ACTIVE

ALROUND IMPROVEMENT IN PRICES

By F. Rocke.

By Air Mail

Special for "INDIAN FINANCE"

Good business news, rise in steel mill activity and the President's letter to Mr. Roy Howard saying that industry would be given a "breathing space" from further "reform legislation," have all contributed to an active session on Wall Street. There was an alround increase in prices and almost all sections took part in the general movement with the exception of Oils and Utilities. The Saturday short session was the busiest on record after February, 1934 and the turnover was nearly 1,290,000 shares. The market was so strong that even profit-taking was well absorbed. Shares of the smaller automobile companies were strong on merger rumours. Utilities were higher on the announcement made by the Edison Electric Institute to test the constitutionality of the Utility Act, the Tennessee Valley Authority and issue of Federal loans for the financing of municipally owned power plants. The market closed lower on profit-taking and this is considered to be a bullish point.

On the Bond market, Treasury Bonds and other Government obligations were irregular. Speculative Railroads were higher and on the foreign list Italians recovered by a few points.

The Treasury announced on Tuesday that $480,000,000 of the $1,250,000,000 called Fourth Liberty Bonds had so far been converted. Conversion into new bonds accounted for $180,000,000 of the total.

Rails were higher on improved carloadings and the general good business news is considered to be a bullish point for this section.

Negotiations are going on in the oil industry and there have been several reductions in gasoline prices in different localities. The position continues to be unsettled.

The California Oil Producers are carrying on a vigorous campaign to get signatures for the new curtailment agreement. So far 451 signatures have been obtained from operators representing 80 per cent., of the State's production capacity.

Representatives of eleven oil-producing states met yesterday in Oklahama City to enlarge the interstate oil pact approved by Congress and which is now subscribed to by six states.

Shell Oil cut its gasoline price by 2½ c. per gallon throughout its territory. The Standard Oil Company of Indiana also cut its gasoline price by 1½ c. a gallon in the Chicago area. Other large marketing firms on the West Coast have also made similar cuts of 2 c. a gallon.

The daily average production of crude oil in the United States in the week ended September 7 was 2,660,000 barrels against 2,665,000 in the previous week according to the figures of the American Petroleum Institute.

Gasoline Stock at refineries on September 7 totalled 25,925,000 barrels.

Mr. Thompson, the Chairman of the Texas Railroad Commission has ordered a general shut down on the East Texas field to enable assessments to be made of the potential output capacity of the 19,000 wells in that district. This is the first time that such a step has been taken for eighteen months.

The active buying of domestic copper continues. The August sales reached 124,604 tons which is a record for recent years. An increase in the domestic price of copper is expected and Anaconda copper seems to be an attractive purchase at the present level.

According to the *Iron Age* steel mill activity during the week was at 52.5 per cent. of capacity against 50.5 per cent. the previous week. There has been no increase in demand from the automobile industry and miscellaneous demand is showing signs of levelling off.

United States Steel's shipment in August totalled 624,497 tons against 547,794 tons in July and 378,023 tons in August, 1934.

The production in the automobile industry has slowed down and apparently it is concentrating on the production of new models. Despite this fact motor issues were higher and those of the smaller companies in particular. The strength of the latter group was due to the rumours that merger proposals were going on in view of the severe competition from the big "three."

General Motors sales to domestic and world dealers in August totalled 124,680 units against 167.790 in July and 109,278 in August 1934. Sales to domestic consumers totalled 127.346 units against 108,645 in July and 86,258 in August, 1934.

Wholesale automobile financing in July amounted to $1,22,210,919 against $92,069,965 in July, 1934. Retail Financing totalled $119,784,582 against $99,630,687.

Automobile production in August excluding Ford totalled 178,166 units a decrease of 30 per cent. from July but an increase of 7 per cent. over August, 1934.

Business Pointers :

Railway freight loadings for the week ended August 24 were 626,373 cars being 11,367 above the preceding week and 19,456 above 1934 but 11,137 below 1933.

Power output last week totalled 1,756,066,000 kilowatt hours an increase of 12 per cent. over the corresponding week of last year.

Customs receipts in August totalled $37,127,492 the highest figure in any single month for four years.

Sales to consumers of Chevrolet cars and trucks amounted to 99,018 units during August. This is an all time record for that month and shows an increase of 33,623 over the figures for August, 1934.

Exports of iron and steel in July totalled 296,000 tons against 289,000 tons in June.

The excess reserves of the member banks of the Federal Reserve System has reached the new high level of $2,820,000,000.

Publicly financed building construction in August was higher than in any of the past 19 months. The total value was $92,346,700, against $68,635,200 in August, 1934.

September 13, 1935.

BOURSES IN AIR MAIL WEEK

Paris :

The uncertain political situation affected the markets and there was very little business done as operators were inclined to hold off till the situation got cleared. The general tendency was downward and this continued throughout the week. A glance at the table given below will indicate that the prices at the end of the week are considerably below those at the beginning of the week. The fall was the heaviest on the last day. Internationals were particularly affected, Suez Canal shares falling down by more than 400 points. Thomas Houstons, the rise in which has been very consistent during the past few weeks was quoted as low as 152.50 against 160.5 of the previous week.

On the Coulisse, an easy tendency was in evidence and diamond prices tended to decline in the absence of interest. Mining values held their own and price declines were not much. Rubbers were steady and were not affected by the market nervousness. Tins and Oils were uninteresting.

Berlin :

After a cheerful opening on the Bourse at the beginning of the week an irregular tendency was in evidence. Banks and Electricals which were quoted higher at the beginning were lower at the end. But Reichsbanks were higher at 184. Minings were better under the lead of Harpeners and Shippings improved.

The foreign currency control office invites foreign owners of "blocked reichsmark credits" to subscribe to the Rm. 500,000,000 4½ per cent. Treasury Bonds which form part of the one milliard mark loan recently issued by the Reichsbank for the consolidation of unfunded Government credits.

According to the currency control office none of the maturing interest will be transferable, but, in accordance with the Anglo-German financial agreement, it will be handed to British subscribers in the form of 4 per cent. Funding Bonds.

The invested capital will on maturity again become "blocked reichsmark credits."

LETTERS TO THE EDITOR

SUGAR INDUSTRY CRUSHED BY EXCISE DUTY

The Editor,

The *Investor's Supplement*.

Sir,

It is a wonder and a pity that several agents of sugar companies have not disclosed, in the recent balance-sheets, the amounts they paid for Excise Duty on behalf of their companies. The agents of the Basti Sugar Mills and the New Savan Company have, however, the courage to protest against the adverse effects of Excise Duty on the manufacturing profits of sugar companies.

A well-known firm of European share brokers of Calcutta make the following comment in their recent circular :

> "This (sugar shares) section has been quieter and the tone has certainly been aggravated by the issue of the New Savan Report. This report explicitly and vividly shows how unfair the Excise Duty is to investors who have money invested in sugar shares. The large amount of Excise Duty which has been paid to the Government prevents the shareholders from receiving any return on their money and no trade or industry can possibly stand attacks of this type which turn a company's small profit into a heavy loss and the sooner the Government readjust the Excise Duty the better for all concerned, including themselves."

The revenue profit of the New Savan was Rs. 2,02,511, out of which the company paid for Excise Duty Rs. 1,35,356, leaving a profit of Rs. 67,155 subject to depreciation of Rs. 1,32,726 resulting into a carry-forward of *minus* Rs. 54,585.

The revenue profit of the Basti was Rs. 3,25,000 after providing for depreciation Rs. 1,82,000 and for taxation Rs. 2,30,000. The Company paid an Excise Duty of Rs. 2,78,000 thus leaving a net revenue profit of Rs. 47,000. It was out of the carry-forward of *plus* Rs. 2,30,000 that the company would pay Rs. 1,80,000 as dividend to shareholders.

The same tragic story is likely to be told of all other sugar companies except a very few best-situated ones like the Belapur, the Mysore, etc.

Yours etc.,
A Correspondent.

Bombay, Sept. 24.

THE JUTE CRISIS—WHAT IS BEHIND IT ?

The Editor,

The *Investor's Supplement.*

Sir,

It is going round and round in the local press of the failure of the Jute Mills Association to bring the outside mills to terms, and of their decision to terminate the agreement. The outlook is regarded as not at all bright. But has it ever struck any of your readers why the Association failed in their efforts and why, inspite of such a disappointing announcement, the prices of jute shares in general, and that of the prime favourite "Howrahs" in particular are keeping steady ?

When, about three weeks ago, it was known that Agarpara had given notice of withdrawal from the Agreement, the drop in the rates of jute shares began in such a way that it created a regular pandemonium ; and, since then, everybody has been eagerly waiting for an announcement as to what the sub-committee appointed by the Indian Jute Mills Association have decided. Now that it has come, and is pronounced to be not a very satisfactory one, how is it that another tremendous decline in jute shares was checked? Instead, they are going steady, and the outlook appears to be not at all gloomy. Is it because of the fact that, for six months at least, the Agreement is to be maintained (the period of notice), that the apathetic feeling has not crept inside the rooms of the Stock Exchange?

No, Sir, my confirmed opinion is that it is not so. Somebody knows something better. It is not so easy to get a glimpse of what is going on behind the scenes, and in the green-room. Is it not a fact that certain millionaires in the city have come forward lately and picked up big lots of choicest jute shares at considerably low rates ? Have they done this as mere philanthropists, with the object of checking the decline of jute share prices, just to save the several holders from utter ruin ? Or is there herein a clue to the missing links as to what or who made it difficult for the Association to persuade the other mills ? Do these gentlemen not fully realise that the moment the Agreement ceases to operate, all the jute mills will have a common sailing, and perforce to save their own skins, a fresh agreement will then be hastened into ? And the turn the jute share prices will then take can easily be foreseen. The harvest these people will then reap at the Stock Exchange for their holdings can easily be imagined. This is the whole thing in a nutshell, and somebody knows something as to what all this means. This has leaked out, and the jute shares are steady.

Yours etc.,
ONE IN THE KNOW OF IT.

Calcutta, Sept. 26.

COMPANY REPORTS

NEW RING MILLS COMPANY LIMITED

Report and Audited Accounts for the half-year ended June 30, 1935 which show a profit of ...	Rs.	518 9 11
Deducting this from the debit balance brought forward from the last account, namely	Rs.	2,195 14 0
There remains a debit balance to be carried forward to the next account of ...	Rs.	1,677 4 1

The half-year under review witnessed little change in trading conditions which, after a period of almost complete inactivity at the commencement of the year, later improved and continued to be slightly more satisfactory until June, when enquiry decreased considerably. Prices for Bundled-Yarn have unfortunately been very uncertain and the outlook is most obscure and is likely to remain so until reactions to the recent upheaval in the American cotton market can be more accurately gauged.

In the circumstances the Company's mills remained closed throughout the half-year.

Directors.—Messrs. V. H. MacCaw, E. L. Watts and M. A. Hughes.

Managing Agents.—Messrs. Kettlewell Bullen & Co., Ld.

Comparative statement of balance-sheets for the last three consecutive half-years :—

THE BANSDEOPUR COAL COMPANY LIMITED

Report and Audited Accounts for the six months ending June 30, 1935.

The profit on the half-year's working is Rs. 13,132-1-10 and after providing a sum of Rs. 15,111-6-6 for Depreciation the Profit and Loss Account shows a debit balance of Rs. 15,926-1-3.

19,476 tons of Steam Coal were raised during the period under review and 13,837 tons were despatched.

The stock of Steam Coal on June 30, 1935 was 11,097 tons.

Directors.—Messrs. C. G. Arthur, C. L. Phillips and E. L. Watts.

Managing Agents.—Messrs. Jardine Skinner & Co.

Comparative statement of balance-sheets for the last two half-years :—

THE CALCUTTA STEAM NAVIGATION CO., LD.

Report and Audited Accounts for the half-year ended 30th June 1935.

After providing Rs. 92,948-10-0 for Depreciation the balance at credit of Profit and Loss Account is Rs. 73,358-8-1 to which has to be added the sum of Rs. 12,310-12-2 brought forward from the previous account, making a gross total of Rs. 85,669-4-3.

From this has to be deducted Rs. 32,843-8-6 for Income Tax & Commission leaving a balance of Rs. 52,825-11-9 with which it is proposed to deal as follows :—

To pay a dividend of Rs. 4 per share ...	Rs.	33,600 0 0
To carry forward in Profit and Loss Account	Rs.	19,225 11 9
Total ...	Rs.	52,825 11 9

There was a slow but steady improvement in both the Boating Traffic and the Goods and Passenger Sections of the Company's Services during the half year.

The Steam launch "Nila" a second hand tug purchased locally, has been added to the Company's flotilla.

Synopsis of the balance sheet:—

	Half-year ended 30-6-1935 Rs.
Liabilities—	
Capital	8,40,000
Reserves	4,89,026
Debts	1,39,112
Profit & Loss	52,825
Total ...	15,20,963
Assets—	
Block (net)	11,00,148

Stores	44,817
Outstandings	1,00,857
Cash & Investments ...	2,44,736
Total ...	15,20,963

THE INDIAN STANDARD WAGON COMPANY LIMITED

Report and Audited accounts for the year ended March 31, 1935 showing a profit after allowing for depreciation of :	Rs.	2,24,807 0 3
To which has to be added the credit balance from last year ...	Rs.	96,174 1 7
Total ...	Rs.	3,20,981 1 10
Out of this sum has been reserved for Provident Institution Contribution ...	Rs.	7,537 6 0
Leaving a balance of	Rs.	3,13,443 11 10

It is proposed to deal with the balance as follows :—

To pay the dividend due on the Preference Shares for the year ended March 31, 1935 amounting to ...	Rs.	1,37,665 0 0
To pay a dividend of 8 per cent. on the Ordinary shares	Rs.	77,950 0 0
To carry forward ...	Rs.	97,838 11 10
Total ...	Rs.	3,13,443 11 10

The 8 per cent dividend on the ordinary shares which the directors now propose to pay represents a return of 2 per cent. only to the original subscribers of the ordinary capital.

The works were not fully employed throughout the year that has passed.

In the current year orders have been received for a total of 1186 wagons of varying types, but unfortunately the placing of the orders was delayed and manufacture has just only commenced. It is to be noted that a portion of the orders for wagons for 1935-36 required by the Indian Railways was placed aborad.

Directors.—Messrs. Sir R. N. Mookerjee, J. S. Ker, Kanai Lall Jatia, E. L. Watts, Srigopal Bhattacharji and B. N. Mookerjee.

Managing Agents.—Messrs. Burn & Co.

Leaving to be carried forward		22,150 7 3

Output.—Raisings and despatches of all grades of coals for the past four half-years compare as follows :—

30th June, 1935	45,397 tons.	45,444 tons.
31st December 1934	37,985 ,,	38,785 ,,
30th June, 1934	47,445 ,,	47,251 ,,
31st December, 1933	47,915 ,,	49,137 ,,

Market conditions remain unchanged and Kajora Coal is being offered freely at uneconomic prices.

A movement is at present contemplated by a number of proprietors of collieries in the Kajora field to raise the price level of this class of coal by mutual agreement. This, however, may prove difficult and meantime the future can only be considered as very discouraging.

Directors.—H. D. Townend, R. A. Towler and M. Solomon.

Managing Agents.—Shaw Wallace & Co.

THE DUNBAR MILLS LIMITED.

Report and Audited accounts for the half-year ended June 30, 1935, which show a net profit of	Rs. 17,866 0 5
Deducting this from the debit balance brought forward from the last account namely, ...	45,889 6 1
there remains a debit balance to be carried forward to the next account of ...	28,023 5 8

Provision has been made for Depreciation by a transfer of Rs. 40,000 from Reserve Fund Account.

The addition to 'Block Account' is comprised principally of further equipment for the new Weaving Shed.

In so far as Woven-goods are concerned demand after a period of almost complete inactivity at the commencement of the year subsequently improved and clearances continued to be on a satisfactory scale until June when enquiry rapidly decreased. At the time of writing bazar sales are poor, but an improvement is looked for in the near future with the commencement of buying for the 'Puja' season.

The prices received for manufactured goods have remained most unsatisfactory and unremunerative, dealers being consistently unwilling to raise their limits above the rates paid at the end of 1934 when the cost of raw material was considerably lower.

The Bundled-Yarn market was fairly active throughout the half-year and it was consequently decided in April to start night-shift working in the spinning department in order to reduce overhead running costs.

The general outlook at the moment is distinctly obscure and is likely to remain so until reactions to the recent upheaval in the American cotton market can be more accurately gauged.

Directors.—Messrs. V. H. MacCaw, E. L. Watts and M. A. Hughes.

Managing Agents.—Messrs. Kettlewell Bullen & Co., Ld.

BOWREAH COTTON MILLS CO., LTD.

Report and Audited accounts for the half-year ended June 30, 1935, which show a net profit of	Rs. 29,847 13 4
To this has to be added the credit balance brought forward from the last account namely	,, 5,814 11 8
and the amount transferred from Renewals and Extensions Account ...	,, 20,000 0 0
giving a total of	,, 55,662 9 0
Out of this there has been set aside for Depreciation	,, 50,000 0 0
leaving a credit balance of ...	,, 5,662 9 0

which is carried forward to the next account.

The addition to 'Block Account' includes the cost of installing the further 75 looms referred to in the last Report and other Machinery for the Weaving Shed.

In so far as woven-goods are concerned demand after a period of almost complete inactivity at the commencement of the year subsequently improved and clearances continued to be on a satisfactory scale until June when enquiry rapidly decreased. At the time of writing bazar sales are poor, but an improvement is looked for in the near future with the commencement of buying for the 'Puja' season.

The prices received for manufactured goods have remained most unsatisfactory and unremunerative, dealers being consistently unwilling to raise their limits above the rates paid at the end of 1934 when the cost of raw material was considerably lower.

The Bundled-Yarn market was fairly active throughout the half-year and it was consequently decided in April to start night-shift working in the spinning department in order to reduce overhead running costs. It was unfortunately found necessary to discontinue night work almost immediately on account of trouble with the labour, but a second attempt in July was more successful and steady working has since continued.

The general outlook at the moment is distinctly obscure and is likely to remain so until reactions to the recent upheaval in the American cotton market can be more accurately gauged.

Directors.—Messrs. V. H. MacCaw, E. L. Watts and M. A. Hughes.

KARNATAK CO-OPERATIVE BANK.

The annual report for the year 1934-35 of the Karnatak Central Co-operative Bank, the biggest and the foremost bank in the Southern Division, shows a gross and net profit of Rs. 3,05,461 and Rs. 52,957 respectively.

A 5 per cent. dividend has been declared and a sum of Rs. 1,000 has been contributed to the Village Uplift Fund. The bad-debt fund has been increased by 50 per cent.

The Bank has established branches at nine places in the district. The lending rate on advances against agricultural produce has been lowered to 5 per cent., and that on gold and silver to 4½ per cent. The lending rate to co-operative societies has been reduced to 6¼ per cent.

THE SALEM-ERODE ELECTRICITY DISTRIBUTION CO., LTD.

The Directors beg to submit their Report and the audited Accounts for the year ended 31st March, 1935.

Accounts.—The Revenue Account for the year shows a profit of Rs. 35,297-2-2 as compared with Rs. 21,513-6-11 for the previous year.

After deducting :—

	Rs.	A.	P.
Income-Tax and Surcharge ...	4,839	0	9
Managing Agents' Commission ...	3,529	11	5
Total ...	8,368	12	2

there is a nett profit of Rs. 26,928-6-0 which, when added to the balance of Rs. 4,887-13-3 brought forward from last year, leaves a balance of Rs. 31,816-3-3 at credit of Profit and Loss Account.

The Directors recommend that this be utilized as follows :—

	Rs.	A.	P.
Write off Preliminary Expenses Account	8,829	1	1
Write off Brokerage and Commission Account	911	8	0
Transfer against Expenditure during construction ...	22,075	11	2
Total ...	31,816	3	3

Progress.—Salem—The Revenue from energy supplied to Domestic consumers shows a satisfactory increase as compared with the previous year, but while there has been a number of additional Industrial consumers connected to the Company's mains the income from energy supplied for industrial purposes shows but little improvement.

Erode.—The rate of progress in the Company's business at Erode is disappointing and the Directors regret that the units sold since April show no improvement as compared with the corresponding period in 1934. It is hoped that negotiations, which has recently taken place with the Erode Municipality, will result in a demand for current for Street Lighting and the extension of the Company's business generally in the Erode area.

Consumers connected.—The following table shows the number of consumers connected and the connected load as at 31st March, 1935 :—

	Number of consumers	Connected Load in K.W.
Salem-Domestic ...	892	524.632
Salem-Industrial ...	38	310.905
Salem-Street Lighting ...	...	45.380
Erode-Domestic ...	240	115.068
Erode-Industrial ...	3	9.9

Directors.—A. G. Hawkins, H. P. Sutcliffe, and J. MacGregor.

Managing Agents.—Messrs. Octavius Steel Co., Ltd.

Synopsis of the balance sheet :

	Year-ended 31-3-1935 Rs.
Liabilities—	
Capital	5,49,500
Forfeited shares	125
Debts	50,037
Profit and Loss	31,816

THE PORT SHIPPING CO., LTD.

The Directors beg to submit the Audited Accounts of the half-year ended 30th June, 1935.

After providing Rs. 40,250-0-0 for Depreciation there is a balance at credit of Profit and Loss Account of Rs. 65,349-15-8 which the directors recommend should be disposed of as follows :—

	Rs.	A.	P.
Dividend of six annas per share ...	52,808	4	0
and carry forward to current half-year ...	12,541	11	8

There has been a slight improvement in the trade of the Port and repairs have been fully maintained.

Directors.—Kanailall Jatia and A. Aikman.

Managing Agents.—Messrs. Andrew Yule & Co., Ld.

WORLD OF INDIAN FINANCE

Calcutta, Wednesday Evening.

There is no change to report in money market conditions. It is only for formality's sake that Clive Street bankers continue to quote ½ per cent. as the interbank call money rate. But none so poor as to take money at ½ per cent. Hornby Road is, however, bothered by no scruples of this kind. The rate quoted in the Western Capital is ¼ per cent., lenders. The main influences in the money market remain the same, except that the purchases of sterling by the Reserve Bank in the second week were on the small side. The latter factor means that the inflow of funds into the market against its sales of sterling must be inconsiderable. The absence of any large-scale applications on the weekly sterling tender day can be easily accounted for when we remember that the present rate of Treasury Bills is not likely to induce the transfer of funds from London to India. It was, from this point of view, suggested last week in these columns that applications for Treasury Bills might not come up to anything like what they have been in the latter half of September. Total amounts tendered on October 1, were Rs. 3.08 crores as compared with Rs. 6.08 crores on September 24 and Rs. 9.55 crores on September 17. In spite of applications being on an appreciably restricted scale, the average discount rate was a shade more favourable to the Treasury. The average rate of accepted tenders this week was 0-11-8 per cent. per annum as against 0-11-10 last week and 0-14-11 a fortnight ago. As in the preceding week, Intermediate Treasury Bills were suspended as from the second day. The tap-rate was open only on September 25, on which date intermediates sold came to the substantial amount of Rs. 3.05 crores. At the time of writing, the statement of the Imperial Bank has not reached our hands; it is, therefore, difficult to say whether this week's intermediates also have been taken up by the Imperial Bank as were the intermediates of last week. The Banking Department of the Reserve Bank, however, bears impress of the sales of intermediates. The deposits by banks with the Reserve Bank have gone down from Rs. 38.94 crores to Rs. 35.79 crores. The return shows a corresponding bulge in Government deposits from Rs. 9.74 crores to Rs. 13.45 crores.

Another interesting feature of the Reserve Bank statement is the continued decline in active notes in circulation. In the week ended September 20, notes in circulation were Rs. 157.95 crores; they have declined to Rs. 156.32 crores by September 27. How continuous is this process of decline is shown by a comparison of the latest figure with that in the first week after the Scheduled Banks started maintaining their deposits with the Reserve Bank. On July 5, notes in circulation were Rs. 162.54 crores. There has thus been a reduction of Rs. 6 crores in active note circulation in less than three months. But this fact becomes all the more glaring if we remember that between July 5 and September 27, total note issue has risen from Rs. 188.82 crores to Rs. 194.12 crores. The increase in the total of note issue is due to the substantial return of silver rupees from circulation. The real position in this regard is best understood from a comparison of the notes held in the Banking Department as on July 5, with those held on September 27. On the earlier date, notes held in the Banking Department were Rs. 26.28 crores; and they had risen to Rs. 37.81 crores on September 27. That is, notes held in the Banking Department have gone up by Rs. 11½ crores in this period. This shows, on the one hand, a greater vogue, amongst banks, of depositing all possible surplus funds with the Reserve Bank and the reduction in the money kept in the till, and, on the other hand, a continuous shrinkage in trade demand for finance. In this connection, it is interesting to note that rupee coin has again shown an increase—from Rs. 57.54 crores on September 20, to Rs. 58.01 crores on September 27. Between July 5 and September 27, the increase in rupee coin is Rs. 5¾ crores. This point must be borne in mind in understanding the increase in the total note circulation. It has been argued, in some quarters, that the note circulation has now reached a high level at Rs. 194.12 crores. The rise in circulation is only apparent. So far as note circulation in India is concerned, there are two kinds of notes in circulation, namely, paper notes and silver notes. To the extent that there has been an expansion in paper note circulation, there has been a contraction in the silver note circulation. On the contrary, the active note circulation is definitely less than it was three months ago. This is the real conclusion which emerges from a study of the Reserve Bank returns as well as the consolidated returns of the Scheduled Banks.

The developments discussed in the above paragraphs are largely responsible for the increase in the total resources of the Banking Department from Rs. 39.86 crores on July 5 to Rs. 60.27 crores on September 27. The Reserve Bank does not appear to have made as good or as proper a use of increased resources. Investments stand at the puny figure of Rs. 5.43 crores. In the last few weeks, investments have been actually showing a decrease. The investment portfolio has shrunk by Rs. 80 lakhs since September 6. One would have thought that with larger resources at its command, the Reserve Bank would expand its investment portfolio. It may be added that, at the very commencement, Investments were shown at Rs. 5 crores, being the securities transferred by the Government to the Reserve Bank in lieu of reserve fund. Barring slight changes amonst the investments held, Reserve Bank has not, during its first half-year, pursued anything like an active open market policy or scientific investment policy. For aught we know, the direction and guidance of the money market under the auspices of the Reserve Bank shows no marked change as compared with what we were accustomed to when there was departmental management of currency. It is time that the Reserve Bank authorities realise the necessity for endowing their monetary policy with a definite personality and individuality. Lack of such personality is due, amongst other reasons, to the absence of the Governor.

Owing to the Puja holidays, there will be no issue of "Indian Finance" next week.

LLOYDS BANK
LIMITED
INCORPORATED IN ENGLAND
1677

COURTESY

Lloyds Bank has never lost sight of the fact that the success of a business depends above all upon the efficiency and loyalty of its personnel.

The fundamental reason for the consistent growth of Lloyds Bank is the maintenance, by every member of its staff, of the tradition of personal courtesy and helpfulness which has been handed down from the leisurely days of private banking.

Branches in the East:
CALCUTTA, 101-1, Clive Street and 37, Chowringhee, DARJEELING, RANGOON, 45, Phayre Street and 75, China Street, BOMBAY, KARACHI, LAHORE, AMRITSAR, DELHI, NEW DELHI, SIMLA, RAWALPINDI, MURREE, SRINAGAR, GULMARG.

The latest advices that we have received from our London correspondent go to show that Sir Osborne Smith might postpone his departure to India on account of the uncertainty that prevails as regards voyages in the Mediterranean and the Suez. If the information furnished by our Correspondent proves true, we should consider that it is altogether unsatisfactory for the market that the present kind of amorphous policy should continue. If Sir Osborne should feel hesitant to undertake travel owing to the disquieting developments as regards Italy and Abyssinia, travel by Air gives him a freedom and charter which these threats of war cannot affect. The place of Sir Osborne is in India; and the sooner he arrives the better for the Reserve Bank and for all concerned. The money market will heave a sigh of relief as soon as it learns that he has started on the return voyage.

The exchange market has been a shade quieter for near positions owing to easy money. On the weekly sterling tender day, applications for £75,000 at 1s. 6 1/8d. were received and allotted in full.

The closing rates are: 1s. 6 3/32d., October 1935-December 1936 T.T., with January-March T.T. available at 1s. 6 1/8d.

Bills may be quoted: 1s. 6 3/16d., for near and 1s. 6 7/32d., right through to December 1936.

Money was very easy indeed. There were no borrowers. The quotable rate is ½ per cent. for inter-bank call money.

Firms' money for call, three days' notice and seven days' notice quoted ¾ per cent. onemonth, twomonth and threemonth deposits quoted ¾ per cent.; fourmonth deposits 1 per cent.; and twelvemonth deposits 2 per cent. But banks are reluctant takers of term money and have no use for call money.

TREASURY BILLS

Tenders for Rs. 2 crores of 3 months' Treasury Bills were opened on Tuesday, October 1. The total amount offered was Rs. 3,08,00,000. Tenders at Rs. 99-13-3 per cent. and above were accepted in full and those at Rs. 99-13-0 per cent. allotted 65 per cent. Lower tenders were rejected. The total amount accepted was Rs. 2 crores, the average rate of accepted tenders being Rs. 0-11-8 per cent. per annum.

Tenders for Rs. 2 crores of 3 months' Treasury Bills willl be received on Tuesday, October 8. Successful tenderers should make payment on Thursday, October 10. Other conditions are as usual.

Three months' Intermediate Treasury Bills will be sold from October 2, to October 7, at Rs. 99-13-3 subject to the condition that their sale may be discontinued without notice at any time during that period.

Three months' Intermediate sold on September 25, amounted to Rs. 3,05 lakhs.

During the week ended September 27, bills for Rs. 1,00,00,000 were renewed in favour of the Issue Department of the Reserve Bank.

STERLING TENDERS

On Wednesday the 2nd October 1935 tenders to the amount of £75,000 @ 1s. 6 1/8d. were received and were allotted in full. Lower tenders were rejected.

£1 million will be offered on Wednesday the 9th October 1935. Successful tenderers will have to take delivery of the allotments on Thursday the 10th October 1935.

The total amount of sterling purchased by the Reserve Bank of India during the week-ended the 27th Sepember 1935, was £190,000/- @ 1s. 6 1/8d.

JUTE POSITION CLARIFIED

It was a clear, precise and forceful speech which Mr. S. K. Scott, the Chairman of the Indian Jute Mills Association, made early this week at the special general meeting of the Association convened to consider the question of giving notice of termination of the working arrangement between the Association and the outside mills. Mr. Scott has succeeded in completely clarifying the present position ; and his remarks should go a long way in curing such misunderstandings as were engendered by the events of the last few weeks. The resolution which was passed unanimously was quoted in our last week's comment on the jute position ; but we may again set out the resolution at full length in view of its far-reaching importance and in view of its relevancy to our present comments. The resolution runs as under:

> "That the requisite six clear calendar months' notice required by clause 2 of the agreement dated the 21st January, 1933, and made between the Indian Jute Mills Association and the outside mills be given by the Association to the outside mills, *viz.*, the Adamjee Jute Mills Ld., the Agarpara Co., Ld., the Gagalbhai Jute Mills Ld., the Ludlow Jute Co., Ld., and the Shree Hanuman Jute Mills, on the 30th September, 1935, to terminate the said agreement as from the 31st March, 1936."

Mr. Scott is careful to explain that such termination of the working time arrangement was not made in any spirit of retaliation or resentment—though there was some justification for both—but with the object "of removing an obstruction to the formation of a scheme based on the principal of equality for all, thus obtaining for the industry a stability which recent events have shown to be impossible under the existing arrangement and secondly of manifesting our determination to take such action as will definitely rule out the possibility of a recurrence of a situation of the nature recently experienced." He emphasised that the determination of the arrangement was the first step in the plan for preparing a scheme of rationalisation of the industry as suggested by the Government of India.

* * *

Mr. A. Aikman stresses this point further in the precise and concise speech which he made in seconding the resolution. Mr. Aikman wishes it to be clearly understood that the notice of termination of the agreement was given as an essential part of a programme in the reorganisation of the industry on the lines suggested in the Government memorandum. Even if one of the outside mills had not declared its intention to resign from the agreement under certain circumstances, Mr. Aikman argues, a resolution like that passed on September 30, would be put before the Association if not on that date, "certainly at no far distant date." He thus explains the significance of the step taken by the Association.

> "It is the first step in the creation of machinery by means of which I confidently believe we shall be able, with a modicum of legislation to re-arrange and manage our own affairs, giving each and every unit in the industry a fair participation in India's share of the world trade in jute goods and of obtaining a stability for our trade, which it has not possessed for many years."

From all of which, it is clear that the Indian Jute Mills Association have taken the Government's reply in the right spirit and that they are in earnest about preparing plans that should secure the approval of the authorities. Mr. Scott was at great pains to examine the statement of the Government that "the existing demands could possibly be supplied by a quarter of the machinery now available, and the highest demand ever reached so far could probably be satisfied by a third of the existing mills." If the Government are correct in this view, it follows that the rationalisation of the jute mills in India should prove extremely difficult as such rationalisation would mean the closing down or scrapping or disuse of three-fourths of the existing machinery. The Chairman of the Association submits the statement of the Government to a searching examination ; and, in the result, he proves conclusively that the Government have not understood the position correctly ; and that, in real fact, the redundant machinery in the industry in these days of smaller world demand is only 25 per cent. to 30 per cent. of the whole. In thus reducing the estimate of redundant plant to roundabout a quarter of the whole, Mr. Scott has made the task lighter for formulating a scheme which should satisfy the approved canons of industrial rationalisation.

* * * *

If the determination of the working time agreement is not a gesture of pique, it does not also imply a breakdown of the working time agreement and the commencement, from April 1, 1936, of a period of indiscriminate and unrestricted production. The assurance which Mr. Scott gives in this connection should be properly understood and correctly appreciated by those interested in the jute trade. The following passage merits the careful attention of everyone concerned: "We, by this resolution, give six months' notice of the termination of the arrangement with the outside mills, but only three months is necessary for notice of modifiaction or termination of the main Association Agreement, subject to the terms with the outside mills, and thus *three months remain in which we can strive to obtain the unanimity of all interests, present our case to Government and in event of failure finally decide what hours of works we as an Association should embark on.*"

* * *

This interregnum will be devoted to the fashioning of an agreement on which the support of as large a number of mills as possible can be secured, and for the evolving of a scheme which will stand the tests proposed to be applied by the Government. 'Eavesdropper' had pointed out, in an earlier comment, that the Association held the view a year ago that unrestricted production would be the height of folly. There were fears, in certain circles, that the present determination of the agreement with the outside mills might mean the opening of an era of unrestricted production. Mr. Scott sets these fears at rest. He repeats his view that unrestricted production would be disastrous. The situation would, he is convinced, become infinitely worse through the relentless trade war waged between all the mills, resulting in the ultimate unsaleability of manufactured goods and the consequent closing down of a number of uneconomical units. For these reasons, there can be no question of determining the present agreement without having another agreement ready to succeed it. The preparation of this new agreement will be taken up in the interval. It will thus be seen that from the point of view of the jute mills, the views expressed both by

Mr. Scott and by Mr. Aikman are definite, categorical and re-assuring. It is also clear that the aim of the Association will be to prepare a scheme that will fulfill the test of rationalisation laid down by the Government of India.

* * *

Both the speeches, however, omit to refer to the two other conditions suggested by the Government, namely, the well-being of labour and the interests of the agriculturists. Mr. Scott would have done well to make a definite commitment that such scheme as his association would put forward would pay the fullest attention to the interests of the jute growers. There is an incidental—but not essential—reference to labour in his speech ; but there is no mention whatsoever of the producers of jute. We can only hope that this omission is not deliberate. For, no scheme which the Jute Mills Association might devise will have any chance of public support unless it can be proved to guarantee a better price for the raw material. In our last week's comment on the jute crisis, we emphasised that the solution that held the field—in fact, the only possible solution—was that furnished in the columns of *Indian Finance*. Any measures that the Government may now take in regard to the jute trade must embrace planning for jute and planning for jute industry ; and if the problem is understood in this way, there is no getting away from the main heads of the plans proposed in these columns. We should strongly commend our earlier comments to Mr. Scott and his association for careful study as forming the best basis for the discussion of a scheme that will embrace the jute trade from farm to factory.

THE DEPRESSION AND THE "RECOVERY"

Few people amongst economists or businessmen would find it easy to collect their impressions of the present state of business or the immediate prospects ahead. Such a task is even normally difficult ; but it has been exceptionally so during the last three years, when world economy continues to be characterised by the principal features of the depression and when, at the same time, signs of recovery are visible. The course of this recovery has been none too smooth. When it first appeared in the Autumn of 1932, many were inclined to hail it as the end of the depression and as the harbinger of renewed prosperity. But the more careful observers sounded a note of warning that the causes which brought about the depression had not ceased to operate, that, in fact, it was difficult to see their end and that, therefore, it would be unwise to set much store by such improvement as had occurred. Though the experiences of 1933 and especially of its latter half, tended to confirm the views of the pessimists, the recovery has never come to a halt during the last three years, though there has been a frequent slowing down of the pace, and even, occasionally, a setback. Thus to the complexities of world economy was added the strange phenomenon of a recovery which started somewhat mysteriously, and which has dragged on in the face of numerous obstacles. The obstacles to international trade, which formed the principal cause of the depression, have increased during these years ; and their effects on international trade have been as severe in the latter, as in the former, half of the depression. There can be no doubt that, if no attempt is made to remove or mitigate these barriers, international trade will continue to suffer, with obvious consequences to the internal economy of each nation. It is also not impossible that the tension of international politics may lead to an accentuation of economic nationalism. In such circumstances, it is obviously difficult to size the position of world economy.

* * *

Indeed, one hardly knows what to say of the depression. Those who have held the view all along, and we may count ourselves among the number, that the depression is not of a cyclical nature and that it is but a transition leading inevitably to a regime of national economic self-sufficiency, can feel satisfied with the accumulation of evidence in support of their view. There is no doubt that with the best will in the world the nations cannot succeed in restoring to world economy the principal features of the pre-depression, not to say pre-War, period, and that, many of the features of the economic policies of the present have come to stay. But, at the same time, as we have repeatedly pointed out in our comments on this question during recent times, we have arrived at the stage when the expansion of international trade is necessary even for the progress of the national economic policy of each country. The most important of the changes that have occurred in recent years, may, therefore, be said to be the community of interest in the progress of the present recovery for the supporters of both national and international policies. Thus it is a task of paramount importance to appraise the progress of the recovery, its potentialities in the immediate future and the present state of world economy as a whole.

* * *

The most valuable service for such a task is rendered by the *World Economic Survey* prepared by Mr. J. B. Condliffe and published annually by the Economic Intelligence section of the League of Nations. Mr. Condliffe's methods of enquiry are familiar to those who have studied the earlier issues of this publication. That a member of the Economic Intelligence section of the League has at his command as much data as can be gathered from the various countries of the world may be easily guessed. But it is not so easily appreciated that to handle this vast volume of material one needs to have a correct perspective which will ensure a proper approach to the problem and which will not, at the same time, involve any manner of prejudice. It is

obvious that, if one were to continue to regard world economy as one whole and international trade as the only index of the fluctuations in the nations' economic fortunes, one finds oneself all at sea in the bewildering variety of movements of price and of production. Equally would it be a folly to assume that the world has ceased to be an economic unit and that peoples are shut up in economic compartments walled by the political boundaries. In strict truth, world economy in its present position is in the dim borderland between these two extremes. The economic unity of the world may be said to have disappeared in so far as its essence lies in a common international standard and the automatic adjustability of national price levels. But the links between the national economies are numerous and strong. It is true that the world has no longer a common international standard. But national price levels do continue to react to external influences. The monetary policy of one country sets up reactions in the prices and other economic conditions of other countries. Though markets are often reserved and quotas and restrictions are the vogue, the measures adopted by one Government in regard to a particular commodity, doubtless, exert their influence on the prices of the same commodity in the rest of the world. It may be pointed out, as an instance, that the depreciation of sterling exerted a downward pressure on commodity prices. In the same way, the measures, which the American Government adopted to improve the position of the cotton-growers in the United States, have had the effect of raising the price of cotton all the world over, though, at the same time, the price of American cotton was well above the world parity.

* * *

There is thus a close interconnection between the nations. And a world economic survey has, therefore, to take account of the growing disparateness of national economies and the continuance of the links which still bind them together. Without bearing this fact in mind, it would be impossible to get a clear idea either of the recovery that is still in operation, or of the persistence of the salient features of the depression. If one has to sum up the present position as a whole, it may be said that the recovery, which was in origin and essence national, continues to be so and that the depression still remains as a factor to be reckoned with by national economic policies and as a series of problems to be tackled by the common effort of the nations. The features of the recovery as they have been detailed by Mr. Condliffe may be said to follow from its predominantly national character. Equally it may be said that the continuance of the depression as a world phenomenon is the logical result of national economic policies which have involved an increase of the barriers to international trade.

* * *

It may be useful to examine the position of the depression as such. If the depression is regarded as the resultant of innumerable economic disequilibria, of prices and costs, of supply and demand, of prices, internal and external, industrial and agricultural, of interest rates, short term and long term, then there is, indeed, little or no improvement to record in all these, five or more years. For these disequilibria cannot be corrected except through the restoration of the common international monetary standard and through some measure of freedom of international trade. The war of the exchanges has by no means come to an end, though there have been occasions on which the Central Banks have shown a better sense of co-operation than in the past. The Belgian devaluation was carried out with the least disturbance to finance and trade ; and the Belgian Government have, indeed, set a good example in agreeing to forego almost all the competitive advantages of currency depreciation. But the discords of the international exchanges have not been reduced. The decision of the gold standard countries to attain equilibrium though deflation raises its own apprehensions in the minds of all well-wishers

of world economy. The attitude of Great Britain and the United States to the sterling dollar ratio continues to be one of suspicion. At best, it is "an attitude of watchful reluctance to take the initiative in promoting a general agreement," which "is apt to cause a succession of depreciations and devaluations which result in first one country and then another gaining a temporary advantage." When the exchanges are so threatened, it is idle to look for any general movement of prices in the direction of equilibrium. The manipulation of exchanges is inspired by the desire for advantage in competition. Prices are hardly free to do their most important job of weeding out uneconomic producers and thus help the adjustment of supply to demand. In fact, the price structure has been altered fundamentally both in the national and in the international spheres, for within the boundaries of a nation there are innumerable commodities which have been helped by the State by means of protection, quotas and price restrictions of various kinds. In the international markets, exports are often helped by bounties of various kinds from the State. The adjustment of disequilibria by changes in prices is, therefore, a more or less forlorn hope.

* * *

One is thus thrown back on the national economies for a study of current trends. Mr. Condliffe has, however, attempted to enlarge the scope of such enquiry by recognising the identity of the gold bloc on the one hand, and the sterling area on the other. The United States stands in a category all by itself not only because of its lack of close ties to either of the two but also on account of its concentration on the New Deal. Mr. Condliffe inclines to the view that, "as the programme has passed from the experimental to the administrative stage, it has proved more and more to be of a regulatory rather than a revolutionary character." The more novel and unorthodox experiments have tended to recede into the background. He records his opinion that "during 1934 considerable progress appears to have been made towards reorganisation of American international economic relations and the foundation has been laid for a vast credit expansion in the future."

* * *

In the sterling area, and particularly in the United Kingdom, the chief reliance for recovery has been based upon balanced budgets, some relief of taxation and above all cheap credit. The indices of production continue to show an increase. The purchasing power within the country has been fostered with some care during these years and has helped to no small extent the comparatively hopeful outlook of business. But in Great Britain, some lack of balance is evident from the continued depression of the basic export industries and shipping and from the relatively slow recovery in foreign trade. The general assumption that the sterling area has hit, through luck or through a fortuitous combination of circumstances, on the wisest monetary policy is somewhat rudely shaken by Mr. Condliffe when he sets an array of figures to show that the balance of commodity trade in the sterling area has moved adversely. In fact, he attributes the sharp depreciation in sterling in March to the strain on the balance of payments ; for the balance of trade of the sterling area has tended to be adverse to about 83.54 million sterling in 1934 as compared with 1933.

* * *

The position of the gold bloc countries calls for no special comment. Their difficulties were aggravated by the heavy strain on their balances of payments arising from the return flow of capital to the United States, the advantage derived by the American exporters from the depreciation of the dollar and the downward tendency of sterling and its satellites. The technical monetary position of the gold bloc currencies was of little or no avail against the increasing economic difficulties. Deflation was proving to be more unpopular. And it was in this state that the Governments, notably in France, started to experiment with

new monetary and economic policies. The only gold countries, in which there was some mitigation of depression were Poland where deflation was wholehearted and the Netherlands which gained some relief from higher rubber prices and from immediate effects of tariff protection. The exchange control countries, among which have to be numbered Germany and Italy, have been sincerely experimenting with a policy of progressive autarchy, and in so far as they have attempted to balance their national economies by the restriction of imports and by the reclamation of waste as part of such a campaign, they have tended to reduce the general demand for the exports of raw material-producing countries and deepened the depression.

* * *

There is thus no uniform progress in the various countries of the world ; and a similar lack of uniformity is noticeable when we consider world economy by groups of commodities, or by the various branches of business activity. Agricultural prices have in a few instances made a better showing ; but on scrutiny it will be found that the improvement is due either to Government measures, as in cotton, or to restriction, as in tea and rubber. The burden of adjusting to changed conditions has been thrown on "narrowing segments of world trade," namely, the agricultural commodities and particularly the cereals. Industrial production has been on the increase in most countries outside the gold bloc ; but it is conditioned by the cheerless outlook of the export industries in countries like Great Britain. It is not a little significant that among the western countries, building is most conspicuous for its improvement, for it is most sensitive to the cheap money policy and the internal development programmes on which national governments have fastened of late years.

* * *

It may be said, therefore, that the recovery, which began in 1932 and which has proceeded slowly and unevenly ever since, has been superficial rather than fundamental and that it has relied on national markets and national policies. This should indicate to some extent the immediate prospects ahead. Doubtless, the rearmament, which most nations are now engaged in, should give a fresh impetus to this recovery and emphasise its predominantly national character. But there is no mistaking the limitations of a purely national and superficial recovery. Some expansion of international trade is necessary if only to give a little freedom of movement for the executors of national policies. The evidence of increasing economic activity over a wide area can hardly warrant any suggestion of the final passing of the depression. On the other hand, there is the danger of the reappearance of the tendency of falling gold prices, unless the authorities in each country make use of the large potentialities of currency expansion. But "given economic peace and international co-operation, the signs of economic improvement in the summer of 1935 are more encouraging than at any preceding period since the depression began."

Can Suez be closed ?

Now that sanctions against Italy are a practical issue, and, possibly, an imminent development the study published by the Geneva Research Centre in collaboration with the Foreign Policy Association of the League of Nations explaining the position in this regard is quite opportune. The author, Mr. Raymond Leslie Puell, President of the Association, states that there may be room for disagreement on the following points :—

1. Is the Convention of 1888 providing that the Canal "shall always be free and open in time of war to every vessel of commerce or of war" in force to-day ?
2. Does the British Government have legal jurisdiction over the Canal ?
3. Does the League Covenant supersede the the Convention of 1888 in so far as the two are incompatible ?

Underlying the immediate problem of whether the Canal may be closed by the League is the fundamental question whether the great canals of the world—Suez and Panama—should be internationalised. In 1832, British forces were landed at Ismailia and the canal was closed for several days. During the Franco-German war of 1870 the warships of both belligerents passed through the canal. A critical situation arose on the outbreak of the Russo-Turkish war in 1877, when the British Government warned Russia that any attempt to interfere with the canal would be regarded "as a menace to India" ; and Russia acquiesced in that reservation. In the Spanish American War, the Egyptian Government allowed the Spanish fleet on the way to Manilla to coal at the canal only after a promise to return to Spain. In the Russo-Japanese War in 1904, Britain, allowed Russian warships to use the canal in spite of the fact that they were proceeding to fight Japan, a British ally. On the outbreak of the Great War, Britain ordered that no enemy vessel was to enter the Canal ; but Turkey recorded her protest that it was a violation of the Convention of 1888.

* * *

Egypt is the territorial sovereign over the Canal ; but she is not a member of the League, nor has Egypt acceded to the Convention of 1888. Disagreement may arise as to whether (*a*) the 1888 Convention is still in force and (*b*) whether the British Government has a legal right to protect the Canal. It is open to Italy to challenge the League's authority under Article 20 of the Covenant on the ground

that the Convention of Constantinople of 1888 is still in force and that Egypt, instead of Great Britain, has jurisdicion over the Canal.

CAPITATION CHARGES

A great deal has been said, written and discussed about capitation charges for the last fifty years. The end of it all is that India has to bear to-day a heavier financial burden than fifty years ago. Nor is there any prospect that the justice of India's case will be conceded, except in vague platitudes. This was made clear, if it needed clarity, by the Commander-in-Chief, who turned down, in the Council of State, Mr. Hossain Imam's resolution on the subject. Sir Phillip Chetwode effused with "sympathy" of the sort that insults one's intelligence. The time is inopportune, His Excellency said, for demanding that the British Government should pay more to India for training and keeping for the major part of their service a large army of occupation, of no military use to India. Three years ago, Government appointed a tribunal to go into the question. The tribunal's recommendations and Government's inaction conveyed the drill command "As You Were." The British Exchequer made a contribution of £1,500,000 to Indian Military expenditure ; and, having done that, perpetuated the *status quo*. According to India Office estimates the British contribution should be between 10 to 15 million pounds. So Sir Philip Chetwode "sympathetically" was glad that the subject was being kept alive, in the faith that the British Government would eventually pay more. If the world is mad, as the Commander-in-Chief has remarked more than once, there is obviously a method in the madness of Britain. And India is not so mad but that it recognises the method of madness.

IMPROVIDENT PROVIDENT SOCIETIES

A Karachi Correspondent writes :—

Karachi has passed through a panic not unscathed. A number of Provident Funds Societies, exploiting the credulity and ignorance of village folk, have come within reach of the not too long arm, in this case, of the law. Charges of criminal misappropriation and misapplication of funds have been framed, which project on a big screen public insecurity from the perils of improvident provident funds companies. The exposures that have followed these charges show irresponsibility merging into criminality, with the policy holder as the milch cow. The recent crashes are solely due to wilful waste and extravagence, combined with a sense of security against the exploitation of the public. The shock has served to quicken an overhauling of the management of Provident Funds Societies. Managing Directors and Directors have been, in the order named, the autocrats in some of these societies to the undoing of policy-holders and subscribers. Balance sheets do not disclose the actual position ; necessary information is withheld: figures are manipulated for window-dressing: economies are neglected—this in the aggregation of mismanagement, even where there is no misappropriation. Their financial standing is unsound and only a careful husbanding of resources and ruthless retrenchment would enable them to outlive serious leakage.

Managing Directors and Directors consider subscribers and policy holders as of no account or as interlopers. Directors leave everything to the Managing Directors who control the concern without hindrance. Expenditure mounts telescopically within the vicious circle of extravagance and irresponsibility. And when, on top of this, the complete constitutional elimination of the policy-holder is sought, it is time that a halt were called. The policy-holder and the subscriber are the head, trunk and legs of Provident Societies and their authority in the management ought to be supreme. The proposal that future amendments to rules put up by members should be subject to the approval of Directors is a flagrant repudiation of company management. That the proposal has been made shows the lengths to which complete immunity from legal control is prepared to go.

On the eve of the Puja festivities, let me wish my readers all that is best and sweetest in life. For those who have not lived in Bengal, it is difficult to realise what the Puja means and what the Puja stands for. It is a festival at once extensive and intensive—extensive in the sense that it is not a short brief ceremony like the *Diwali* in Bombay or the *Pongal* in Madras; intensive because each town and village, each home and individual in Bengal are permeated by the Puja fervour and jollity. I have used the words "fervour and jollity" advisedly to stress that the Puja is at once a religous ceremonial and a social function. The religious and social trends are so mixed that you can hardly know where the one ends and the other begins. All that you know is that the old and the young, men and women, the orthodox and the heterodox, the spiritually-minded as also the materialistic folk—everyone without distinction of age or faith hails the Puja as the season when the Family God is worshipped in pomp and state, when family members whom avocations of life have separated meet annually, when those who have are liberal to those who have not, when old feuds are forgotten, when neighbours exchange greetings in place of acerbities, when the Patriarch of the family beams with pride and pleasure as he distributes presents of gay clothes to all and sundry, when the old exchange confidences of old times and the new revel in the new stories on screen and stage, when after due and becoming religious rites, there is feast and festivity in cloying plenty and in utter abandon. For once, the caution of thrift is unheeded; the pique of self-importance is set aside; the restraint of prudish decorum is held in temporary suspense. Here is an occasion for a manifestation of human urges and desires in their full force, in their manifold forms, in their pleasantest harmony.

Here is the key, then, to understand Bengal and the Bengalees. It is a full-blooded race; and, for this very reason, they have suffered most in these anaemic times. Yet, if the State and the leaders had solved the problems of Bengal with understanding and sympathy, with imagination and courage, this is the last province that need have known any privations. If the Bengalees are a full-blooded race, their land is endowed by Nature with gifts equally lavish. Mother Earth produces a world monopoly in jute. The gracious Himalayas are best fitted for tea, another crop of world value. From the womb of earth, coal and iron, the twin symbols of the modern age, are forthcoming in abundant quantities and of a high quality. Jute, tea, coal and iron—all these lend themselves to planning in such a way that maximum prosperity is assured. Amidst the travails of recent developments, a plan for jute looks like taking form and shape. Tea, too, enjoys some measure and manner of planning; but it is yet to be planned on a basis which spells enduring prosperity —and prosperity not only for the few but for the many. It is a tragedy that, through restriction and reorganisation programmes, tea estates under foreign ownership or management have made good showing; the estates owned by Indians are, however, in doldrums. The peculiar problems of the latter have hardly been understood by the general public. There can be great relief afforded to them if public interest is aroused and State help is arranged. And the help, at the start, will have to be in the form of a Tea Industrial Bank, complete plan for which could be easily worked out from the reports of the Mitra Banking Committee. By the same token, while shareholders have had occasional good fortune, labour on tea estates is doomed to a bleak and penurious existence. It is time that Bengal (and, with it, Assam) realised that much could be done if the problem of tea is resolutely tackled.

As for coal, Bengal will do well to realise that just as the Punjab, the United Provinces, Bombay and Madras are developing a country-wide electric supply system from hydro-electric sources, a kind of 'grid' has to be planned for this province through the utilisation of second and third class coal in huge power generating plants installed right in the coal areas. The fortunes of coal will take a roundabout turn if the neglected seams are thus put to use for producing electricity which will cover the whole presidency. Now to iron. If the Bombay interests control the steel industry to-day, cannot the Bengal interests through the Indian Iron and Steel Company secure a place in the steel world; for, every condition is propitious, the earlier preparations and the existing plants are apt for expansion, the additional outlay will be well within the capacity of the local capital market and must be easy as easy to a firm associated with Sir Rajendranath Mookerjee.

It is customary, on the occasion of the New Year, to make impressive and far-reaching resolves. There is, I know, the taunt that most new year resolves go awry. But there is, I urge, a tremendous

PROSP

With the Sugar Industry (Protection) Act of 1932 giving protection to the Industry till 1946, those districts and places of the country where a rich and good variety of sugar-cane is grown in abundance and which are also heavy consuming centres of sugar have as yet a thriving field for Sugar Mills. Vizagapatam District has a very suitable soil and climate and grows one-third, *viz.*, about 35,000 acres of the richest sugar-cane crop in the Presidency. Anakapalli, where the present Factory is situate, is considered a very good centre for sugar-cane and Government have established Sugar-cane Station at Anakapalli. Within a radius of fifteen miles, about 15,000 acres of rich sugar-cane are cultivated. The Central Research Station which also receives a subsidy from the Imperial Council of Agricultural Research has been established at Anakapalli. The Superintendent, Anakapalli Research Station, in one of his Reports says :—

> *"For any concern, if it is to be worked from a business point of view and make the Industry substantially stable, the production of cane should be at the lowest rates possible with higher tonnages. This is possible at Anakapalli."*

The statistics of the past reveal that due to the excellent under-ground water-supply, cultivation of sugar-cane around Anakapalli is assured irrespective of seasons. Unlike Bihar and United Provinces, the sugar-cane grown in Vizagapatam District and specially in Anakapali centre is of the rich variety. Anakapalli cultivates on a large scale J. 247 type of sugar-cane which has a brix of 18 per cent. sucrose of 16 per cent. with a purity of 86 per cent. and which keeps on for more than one and a half months even after attaining its maximum maturity, and gives 35 tons of millable cane per acre which is very useful for late crushing under factory conditions.

The normal consumption of refined sugar in Ganjam, Vizapagatam, Godavari and Kistna Districts is more than 6,000 tons. With the development of the Vizagapatam Harbour, this consumption is bound to increase. Further because of up-to-date and cheap shipping facilities from Vizagapatam Harbour which is only twenty miles away from the site of the factory, the products of this Company can easily be shipped at competitive and cheap rates to the sea-ports of Madras, Southern India and Burma and the cost of freight, unlike on sugar manufactured in Bihar and United Provinces, will be very low thus enabling the products of the Company being marketed at competitive prices and ensuring good profits.

In 1934, the Sree Rama Krishna Co-operative Industrial and Credit Society Ltd., was promoted as a Co-operative Society at Thummapala, and a Fifty-Ton Sugar Factory was erected. The Factory is located right in the midst of the sugar-cane area and is by the side of a river and is only two miles away from the Railway Station. A good metalled main-road passes by the Factory. The whole of the work of erection was carried on a co-operative basis and the block-account is very cheap though the buildings are of a very substantial type. The latest type of crushing and refining machinery is installed in the Factory. The present Company is formed to take over at cost-price this ready-built and ready-to-operate factory and to increase the capacity of crushing and refining to 100 to 150 tons per day. The Directors feel that the extra cost involved in raising the capacity of the Mills will be very little as the buildings are sufficiently large to house a plant of about 250 tons per day and refinery needs little extra machinery. Only the crushing machinery will have to be supplemented.

Anakapalli and its surrounding area of about 1,000 square miles are full of palmyra trees. The Directors have carefully surveyed the possibilities as to the availability of Palmyra Gur for this factory and on a conservative basis estimate is that about 4,000 tons of Palmyra Gur can easily be available from February to December at below Rs. 18 per Putti of 500 lbs., which will mean a saving in cost-price of manufactured sugar. Further, the Company will be able to save excise duty of Rs. 2 per bag (of 1½ cwt.), as sugar manufactured from Palmyra Gur is exempt from excise duty. The Directors thus expect that the Mills will be ensured of working throughout the year and that this continuous working on sugar-cane and Palmyra Gur will be advantageous to the Company as compared with most of the Bihar and United Provinces Sugar Mills both in respect of lesser administrative charges and larger profits.

The Directors are very confident that there will be a steady and continuous supply of good variety of sugar-cane (J. 247 and other good types) available to the factory at reasonable and cheap rates as the acreage of sugar-cane cultivated around Anakapalli is more than 15,000. Further some of the farmers of this area are share-holders of this Company and are interested in the success of the same. The Directors have already begun entering into agreements with the farmers for a continuous and steady supply of sugar-cane for the year 1935/36.

The Directors feel that all the necessary ingredients for success of a sugar-cane factory are available at Anakapalli namely, ready-built and spacious buildings, well-equipped factory, continuous and steady supply of sugar-cane at low rates, a good supply of Palmyra Gur at cheap price and a good selling market for the manufactured products at its very door. The Directors are already in correspondence with the manufacturers of machinery for increase of the plant and it is expected that before the Factory begins work in early

Office of the Andhra Engineering Co., Ltd., Vizagapatam.

ECTUS

December, the necessary supplementary machinery for crushing 75 to 100 tons per day and for refining Palmyra Gur shall have been installed and ready to operate. The over-head charges will be reduced by the Factory being able to work with sugar-cane during the season and with Palmyra Gur out of season.

Mr. D. L. Narasimharaju, B.A., B.Sc., (Eng.) London, A.C.G.I. who has considerable local knowledge and influence and who has good experience of Sugar Factories will be in charge as the Managing Director of the Andhra Engineering Co., Ltd., who are appointed as the Managing Agents of the Company.

ALLOTMENT

The minimum subscription upon which the Company will proceed to Allotment, according to the Articles of Association is 20 per cent. of the Capital, *viz.*, Rs. 60,000. As about double the amount of required capital has already been subscribed, the Directors have proceeded to allotment.

PROMOTION MONEY

No Promotion Money has been or will be paid.

PRELIMINARY EXPENSES

Preliminary expenses payable by the Company are estimated not to exceed Rs. 3,000.

DIRECTORS

The Articles of Association contain the following provisions with regard to qualifications and remuneration of Directors:

> 84 (*a*) The qualifications of a Director shall be his holding shares of the nominal value of Rs. 1,000 in his own name. The Ex-Officio Director is exempted from holding the qualifying number of shares.
>
> (*b*) The Directors may be paid a fee not exceeding Rs. 5 for every meeting that they attend in addition to the travelling expenses, if any.

DIRECTORS' INTEREST

Messrs. The Andhra Engineering Co., Ltd., are the Managing Agents of the Company and Mr. D. L. Narasimharaju, B.A., B.Sc., (Eng.) London, A. C. G. I., is interested as the Managing Director of the Andhra Engineering Co., Ltd., and Mr. C. M. Kothari, B.A., LL.B., is a partner of Messrs. Kothari & Sons, who are partners of the Adhra Engineering Co., Ltd., in the Managing Agency of the Company.

The other Directors are interested to the extent they hold that office and are entitled to remuneration under the Articles of Association.

AGREEMENTS

Copies of Agreement entered into with the Andhra Engineering Co., Ltd., Vizagapatam, and the Sree Rama Krishna Co-operative Industrial and Credit Society Ltd., Thummapala can be seen in the Registered Office during office hours.

BROKERAGE AND COMMISSION

The Company will pay an under-writing commission of 5 per cent. and a brokerage commission of 2½ per cent. to approved Brokers or Agents.

APPLICATION FOR SHARES

Application for shares should be made upon the form accompanying this Prospectus and sent to the Registered Office of the Company or to the Company's Brokers or Bankers together with the money payable on application. When no allotment is made the deposit will be returned in full and when the number of shares allotted is less than the number of shares applied for, the surplus amount paid on application will be appropriated towards the amount payable on allotment and any balance will be returned to the applicant. Failure to pay instalments on the due dates will render all amounts paid previously liable to forfeiture and the allotment liable for cancellation.

Prospectus and forms of application can be obtained at the Registered Office of the Company or from its Brokers.

momentum supplied by resolves to one's thought and conduct and plan. On the Puja day, may not every Bengalee resolve that the vast potentialities of his land must be translated into actualities and that God help him in playing a part in this splendid and fruitful transformation? And may not every foreigner, who has received hospitality in Bengal, resolve likewise: "May it be vouchsafed to me to do my bit to help Bengal realise her great self, to help every Bengalee share in her great riches. So help me God." The Puja is a fitting season when all of us who have been born or who have lived in Bengal should resolve to prove our worthiness to the land we live in.

A selection from the wardrobe of memory of days long gone by has sometimes the delicate quality of reminiscence. Audiences come and go; new actors assemble on the stage; the orchestra tunes up on a different note; even applause has another tempo. The corridor of change stretches a long, long way and sometimes the perspective is awry. That is the drawback of delving into the past—a drawback that does not exist in a volume of selected speeches and writings of Mr. Sachchidananda Sinha, who has filled so long so large a space in the public life of Behar. The selection, an admirable one, covers a period full of portents for India, during which Mr. Sinha was always an arresting figure. A social reformer, a political leader, a Council and Assembly member, a Deputy President of the Assembly, a President and a Finance Member of the Behar Council, a journalist and a member of many Committees and Commissions, Mr. Sinha's public service is both distinguished and deserving. The volume of selections reflects, where it does not register, Mr. Sinha's intimate association with all public movements in the national cause. The volume is dedicated, with fine feeling, to the Rt. Hon'ble Sir Tej Bahadur Sapru. and has a foreward by Mr. C. Y. Chintamani. Of Mr. Sinha, as a friend and host and humourist, I have unforgettable impressions. Patna has claimed Mr. Sinha as its own, while my lot has been cast elsewhere. The volume revives many memories and, across the bridges of years, I stretch a cordial hand of old friendship and fellowship.

Sir Phillip Chetwode's reply to the modest request of Mr. Kalikar that the intake of cadets in the Dehra Dun Military Academy should be increased from 60 to 120 a year betrayed an amazing obliquity. His Excellency's explanation that young Indians are not available in sufficient numbers to warrant the suggested increase and his regret that sons of Zemindars and Sirdars are indifferent to careers in the Army is another instance of the mental reservations that isolate the Treasury Bench in the Assembly from popular elements. The plea that sons of Zemindars and Sirdars alone are eligible for careers in the Army is untenable. The best material is available in abundance in the upper middle and professional classes, who, in mental and physical calibre and in character, are on a higher plane than youths of a conservative class with a wrong sense of values. The myth of martial communities has been exploded; another has been released by the Commander-in-chief. Leadership is not a hereditary quality; least of all is leadership the monopoly of a sheltered class without any character-forming contacts. His Excellency's reference to political and religious influences that are brought to bear in the selection of officers puts out of court the class on which the Commander-in-chief would build up India's army cadet corps. Having introduced and expanded communalism in the public services, it is not surprising that the taint is spreading to the Army. Sir Phillip Chetwode's generalisations on the subject are admirable; but they do not cover Mr. Kalikar's query nor do they allay public disquietude.

'Miss, give me 5400 Calcutta. . . . . . Hullo, hullo, is that 5400 Calcutta?'

'No reply from 5400 Calcutta'.

All is quiet on the Port Trust front. Mr. Elderton, while in England, avoided London as far as possible; and, while in London, he avoided the popular restaurants and the habitual rendezvous. In Calcutta, he has, likewise, found it necessary to cultivate the sly ways of the cat. If the suspense is a torture to the soul for the interests concerned, it is a trying embarrassment for the Chairman of the Port Trust. He has to be furtive in his movements, guarded in his replies and evasive of engagements. To a superficial observer, his may appear a position of compelling importance; but it is the kind of importance which is truly and vastly irksome. I said, at the start, that all is quiet on the Port Trust front. Not quite. I must make this amendment; for, I find that the Bridge Commissioners have not been altogether idle during recent weeks. For example, they have promulgated the rules and regulations for the staff that will be employed or engaged in the construction of the Bridge. Now that this all-important question of staff has been disposed off, the commissioners will, perhaps, take up the next topic in the order of importance, namely, the settlement of the contract. Are we in for more delay? Will the Puja holidays cause further postponement? How

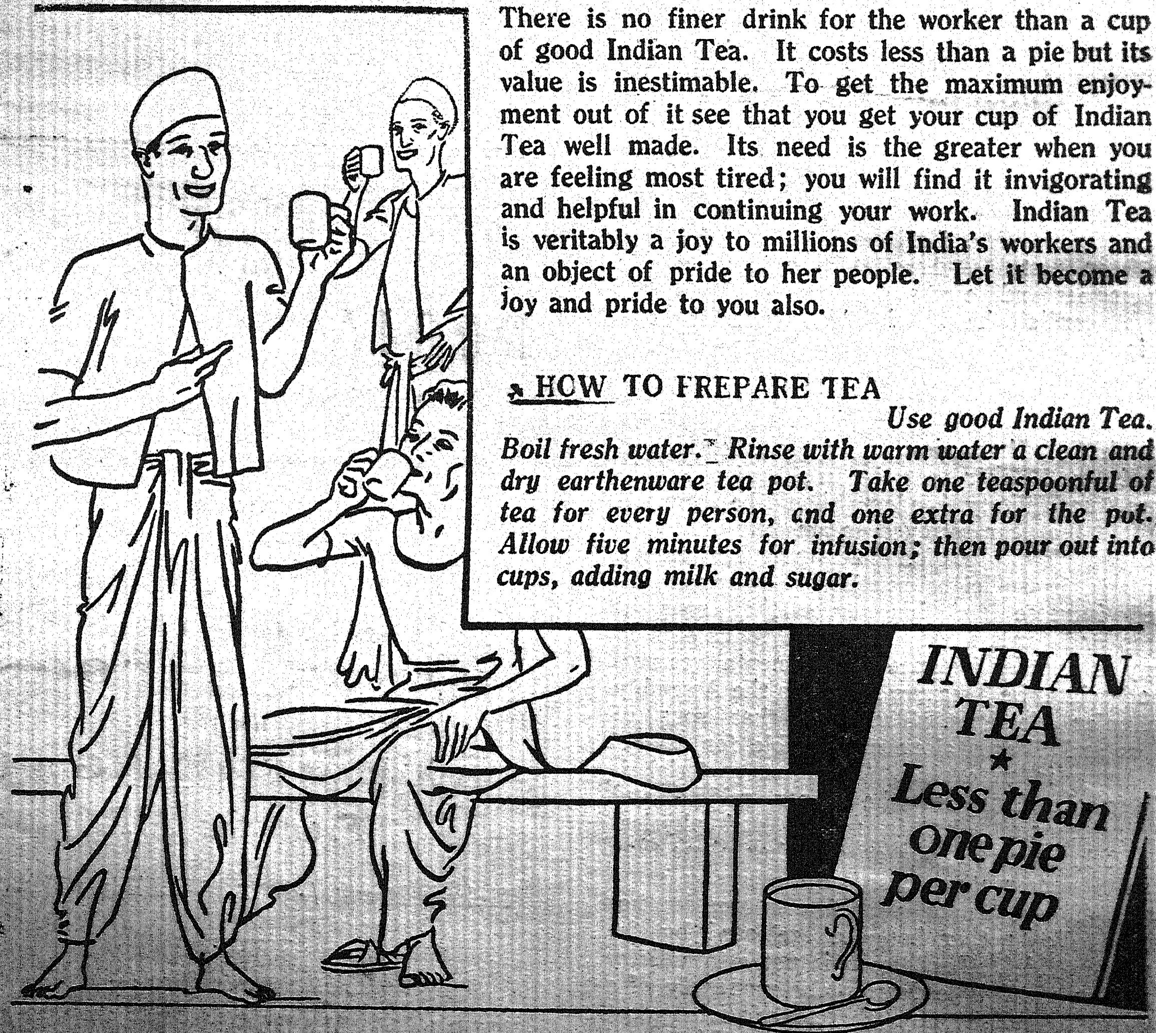
INDIAN TEA

low in price - but highly beneficial



There is no finer drink for the worker than a cup of good Indian Tea. It costs less than a pie but its value is inestimable. To get the maximum enjoyment out of it see that you get your cup of Indian Tea well made. Its need is the greater when you are feeling most tired; you will find it invigorating and helpful in continuing your work. Indian Tea is veritably a joy to millions of India's workers and an object of pride to her people. Let it become a joy and pride to you also.

HOW TO PREPARE TEA

Use good Indian Tea. Boil fresh water. Rinse with warm water a clean and dry earthenware tea pot. Take one teaspoonful of tea for every person, and one extra for the pot. Allow five minutes for infusion; then pour out into cups, adding milk and sugar.

India's joy and pride - **INDIAN TEA**

long will this veil of secrecy shroud the issue about which the world is agog? There may be good reasons for all this secrecy; but there is every probability that secrecy might be misconstrued as uncanny planning and plotting. It is such misconstruction which accounts for the Howrah Bridge figuring twice in the question paper in the Assembly. I am both against too much hush-hush and too much dilatoriness. There is a paramount consideration which should compel expedition. On the contract being settled, a loan will have to be raised. There is a time and season for the raising of loans in India. Too much thinking on the event Hamlet-wise might mean that the Port Trust will miss the appropriate time and the proper season. Beyond November, the capital market in this country is hardly propitious for loan issues. Between now and November is a short space of time; and much has to happen. I hope that whatever happens will happen to be for the best—it should reflect glory on the judgment of the Bridge Commisssioners and spell prosperity to national interests.

Our Simla correspondent suggests that, in a short while, the *personnel* of the committee for Company Reform will be announced. To get competent members from Bengal and Bombay for such a committee should prove an easy job as they account for a considerable number of joint stock enterprises. Madras has, however, a modest record in this behalf; but the critical judgment of South India will, for this reason, have also the merit of being disinterested judgment. From this point of view, I would like to see Mr. Narayandas Girdhardas on the committee. He has been, for over a decede and a half, on the Board of the Indian Bank. He was, for long, connected with the United India Life. He knows Company Law both in theory and practice. He has, above all, a mental poise which pre-eminently fits him for work on a committee. He was in the Assembly for a session; and he understands the public point of view in all questions. He would be an invaluable asset not only for Company Law reform in general but for insurance law in particular. If competence, not canvassing, counts, Mr. Narayandas must find a place on this committee.

"The Ottawa Pact", the Editor observed last week, "is the bugbear of the conscientious economist." But to Mr. Nalini Sarker belongs the credit of not fighting shy of it. His latest publication, *A Study of the Ottawa Agreement*, is true to type. It bears evidence of quite laborious work at figures and statistics, and at their presentation in the form in which conrlusions can be drawn. Mr. Sarker is rarely, if ever, content to present economic theses without the support of adequate facts in their most concrete form, namely, statistics. The academic economist may find them inconclusive owing to his making a fetish of the open mind. But the average man can have no doubt that Ottawa has, on the whole, tended to fetter our foreign trade, confer a vantage on British imports into this country and handicap our exports to the rest of the world. Mr. Sarker brings out his points clearly; and the brochure is well worth the careful perusal of our legislators who would otherwise have only the official document to guide them.

My friends in Bombay have chid me for the views of *Indian Finance* on the appointment of Sir Otto Niemeyer. *Indian Finance* is believed to have deserted the national cause and under-rated the importance of the enquiry which is now entrusted to what I may call a single-white commission. To all of which charges we can well plead not guilty. The very first issue of this journal brought out the importance of financial questions in constitutional reform; and the appointment of Sir Walter Layton as Financial Assessor to the Simon Commission, I have, immodestly enough, attributed to the series I wrote at that time. The pages of *Indian Finance* will bear the best testimony to our interest in the question of the financial relations between the Centre and the Provinces. Every time this question was topical, it received the fullest treatment. But, it must be admitted, it is far from easy to do justice to it. It is more than any one can do to avoid the Scylla of partial treatment of certain provinces and the Charybdis of unscientific allocation of revenues. We in *Indian Finance* have inclined to the view that inter-provincial wrangles, which are most likely, if not sure, to occur if the question is left in the hands of an all-brown enquiry, must be avoided. It is understandable, therefore, that our feeling at the announcement of Sir Otto's appointment is not one of an outraged nationalist sentiment. But I heartily share the resentment against making this enquiry another all-White one, instead of a white *cum* brown affair. Surely, there are men in India who could render Sir Otto valuable—I should say, indispensable—help in arriving at just decisions. The Federation has justly sent a protest, in the tail of that of the Bombay merchants' chamber; and I am hoping that the Government will not be swayed by considerations of *izat* nor risk another serious misunderstanding with the public.

"EAVESDROPPER"

(*Continued from page 1169*)

conditions of present-day Japan and Germany bear a close resemblance. The rearmamentt programme, which, after the conscription ordinance, has assumed enormous dimensions, has been responsible for the heavy increase of national debts "to unheard-of heights" on the one hand, and the shortage of raw materials and foodstuffs on the other. This shortage of food and raw materials is mainly due to the fact that the imports of war materials press hard on the import of other commodities. Japan is now in the same position, and, if the heavy increase of war expenditure has any effect on national economy, as it should have, it must be to bring about a similar shortage of essential raw materials thus impeding industrial activity.

(FROM OUR CORRESPONDENT)

Bombay, September 30.

Official press notes are generally not informative. They are often excellent illustrations of language concealing, not revealing, thought. The press note issued by the Director of Information on the operation of the Sykes scheme, is an exception. The scheme has well stood wear and tear for two years—a gruelling experience under which most official welfare schemes wilt. For welfare work for the people, one has to know them in their home and unhappiness, in the inescapable environments in which they live, they struggle and they die. The Sykes scheme, named after a Governor who did a great deal more than tour the rural areas and receive congratulatory orations, threaded with respectful supplications, from local hokum-wallahs.

* * *

Self-help is the corner-stone of the scheme, which regards the peasant, first, as human beings, and, then, as economic units. It aims at making the peasant happier and healthier before lashing him to an economic chariot. And the scheme has outlived the experimental stage, primarily because the peasantry have produced results. Sanitation and roads have been improved in a number of villages, and village sites have been cleared of rank vegetation, which breeds pestilence. More pure drinking water, the tragic scarcity of village life, is made available, and the removal of manure-pits outside the villages has been carried out. Draining poisonous pools and constructing soak-pits is a difficult part of the scheme, for the success of which self-help has been much in evidence. The provision of trench latrines, with some sort of seclusion for women, has been widely taken up. Old wells have been repaired, and new ones constructed.

* * *

I have only sketched the skeleton of the scheme. That gives an idea of the break away from the traditional methods of officialdom, which generally attempt to stand a rural welfare pyramid on its apex. The Sykes scheme appeals to the human desire of men and women to live comfortably, to get away from conditions under which no human being ought to live. Education, co-operation, agricultural enlightenment are desirable, and have their correct place in the Sykes scheme. They are subordinated to the primary purpose of restoring to the peasantry the elementary rights of humanity. There is a spate of provincial rural uplift schemes. I do not know of any more human and, therefore more effective, than the Sykes scheme.

* * *

Crook companies exploit the unwary and the ignorant. And their names are generally their ground-bait. The simple village folk of Karachi have been the latest collective victims of this particulary nefarious sort of fraud. Several provident fund societies reaped a rich harvest in small premia from credulous villagers, whom the pretensions, personal and on paper, of these societies lured to the parting of small change. The inevitable day of exposure came, and, on its heels, the arrest of six Directors of an Home Relief Insurance Company. Widespread panic, pathetic because of its ignorant protest, followed, and Karachi had an oriental experience of a Wall Street crowd of ruined spectators. Train loads of bemoaning villagers poured into Karachi to seek their little, which was lost, and the futility of the search came home to them in tragic spasms. The law will deal with these public enemies: but the law should protect their dupes.

* * *

Government and our civic elders are having a set-to over a nominated element on the Standing Committee of the Corporation. The preliminary bout was on April 17, 1931, when in reply to a representation, Government put on the nomination gloves in that they adhered to the view, that a nominated element "is at present indispensable". The Corporation consider that the "at present" aforesaid does not apply in continuity to the present year of grace, when the Government of India Act is big with a new earth, if not a new heaven, for the delectable province, among other provinces, of Bombay. The Mayor has been charged by the Corporation to submit a representation to Government suggesting the funeral, with flowers, of the nomination system. The Corporation's case is that, for 50 years, the Corporation have managed their affairs with conspicuous success, and have been set up as an example to other civic bodies.

* * *

Let me quote textually the context. "It seems a poor recognition of this fact for Government to assert at this juncture, even by implication, that the presence of nominated members is essential for that success hereafter or that such success in the past has been rendered possible by the presence of nominated members on the Committee. The Corporation gratefully acknowledge the services rendered to them by nominated members from time to time. But they feel that any such claim, as is now impliedly made by the Government on their behalf, would be repudiated by those members themselves. The Corporation cannot, therefore, agree that the presence of nominatd members on the Standing Committee is indispensable for the proper conduct of the business of the Committee.

* * *

Secondly, the principle of nomination by Govment on public bodies has generally been justified as affording the means of redressing any inequalities of representation on those bodies through election, and this fact has been emphasised by Government in their letter under reply. The Corporation are, therefore, not a little surprised to find that the principle is now sought to be justified on the ground of the indirect control, which it furnishes to Government, over the affairs of the Corporation. The degree of control to be excercised by the Government over the Corporation is clearly prescribed by the Bombay Municipal Act, 1888. The difference in this respect between the Corporation and the Municipal bodies elsewhere must be attributed to the larger experience of local Self-Government in this City, the greater aptitude therefor displayed by its citizens and generally in the different circumstances prevailing in the areas concerned."

* * *

A fair case, fairly put. In this unfair world, fair cases are seldom successful cases. And, without being any sort of a prophet, I may say that the nomination system is not to be so soon eliminated. The new writing on the wall is legible and understandable.

* * *

The Government of Bombay have decided that it is not possible to postpone the enforcement of the Standardisation of Weights and Measures Act. They do not admit that the scale of fees fixed for verification and stamping of weights and measures is high. Should actual experience show that the receipts from fees are over and above the requirements, Government propose to reconsider the question. The Act came into force on August 1, in Bombay city and ten districts, namely, Broach and Panch Mahals, Surat, Thana, Bombay Suburban, Ahmednagar, Poona, Satara, Belgaum, Karachi and Sukkur.

OUR BALANCE SHEETS TLL THE TALE

Founded in the wake of Swadeshism, the "NATIONAL" of Calcutta has grown from strength to strength with the result that it is to-day one of the leading Life Offices of the East. During nearly thirty years of buisness-building it has been able to accumulate assets worth more than Rs. 2,50,00,000 despite the fact that within so short a period a sum exceeding Rs. 1,30,00,000 has been paid away by way of Claims to the Policyholders and their beneficiaries. These are facts which merit the earnest consideration of those who do not want to gamble with the savings of a life-time. Why not yours?

You have only to let us know your requirement and leave the rest to us.

SOUTH INDIA

(From Our Correspondent)

Madras, September 30.

Changing India is fast losing its picturesque ceremonial code. Life is made up of small things, though life is not a small thing. And high life without colour leaves the Indian cold. The inhibitions and repressions of a people may be an intricate and inexact study ; their joyousness is not to be suppressed or twisted by psychological canons. In this Presidency, people have not shed their ancient love of pageantry and pomp. Wherefore there was great rejoicing without revelry on the arrival of His Highness the Maharaja of Cochin at the Chittur Municipal toll-gate at Tattamanghan, where the princely party was received by Mr. P. Sankaranarayan Menon, Chairman of the Municipality, and other officers of the State. Brahmins offered poornakumbham and His Highness was garlanded. Young girls, clad with the becoming beauty of embroidered silk sarees, sang songs of greeting. And after this *aperetif* followed the solid menu of civic disablilities—linking Chittur with the railway, electrification of the town, converting the local hospital into a civil hospital and enough drinking water. Sir R. K. Shanmukham Chetty, the Dewan, read the Maharaja's sympathetic reply, and then students chanted Vedic hymns. India, its reverence and its picturesqueness, was symbolised at the ceremony ; and I would there were many more. They link India to a great past.

* * *

I may not (not that I would) cut the cordon of plans of rural renaissance which encircles me. Schemes to the right of me ; schemes to the left of me ; scheme ahead and behind me ; and, multilating the historic comment, I say it is magnificent. For, as a faithful chronicler of the things, visible, semi-visible and invisible, that are churning public life in this part of the country, I have to get a line, to use an Americanese, on most of them. So it is my job to refer to the able presidential address of Mr. Vaikunth Metha at the twenty first Madras Provincial Co-operative Conference, which began its session last Saturday. All the co-operative facets of rural re-construction were presented by the speaker to an informed audience. The subsequent proceedings of the Conference will consider the track indicated by the President. I must content myself with one passage :—"Any comprehensive attempt to solve the problem of rural employment must embrace all the aspects of production, and, appreciating the force of this contention, Mahatma Gandhi has now brought into being a new body, the All-India Village Industries Association, whose task it is to promote the improvement of the moral and material condition of the rural population by encouraging the revival of the dead or dying industries of the country and by organising public opinion to patronise the products of such industries. As co-operators, we are intensely in this new national actitivity, and we have a distinct contributon to make in promoting it in the sphere both of production and distribution."

* * *

Illiteracy chains the feet of national progress. And deep depression possesses one's spirit at the prospects of literacy. That was the feeling in me at the close of an informal meeting at the Theagaraya Memorial Buildings, with Dewan Bahadur A. Ramaswami Mudaliar in the chair, convened by Mr. C. Basudev, M.L.C. and Mr. T. G. R. Gopal. The Dewan Bahadur spoke of the amount of illiteracy in the country and pointed out that, however much free and compulsory education may be introduced and with what celerity it may be pursued in the near future, 80 per cent. of adults to-day would be beyond its scope, as such education would be confined to those of school-going age. The problem, therefore, was how to give education to those adults who are illiterate. The need for the education of the adult population was becoming more and more clear as the political progress of the country was becoming more marked. In most Western countries, adult education was undertaken by organised associations, the chief aim of such education being to interpret the experience, increase the knowledge, and train the emotions, of the adults. The Chairman pointed out that the new responsibilities, however inadequate and restricted they may be, would involve a great strain on the people, and an illiterate population would mean an unstable Government, since the people, being ignorant, could easily be misled. The introduction of democratic forms of self-Government made the question an urgent one.

* * *

A discussion, whose value was its informality, on the issues raised by the Chairman followed, leading to a concrete result. The members present at the meeting resolved to form themselves into an association registered under the Indian Societies Act with the object of promoting adult education. A conference will be held in Christmas week to organise a considered campaign. Each little stream, by trickling to the river, makes up the river's rushing current.

* * *

Bengalee readers will appreciate the tribute paid here to Ram Mohun Roy at a meeting to commemorate the 102nd anniversary of his death. The meeting was held under the auspices of the Southern India Brahmo Samaj. Dewan Bahadur S. E. Ranganathan presided. Ram Mohun Roy's claim to the far-off tribute of generations consists not on his religious convictions, but on his mental and moral poise. The first to break through the iconoclasm of Hindu orthodoxy, he was also the first, among Modern Indians, to recognise the spirituality of Hinduism. And it was meet that, in this presidency, where the spirit of Hinduism broods over the beginnings of a new culture, Ram Mohun Roy's memory should have been honoured.

GENEVA & STOCK MARKETS

PROSPECT OF BIG ARMAMENT LOAN

NO CAUSE FOR ALARM

BY FRANCIS WILLIAMS

(By Air Mail)

City Editor: *The "Daily Herald," London*

Special for "INDIAN FINANCE"

London, September 23.

Geneva has, not unnaturall, been the centre of interest throughout the week. Stock Markets have been swayed by almost hour-to-hour developments in the Italo-Abyssinian discussions ; and with a strong feeling of uncertainty amongst investors, upward movements have been few and far between.

Last Friday's heavy setback in all sections of the Stock Exchange was not to be wondered at, in view of the large amount of foreign money which has been flowing into British investments for some considerable time. With their usual abandon and nervousness, foreigners have been liquidating British investments without any regard to future possibilities or intrinsic merits.

In my opinion, the present nervousness is being overdone. Apart from Great Britain becoming directly involved in war, there are no facts on which to base a feeling of pessimism as to the immediate outlook for the leading British industries.

There is likely to be a continuance of the present uncertainty in the gilt-edged market, as, so far as I can find out, there are still some large foreign holdings remaining unliquidated. Moreover, it can now be taken as an almost accepted fact that the British Government will soon decided on an increase in armaments expenditure involving flotation of a loan of anything up to £250,000,000.

Before such a loan could, however, be publicly issued it would, I think, be necessary for the authorities to ensure the success of the loan by bringing about an improvement in gilt-edged prices and creating a greater feeling of optimism.

From this point of view alone, therefore, it is evident that there is scope for recovery in gilt-edged stocks. But as against this bright side of the picture must be offset the fact that public feeling on an increase in the national indebtedness at this stage may be adverse. Furthermore, it might be necessary to offer a fairly high rate of interest in order to ensure the success of the loan.

Although official cognisance of the possibility has not materialised, it is evident from recent conversations between British and French politicians that an early pronouncement on stabilisation is not beyond the bounds of possibility.

Following M. Bonnet's speech at Geneva I understand that something is going on behind the scenes regarding his suggestion that in exchange for trade agreements stabilisation of currency would be an acceptable proposition.

As to the outlook, international politics will again sway stock markets ; and for the time being an ultra cautious policy will be the most profitable. Investors should, however, not throw over sound stocks without first weighing up future possibilities, while those in possession of liquid resources should be prepared to pick up cheap stock at bargain levels.

OVERSEAS' NEWS: *By Air Mail*

Week ended Sept. 21, 1935

GREAT BRITAIN

LEAGUE SANCTIONS

All other subjects have faded into invisibility before the interpretation of Sir Samuel Hoare's declaration, at Geneva, of Great Britain's foreign policy, implemented by Sir Austin Chamberlain's statement that sanctions mean war. Public opinion is hardening against Italy, and what a fornight ago would shake people into sobriety is now accepted with a shrug of the shoulders. While there might be a sub-conscious sense of the imminence of an open rupture with Italy, there is, nevertheless, definite disinclination to the last argument of Dictators. A strong feeling exists that economic pressure, both in respect of credits and complete cessation of trade, would convince Signor Mussolini of the truculence of his way, and that it would not be necessary ultimately to be a belligerent. At the back of this feeling is the apprehension that an impotent League of Nations would precipitate a world war, finally destroying the world's economic structure, which is slowly acquiring stability. France's active collabration with England, after M. Laval's categorical endorsement of Sir Samuel Hoare's stand for collective security, is regarded as a weightage which must dip the scales against Italy. For this reason, Sir Austin Chamberlain's warning is regretted as premature and provocative. A minority opinion is represented by the curious combination of Lord Beaverbrook, Sir Strafford Crips and Mr. George Lansbury. It has not yet leavened the yeast of militarism.

It has, however, stimulated the country's determination to strengthen defensive equipment. City circles are debating the best method of obtaining the required finance. Loans and taxation are the alternative proposals. A loan of 150 to 250 million sterling would, some say, give a fillip to trade. Others say that loans should be raised for the creation of social assets, such as housing schemes. The rate-payer is between the Charybdis and Scylla of taxation and loan —an issue which will be raised at the annual party conference at Bournemouth. The Conservative rank and file are in favour of taxation.

The Chamber of Shipping is aligning itself to the eventuality of war. It recommends to shippers that no bills of lading should be signed for any blockaded port, and that, if any port of discharge is declared blockaded after bills of lading have been signed, the vessel may be unloaded at another specified port. Underwriters are fixing day-to-day rates. The Chamber took this step after the British Government's reply to the French Government's inquiries, regarding Britains's attitude to any act of agression, was handed to the French Ambassador in London.

The Second Commission of the League Assembly has adopted a resolution, moved by the British Member, Dr. Leslie Burgain, Parliamentary Secretary to the Board of Trade, recommending to Governments to conclude bilateral agreements based on the most-favoured nation clause, with the object of encouraging free trade, subject, if necessary, to the provision that, in the event of a large variation in the rate of exchange between the currencies of the contracting parties, the agreements may be revised at short notice. The preamble recognises, as the ultimate objective, the return to the international gold standard, but points out effective measures to remove the impediments. The world trade need not wait for the restoration of the gold standard.

The way Britain has managed to balance her budget for the past two years is revealed in shadow by the accounts of the United Kingdom for the financial year ended March 31, 1935. They show that excise payments alone amounted to £104,600,000—of which £23,303,056 was for spirits and £53,582,334 for beer. The Ottawa customs duties fetched in £7,533,944. Duties on certain imports from the Irish Free State amounted to £4,694,593. Other net receipts for customs were—imported rum, £1,690,921; brandy, £1,459,612, tobacco and snuff, £70,783,297; key industry goods, £679,578. Britain's middle class has a conscience which operates in unexpected ways, and it accounts for "conscience" money sent to the Chancellor of the Exchequer "by sundry persons for conscience sake, etc.," amounting to £1,936. Forfeited election deposits under the Representation of the People Act, which lays down a minimum number of votes for ach candidate, brought in £900. Another unusual source of revenue was the proceeds of gold, salved from the S. S. "Laurentic" valued at £869.

U. S. A.

ANTI-TRUST LAWS

Now that Congress has adjourned, the political tension of President Roosevelt's New Deal has eased, with the thoughts of the country on the forth-coming election. On the economic side, the tide has definitely turned to the sea of recovery. On the legislative side, considerable new ground has been broken, the effects of which cannot be appraised till their constitutionality is confirmed, or set aside, by the Supreme Court. The personal popularity of the President has not appreciably waned and, though political differences with vested interests have been acute and even stormy, his prospects of re-election are far from remote. Should business bear out, in the next three months, the beginnings of confidence and activity, there is, as far as one can plumb political depths, no likelihood of an adverse verdict at the polls.

Topical interest in the aftermath of legislative inaction is focussed on Anti-Trust Laws, which constitute the most important business problems of the moment. The history of the United States anti-Trust legislation dates back to February 4, 1887, when the Interstate Commerce Law was introduced, which dealt with one special section of industry,—railways. It made it unlawful for any common carrier to make or give undue or unreasonable preference to any particular person or interest. The first general anti-Trust law was the Sherman Act, known also as the Federal Anti-Trust Law of July 2, 1890, which declared every contract, combination in the form of Trust or otherwise or conspiracy, in restraint of trade or commerce, to be illegal. The next important step in the progress of Anti-Trust legislation was the passing of the National Industrial Recovery Act, which introduced "codes of fair competition" in place of "unfair methods of competition."

The introduction of these codes was described by Senator Borah as "the end of the Anti-Trust legisla-

Air Mail Week

tion." It was proved that many trade practices, which had formerly been forbidden by the Courts, were restored by these codes.

Now, by the Schechter judgment the Federal Trade Commission has regained its original authority, having theoretically full power to prevent any close co-operation in industry. And the vital question of the moment is what effect this restoration will have on business. President Roosevelt looks on the suppression of the Anti-Trust laws by N. R. A. as temporary emergency measure, having stated in June, 1933, that the general public must be protected from the abuses, which had led to the promulgation of Anti-Trust laws.

The President, in spite of a liberal attitude, recognises the existence of Anti-Trust legislation, and it is not likely that at present he will countenance its effacement. At the same time, the President cannot but be aware that the legislation is a serious obstacle to co-operation in industry, and, therefore, a handicap on the economic situation. Despite great efforts in those branches of industry, in which the codes have worked with some measure of success, it has not been possible to continue this co-operation on voluntary basis for fear of infringing the restored Anti-Trust laws.

The time appears to be propitious to dispose of, or, in the alternative, to amend the laws to meet the present economic situation. President Roosevelt would have the backing of such influential organisations as the Chamber of Commerce of the United States, the National Association of Manufacturers and the American Federation of Labour. At the same time he would find himself faced with a powerful opposition. In 1932, when several important industrial groups attempted to win the support of the political parties at the presidential election for a struggle against the anti-Trust laws, 137 eminent American Professors of economics passed a resolution declaring that even a slackening of the antiTrust laws would have such reactions as would undermine the very principles of private initiative in economic activities. All the conservative opinion of the country stands solidly against any tampering with the anti-Trust laws.

CANADA

NATIONAL DEBT

The second of a series of broadcast addresses that Mr. R. B. Bennett, the Canadian Premier has delivered, is a peculiar combination of an outline of official policy and a pre-electoral appeal to the nation. The question of the national debt of the country has engaged the attention of the Premier on this occasion; but he has also covered other items of economic policy. For instance, dealing with the problem of unemployment, the Premier said that machinery and labour-saving devices in the past few years had intensified the problem. He would, therefore, suggest, as a first step in combating this problem of unemployment, the removal from the labour market of all those workers who had reached an age where, especially under conditions to-day, the workers' social interest and the State's economic interest equally suggested the wisdom of retirement. In his opinion, this provides the only possible means whereby the youth of the land can secure employment. It provides the only means whereby all people may "obtain security and leisure when they have got beyond that age where in any Christian state, the workmen should be forced to continue his labours." If this principle were to be applied in practice, it would mean a withdrawal from the labour market of about 120,000 people who will thus make room for so many young workers. He has also outlined a scheme for the provision of training boys and girls who are denied proper education because of peculiar economic conditions.

Most important of his utterances on economic policy is what he said about Canada's national debt. Canada has up till now held a proud place among the nations as a country whose word was as good as her bond; and he would be a traitorous citizen who would do anything to impair this reputation. In view of the fact that about 30 per cent. of Canada's debts are contracted in the United Kingdom and the United States, the creditors in these countries have cause to feel grateful for the assurance about the sanctity of obligations. At the same time the Premier has emphasised the fact, whereas it has been possible to pay the creditors in the United Kingdom by means of goods and services, it has been difficult in the case of creditors in the United States. He, therefore, hopes to achieve "this highly desirable adjustment in international trade" through a treaty with the United States. That is now under consideration. Regarding internal debt, which is about 70 per cent. of the total indebtedness, Mr. Bennett has outlined more far-reaching plans that savour strongly of socialist convictions. Debts, private and domestic, says the Premier in his broadcast address, are the root evil of the present economic system; and it is, therefore, the duty of the Government to undertake a comprehensive resolution of the whole national debt structure. The Farmer's and Creditor's Arrangement Act, which is in operation in every province, has brought relief to many Canadian farmers and thus the incidence of private debts has been lightened. As for the public debt, he proposes the conversion of the Provincial and Municipal debts held by Canadians, including Canadian National Railway bonds, to lower rates of interest. "We will co-operate with the provinces and the municipalities in refunding operations and upon terms and conditions which are just to the people of this country holding these bonds." The proposal also is outlined for the setting up of a Loan Council. The same principle of interest reduction, he would extend to private mortgages. He believes that the mortgagee, if he takes a sensible view of things, should welcome legal

PUBLICATIONS OF THE LEAGUE OF NATIONS

"BALANCES OF PAYMENTS, 1933"

Price : Rs. 4-2-0

Only existing statistical book of reference concerning international accounts (trade in goods and services, gold, long and short-term capital operations). Figures, are given for 32 countries, in the majority of cases for a series of years up to 1933 inclusive. Information is also supplied concerning outstanding international liabilities and assets. In a summary chapter the general tendencies up to September, 1934, are dealt with, special consideration being given to the effect of currency depreciation.

"ARMAMENTS' YEAR-BOOK, 1934"

Price : Rs. 13-12-0

This edition contains monographs on 64 countries, both members and non-members of the League. The information contained is derived from two sources: the communications from various Governments to the Secretariat on the occasion of the Conference for the Reduction and Limitation of Armaments and the official publications of the different countries, such as collections of laws, army gazettes, etc

"NATIONAL PUBLIC WORKS"

Price : Rs. 8-4-0

This book has just been issued by the Communications and Transit Organisation of the League of Nation and is the result of a letter addressed by the Secretary General of the League requesting various Governments to communicate to him the following particulars: (1) A brief description of the main public works undertaken since the beginning of the year 1929; (2) The principal administrative methods followed or contemplated for the execution of such work; (3) The principal methods employed for financing such work; (4) An estimate, as far as possible, of the allocation of expenditure on the execution of the possible works.

"INTERNATIONAL TRADE STATISTICS, 1933"

Price : Rs. 6-14-0

This volume analyses the foreign trade during the years 1931, 1932 and 1933 of 65 countries accounting for 95% of the total world trade. It contains more than 300 tables, which are accompanied by explanatory notes. The data it gives illustrate strikingly the great changes undergone in recent years in the composition and direction of foreign trade, and their effect in the position of the individual countries. The synoptical tables show the percentage distribution of each country's imports and exports by provenance and destination.

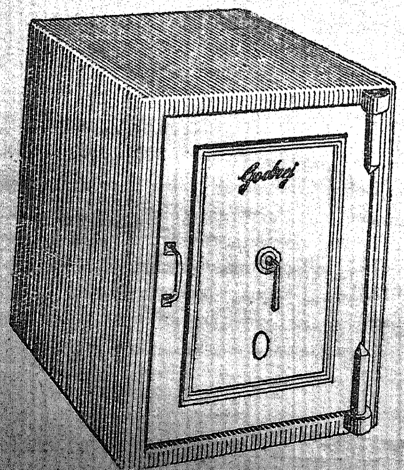
THEY CANNOT MAKE SAFES

WITH CHISELS AND HAMMERS

The proverb is that you cannot make bricks with straw. Nor can small shops make real Safes with chisels and hammers. Small hand tools and crude hand work could in no way take the place of modern machinery. Some important operations could never be performed except by machines only. Good Safes can be made only with the help of suitable and special machines.



THIS PATENT

16-CORNER-BEND

GODREJ SAFE

has no outside joints in its body or door frame. Its 16 corners are bent cold by a powerful 15 ton press.

You are always welcome at the Godrej Works and Show Rooms.

machinery whereby the mortgager will be enabled to scale down the obligations to a point where the home-owner could pay interest and be solvent.

As a treatise on the diagnosis of the economic ills that affect the country and the lines on which any new policy should necessarily be modelled, the broadcast speech has been a success. The Premier has picked out, though not all, some of the salient features of the economic situation; but it is rather doubtful if his speech has been received so well as expected, as a pre-electoral appeal, in view of the interest-reduction proposals involved; but still Canada is not France; and there is not the Rentier and his special position to be taken into account here, unless the farmer creditors view with suspicion the idea of law interfering and regulating their mortgage obligations. More practical still is the successful application of the debt redemption proposals. Both in the Dominion and in the provincial governments, the state of finances was never satisfactory. Nor is the position of the smaller municipalities very far different; and it is common knowledge that on many occasions the Dominion Government had to come to the rescue of these local bodies with substantial loans. The provinces themselves had to borrow more than 20,000,000 dollars during the last financial year to meet their obligations. The provincial debt averages have been reckoned at 150 dollars per head in all the provinces; and at figures ranging between 160 and 200 dollars in the prairie provinces of Alberta, Manitoba and Saskatchewan. Normally half the resources of the provinces are required for debt services; and in many cases the Dominion Government helps them with loans. It is also reported that, in consequence of the Alberta elections, Mr. Aberhart, has already completed negotiations for a loan of 2¼ million dollars for his social credit plan. The success of the new Loan Council on the plan of the Australian model to control the loan operations of the Dominion and the Provincial governments, will, therefore, depend upon the extent it will shoulder the responsibility of consolidating national debts: for consolidation would mean, guaranteeing for the overseas debts of individual states as well. In other words, this will mean relinquishing valued constitutional rights and shouldering, financial obligations of a heavy magnitude.

JAPAN

MILITARIST

Mr. Takahashi, the Finance Minister, has shown signs of yielding to the wishes of the Military Department in his policy in framing the budget for the coming year. After a series of conferences and consultations with the heads of departments, and after a severe examination of the pros and cons of the estimated receipt and expenditure of the budgetary figures, the Finance Member has come to the irresistable conclusion that it is difficult to uphold the rules of sound finance rigidly in drawing up the new Budget. The general principles, that will underline the coming year's budget, at best express a pious wish. New items of expenditure are to be confined to those of imperative necessity. It must be a comparatively easy task to prove that a demand is imperatively necessary as the military have done. Even with regard to the items already voted, economy is to be voted wherever possible. All these form at least sound theoretical principles for a text book on public finance. But reduced to practice, the Finance Minister has realised that over-stiffness, does not, after all, commend itself.

The rough estimate of new expenditure, as submitted by the various departments to the Accounts Bureau of the Finance Department, total 859 million yens excluding some 300 million yens on account of Manchurian affairs. The new expenditure of the War Office amounts to 150 million yen, and that of the Navy Department 285 million yen, thus totalling 435 million yen or more than half of the aggregate of the new claims of all the Departments. The basic expenditure for the new fiscal year is 1,661 million yen, as against the prospective expenditure of 2,820 million yen for the coming year. The national revenue is estimated to yield between 1,400 and 1,500 million yen, thus leaving a deficit of 1,400 to 1,500 million yen. If the pruning knife of the Finance Department intends to cut down expenditure of the Departments to the level of the present year, the saving that could be effected could not exceed 500 million yen, still leaving a deficit of a fairly heavy sum. Again the question of raising a loan comes up, but the Finance Minister has decided to limit the fresh issues to an absolute minimum, the amount to be reduced proportionately to the increase in the revenue receipts over the estimated figures.

How far the present international situation is actually responsible for bringing about this change in Mr. Takahashi's attitude towards the proposed Army Expenditure, it is difficult to say. The military authorities have all along been pointing to the troubled European situation and the fear of the Soviet invasion, as the potential causes for their heavy demands. The European situation is certainly portentious, especially with the war cloud on the horizon; but there has been no substantial development in the Soviet activities, at any rate of such magnitude as to cause fear in the Japanese minds. Even if one were to grant the propriety of an increase in war expenditure, there is no reason why it must be allowed to expand without any limit. Unless a limit is set, the establishment of a permanent financial programme will wellnigh be impossible. An examination of this predominance of the military and the military programme, in relation to national budget, brings the German parallel into bold relief. In regard to the military expenditure, the

MARKET REPORTS

Calcutta, October 2.

As, owing to the holidays, this issue has to be brought about on a Thursday instead of as usual on Saturday, the market reviews are necessarily brief.

JUTE

The jute market steadied up by about a rupee on Friday last owing to expectations of the announcement by the Government of Bengal regarding restriction of the next year's crop. There were rumours that some parties had reliable information that it was the intention of the Government to restrict the size of the next crop by another 25 per cent. taking this season's acreage as the basis. These rumours turned out to be baseless. The Government have announced they will advise the cultivators to sow in 1936 the same area that they sowed in 1935. This announcement did not create any enthusiasm amongst dealers. The reason is that at present the arrivals of jute are very heavy. These arrivals are likely to continue throughout October.

Mills have been almost entirely out of the market. There were sellers of a decent quantity at the last rates without finding buyers.

In the Pucca Bales section there was a fair amount of business done with Overseas buyers. Balers are now offering a little more freely.

The rush of arrivals in the mofussil centres is due to approach of Puja celebrations as the cultivators are forced to dispose of their jute holdings to meet their Puja bill. So long as the arrivals continue heavy, there is little chance of any improvement in prices.

JUTE MANUFACTURES

There has been very little fluctuation in the gunny market during the week under review. The principal events in the gunny trade during this week were the meeting of the Indian Jute Mills Association and the failure of a big shipper of gunnies.

At the general meeting of the Jute Mills Association the resolution proposed by the Committee, terminating the agreement between the Association and the Non-Association mills on 31st March, 1936, was unanimously passed. It did not create any change in the market. The Chairman's remarks at the meeting have created hopes that after all the industry may not have to engage in a cut-throat competition. But a crisis is not unlikely.

There is a lull in the demand from Overseas. There is not likely to be much change in the market for some time to come. Very small business passed during the week. At the close Ready 9 Porters were selling at Rs. 7-12 and 11 Porters at Rs. 10. Heavy goods are quiet but steady and quotations for October delivery are, B. Twills Rs. 22-6, Liverpool Twills Rs. 25-10 and Cornsacks Rs. 22-10.

Total reported sales for the week ending Saturday the 21st September 1935:—

		This and next month. Yds.	Forward. Yds.
Hessians	...	1,36,62,788	5,18,49,995
Twills	...	49,31,923	3,06,09,119
Plains	...	20,08,180	1,04,33,140

The total reported stocks of manufactured goods as at 30th September 1935, as compared with the previous month's figures shows a substantial reduction. Hessian stocks are down by 3 crores and Sacking by 3.89 crores. The comparative figures are given below :—

		Stocks in Yards*	
At the end of		Hessian	Sacking
September 1935	...	7,44,53,412	13,77,92,185
August 1935	...	10,44,83,150	17,66,83,319
September 1934	...	9,04,87,116	9,36,14,931

* These figures include the returns of Adamjee, Agarpara, Gagalbhai and Shree Hanuman Mills in addition to those of members.

COTTON

An obvious disposition to "sit back" awaiting further definite developments in the European political situation was shown by all cotton markets. Operators generally are in a disposition to avoid fresh commitments and, for the time being, there is a lull in the situation.

Very small business passed daily in the Bombay market. Owing to absence of speculative activity prices gave way slightly, Broach April/May declining to Rs. 203-12. Towards the close of the week speculators have been active and further purchases by Bombay in Liverpool have been reported. Prices improved towards the close. Broach April/May touching the highest at Rs. 208-4 and closing at Rs. 207-12. Oomra and Bengal Dec./Jan. also improved to Rs. 189-4 and Rs. 143-8 respectively at the close.

The uncertain European political situation dominating the market, a feeling of indifference was shown by operators in the New York Cotton Exchange. On reports of favourable weather and under pressure of increased hedge-selling prices gave way, October receded by 13 points to 10.43 and Middling

spot to 10.75. A better feeling was in evidence towards the close owing to increased trade calling, middling spot touching 10.80 and October 10.48.

The New Orleans market was also easier, middling spot declining to 10.65 and October to 10.44.

Considerable amount of hedge-selling operations were witnessed in Liverpool, but the market maintained a steady tone on the support of improved trade calling. An easier tendency was in evidence towards the close. The closing rates were, Middling spot, 6.32; October, 5.86 and December, 5.76. In the Egyptian section, Sakel spot after improving to 8.52 closed at 8.43, while October Sakel after touching 8.01 closed at 7.93.

PIECEGOODS

Demand for Puja season seems to have set in and trade has certainly improved in the local market. Prices have advanced to some extent. Improvement in the off-take of both local and Japanese goods is visible, but Lancashire goods have made little progress and this has been attributed to the firm replacing prices. Though plentiful enquiry was reported, little business of importance has transpired.

The yarn section has been more active. War prospects and steadiness in the raw material market are two factors that helped both demand and prices to improve.

Conditions were decidedly better in Bombay. Demand has been more encouraging. There has been more activity in Japanese goods, both in the off-take and in ruling rates. In British goods the usual retail demand continues and prices are more or less steady. As regards indigenous goods, the tone of the market is healthy. Clearances were on a satisfactory scale and movement in grey goods has improved. Forward trade has not been possible in any bulk quantities, but small orders in miscellaneous lots have been plenty. The yarn section has shown much improvement, both in respect of prices and clearances.

GOLD

The price of gold in Bombay fluctuated in consonance with the movements in the cross rates. Opening steady at Rs. 34-14-9 on September 26, the rate for ready gold improved steadily to Rs. 35-0-6 at the close, owing to the weakness in Sterling in terms of the franc and dollar. First settlement closed at Rs. 35-0-9 and Second settlement at Rs. 35-1-0. There was good demand for gold for export, but sellers were reserved expecting higher prices and owing to scarcity of supplies.

Stocks on hand amounted to about one lakh tolas over the week end with the daily offtake unchanged at 3,000 tolas. Arrivals from upcountry averaged at 10,000 tolas a day. Imports during last week amounted to Rs. 2,39,047 in bar and coin.

The price for gold in London improved by 6½d. from the closing rate of last week. Opening at £7-1-3½, the price spurted up to £7-1-6½ and finally closed at £7-1-7½.

The Sterling-Franc rate opened at 74.57 and after improving to 74.63 at the week-end, declined at the close to 74.44. The Sterling-Dollar rate, opening at 4.91 5/16, declined to 4.90 9/16 at the close.

SILVER

The Bombay silver market witnessed quiet trading during the period under review. With the exception of a shortlived spurt on September 28, when the rate for first settlement improved to Rs. 67-7-0, the market remained inactive. The rate for first settlement declined to Rs. 67-1-0, but closed slightly better at Rs. 67-3-0. Second settlement closed at Rs. 67-8-0.

Stocks in Bombay increased to 35,000 bars with the daily off-take amounting to 6 bars. Arrivals averaged at 10 bars a day.

The market was steady in London. Spot and forward rates were on the same level. A net rise of ⅛d. was recorded at the close. Opening at 29¼d. for both spot and forward, the rates remained steady at 29 5/16d. and at the close improved to 29⅜d. America was a buyer throughout the week. China and speculators were sellers, while India was altogether out of the scene throughout the week.

The spot rate for silver in New York remained unchanged at 65⅜c.

TEA

Calcutta Auctions.

At the Calcutta auctions of teas for export on September 30, the total offerings amounted to about 27,000 packages. The quality was very similar to last week's teas, but occasionally showed some slight seasonal improvement. The demand was on a fair scale at slightly lower prices and teas, which were bid at below last week's rates were withdrawn.

The total offerings for the auctions for internal consumption amounted to 20,000 packages. The quantity was made up of about 10,000 packages of broken and leaf grades and the same amount of

dust. There was a good general demand and prices were fully firm as compared with last week.

The total offerings of Indian and Ceylon teas at the London auctions for the week ending October 3, amounted to 48,600 packages of Indian and 23,500 packages of Ceylon teas. At the auctions on September 30, 26,000 packages of Indian tea were submitted for sale. There was a good demand, poorer teas meeting strong competition at firm rates. Other kinds were irregular.

SUGAR

The local sugar market ruled very steady during the period under review. Last week's advance in prices were well maintained owing to good support from buyers. Java Refined Ready closed at Rs. 10-8-0 and Refined Steamer at Rs. 10-2-0 while the rate for White Ready and Steamer improved, the closing quotation being Rs. 9-10 to Rs. 9-14.

The Desi section was firm, White (1st Crystal) quoting Rs. 9-6 to Rs. 9-12 and Brown Rs. 9-2 to Rs. 9-7.

Improved demand for spot sugars and better foreign advices improved prices in Bombay and a fair amount of transactions were reported for August, September and October / December deliveries at Rs. 4-4, Rs. 4-2-3, and Rs. 4-4 respectively. Later, in sympathy with a reaction in London and increased arrivals prices declined by 2½ annas. The Nivas in Java has advanced by 10 points to F 3.95 at which rate about 20,000 tons are reported to have changed hands. Turnover in the Bombay market totalled about 10,200 tons.

The Cawnpore market continued firm and closed ½ to 1 anna higher than last week's closing rates for both old and new crops. Business to the extent of 33,400 bags in No. 1 crystals is reported.

WHEAT

Quiet but steady conditions ruled in the local wheat market. Last week's heavy buying seems to have subsided a little. Owing to favourable weather reports in the wheat growing areas and weak foreign advices, prices were slightly easier on balance. The market closed steady, Ready Punjab and Cawnpore quoting Rs. 3-6-0 and May Beta Rs. 3-7-0.

A fair volume of trading has been reported in upcountry centres where, owing to rumours of war, buyers were very active. Prices also improved, to Rs. 2-5-6 at Amritsar, 2-4-0 at Lyallpur and Rs. 2-9-9 at Hapur.

In Bombay conditions were quiet but steady during the week. Delhi-Cawnpore January closed at Rs. 4-9-0 on May at Rs. 4-9-6.

Overseas markets have been less active than the previous week and rather wide fluctuations were witnessed owing to political rumours. Australian grades were dull and prices for these in London are slightly easier, Australian Parcels September closing at 30s. 3d. The market was irregular in Chicago. Fluctuations were wide owing to varying rumours about the political situation in Europe. Wheat rates closed fractionally higher, September at $1.01¾ and December $0.99¼ per bushel. Weather conditions in Argentine are very unfavourable and a serious reduction in outturn is anticipated. Australia also is in need of rain.

LINSEED

In sympathy with a decline of about 8s. in Argentine linseed and less support from buying centres, the local linseed market has suffered a slight set back during the period under review. Operators are awaiting further development in the Italo-Abyssinian affair and are holding off to avoid further commitments. The rate for Ready declined by 5 annas to Rs. 4-13-0, and May to Rs. 4-15-6. But towards the close the market assumed a firm tone and prices show a rising tendency. Ready closed at Rs. 4-14-6 and May at Rs. 5-1-0.

In Bombay, a quiet but steady tone was maintained. Buyers seem to have withdrawn from the market temporarily awaiting further developments in the political situation in Europe. A decline of 3 annas was recorded in May contract. A steady tone set in towards the close on trade buying being resumed, Ready closing at Rs. 6-14-0 and May at Rs. 7-3-6.

The steady rise in the price of La Plata Linseed in London attained a peak on September 26, when it touched £10-16-3. Thereafter, a steady decline was noticed due to the buyers withdrawing from the market pending fresh developments in the Italo-Abyssinian dispute. The market was easier at the close La Plata September closing at £10-10 and Calcutta Sept. / Oct. at £12-10-0.

Investor's Supplement

Vol. XVI. No. 14 THURSDAY, OCTOBER 3, 1935 Price Re. 1

CHAOS YIELDING PLACE TO ORDER

The Jute industry has occupied the centre of attention in the current week.

The first event of importance was the announcement of the Government regarding the percentage of restriction of jute crop for the next season. The following is taken from the daily press:—

> "A Bengal Government *communique* on jute restriction announces that it has been decided that the extent of restriction in 1936 should be one-third of the acreage under jute in 1924.
>
> The area to be planted with jute in 1936 would thus be two-thirds of the area planted in 1934.
>
> The *communique* adds that the Government intend to use their best efforts to bring about this reduction in the area under jute next year."

This means that the Government are earnest in their resolve to effect a reduction of the jute crop. It is another question if earnestness is synonymous with success. It is too early to say whether the propaganda for this year's crop could be deemed a success.

If the Government are convinced that there should be curtailment in the production of jute, there is only one logical conclusion, namely, there should be compulsory restriction. We wonder if, during the settlement of the scheme to be proposed by the jute industry, the problem of compulsory restriction for the jute crop could be definitely fixed up.

London, October 1.

Markets dull and idle.

Giltedged weak.

If a few mills, extremely well-organised, need State legislation for compulsory restriction of jute manufactures, how much more essential is compulsory legislation in the case of raw jute which involves millions of illiterate and unorganised cultivators ?

We hope that the jute industry and, through them, the Government will, ere long, see the logic of this position.

This brings us to the second important event of the week, the speech of Mr. S. K. Scott, the Chairman of the Indian Jute Mills Association at the meeting convened for considering the question of giving notice of termination of the working arrangement between the Association and the outside mills.

The speech of the Chairman is greatly assuring to investors in jute shares. It must give a quietus to the alarming news spread in market circles.

Mr. Scott makes out a few excellent points in an excellent way. The following are specially noteworthy.

First.—The determination of the working time agreement is only the first step in the programme for preparing a scheme that could prove acceptable to the Government.

Second.—The Association are making an earnest endeavour to produce a scheme for Government's acceptance.

Third.—The new scheme must rule out the possibility of a recurrence of a situation of the nature recently experienced.

Fourth.—Such a scheme, so far as the industry is concerned is made simpler because the redundant machinery is not 75 per cent. as the Government seem to think, but only 25 per cent. to 30 per cent.

Fifth.—The passing of the resolution early this week does not mean an era of indiscriminate and unrestricted production.

Sixth.—There can be no doubt that unrestricted production would be disastrous.

Seventh.—There can, therefore, be no question of scrapping the present agreement among Association mills without having ready another agreement to succeed it.

It will thus be clear that the reply of the Government, which was somewhat like a rebuff, has not inspired, as was feared, any truculence in the Association authorities. On the other hand, the Association have taken the reply in the right spirit. They are taking steps to satisfy the conditions laid down by Government.

RENEWED WAR RUMOURS

(By Special Cable)

New York, October 1.

There was selling pressure due to renewed rumours of war.

It is also believed that a scheme or schemes may be said to be more or less ready. In the next three months, the various steps by way of consulting the Government, mobilising the views of the jute mills, etc., will be vigorously pursued.

If the Association are in earnest and go about the business in the spirit of protecting the varied interests involved, success surely awaits their endevoaurs.

Which is a bull point of the greatest significance to jute shares.

Those who picked up jute shares in the recent setback are proved wise by the event. Those who may pick up at current levels will prove equally wise.

INDIA

EARLIER COMMENDATION REAFFIRMED

BISRA STONE LIME COMPANY LIMITED

(By "Watch-dog")

Most industries are faced with some difficulty or other. The jute industry is passing through a crisis. The sugar industry is worried over the excise duty ; and the coal industry is threatened with state competition. In the circumstances, it is no easy matter to pick out companies which have an assured future. Bisra Stone Lime Company has an impregnable financial position and such a surfeit of profits that they have been obliged to raise their dividends very frequently. The Managing Agents are Messrs. Bird & Co. who are well-known for their efficient management.

The Company was registered in 1916. It works limestone deposits in the Gangpur State on the Bengal Nagpur Railway. The property has an area of over 10,000 acres and is held on lease for 30 years with the option of renewal for further 30 years. Modern kilns and plants have been erected at Birmitrapur, the terminal station on the Panposh-Raipura Branch of the Bengal Nagpur Railway ; and the works are capable of producing 20 wagons of lime and 2,000 tons of stone daily. The limestone is used for fluxing purposes by all the iron and steel works in Bengal and Behar.

The authorised capital is Rs. 15 lakhs in 1,50,000 shares of Rs. 10 each. The capital issued and subscribed is Rs. 7.5 lakhs in 75,000 shares of Rs. 10 each fully paid up.

In April 1930, the authorised capital of the company was increased from Rs. 5 lakhs to its present figure by the creation of 1,00,000 new shares of Rs. 10 each. Rs. 2.5 lakhs being part of the amount standing to the credit of the Reserve Fund was capitalized and 25,000 shares of Rs. 10 each created thereby were distributed to the existing shareholders as free bonus, in the proportion of one new share for every two shares held, ranking in all respects with the existing shares of the company.

The total reserves are now Rs. 2,75,000, the General Reserve being Rs. 2,50,000 and the Equalisation of Dividend Reserve Rs. 25,000.

Liabilities are Rs. 3,97,157. Rs. 1,00,087 are deposits received from agents, and Rs. 2,96,320 are for working expenses and goods supplied.

On the assets side, the total block valued at Rs. 27,91,528 has been depreciated by Rs. 25,40,928 to Rs. 2,50,600. At the rate at which depreciation is carried out, the block value will be nil in another four years.

Stores and spare gear are Rs. 13,750 and stocks Rs. 29,111.

Outstandings are Rs. 4,94,292.

Investments are Rs. 6,34,100 and all of them are in giltedge and they are considerably under market value. Interest accrued on investments is Rs. 8,692.

Cash and other balances are Rs. 3,34,295.

The total liquid assets are Rs. 15,14,241. The balance sheet is noted for its high liquid position. The balance sheet position is improving day by day. A comparison of the latest balance sheet with that of the previous one affords impressive testimony.

		1935 Mar.	1934 Sep.
Liabilities—		Rs.	Rs.
Capital	... ...	7,50,000	7,50,000
Reserves	... ...	2,75,000	2,25,000
Debts	... ...	3,97,157	4,27,876
Profit and Loss	...	3,42,684	3,22,197
Total	...	17,64,841	17,25,073
Assets—

Outstandings	... ...	4,94,292	5,10,198
Investments	... ...	6,34,100	4,34,100
Interest	... ...	8,693	3,018
Cash and other balances	...	3,34,295	4,63,228
Total	...	17,64,841	17,25,073

Reserves have increased by Rs. 50,000. Sundry liabilities are lower at Rs. 3,97,157 against Rs. 4,27,876. Block is lower at Rs. 2,50,600 against Rs. 2,70,800. Outstandings are lower at Rs. 4,94,292 against Rs. 5,10,198. Investments are greater by Rs. 2 lakhs at Rs. 6,34,100. Cash balance is lower by more than a lakh at Rs. 3,34,295 against Rs. 4,63,228 but this is amply compensated for by the increase in investments. Total liquid assets are Rs. 15,14,241 against Rs. 14,54,273.

The profit for the half-year ended March 1935 before depreciation and after charges and provision for Income-Tax and Super-Tax of Rs. 69,948 against Rs. 75,000 is Rs. 3,00,864 against Rs. 3,03,318 for the previous half-year. The increase in profits of the previous half-year was due to profit on investments of Rs. 17,734. The profit on revenue account for the half-year ended March 1935 was Rs. 3,67,579 against Rs. 3,51,833. The interest on investments was Rs. 3,333 against Rs. 7,557. Thus the improvement

BRITAIN

McINTYRE, HOGG, MARSH & CO.

By R. Gordon Cummings

Incorporated in 1908, this company conducts business as shirt and collar manufacturers and warehousemen, with branches in London and Manchester. A number of its products are sold under the trade name of "Radiac." Through intensive advertising its goods are well known throughout the United Kingdom.

For many years the authorised capital has remained at £500,000, the issued amount being £339,000 in £1 shares, of which 120,000 are 5½ per cent cumulative participating preference, and 219,000 are ordinary shares. Over and above their fixed cumulative dividend of 5½ per cent. per annum, the preference shares are entitled to an additional ½ per cent. for every 1 per cent. declared in excess of 7 per cent. on the ordinary capital. Both preference and ordinary dividends are paid about the middle of February and August. There are no debentures or loans outstanding.

An analysis of recent profits discloses that the company has not escaped unscathed from the industrial depression. It will be noticed from the table appended that net revenue has fallen during the last seven years. The annual accounts are, however, struck, on a conservative basis, and, as pointed out later, trading results during the last three years have shown little variation. Net profits and allocations for the last ten years ended November 30th 1934 are as follows:—

	Net Profit after Tax.	Pref. Div.	Ordinary Percentage Earned.	Paid	To Reserve
	£	£	%	%	£
1925 ...	69,626	63,026	25.8	17½	10,000
1926 ...	63,435	56,835	23.0	17½	10,000
1927 ...	77,042	70,442	29.1	17½	10,000
1928 ...	70,994	64,394	26.7	17½	50,000
1929 ...	69,889	63,289	25.9	17½	10,000
1930 ...	55,563	48,963	19.6	17½	—
1931 ...	50,405	43,805	17.2	17½	—
1932 ...	† 44,185	37,585	15.0	15	—
1933 ...	† 52,015	45,415	18.6	15	—
1934 ...	† 46,035	39,435	15.8	15	—

† Including investment realisation profits; £7,398 in 1932, £15,305 in 1933 and £8,516 in 1934.

For many years the ordinary dividends have comprised 3½ per cent. interims and finals of 6½ per cent. In the period covered by the above table the bonuses were 7½ per cent. per annum up to 1931, but in the last three years they have only been 5 per cent. per annum. In accordance with their rights the preference shares received total dividends and bonuses of 10¾ per cent per annum up to 1930/31, and 9½ per cent. per annum for each year since then. In order to make a fair comparison for the three years ended November 30th 1934 it is necessary to exclude the investment realisation profits in arriving at the net trading income. After making these adjustments, trading profits of £37,519 in 1933/34 compare with £36,710 in 1932/33 and £36,787 in 1931/32. The trend is therefore upward.

A feature of the annual reports is the strong liquid and reserve position. After making adjustments for the final appropriations, summarised balance-sheets for the two years ended November 30th last are appended:—

Assets—

	1934	1933
	£	£
Property, Plant, etc. ...	163,322	158,314
Cash, Debtors & Stocks ...	266,646	302,385
Investments	*317,367	278,424
Goodwill	55,000	55,000
Total ...	802,335	794,123

* Market value November 30th 1934, £388,617.

Liabilities—

	1934	1933
Capital	339,000	339,000
Creditors	115,613	111,192
Reserves	287,214	285,208
P. & L. a/c.	60,508	58,723
Total ...	802,335	794,123

On the basis of the 1934 figures, net liquid assets amount to no less than £468,400, or over £129,000 more than the issued preference and ordinary capital. The reserve fund of £287,214 is made up of £170,000 on general, £63,634 on depreciation, and £53,580 on stock and contingency account. These figures exclude the unrealised profit of £71,250 on investments. If to the reserve fund is added the profit and loss balance and the unrealised investment surplus, the total surplus equity available on the ordinary capital is £418,972, making the break up value of the ordinary shares about 58s. These calculations include goodwill at cost, but even if this were entirely written off the surplus would be £364,000, making the ordinary shares worth 53s. In view of the strong liquid position, it is possible that the directors may decide in the near future to repay part of the issued capital.

So far as prospects are concerned, the chairman pointed out at the meeting in February last that although he could not report any improvement in trading conditions during the current year, everything would be done to improve matters by instituting further economies and by installing the latest machinery in the factories, so that when the hoped for improvement in trade arrived the company would be in the strongest position to deal with it.

In view of these remarks a set-back in profits is unlikely during the current year, and although it may mean drawing on the carry forward, I do not think that the dividend and bonus on the ordinary capital will be reduced below 15 per cent. The £1 ordinary shares can be bought at 52s. 6d. to yield 5¾ per cent. Despite the not too bright outlook they can safely be bought as a good lock-up investment. For those requiring greater security the preference shares are worth attention at 35s. On the basis of last year's dividend and bonus of 9½ per cent. they give a good yield of almost 5½ per cent.

(*Continued from page 1174*)

in profits has been maintained. The amount set aside for depreciation is Rs. 42,877 against Rs. 60,256 the previous half-year and the amount allocated to reserves is Rs. 50,000 as against the same in the previous half-year. A dividend of 60 per cent. per annum was paid against 50 per cent. and the carry forward is Rs. 67,684 against Rs. 84,696.

The balance sheet for the half-year ended September 1935 will be published shortly and it should make good showing.

At the present price of around Rs. 80 the yield is 7·5 per cent. tax free on the basis of the last dividend. When we last recommended the share, it was at Rs. 57½ and it has now steadily appreciated to Rs. 80. Even at the latter level it is attractive

THE WEEK IN THE EXCHANGES

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Wednesday, Oct. 2, 1935.

The holiday mood continues in full swing at the Calcutta Stock Exchange and the volume of business transacted was smaller. The atmosphere here is surcharged with war rumours. In fact telegrams published in the Indian Papers, have already announced that hostilities will start on and from the 10th of October. This has undoubtedly had an effect on the Government Securities, and 3½ per cent. G. P. Notes went down to Rs. 88-10. The Indian Jute Mills Association met on the 30th September, and issued their six calender months' notice of the termination of the agreement on and from the 1st April 1936. It is also reported that the Association is considering the adoption of a rationalisation scheme on the lines suggested by the Government. Although the number of transactions in Jute shares was small, the rates ruled steady. Amongst others, Coal, Tea and Engineering shares were ruling strong. Call money was plentiful and Reserve Bank rate remained unchanged at 3½ per cent.

Government Securities.—Inspite of war rumours 3½ per cent. G. P. Notes did not drop down much. the lowest figure reached was Rs. 88-10 but at the close on Tuesday the rate recovered a little to Rs. 88-12. Of the others, the medium-dated loans were in demand as usual, although in every issue very few transactions took place. 3 per cent. New Loan was maintaining itself round about Rs. 96, 3½ per cent. Loan 1947/50 at Rs. 103, 4 per cent. Loan 1943 at Rs. 107-1, 5 per cent. Loan 1934-44 at Rs. 108-8.

Debentures.—The demand for debentures continued but no transactions took place owing to scarcity of sellers. Nothing was reported in either Port Trust or Municipal Debentures and of others a small lot of Rohtas Sugar at Rs. 101 and a small lot of Chitavalsah Jute 7 per cent. at Rs. 101-8 was recorded.

Preference shares.—In Jute preference shares, Agarpara changed hands at Rs. 134, Alexandra at Rs. 126-8, Bally at Rs. 140, Khardah at Rs. 131 and Soorah at Rs. 113. Of others Kesoram Cotton at Rs. 113-8, Muirs at Rs. 65 and Bengal Telephone at Rs. 14-6 were among the transactions. The only one dealing in Railway preference shares, reported was in Darjeeling Himalayans at Rs. 100 (F.U.D.)

Other Investment Stocks.—Reserve Bank shares kept fluctuating between Rs. 117 and Rs. 119. Both the lowest figure and the highest were touched on Tuesday. The closing was however better at Rs. 119. The absence of transactions in Imperial Bank contributories shares was marked, and only one lot of fully paids was crossed at Rs. 1,460 the old rate. Central Banks were better at Rs. 33-4 and a small lot was transacted at Rs. 33-6. In Railway shares some demand was evinced and Arrah Sasaram changed hands at Rs. 57, Kalighat Falta at Rs. 89 x.d. and Katakhal Lala Bazar at Rs. 89 x.d. In Shipping issues I.G.N. were better at Rs. 98 at which figure it closed. Calcutta Landings had buyers at Rs. 13-14 and Port Shipping at Rs. 15-2.

Cottons.—Kesorams recorded an improvement and during the period under review, kept on fluctuating between Rs. 3-8 and Rs. 3-10 closing at Rs. 3-9. New Victorias were dealt in at Re. 1-5, Bengal Nagpurs at Rs. 13-2 and Benares Cotton and Silk at Re. 1-3.

Coals.—A firm tone was noticed and business was done at advanced rates. Westerns were wanted at round about Rs. 2-14 and prices advanced about As. 8 in a days transactions. In others also, improved rates were noticed. Burrakurs closed at Rs. 11-14, against Rs. 11-8 of last week. Talchers at Re. 1-1 against Re. 1 of last week. Equitables were maintaining their old rate of Rs. 34, Deoli changed hands at Rs. 5-12 and Bengals at Rs. 251. Amalgamated Coals were fluctuating between Rs. 20-12 and Rs. 21 at which is closed.

Jutes.—A steady market was reported although the volume of business was on a small scale. Howrahs which were marked at Rs. 46-9 on Saturday, improved and by Tuesday it reached Rs. 47-4, at which it closed. Kamarhattys were dealt in at Rs. 476, Nationals round about Rs. 22, Clives at Rs. 25-10 and Gourepores at Rs. 625-8. It is strongly believed that if war actually breaks out the Jute share prices will have a further rise.

Electricals.—The demand for electric shares continued as usual, Bengal Telephones changing hands at Rs. 18-6, Jubbulpore Electrics at Rs. 12, Benares Electrics at Rs. 13-8 and Patnas at Rs. 17-8.

Engineering.—Both Indian Iron and Steel and Bengal Iron shares were strong, the former closing at Rs. 8-12 and the latter at Rs. 3-13. Of the others Indian Standard Wagons closed at Rs. 46 and Marshalls at Re. 1-3.

Sugars.—Only a few transactions were reported in this section which included Cawnpores at Rs. 33-12, Balrampurs at Rs. 17, and Samastipurs at Rs. 8-4. There were buyers for several others but with no sellers and business was not possible.

Miscellaneous.—Paper shares were wanted but transactions were few, and the prices were more or less unchanged. Titaghur ordinary shares closed at Rs. 22-2 and deferreds at Rs. 9-2. Bengal Papers dropped down considerably and from Rs. 97, which was last week's figure it closed at Rs. 94. Of the others Burma Corporations continued to get good support and better prices were obtained. It rose up to Rs. 7-6 but closed a bit easier at Rs. 7-2 ex-dividend. B. I. C. ordinaries were maintaining their old rate round about Rs. 3-6 and Indian Cables at Rs. 4-12. A couple of transactions in Calcutta Tramways took place at Rs. 21-4 and Rs. 21-8.

Teas.—Prices continued to be steady although no change was apparent and the transactions were few. Bishnauths had better rates at Rs. 26. Dufflaghurs at Rs. 12-4, East Indias at Rs. 10-8, Gohpurs at Rs. 6-8, Tezpores at Rs. 9-4 and Hattikhras at Rs. 24-8 were the principal transactions.

MADRAS STOCK EXCHANGE

(By Wire)

(From Our Correspondent)

Tuesday evening

The period under review covers only three days and the report is necessarily short. Markets ruled dull and business was on a restricted scale. In the gilt-edged section some improvement was noticeable. 3½ per cent. Paper was quoted at Rs. 89-11 ; 3 per cent. New Loan at Rs. 97-4 ; 3½ per cent. 1947/50 at Rs. 101-12 ; 4½ per cent. 1955/60 at Rs. 113-8 ; 5 per cent. 1945/55 at Rs. 116-4 and 5½ per cent. 1938/40 at Rs. 108-9.

Textiles.—There was a fair amount of support and prices were steady. Buckingham Carnatic were at Rs. 205, Vasanta Mills at Rs. 110 and Pankaja Mills debentures at Rs. 100.

Banks.—Reserve Banks were fluctuating between Rs. 117-8 and Rs. 119-8. Imperial Bank fully paid-ups Rs. 357-8. Indo-Commercial Banks were done at Rs. 357-8. Indo-commercial Banks were done at Rs. 26-12, Indian Banks at Rs. 27 and Hindustans at Rs. 30.

Electricals.—No change was noticeable in this section. West Coast Electrics were quoted at par and Vellore Electrics at Rs. 14-12.

Plantations.—There was some enquiry for rubber shares but there were scarcity of sellers. Nilgiri Neerugundi and Vellamalai Debentures were quoted at Rs. 102.

Miscellaneous.—Among others, Mysore Sugars were quoted at Rs. 26-12. Burma Corporations were in demand and were quoted at Rs. 7-5.

BOMBAY STOCK EXCHANGE

(*By Wire*)

(From our Correspondent)

Tuesday evening.

Money Market.—Money was easy with interbank call quoting at ½ per cent.

Exchange.—Steady. Banks were selling T. T. at 1s. 6 7/64d. for ready and upto April 1936 and 1s. 6 3/32d. May-December 1936. Banks are buying three months Bills at 1s. 6 7/32d.

Security.—The security market was depressed on account of war news. 3½ per cent. Paper was quoting at Rs. 88-7. 1941 Loan was quoting at Rs. 102; 1951/54 at Rs. 97-2; 1947/50 at Rs. 102-12; 1943 at Rs. 107-3; 1960/70 at Rs. 105-4; 1955/60 at Rs. 113-12; 1939/44 at Rs. 108-4; 1940/43 at Rs. 109-8; 1938/40 at Rs. 108-8; 1945/55 at Rs. 116-4; and 6½ per cent. Bombay Development Loan at Rs. 100-6.

Shares.—In the share market forward business is still closed.

Textiles.—In this section Colaba was quoting at Rs. 120-10; Gokak at Rs. 165; Indian Bleaching at Rs. 98-12; Indore Malwa at Rs. 72-8; Lakshmi at Rs. 625; New Great at Rs. 120; Simplex at Rs. 66-14; and Vishnu at Rs. 1,162-8.

Hydro-electrics.—Tata Hydros were quoted at Rs. 160-10.

Iron & Steel.—After being done at Rs. 143, Tata Second preferences closed at Rs. 142-8.

Cements.—This section was steady. Bundis were quoted at Rs. 34-12; Gwalior at Rs. 112-8; Katni Deferred at Rs. 1,980; Ordinary at Rs. 352-8; Okha at Rs. 265-2; Punjab at Rs. 23-4 and United at Rs. 120-8.

Miscellaneous.—Ahmedabad Electrics closed at Rs. 147-8; Alcocks at Rs. 161-4; Bombay Burmahs at Rs. 343-12; Bombay Telephones at Rs. 101; Bombay Trams at Rs. 142-8; Scindias at Rs. 11-8; Premier Constructions at Rs. 74-12; and British Burmah Petrols improved from Rs. 2-15 to Rs. 3-4.

Banks and Insurance.—Imperial Bank fully paids were quoted at Rs. 1,470 and partly paids at Rs. 358-12; Reserve Bank at Rs. 117-12; Bank of India at Rs. 120; Central Banks at Rs. 32-2; Barodas at Rs. 98-12; and Union at Rs. 5-5.

In the Insurance section, Oriental Life closed at Rs. 4,200; New India at Rs. 37-12; and Vulcan at Rs. 7.

NEW YORK STOCK EXCHANGE

On renewed fears of war, selling pressure was in evidence and prices were lower as a consequence. Eaton Manufacturing has declared a dividend of 25 cents and an extra dividend of 12½ cents.

LONDON STOCK EXCHANGE

Markets have been dull and weak and even during the short period under review the decline in prices is noticeable. In the giltedged section the decline in Home Funds was more marked. Indian Loans were fairly steady.

3½ per cent. Indian Stock 1931 was quoted at 92⅝, 4½ per cent. 1950/55 at 111, 4½ per cent. 1958/68 at 114½, and Consols were at 82½, 3½ per cent. Conversion at 102⅜, War Loan at 102⅞ and Victory Bonds at 111¼.

Among other sections, Oils were irregular. Teas and Rubbers were unchanged. Home Rails were lower, Great Western ordinary being quoted at 46. Minings were steady and Industrials were featureless.

INVESTMENT BREVITIES

The working results of the Hooghly Flour Mills Company for the half-year ended June 30, 1935, show a loss of Rs. 6,924 against a profit of Rs. 22,989 in the previous half-year. Rs. 7,692 has been set aside for depreciation against Rs. 10,512. No dividend has been declared as against 5 per cent. per annum last half-year and the carry forward is Rs. 9,057 at debit of profit and loss account against Rs. 5,560 at credit of profit and loss account last half-year.

The profits of the Bombay Steam Navigation Company for the year ended 30th June 1935 are Rs. 12,16,823 against Rs. 9,76,873 the previous year. The amount set aside for depreciation is Rs. 6,71,000 against Rs. 5,50,000 and allocation to funds Rs. 1,75,575 against Rs. 84,058. A dividend of 6 per cent. has been declared against 5½ per cent., and the carry forward is Rs. 11,000 against Rs. 15,753.

The loss of Smith Stanistreet & Company amounts to 3,08,726 for the year ending December 1934 against Rs. 28,227 the previous year. No amount has been set aside for depreciation against Rs. 14,820 the previous year. The debit balance carried forward is higher at Rs. 7,44,394 against Rs. 4,36,668.

With the Satpukuria and Asansol Collieries the debit balance carried forward is higher at Rs. 4,23,118 against Rs. 3,95,664. But it has not been due to any loss on trading account. The gain has been only Rs. 247 and the other charges and depreciation of Rs. 15,778 against the same last year have been responsible for increasing the debit balance carried forward.

The Mangalore Electric Supply Company for the year ended 31st March, 1935 reports a loss of Rs. 35,984 as against Rs. 27,397. The amount set aside for depreciation is Rs. 20,385 against only Rs. 470 last year and the debit balance carried forward is higher at Rs. 84,237 against Rs. 27,863.

MARKET REACTIONS TO POLITICAL NEWS

UNCERTAINTY STILL PREVAILS

By R. Gordon Cummings

By Air Mail

Special for "INDIAN FINANCE"

London, Sept. 23rd, 1935.

The past week has been a trying time throughout Stock Markets. Although at the time of writing prices are above the lowest levels reached on Friday there is still evidence of uncertainty. Beyond giving an outline of the major movements and the closing prices I do not propose at this stage, however, to discuss the changes in quotations since last writing. An explanation of Friday's slump is given in a subsequent note.

Gilt-edged have suffered severely, and even after a temporary rally to-day, prices of all stocks are anything up to several points down on the week. After being as low as 101⅞. *War Loan* is 103¾. 3½ *per cent. Conversion* 102, 2½ *per cent. Consols* 81¾, and 3 *per cent. Local Loans* 91¾. *India Loans* have suffered in sympathy, the 2½ per cent. being 68, the 3½ per cent. 91½, the 4 per cent. 106 and the new 3 per cent. 3 discount. *Colonial Stocks* have followed a similar tendency.

At one time Home Railway Stocks declined to almost the lowest levels of the current year, but to-day a little support was forthcoming from bargain hunters and prices were quickly raised. *London Midland and Scottish* is 17, *Great Western* 47, *London and North Eastern* 2nd preference 19½ and *Southern* Deferred 18. Were it not for the general feeling of uncertainty a good deal of buying would normally have been brought out at such attractive prices.

Industrials have also met with a large amount of selling, but in accordance with the change in sentiment this morning, a small part of the sharp losses of last week have been recovered. For instance, *Courtaulds* are 2s. above the worst at 54s., *Rolls-Royce* 7s. 6d. better at 150s., *Imperial Tobacco* 3s. up at 135s. and *British Oxygen* 5s. to the good at 106s. 6d. Elsewhere, *London Brick* are 79s., *Associated Cement* 5[illegible]s., *Eastwoods Cement* 48s., *Radiation* 69s., *Turner and Newall* 54s. 6d., *Electric and Musical Industries* 25s. 6d. and *United Molasses* 18s.

One of the strongest markets has been that for Iron and Steel shares, although here again some fairly big falls have to be reported. *Allied Iron* close at 37s. 6d., *Guest Keen* at 29s. 9d., *Hadfields* at 17s. 6d., *Staveley Iron* at 44s., *Stewarts and Lloyds* at 32s., *United Steel* at 32s. 3d. and *Vickers* at 16s. 6d. Electrical Equipment shares have stood up fairly well to the bout of liquidation, *Associated Electrical* being 34s. 3d., *English Electric* preference 20s. 9d., *General Electric* 61s. and *British Insulated Cable* 87s. 6d.

Amongst Motor Shares, *Alvis* have jumped to 12s. on the developments reported later, while *Fords* are better at 33s. 9d. Aircraft shares have benefited from rumours of war, *General Aircraft* in particular having spurted to 5s. 10½d. Breweries have a firm appearance with *Distillers* closing at 90s., *Guinness* at 140s., *South African Wine* at 46s. 6d. and *Watneys* at 70s. 6d. Amongst retail stores issues *Harrods* have kept steady at 81s. on some good investment buying, but shares of the newer "chain" groups have fallen on renewed fears of increasing competition. Readers will no doubt remember that I have repeatedly pointed out the difficulties which would later arise through the tendency of an increasing number of companies to enter this type of business.

On appreciation that the recent falls had been overdone the Oil Market has taken a turn for the better. Despite the weekly stock figures in the United Kingdom showing a moderate fall of about 250 tons—the first decline for many a long day—the price of rubber has again fallen to under 5½d. per lb. In the share market the tone is steady, but there is little business passing. With the Tea auction results continuing very satisfactory there has again been some moderate buying of the most promising shares.

Interest in mining shares has been confined to South African issues, which, generally speaking, are well above the worst. An outstanding movement has been a jump of 5s. to 58s. in *West Witwatersrand.* Sentiment, however, in West Africans and Australians is better. *Commonwealth Mining* are 11s. 3d. and *Ariston* 8s. Indian Gold Mining shares have turned easier on disappointment with the dividends, which are below general expectations.

Base Metal shares keep remarkably firm, although Copper and Tin issues have not as yet responded to the brighter outlook.

Market Reactions to Political News.

A brief resume of market movements during the last few days provides me with a striking example of the harmful effects arising from undue nervousness over the possible repercussions of the Geneva discussions.

For some time there has been a tendency for most stocks to decline, but on Friday last this decline developed into almost a landslide, gilt-edged being marked down several points and Industrial shares, especially the more speculative issues, falling by shillings each. This morning a more optimistic tone was in evidence, a moderate amount of buying being attracted by the opening of a new fortnightly account and by "Bear" covering. A fair part of Friday's falls was recovered, but once buying orders were filled, prices again fell away, jobbers adopting their usual attitude of playing safe. In consequence prices at the close do not by any means show the best of the improvement.

An analysis of the causes of the recent fluctuations will, although now somewhat academic, be of interest and a possible guide to future reactions. Not unnaturally the course of the Geneva talks has given rise to uncertainty and anxiety, with the result that many investors, particularly those of a nervous disposition, have been misled by market movements into taking hasty action which they may later regret. Three factors are responsible.

In the first place Friday saw the close of a very unsettled Stock Exchange fortnightly account. As a result of an almost complete absence of carry-over facilities short-term speculators were faced with the alternative of taking up their commitments or cutting their losses. The result was a good deal of forced selling. Secondly a large proportion of the recent purchases of gilt-edged stocks and Industrial shares was on foreign account. With their usual lack of foresight these foreign holders have been throwing out stock at any price without due regard to intrinsic merits. Thirdly buying support, apart from "Bear" closing, has not been much in evidence, bargain hunters being under the impression, probably quite correctly, that they need not hurry to buy.

The Action to Take.

As subsequent events have proved, Friday's fall was overdone. While I cannot yet forecast any steady upward movement in Stock Markets, I do believe that the best part of the trouble may now have been seen. Political developments will of course sway market sentiment for some time to come, but apart from an actual war involving Great Britain, I cannot find any tangible reasons for a further heavy marking down in stock and share prices. Without doubt, speculative counters will fluctuate with general sentiment, but holders of gilt-edged stocks and sound industrial equities should not be panicked into hasty action by such movements, or nervous selling.

Last week I took the view that the time was almost ripe for buying gilt-edged. I feel that by Christmas this view will be fully justified and be reflected in much higher prices. At this point however I have to utter two warnings. Firstly, the possibility of an early general election should not be overlooked and, secondly, it now seems certain that the Government will soon float a "National Defence Loan" for anything up to £250 millions. With things as they are at present the flotation of a new Government Loan would have anything but an inspiring effect on markets, although from the point of view of industrial companies connected with the armaments business a profitable era would be opened up.

Capital issue Market Revival.

Finance Houses have gained some Measure of confidence from the successful issue of 750,000 £1 preference shares on behalf of *MacLeans Ltd.*, the toothpaste etc., manufacturers. The list of applications was closed in a few minutes and I am told that applications were in excess of over three times the number of shares offered. Had market conditions not been so adverse I am sure that these shares would have opened at more than 1½ d. per share premium in initial dealings.

Another event has been the successful issue of a 2 per cent. guaranteed loan for nearly £1,000,000 on behalf of the *African Railways Finance Company*. This stock is relatively short dated and as such has a strong appeal for the money market.

Several issues are scheduled to be made before the end of the month, but it will be some time before we again see the exceptional activity witnessed during July.

On the other side of the picture an interesting sidelight on the strong financial position of many old established companies is the proposal of the directors of *William Hollins and Co.*, the spinners and fabric manufacturers, to return in cash 15s. on each of the £1 preference shares. If these proposals are adopted they will entail a repayment of £270,000 to shareholders.

With restrictions on foreign business still in operation and the need of spending big sums on replacement of machinery not being a dire necessity, a number of companies are accumulating large liquid resources. In common with the individual investor they are finding it impossible to place these funds surplus to ordinary business requirements in remunerative investments. Who can therefore blame the directors if they decide to rid themselves of such a responsibility by repaying capital bearing interest at rates of 5 per cent. and over; and hereby placing the burden of finding a profitable home for such money on the shoulders of their shareholders?

A number of similar proposals have been carried through of late and further companies will adopt the same policy in the near future.

Progress in the Heavy Industries.

A number of companies in the Iron and Steel and kindred industries have come out with some very satisfactory dividend and profit statements during the week. Before dealing with these items of news I propose, however, giving more details from the report of *Stavelely Coal and Iron Company* for the year ended June 30th last.

As already announced trading profits of £518,983 compare with £463,973 in 1933/34. Allocation to depreciation is £186,242 (£187,748), thus leaving, after deduction of directors fees, a net profit of £323,2 9, compared with £274,774 in 1933/34 and £230,6 8 in 1932/33. The present net profit constitutes a fresh high record and goes against the recent best figure of £286,130 in 1930/31. After again allocating £50,000 to general reserve and £10,000 to writing down workmens' houses, and providing for the tax free dividend of 8 per cent. (½ per cent.), the carry forward is reduced by £4, 39 to £98,7 3. Earnings on the £3,385,356 issued ordinary capital are equal to 9.7 per cent., as against 8.1 per cent. in the previous twelve months and 6.8 per cent. in 1932/33.

Apart from an increase of £130,000 to £1,318,414 in liquid assets, which now exceed current liabilities by £893,600, the balance-sheet shows few changes. In addition to a depreciation reserve of £572,409, general reserve is £1,050,000. The £1 ordinary shares have always been a strong favourite of mine, so that the present results give me due cause for satisfaction.

The annual report of *Sheepbridge Coal and Iron Company* for the year ended June 30th last also shows a satisfactory improvement in profits, which come out at £105,085, against £85,871 in 1933/34. Compared with 5 per cent. for each of the two previous years, the ordinary shares give a good yield combined with prospects of capital appreciation.

Thos. W. Ward, the constructional and general engineers, announce a further gratifying recovery in profits, which, for the twelvemonths to June 30th have risen by £16,283 to £91,351. Dividend arrears on the 5 per cent. second preference capital are brought up to date, but, contrary to certain optimistic expectations, no distribution is to be made on the £1 ordinary shares, which, however, should not be parted with at current price of 16s. 9d.

Evidence of the accumulating benefits accruing to companies operating in South Africa is forcibly brought home by the jump of £18,600 to £37,494 in the net profits of *E. W. Tarry and Company*, the mining and agricultural machinery manufacturers. Out of the present profits two years dividends, bringing matters up to June 30th 1932, is to be paid on the 6 per cent. £1 preference shares. Obtainable at 22s. 6d. these shares certainly look a promising holding.

Other items of interest include the decision to pay an interim dividend of 2½ per cent. on the ordinary shares of *Hopkinsons*, manufacturers of boiler mountings etc., an increase of 2½ per cent. to 10 per cent. in the ordinary dividend of *Ransome and Marles Bearing Company*, and maintenance of the ordinary dividend at 20 per cent. on the ordinary capital of *Qualcast*, the manufacturers of lawn mowers etc. The latter company earned record profits of £45,240 in the year ended June 30th last.

Other Industrial Results.

Increased profits and higher dividends are not, however, the sole monopoly of the heavy industries, gratifying statements having recently come to hand from a wide variety of industrial and other enterprises.

In the light of my forecast of a few weeks ago I would like to draw particular attention to the latest report of *Eastwoods Limited* covering the twelvemonths to March 31st last. Profits of this prosperous Company, which carries on business as brick manufacturers, builders, merchants, coal factors, etc., and controls various subsidiary companies, apart from its interests in Associated Concerns, have risen from £72,395 in 1933/34 to £85,038. After providing for the preference dividend earnings on the £300,000 ordinary capital are equal to 27.7 per cent., compared with 22.5 per cent. 1933/34 and only 11.1 per cent. in 1932/33. By a final payment of 10 per cent. the dividend is made up to 15 per cent. (12½ per cent.), and after again putting £22,500 to general reserve, the carry forward is over £7,000 higher at £13,811. A profit of £11,194 on realisation of investments is transferred direct to investments reserve. Total disclosed reserves now exceed £193,500, or almost two-thirds on the ordinary capital.

In the retail trades section, *Selfridge Provincial Stores*, which owns a chain of well-known shops operating in London and the provinces, managed to increase profits by £2,853 to £107,371 during the year ended August 31st last. The ordinary dividend is maintained at 2½ per cent. and the reserve allocation of £25,000 is unchanged. While this Company has a long way to go before it recovers its former prosperity the £1 ordinary units are not overvalued on prospects at 9s. 6d.

The recent decision of the directors of *Leyland and Birmingham Rubber Company* to raise the ordinary dividend by 1½ per cent. to 7½ per cent. is fully justified by an increase of almost £16,000 to £36,2[illegible]9 in the profits for the year ended June 30th. As earnings on the ordinary capital were in excess of 10 per cent. it should not be long before the ordinary shares rise from their current low level of 25s.

Two interesting announcements are the resumption of ordinary dividends by the *United Premier Oil and Cake*, and the *Smithfield and Argentine Meat Companies.* United Premier is paying 4 per cent. and Smithfield 2½ per cent.

Net profits of *Press Caps* for the year to June 29th are £14,665, as against £8,539. A final dividend of 7 per cent. making 10 per cent. for the year, is to be paid on the £96,000 ordinary capital. A sum of £5,000 is transferred to general reserve, £1,664 is written off new issue expenses and the carry forward is raised by £227 to £3,118. These figures fully justify my previous advice to buy the 5s. ordinary shares.

Mining Finance Dividends.

In sympathy with the shares of producing companies some sharp falls from the highest levels of this year have been seen in the stocks of the South African mining finance companies. There is no need for me again to stress the lockup merits of these shares. For those requiring a well spread investment in sound mining properties I have no hesitation in suggesting purchases in this group.

Perhaps those nervous investors in doubt as to the wisdom of taking an interest in what some people still erroneously consider to be a highly speculative section of the Stock Exchange will be encouraged by the raising of the dividend by 10 per cent. to 40 per cent. on *Rand Selection Corporation* 5s. ordinary shares. They can also derive encouragement from the latest annual report of *Johannesburg Consolidated Investment.* Despite the fact that profits have fallen by £201,918 to £1,179,017 a wonderfully strong position is shown in the balance-sheet. In accordance with the previous announcement the distribution on the £3,950,000 issued capital is to be maintained at 20 per cent. I have a shrewd idea that the decline in profits is the result of a conservative and heavy writing down in investments to well below current market values. The market value of the numerous holdings must be many millions of pounds in excess of the present book valuation of £6,626,260.

Market Pointers.

For the year ended June 30th, 1935 profits of *Harrisons and Crosfield,* the Eastern Tea, Rubber, Tin and other merchants, rose by £6,[illegible]81 to £263,284. Dividend on the deferred ordinary capital is again 20 per cent.

Alvis Bar and Engineering Company is shortly to manufacture, under a concession or licence, aero-engines designed by an aircraft firm known throughout the world. It is anticipated that in order to make the necessary large extensions to the present plant it may be necessary to issue further capital.

In November, 1933 a full year's dividend was declared on the 4½ per cent. non-cumulative preference stock of the *Central Argentine Railway,* but only one-half of this dividend was paid, and then not until November, 1934. It has now been decided to pay the balance on October 4th.

Latest weekly Home Railway traffics for the four main line companies disclose an aggregate decline of £29,000. Passenger revenues increased by £1,000, but receipts from goods traffics have fallen by £30,000. The market was not pleased with these figures.

The latest monthly traffic index of *Cable and Wireless* for August reflects the falling away in world trade pending a satisfactory settlement of the Abyssinian dispute. Although the August index of 67.1 is slightly up on that of 66.7 for July last it compares with 70.7 in August, 1934.

BOURSES IN AIR MAIL WEEK

Paris.

The confident tone prevailing at the beginning of the week on satisfactory progress at Geneva regarding the political situation gave way to an uncertain and rather depressed tendency. There was an allround decline in prices and holders became nervous on account of the frequent alarmist rumours. Rentes, Banks, Internationals and Industrials went down. Suez Canals were quoted as low as 16,430, Royal Dutch at 19,180, Thomas Houston at 138 and Banque de France at 8,730.

On the Coulisse even though the decline was not so marked, share prices could not resist the general trend. Shares in the Gold Mining Group were not so adversely affected.

	Sep. 13	Sep. 16	Sep. 19
4½% Rentes, 1932 "A" ...	89.75	88.85	85.75
4½% Rentes 1932 "B" ...	90.65	89.80	86.65
Banque de France ...	9,490.00	9,500.00	8,730.00

WALL STREET IN AIR MAIL WEEK

WALL STREET TAKES NOTICE OF POLITICAL DEVELOPMENTS

GENERAL SETBACK IN PRICES

By F. Rocke.

By Air Mail

Special for "INDIAN FINANCE"

Wall Street which was hitherto unconcerned about the political developments on the Continent has apparently grown sympathetic and prices were as a consequence a shade lower. The profit-taking in evidence at the close of last week continued and the general tendency was irregular. Coppers were firm. At the close war rumours and the serious fall on the Paris Bourse caused prices to decline. Even Steels and Motors declined. Oils and Rails which were higher were lower. Some dealings took place in war stocks.

On the Bond market, Treasury Bonds and other government obligations were lower. This was partly due to the fact that banks were loathe to invest in Treasury bonds, large stocks of which they had already in stock. They preferred short-term maturities. On the foreign list, Italians slumped further.

Owing to the Puja holidays, there will be no issue of "Indian Finance" next week.

Editor.

Rails were slightly better during the week but they closed lower. Freight car loadings in the week ended September 7 totalled 592,800 cars, an increase of 30,100 cars over the corresponding week of last year.

Chicago, Milwaukee, St. Paul and Pacific Railroad propose to spend $5,000,000 in the current half-year on improvements and re-equipment.

The commodity market was interesting. Cotton as well as wheat was strong. Copper futures were under pressure notwithstanding the firmness of export copper which was bid up as high as 8.60c. per pound and the confident maintenance of the new domestic price at 9c.

The domestic copper price has been raised from 8½c. to 9c., the old "code" level.

The export price touched 8.57½c. per pound, the highest level since July 25, 1933. Bulk sales were done at 8.50c. to 8.55c.

The August copper statistcs have been issued, which show that world copper stocks have fallen from 569,378 tons on July 31 to 549,830 on August 31.

Domestic stocks fell from 263,000 tons to 240,000 tons, and foreign stocks from 305,000 tons to 301,000 tons.

There was very heavy buying at the week-end before the increase in the domestic price became effective, no less than 46,560,000 lb. changing hands. Total sales in the first half of this month are 76,000,000 pounds, against 29,000,000 lb. in the same period of August.

Copper shares were firm on Wall Street. Kennecott Copper, which rose ½, to a new high level for the year, report earnings of 32c. per share for the first six months, against 36c. in the corresponding period a year earlier.

The oil situation has not very much improved. Oil shares were slightly higher. A new plan has been devised for the curtailment of California's unchecked flow of crude oil. An announcement of regulatory measures is expected shortly.

It is reported that the plan for the curtailment of crude oil production provides an emergency provision establishing the market demand for October, November and December at 531,000 barrels daily compared with the current production of 635,000 barrels.

The daily average production of crude oil in the United States in the week ended September 14 was 2,749,850 barrels, against 2,660,000 in the previous week, according to the figures of the American Petroleum Institute.

Gasoline stocks in the United States on September 14, totalled 42,916,000 barrels.

According to the *Iron Age* steel mill activity during the week was at 52 per cent. of capacity against 52.5 per cent. the previous week.

The renewed threat of the strike in the bituminous coal industry is improving the pig-iron market. The demand from the automobile industry some time later will be good.

At present the automobile industry is concentrating itself in changing over its production to new models. It is faced with unexpected difficulties but they are expected to be got over in a short time.

Buick Motors announced a reduction in the prices of new model ranging from $40 to $385 per car.

Chevrolet truck sales in August totalled 21,716 the highest in any month in the Company's industry. The figure for August 1934 was 16,748.

Motor output in the U.S. and Canada for the week ended September 15, totalled 13,470 units against 2,960 in the corresponding week of 1934.

September 20, 1935.

BRITISH COMPANIES IN INDIA

By R. Gordon Cummings

Banking and Gas Interim Dividends.

As for many years past the interim dividend on the issued capital of *Chartered Bank of India, Australia, and China* is to be maintained at 7 per cent. actual. In respect of the four years ended December 31st, 1934, final dividends were also 7 per cent., making 14 per cent. per annum. In more prosperous periods annual dividends were maintained at 14 per cent., plus 6¼ per cent. bonuses, all free of Income-tax. The issued capital is £3,000,000 in £5 fully paid shares, which are quoted at £12¾ ex-dividend.

For the eighth successive year *Bombay Gas Company* is maintaining the interim dividend on the £300,000 issued capital, all in £1 ordinary shares, at 3½ per cent. Since 1930 the interim payments have been followed by final distributions of 4½ per cent. per annum.

Indian Gold Mining Dividends.

The interim dividend announcements of the remaining three gold mining companies under the management of John Taylor and Sons are now to hand. *Champion Reef Gold Mines of India* is maintaining the interim at 12½ per cent., while *Mysore Gold Mining* is again paying 7½ per cent. *Ooregum Gold Mining* does not pay any interim on the ordinary capital.

Rubber and Tea News.

In respect of the period from March 19, 1934, to June 30, 1935, a dividend of 4 per cent. is to be paid on the £99,970 capital of *Sittang Valley Rubber Estate*, which was formed to take over the assets and liabilities of another company, wound up under a reconstruction scheme in March, 1934. The Company owns estates situated in Lower Burma with a total area of 4,272 acres.

Following the resignation of Mr. S. Thompson, Mr. L. Drysdale has been appointed to a seat on the Board of Directors of *British Darjeeling Tea Company*. At the same time Mr. M. W. S. Pemberton has been appointed Chairman.

COMPANY REPORTS

BENGAL NAGPUR COTTON MILLS LIMITED

The Directors beg to submit their report and accounts for the half-year ended June 30, 1935.

	Rs.	A.	P.
The working for the half-year after allowing for Debenture Interest, Depreciation and Commissions, shows a loss of	1,318	13	7
After deducting this from the amount brought forward from last half-year	22,698	1	3
There remains a balance of	21,379	3	8
Which the directors recommend should be dealt with as under :—			
In payment of a dividend on the Preference Shares at the rate of 7 per cent. per annum, free of Income-Tax	10,500	0	0
Leaving to be carried forward	10,879	3	8

Trading Conditions.—The unsatisfactory trading conditions which manifested themselves early in the year continued throughout the period under review, principally on account of cloth prices failing to respond to the upward trend of cotton. Prospects for the coming half-year are uncertain.

Messrs. H. D. Townend, H. F. Bensly, B. M. Birla and D. J. Leckie—*Directors.*

Messrs. Shaw Wallace & Co.—*Managing Agents.*

MANGALORE ELECTRIC SUPPLY CO., LTD.

Report and Audited Accounts for the year ended March 31, 1935 :—

Accounts.—The Revenue Account shows a loss of Rs. 56,369-0-1 (including depreciation amounting to Rs. 20,385-0-10) which when added to a sum of Rs. 27,867-8-10 brought forward from the previous year leaves a balance of Rs. 84,236-8-11 to be carried forward at debit of Profit and Loss Account.

The Directors hope that the accounts of the Company for the year now current will show an improved position.

Progress.—Nine tile factories in the Southern area of Mangalore were connected to the Company's mains during the year but the demand from this source has fallen off since February, 1935, when the manufacture of tiles was greatly reduced owing to the difficulty experienced by the manufacturers in securing a market for them.

The development of the Company's system in the Northern area of the town to which reference was made in the last Report has not been completed.

The proprietors of a large Oil Mill have decided recently to take a supply of electricity from the Company to drive five Oil *Ghannies.*

On March 31, 1935, the applications for supply of electricity numbered 708 and the following table shows the number of consumers connected and the connected load at that date :—

	Number of Consumers	Connected load in K. W.
Domestic	521	392.376
Industrial	37	401.95
Street Lighting		18.175

The supply of electricity has been satisfactorily maintained and a table is appended showing the number of units sold each month since the commencement of supply :—

THE TATA OIL MILLS CO., LTD.

The Directors submit their report and Audited Statement of Accounts for 12 months ended with the 31st of March 1935.

During the year, the Company has made a profit of Rs. 4,583-10-5, which, with the sum of Rs. 8,828-1-11, brought forward from last year's accounts, makes up a total of Rs. 13,411-12-4. The Directors have decided to carry this amount forward.

As reported last year, the sales of the Company's products are now being made directly by the Company.

The Directors sanctioned the installation of a small plant for manufacturing Glycerine from the spent Lyes (of the Soap Plant) which have hitherto been thrown away as waste. The plant has just been erected and was only put into operation last month, so it is too early yet to offer an opinion on its working. The resultant product however is satisfactory and the Directors hope to get some additional income from this source.

The Directors are also glad to report that they have arrived at an arrangement for the disposal of Oxygen—a Bye Product of the Hydrogenation Plant—which was allowed to go to waste so far. The arrangement will come into effect in the course of the current year and will also bring a little supplementary income.

The plant has been kept in good condition and is working efficiently.

Calcutta, Friday, Oct. 18.

Short credits continue unlendable. The nominal rates, likewise, continue to be ¼ per cent. in Bombay and ½ per cent. in Calcutta. The continued easy conditions in the money market are, on a superficial view, at variance with the hardening rates in respect of the weekly sales of Treasury Bills. Till the auction of October 1, there was a steady decline in the average rate of accepted tenders and the low level of 0-11-8 was touched that week. Since then, however, a firmer tendency has been noticeable. By the same token, the applications on the auction day have also tended to dwindle down. On October 8, the total amount offered came to Rs. 2.78 crores. It is noteworthy that the total amount accepted was not the full Rs. 2 crores but only Rs. 1.78 crores. Even so, the average rate rose to 0-12-6. During the current week, applications came to only Rs. 2.22 crores. But by alloting the full amount of Rs. 2 crores, the average rate had to be pulled up to 0-15-9. As for Intermediate Treasury Bills, the sales on October 2 amounted to Rs. 2.08 crores. It is to be noted that the sales were kept open only for one day ; and sales at the tap-rate were withdrawn from the second day. Sales of intermediates on October 9, amounted to Rs. 2.01 crores. In this case also, sales were kept open only for one day. It is now announced that the sale of Intermediate Treasury Bills to the public has been discontinued until further notice.

Now that intermediate Treasuries are suspended for the time being, it is useful and necessary to examine the position in this regard in some detail. In the first week during which the tap-rate was announced, sales of intermediates came to Rs. 5.60 crores ; in the second week, they were Rs. 3.05 crores ; in the third week, Rs. 2.08 crores ; in the fourth week, Rs. 2.01 crores. The total sales at the tap-rate were thus Rs. 12¾ crores. In all these four weeks, the tap-rate was open only for one day. It must not, however, be construed as an indication of a considerable interest on the part of banks in the three months, Treasury Bills. It was the operations from special quarters, namely, the Imperial Bank, that accounted for the large sales made at the tap-rate. This is borne out by a study of the weekly returns of the Imperial Bank. On september 13, the investments held by the Imperial Bank were Rs. 33.08 crores. By October 11, they had increased to Rs. 45.60 crores. The increase in the giltedge portfolio of the Imperial is thus Rs. 12½ crores in four weeks. This exactly corresponds to the total sales of intermediates.

The floating debt stands at the present moment at Rs. 27½ crores. More than half of this total would appear to be held by the Imperial Bank. It follows that the banks other than the Imperial are not yet fully interested at the rates prevalent in the last few weeks. It is of paramount importance that larger and larger interest of the banks should be cultivated in Treasury Bills. Towards this end, it may be even necessary to offer a more attractive yield on Treasury Bills. It is not satisfactory that the authorities should depend upon a single institution for the major portion of its floating debt. If, for any reason, that institution has special use for its funds, it may not be able to subscribe for large amounts of Treasury Bills. In which case, the Government will be obliged to fall back on the banks in general, the result being a sudden and sharp rise in the discount rate. The popularisation of Treasury Bills and their being made a general vogue in the money market are tasks to which the Reserve Bank must devote careful attention and special thought. As we have remarked more than once in these columns, the presence of the Reserve Bank is hardly felt in money market circles. To all appearances, there is not much difference between the present state of affairs and the old regime. By pursuing an enlightened Treasury Bills policy which will interest

Reserve Bank would be taking the first step towards the proper functioning of a bill market.

The floating debt is already Rs. 27½ crores and it looks as though it will, ere long, reach a total of Rs. 35 crores. This is fully Rs. 15 crores in excess of the limit envisaged in the budgetary plans. But it must not be forgotten that the highest watermark of the floating debt is, as a rule, touched in November/December; and that the reduction in the size of the floating debt will start and be completed in the final quarter of the financial year, during which period there is a considerable excess of current revenue over expenditure. At the moment, with the increase in the Treasury Bills outstandings to Rs. 35 crores, the ways and means position of the Government should be satisfactory. Rs. 9½ crores has to be repaid in respect of the 6½ per cent. Bombay Development Loan on November 1. The cash balance of the Government with the Reserve Bank on October 11, was Rs. 10.92 crores. Even after allowing for the sales of Treasury Bills in the remaining weeks of this month, it may well be necessary for the Government to take an advance from the Reserve Bank. The advance could easily be liquidated in the course of November from the funds received on account of Treasury Bills sales. On account of the increase in Treasury Bills outstandings, the deposits of Scheduled Banks with the Reserve Bank have shown a sharp shrinkage. On September 20, deposits of banks with the Reserve Bank stood at Rs. 38.94 crores. By October 11, they had fallen to Rs. 29.28 crores. The decline is thus Rs. 9½ crores. Most of it is accounted for by the fall in the cash balance maintained by the Imperial Bank with the Reserve Bank. In four weeks, the cash held by the Imperial with the Reserve Bank has come down by Rs. 7½ crores. The total cash balance of the Imperial Bank as on October 11 stands at Rs. 19.66 crores. This means that the interest which the Imperial Bank will take in future sales of Treasury Bills will be on a considerably smaller scale. This betokens a further hardening tendency in the discount rate.

The Reserve Bank elections for the Local Boards are to take place next month; and the final date for nominations is Monday of next week. We have, again and again, urged in these columns that the shareholders of the Reserve Bank should realise that the vote which they will now exercise is a serious responsibility and a magnificent privilege. We trust that the shareholders will not succumb to the intrigues and manoeuvrings of vested interests and that they will ensure the election of men who will discharge their work in the best national interests. We believe that there will be great liveliness in the elections in Bombay and Madras. The shares in those areas are well-distributed, and the shareholders are of an intelligent class. We have, however, reasons to believe that the shareholders in the Calcutta register would turn out, in many cases, to be nominees of some powerful institution or other. Moreover, the unattached shareholders have been disposing off their holdings in recent weeks. Bombay has bought heavily from Calcutta. Shrewd investors in the Western Capital have been picking up these shares at the declining levels of recent weeks. The Bengali community is conspiciuous by its absence in the Central Board. We hope that this defect will be redressed in the constitution of the local board. We have heard of many candidates who are in the field. A good few of them are quite worthy of the confidence of investors and of the Indian public. It is too early to comment on this matter as the full list of candidates will be known only next week. Meantime, we have received considerable enquiries as to whether one who is not a shareholder can stand as a candidate for the local board. There is an impression that, as in the case of most joint stock companies, it would suffice for the successful candidate to buy the requisite shares *after* the election. The Reserve Bank Act, however, makes it clear that five members are to be chosen *from amongst themselves* by shareholders on the register of the particular area and entitled to vote. In other words, only a shareholder who has been on the register for six months is eligible to stand as a candidate for the Local Board.

The closing rates are: 1s. 6 3/32d., October-December T.T.; 1s. 6 1/8d., January-March T.T.; and 1s. 6 3/32d., onwards.

Bills may be quoted: 1s. 6 7/32d., for any position but some bargaining is possible as to the rates.

Money has been unlendable. The nominal rate is ½ per cent. for interbank call money.

Firms money for call, three days' notice, seven days' notice and onemonth, twomonth and threemonth deposits 2 per cent. to 2¼ per cent.

In the present temper of the authorities in England, and in the posture of world developments to-day, nothing can be more futile than talks about currency stabilisation. One would have thought that the futility of these talks is obvious and that there would be no recurrence of such talks. In this, however, one is disappointed. It is, indeed, a matter for surprise that the question of currency stabilisation should be raised again and again on platforms and on occasions which are at once divergent and strategic. Some weeks ago, the League assembly was utilised for mooting proposals for monetary stabilisation ; and all that transpired on that occasion, was a kind of general reassurance that the ultimate aim of all important nations was a return to the gold standard. It was sought to make out that while *de jure* stabilisation remained still unaccomplished, the dollar and the currencies of the sterling bloc could be said to have achieved a measure of *de facto* stabilisation. It is true that studying the fluctuations of sterling in the course of 1935, the variation is, perhaps, no more than 5 per cent. It is also true that the Exchange Equalisation Account has been active and purposive. Nevertheless, there can be no doubt that British authorities wish to keep an absolutely open mind and free hand in this matter. They do not propose to be committed to any definite step in this regard for some time to come—possibly, for a good time to come. Despite these known views of the British monetary authorities, the question was brought up in the International Parliamentary Commercial Conference held in London in the first week of October. It was the remarks of Dr. Burgin and of Mr. Bruce, the Australian Delegate, which were interpreted by the press in the gold bloc countries as indicating a change in the attitude of Britain in favour of an early stabilisation.

The discussion that was raised in the International Parliamentary Commercial Conference at London was something like the bearding of the lion in his own den. But the British lion was not willing to allow itself to be thus bearded. At the same conference, Mr. Neville Chamberlain made a categorical and emphatic statement to the effect that, "as things are to-day, even the most tentative approach to stabilisation is quite unthinkable." The same night, at the Lord Mayor's dinner, Mr. Chamberlain took it upon himself to utter another clear warning against premature stabilisation. The two occasions on which the British Chancellor of the Exchequer spoke his mind in Air Mail week on currency stabilisations are marked by a special emphasis of language and tone which should make the gold bloc countries realise that this constant reiteration of the need for an early stabilisation would not make the British authorities change their mind.

After the declaration of Mr. Neville Chamberlain in such curt and explicit terms, it is surprising that hints of early stabilisation have emanated, in the current week, from leading international authorities. Two important pronouncements in this regard deserve attention. Both of them are from responsible officials of the United States. This means that the propaganda of the gold bloc is thus having the support and backing of America. Talking to pressmen in Paris, Mr. Henry Morgenthau, the Secretary of the Treasury of the United States, declared: "If the European countries wish to discuss stabilisation and currency questions, we are ready at any time to discuss them ; but hitherto we have received no such requests from England or France." It is also announced that Mr. Morgenthau had conversations with the French Premier, the French Finance Minister, the Governor of the Bank of France and the Governor of the Bank of Holland. Mr. Morgenthau was, however, careful to add that, in the course of discussions, he had only touched on monetary problems, such as stabilisation, in a general way. This message from Paris receives added piquancy from a passage in the broadcast speech of Mr. Cordell Hull, the Secretary of State of the U. S. A. A Washington message gives a summary of the broadcast speech. Mr. Hull advocates a three-fold effort for peace and prosperity. He urges simultaneous international action in three directions, namely, first, for the vigorous rebuilding of international trade, second, for the gradual restoration of monetary stabilisation, and third for an international agreement ensuring that all important raw materials would be available on reasonable terms wherever they are needed. There is now a feeling in London city circles that the countries still adhering to the gold standard and the United States are adopting tactics which look like forcing the hands of the British monetary authorities. So long as pressure in this regard is confined to the economic field, the British authorities will not allow their hands to be forced. If political factors come into play, who can prophecy what the future has in store?

OUR BALANCE SHEETS TELL THE TALE

Founded in the wake of Swadeshism, the "NATIONAL" of Calcutta has grown from strength to strength with the result that it is to-day one of the leading Life Offices of the East. During nearly thirty years of buisness-building it has been able to accumulate assets worth more than Rs. 2,50,00,000 despite the fact that within so short a period a sum exceeding Rs. 1,30,00,000 has been paid away by way of Claims to the Policyholders and their beneficiaries. These are facts which merit the earnest consideration of those who do not want to gamble with the savings of a life-time. Why not yours?

You have only to let us know your requirement and leave the rest to us.

NATIONAL INSURANCE CO., LTD.

IL DUCE'S DIPLOMACY

What seemed to the world outside secret international corridors as the war-obsessed arrogance of Italy appears, in the light of the latest news, a supreme diplomatic triumph of IL Duce. The application of collective sanctions, under the authority of the League of Nations, rests principally, if not exclusively, on the complete co-ordinated collaboration of Great Britain and France. From the beginning, France took up an attitude of extenuating conciliation to Italy which hampered Britain in the legitimate application of the League Covenant against Italy, on the finding of the League, as an international outlaw. Sir Samuel Hoare's definite pronouncement induced a reassuring response from Monsieur Laval and the League seemed to have been saved from utter impotence. That happened three weeks ago; and the League proceeded to set in motion its cumbruous machinery of sanctions. Financial measures against Italy were approved by the co-ordinating Committee of the League Assembly, while proposals for economic action, sponsored by Mr. Anthony Eden, have not yet emerged from the Committee stage. Meanwhile, Italy has proceeded unconcernedly with her pre-conceived predatory plan.

* * *

France's studied reluctance to translate her allegiance to the League in terms of progressive effective sanctions against Italy is explained by Signor Mussolini's new diplomatic counter. Contrary to assurances previously given, the Italian Government now expresses inability to defend the Brenner Pass and desires to be assured of French assistance. The message, which is really an ultimatum, has at once altered the situation for the worse. It is a pointer, at a pschychological moment, which practically effaces France's active co-operation with Britain in the cause of collective peace. The danger, ever present in French and Italian minds, of Germany exploiting the present situation is the diplomatic explosive that Signor Mussolini has, with consummate calculation, hurled at France. Monsieur Laval, in pursuit of France's policy of security, cautiously cultivated Britain's co-operation after the categoric statement of Sir Samuel Hoare that the collapse in the present instance of the League of Nations would destroy the bridge that linked Britain to Europe. The implications of that statement, the considered foreign policy of the British Cabinet, were not obscure; and France, remembering 1914-18 and intensely apprehensive of a similar danger in the near future, ranged herself on the side of her chief ally to dissuade Italy from an act of brigandage, but with reservations that restricted the degree and scope of sanctions.

* * *

France's reaction to Signor Mussolini's gambit was instant and fundamental. Monsieur Laval, acting, it is reported, on his own initiative, has already opened fresh accommodating negotiations which include the following proposals:—

(*a*) The Italian advance to halt at the positions now occupied.

(*b*) The Province of Tigre to be an independent Principality under Italian control.

(*c*) The cession to Italy of the Provinces of Harar and Ogaden.

(*d*) An international system of control over the rest of Abyssinia.

Supplementing these proposals, the French Premier has raised the point with the British Ambassador in Paris whether the situation would be improved by the reduction of the British forces in the Mediterranean to a more normal strength. It is added, of course, that the new French outlook in no way affects Angle-French relations. On the information on hand, it is clear that Signor Mussolini has isolated Great Britain from collateral action with France—a diplomatic *coup* with incalculable repercussions in Europe and Africa. Italy has all along insisted that Britain, in pursuing peace *vis-a-vis* Abyssinia, is not an addict to altruism. Nor has Great Britain, despite her diplomatic dissertations, disavowed her immense interests in Egypt and in the terrain covered by Kenya and British Somaliland. In the ultimate analysis, clouded by ancillary incidents, Abyssinia represents a British-Italian clash of interests inherently antagonistic. The armed, not to say alarmed, British activity on the Mediterranean and at Gibralter bespeaks the incidence of Britain's present passion for peace. That she is, on the showing of her naval and aerial experts, not now on the same fighting standard as the great Continental Powers would not be missed by Signor Mussolini.

* * *

Reliable reports indicate that the situation in Egypt is tense owing to the mobilisation of 50,000 Italian troops on the Sallem frontier and the arrival of 350 bombers and several submarines in the vicinity of Tripolis. Signor Mussolini declared to all whom it might concern that Italy was prepared to meet military sanctions by war, whether roundabout the Suez Canal or on the Mediterranean. As far as is known, the total of British warships in Alexandria, Port Said, Suez and Ahabah harbour is 190, besides the Malta fleet. At the Aboukir aerodrome alone there are 300 British aeroplanes. At the Cairo aerodrome 400 British bombers are awaiting instructions. At the British military headquarters at Cairo, a considerable strength of tanks and artillery has been assembled. Gas masks have been distributed widely. It is known that the Mediterranean Fleet Admiral, with military highbrows, has inspected the desert from the air. The present relative naval strength on the Mediterranean is—

		Britain	Italy
Battleships	...	6	4
Aircraft Carriers	...	1	1
Cruisers	...	12	30
Destroyers	...	37	111
Submarines	...	6	77

These war preparations or precautions belie the diplomatic pose that Italy and Britain have no points of conflict outside the local implications of the Abyssinian outrage. If deliberate and designed actions have any significance, the peril of war in or over Egypt is a stark reality. Il Duce's dream of an overseas empire, compassed by the Mediterranean and the Nile, a modern replica of Imperial Rome's sway over the Egypt of Cleopatra, is a vigorous element of Italy's foreign policy. The Abyssinian episode—for it is no more in the Italian scheme of conquest—is the first step to the goal of Fascist Italy's ambition. In the words of a great British imperialist, Italy seeks in a new world to restore the balance of the old. Pacificism and imperialism cannot coalesce in any concrete form ; and so long as the existence of empire States rests on imperialism, war is the only certainty of our civilisation. Humanity, red in tooth and claw, stalks the continents, to-day Abyssinia ; tomorrow—who can tell,

* * *

The rift in the lute of Italy's hymnal is the position of her finances. During the ten days to September 20, the Bank of Italy's gold reserves declined by a further £3,815,000. This continued decline reflects Italy's war preparations. The bullion reserves of the Bank are used to purchase exchange in Paris to meet payments for materials for the manufacture of munitions. In three months, Italy has lost £18,800,000 in gold. The amount of gold held by the Bank is estimated at—

June 30, 1934 ...	£108,000,000
June 30, 1935 ...	£91,000,000
July 31, 1935 ...	£87,000,000
August 31, 1935 ...	£78,000,000
September 20, 1935	£72,200,000

The drain can continue for some time ; but that means that Italy's currency will be merely paper, the value of which will be negligible in the money markets of the world. Neither Germany nor France nor Britain thought of or cared for the economic devastation of 1914-18. Trangic History is repeating itself within a decade and a half.

THE RAILWAY CONFERENCE

Once a year, what time the Puja spirit permeates castes, creeds and communities, railway men from the four corners of the country assemble at Simla to deliberate on what is and what may be in railway matters. Not long ago, this gathering of gaysome railwaymen was a mutual adoration institution. "Behold, we are not like unto others, but a law unto ourselves", was the unexpressed slogan of the President and his following. Criticism, however informed and constructive, was anathema; condemnation, however merited, was impertinence. For, were they not the gods, the demi-gods and the semi-demi-gods of the railway world for years and years; who should know better than they how to run railways without ruining them? Government, through the Railway Board and the Railway Member, used to cast an appraising, if not approving, eye, on the doxology of the Conference, which would disperse after a fortnight's cheerful appreciation of Simla and its autumnal delights.

* * * *

Other days: other ways. The Conference now meets in a chastened mood which the continuance of the bankrupt condition of railways has induced. There is a commendable heart-searching and mind-cleaning; the Pharisaical spirit is subdued, if not submerged. This conversion of heart and mind marked, in rather sombre tones, the proceedings of this year's conference. Mr. J. C. Highet, Agent, North Western Railway, who presided, presented, what appeared to him, the two principal problems of railway administration—road competition and revision of rates. Mr. Highet, expressing the new sense of administrative efficiency, admitted that the best way to deal with road competition was to co-ordinate all forms of transport. Funds for capital expenditure should, he agreed, be largely spent on so constructing roads as not to duplicate existing transport systems—a suggestion of the Transport Advisory Council. The Railways have, it would appear, accepted the principle that precedence should be given to the construction and development of non-competitive roads in areas innocent of transport facilities. The linking up of these feeder lines would rope in substantial receipts which are not now tapped. The Conference would do well to remember that transport has to cater to goods and not goods to transport. Certain forms of transport, not necessarily primitive, are best adapted to certain kinds of goods. No co-ordination between road, rail and river would cover all the ground without an intelligent appreciation of this fact.

* * *

On the question of rates, the Conference views did not fall in with Indian Commercial opinion, which is insistent that the present rating is defective. Popular opinion holds that railways should be run on sound commercial methods, without political or communal bias. That is also the avowed sentiment of railway authorities. It is in the translation of a common aim into reality that railways and the people disagree. Mr. Highet ran over the gamut of rating difficulties, laying perhaps too much stress on the technique rather than the principle. No one doubts that the fixation of rates in economic relation to railways and commodities is a complicated business; and

we appreciate the points made by Mr. Highet, specially in regard to cheaper rates for long distances, irrespective of the consideration that traffic is spread over different systems.

* * *

In July, there was a conference at New Delhi of representatives of the Federation of Indian Chambers of Commerce and Industry, the Associated Chambers of Commerce, the Imperial Council of Agricultural Research and the Indian Railway Conference Association. Before that the Railway Board had invited important commercial bodies to convey their views on the scale of rates to a special Committee, which had done a good deal of spade work. The Committee's report has not been made public; nor is anything known of Government's decision, if any, on the subject. The case for revision is so strong and its urgency so manifest that it is more than disappointing that Mr. Highet's review does not encourage a reasoned optimism. His plea that "a formidable obstacle in the way of attempting any complete revision of the classification is the cost of compiling the special statistics which experts have advised to be necessary for the purpose" is thin. Cost counts for nothing when Government pursue, as they often do, a policy of purposeless extravagance or obstinate obsession. To sidestep the admitted need of a revision of rates, in consonance with India's new economic and industrial requirements, is a grave lapse. It would seem that railway administrations have not wholly broken away from the undisciplined traditions of immunity from public control. Of the monopoly mentality which still leavens railway administration, though in a diluted degree, the Railway Member, who was present at the Conference, spoke in refreshingly candid language. He said: "It is for the railways to consider whether it is not possible for them to bring home their services—at least so far as goods traffic is concerned—to the people in the same manner as the motor transport concerns do. In regard to the passengers of the class who are acquiring the habit of motor transport, would not railways consider the desirability of impressing upon their subordinate staff the need of greater courtesy towards and greater attention to the comfort and convenience of that class of passengers? At present I am afraid that class of passengers contemplates a railway journey with a certain amount of dread and fear and regards it in the nature of a tribulation. I see no reason whatever why that should continue to be so."

* * *

Implicit in that indictment is a judgment on the policy of railway administration. Practices have an affinity to policy. And, in re-affirming Sir James Grigg's assurance to the merchants of Bombay that Government are anxiously aware of the rapid fall in railway earnings, the Railway Member urged Agents at the Conference to place railways on a sound financial basis before handing over to the Federal Railway authority.

PROGRESSIVE HYDERABAD

The gladdening year of His Exalted Highness the Nizam's Jubilee is rendered more gladsome by the happy budgetary position for Fasli 1345, corresponding to October, 1935 to October, 1936. For the past three years, there have been consecutive surpluses. The actuals for 1345-F show a surplus of Rs. 23.96 lakhs which is more by Rs. 7.32 lakhs, than the anticipated surplus. The revised figures for 1344-F also show a surplus of Rs. 12.61 lakhs. The estimates for 1345-F again indicate a surplus of Rs. 16.46 lakhs, on receipts at Rs. 855.92 lakhs against expenditure at Rs. 839.46 lakhs. Reassuring as the budgetary position is, the instance of the loan of a crore of rupees being oversubscribed within ten minutes of the issue speaks volumes for the credit of the Hyderabad State. As a

matter of fact, applications received showed Rs. 138 lakhs ; the significance of this response is all the more noteworthy as the loan was issued at 3½ per cent., and at par. It is already quoted at a premium of 1.3 per cent., despite the fact of disturbed conditions in the West, which have already produced deleterious effect on giltedge securities elsewhere.

Under capital expenditure, the Nizam Sagar is the most noteworthy, as it is estimated to cost Rs. 4½ crores, on which the annual interest and maintenance charges will be Rs. 26 lakhs a year. The progress of this project will be watched with interest, as it is preventing any augmentation of the grants to nation-building departments like education, medical relief, etc. When even 4 per cent. on this project comes to be realised, it will give the Finance Member of the day an yield of Rs. 18 lakhs a year, which he may spend on the nation-building departments of the State.

The Hyderabad State is almost a pioneer in finding a solution for the annoying problem of road and rail competition. The State budget provides for an expenditure of Rs. 18.96 lakhs over the expansion of road mechanical transport services which link motor with railway transport under the same agency. This innovation, while yielding net earnings of Rs. 2.8 lakhs to the coffers of the State, serves to prevent private monopoly of a public utility service, and gives, at the same time, to the public a service more regular, cheaper and safer. The cash balances, at the end of the past three Fasli years, also indicate the happy position of the finances of the State. At the end of 1344-F, they were Rs. 292.07 lakhs ; and at the end of 1345-F, Rs. 267.12 lakhs. Another striking feature of the financial administration of the State is the departmentalisation of the finances, by which the surpluses accruing to a department are pooled for three years ; and further sums therefrom are voted to the department concerned. This practice conduces to economy and automatic development of the departmental activities.

It is but proper to give a brief statement of some of the great schemes of development, marking the progress of the Hyderabad State, during the 25 years, as during the current year, the Jubilee of H. E. H. the Nizam Mir Sir Osman Ali Khan Bahadur falls. In the words of Sir Akbar Hydari, the Finance Member, and the Leader of the States' representatives in the Constitutional negotiations,—"the first ten years' reign was memorable for rallying the resources of the Hyderabad State to the service of the Empire during the Great War, when, besides indirect help, there were direct contributions in money, consisting partly of subscriptions to the War Loan amounting to Rs. 1 2/3 crores and free gifts in the form of subscriptions amounting to almost Rs. 2 crores ; introducing in the State a Paper Currency of its own, the profits from which amounted to over Rs. 19 lakhs a year ; construction of the Himayat Sagar and the Osman Sagar to safeguard Hyderabad against floods at a cost of Rs. 1½ crores ; construction of some of the buildings which beautify Hyderabad, such as the High-Court, the Osman General Hospital and the City College, at a cost of half a crore ; supporting the activities of the City Improvement Board which have continued unabated with liberal grants from the State Exchequer, amounting by the end of the present year to almost Rs. 2 crores ; and revision of the scales of salaries increasing the Salary Bill of the State by about one-third crore.

During the present Nizam's reign, the progress of expenditure was satisfactory, if only because the departments of internal development show an increase of Rs. 55¾ lakhs, to which should also be added a considerable portion of the increase to about Rs. 25 lakhs under interest and debt redemption, due to the undertaking of capital works on a large scale from Loan Funds. Among the departments of internal development may be mentioned first education, including the inauguartion of the Osmania University, the expenditure on which has risen from Rs. 65 lakhs to Rs. 89 lakhs. Among the large programme of works, made feasible by the departmentalisation system, may be mentioned the Hyderabad modern drainage system and supply of pure drinking water at a total cost of Rs. 2 2/3 crores ; the provision of drainage systems, water works and electricity and other amenities to the chief towns, facilities for through communications by construction of large bridges over the Bhima and over the Godavari at three places, costing in all over Rs. 60 lakhs ; and a net-work of roads over the Dominions, costing about Rs. 2¾ crores.

It is only agriculture, receiving an annual grant of about Rs. 9 lakhs, that has not yet received its due recognition.

The subsidy of a quarter lakh a year to Tata's for diverting the Trans-Continental Air Mail to Hyderabad, making adequate provision for starting of a Civil Aviation Club and the deputation of an officer to England to arrange for the starting of broadcasting stations between Hyderabad and Aurangabad deserve special notice as conducive to bringing the State in line with modern civilised States.

His Exalted Highness was able to achieve so much good for his subjects, mainly through the purchase of the railway from the company without any loan. The benefit to the State was, on an average, about Rs. 108 lakhs a year, as against only Rs. 20 lakhs a year in the quinquennial period, 1316—1320 Fasli.

This review will be incomplete without reference, in Sir Akbar Hydari's own words, to the role Hyderabad played in the Indian movement for Constitutional reform:—

> "Mention must be made, in conclusion, of the deputation of a Sub-Committee of the Executive Council to England in connection with the constitutional discussions leading to the Government of India Act of 1935. The period of the present contract will possibly be the last before the State is called upon to make its decision whether to enter the Federation of India as a constituent State or to remain in its present position of isolation from British India in direct relation with the Crown. In the course of the discussions that have led to the Government of India Act in its final form, Hyderabad has insisted upon provision that will enable it, in the event of its joining the Federation, to maintain intact, in matters affecting its Finance, such insignia of the Nizam's Sovereignty as its own Post Offices, Stamps and Currency; such sources of revenue as its internal customs revenue; and such fields of administraiton, even in subjects in which it may agree to federate, as the management and control of its own Railways. And it is needless to say that, if Hyderabad does ultimately decide to enter into the larger life of an All-India Federation, its entry will not be obtained at the expense of the stability of its finances, which has been such a proud feature of His Exalted Highness' reign."

IN THE AERIAL BLUE.

The conquest of the air has opened another vast world to man's service. How magnificent and manifold that service is appears from a concise report on the progress of civil aviation in India in 1934-35. In two decades, flying has taken its place as one of the premier transport services. Railways and ships grew into their present speed and security in two hundred years; aviation has leapt, as it were, into popularity in twenty. The mid-Victorian poet's prophecy of science culling her secrets from the latest moon has in aviation a remarkable fulfilment. A country of wide spaces and wonderful mountain ranges, India presents a great promise for aviation. Flying can never be a popular service in this country of incredible mass poverty; but the transport of mails, merchandise, tourists, scientific survey and "joy" parties and affluent passengers is outstripping anticipation. The responsibilities of the Director of Civil Aviation are widening quickly and, with the carrying out of Government's programme of capital expenditure, aviation is coming into its own. This programme, for which Rs. 92½ lakhs are earmarked, envisages the full equipment of the trunk air mail route across India with night flying apparatus, ground organisation and meteriological and wireless accessories.

* * *

London reports suggest that the trans-India route may be open for night-flying by the beginning of next year, though the schedule of the Government of India post-dates it by six months. The development programme provides for similar equipment of the Karachi-Bombay-Madras and Colombo routes, the laying down of a route between Bombay and Calcutta and Madras and Calcutta and the improvement of the Karachi-Lahore service. Last year's record carried civil aviation on a big wave of expansion. An internal air service began operations in Burma; a regular air mail was inaugurated between Karachi and Lahore; and the decision of the British Post Office in December to introduce the flat rate air

mail surcharge to all places in India, followed by the duplication of the London-Calcutta service and of the complementary feeder lines in this country, had a stimulating effect. The total weight of mails carried by Tata's Western India air mail in 1934 increased over 76 per cent., and once again that service registered a hundred per cent. regularity. Since March of this year, a remarkable record has been marred, but it still remains an outstanding achievement among air mail lines. The Tata Machines serve Karachi, Bombay, Hyderabad and Madras. For a considerable period, an extension to Colombo has been anticipated and it is to be hoped that the Ceylon Government will make this expansion possible in the near future. India is served by three big lines—Imperial Airways; K. L. M. (Amsterdam-Batavia) and Air France (Paris-Saigon). The development of the internal service will naturally align itself to Imperial Airways, operated in India by Indian Trans-Continental Airways, as the main trunk line.

* * *

One flying club—that of Kathiawar—closed down; but at Delhi, Karachi, Bombay, Madras, Trichinopoly, Dum Dum, Lucknow, Cawnpore and Lahore, the work of training pilots and popularising flying has been progressive. The outstanding event was the enterprising instructional flight to Europe organised by the late Flight-Leiutenant Binley, whose unfortunate death was widely regretted. The survey of the year's accidents is the only setback in an otherwise fruity report. There were actually four fewer mishaps than in the previous year, but the consequences were much more serious and four lives were lost as compared with no fatality in 1933. What aviation has done to facilitate communication between Britain and India is indicated by statistics. In 1930, (the first complete year of working) the weight carried was about 39,700 lbs. to India and about 3,500 lbs. from India; for 1934 the total was, to India about 85,000 lbs. from India about 83,500 lbs.

THE TEXTILE TARIFF BOARD

With the arrival of Sir Alexander Murray in Bombay, a ticklish and somewhat embarassing enquiry has begun. We do not envy Sir Alexander his task. At the outset, we may own that we do not see any need for this enquiry at this stage or at this moment. Nor can we reconcile ourselves to an investigation which is an off-shoot of the notorious Mody-Lees Pact. We deem it our duty to stress that ciated with episodes which have left a bad taste in the present enquiry is ill-timid, unwanted and asso- the mouth. While we must make our position in this regard clear and unambiguous, we do not agree with those who criticise the *personnel* of the Board. For the present enquiry, Sir Homi Mody is as much culpable or responsible as the Government. Let not the critics from Bombay forget that their own Millowners' Association backed Sir Homy in the Pact which he concluded. If, then, this enquiry was to take place whether we liked it or not, the Board as it is now constituted is as good a Board as the Government could have set up. The Millowners of India will find that in Sir Alexander Murray, they have a Chairman for the Board who will be appreciative of Indian interests and impartial in his judgment of rival claims. Much has been made of the appointment of a British businessman as the head of this enquiry. All this criticism has its root in a lack of proper appreciation of the credentials, equipment and past career of Sir Alexander. Let us also not forget that the cause of protection to Indian industries received the most stalwart support during the occasions when the Tariff Board was presided over by an European and the commerce portfolio was in charge of a British civilian. We cannot agree that the mere appointment of an Indian as the Chairman of the Tariff Board would have ensured a more favourable treatment to the Indian textile industry. Instances are not rare where Indians have out-heroded Herod. So far as this enquiry is concerned, we believe that it is wrong to make all this fuss about the mere fact of a European being its Chairman.

* * *

However, we agree with many of the other points made out in the representation of the Indian Merchants' Chamber of Bombay. The terms of reference are limited to the examination of the cost of production in this country; the issue is thus purely an economic one. We believe that, in view of this important consideration, the Government should have appointed an economist on the present board. In the absence of the strictly scientific outlook which a trained economist would have brought to the deliberations of the Board, there is every reason to fear that political issues may have exaggerated significance. It will be the difficult task for Sir Alexander to keep the enquiry within strictly economic limits. This caution is all the more necessary as the earlier history which has culminated in this enquiry represents a measure of political intrigue which has caused bitterness in this country. The impression prevalent in Lancashire is that the Indian

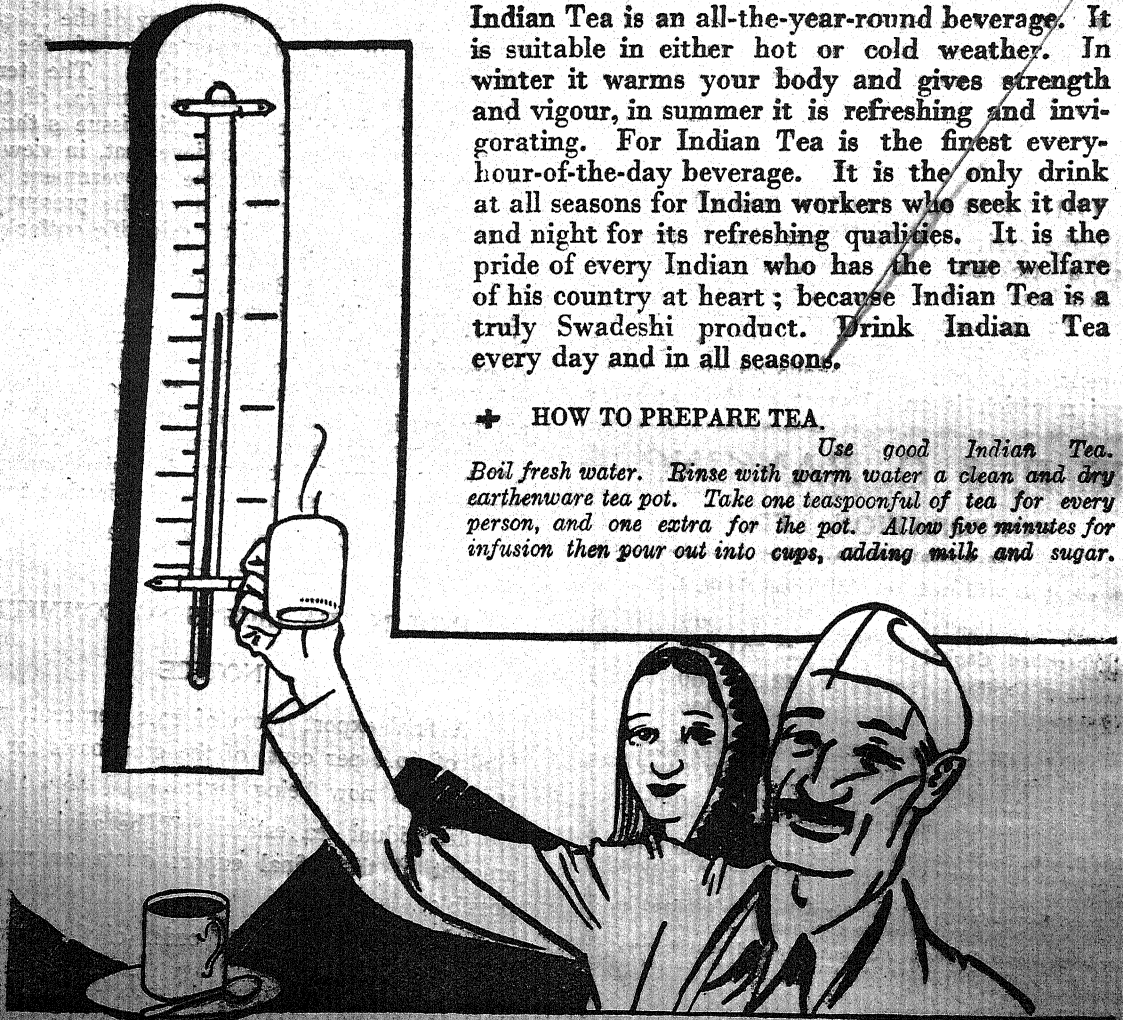
INDIAN TEA

aids health in hot or cold weather



Indian Tea is an all-the-year-round beverage. It is suitable in either hot or cold weather. In winter it warms your body and gives strength and vigour, in summer it is refreshing and invigorating. For Indian Tea is the finest every-hour-of-the-day beverage. It is the only drink at all seasons for Indian workers who seek it day and night for its refreshing qualities. It is the pride of every Indian who has the true welfare of his country at heart; because Indian Tea is a truly Swadeshi product. Drink Indian Tea every day and in all seasons.

✚ HOW TO PREPARE TEA.

Use good Indian Tea. Boil fresh water. Rinse with warm water a clean and dry earthenware tea pot. Take one teaspoonful of tea for every person, and one extra for the pot. Allow five minutes for infusion then pour out into cups, adding milk and sugar.

India's joy and pride • **INDIAN TEA**

And there came a leper to him, beseeching him, kneeling down to him, and saying unto him, if Thou wilt, Thou can'st make me clean.

And Jesus, moved with compassion, put forth his hand, and touched him, and saith unto him, I will ; be Thou clean.

And as soon as He had spoken, immediately the leprosy departed from him, and he was cleaned.

For any the foullest disease, there may be cleansing. But the patient must not lack faith, nor must the physician lack grace. If only the managing agents in India should realise the folly of some of their ways, Dr. P. S. Lokanathan would fain prove a master-healer for the ills with which they are afflicted. It is not that they know not their sins ; they know their sins and persist in them. Salvation in their case becomes hundred-fold difficult. Yet, their sins must be redeemed ; for, we do need the service which the managing agency system, purged of its dross, can render. This is the conclusion which Dr. Lokanathan underlines in his opportune publication, *Industrial Organisation in India* (George Allen and Unwin Ltd. 15s.). I would strongly commend the book to every leader of the business community, to everyone who has aught to do with managing agency, to all those who wish to see Indian industry replanned and reorganised on a basis which spells enduring prosperity.

Much has been said and written, in recent years, about managing agents and their ways and wiles. Three outstanding landmarks arrest one's attention. The first is the downright condemnation of the system by the Bombay Shareholders Association and their demand that it should be uprooted lock, stock and barrel. The second is the reasoned defence of the system as it obtains in the Eastern Presidency, the defence being led by Mr. K. C. Mahindra in the evidence which he tendered at the special request of the second Textile Tariff Board. The third is the chapter in Dr. Matthai's report on managing agents—following closely the views advanced in *Indian Finance* in a series of articles. Dr. Lokanathan's may be said to represent the final judgment on these valuable data. Not that his treatise is a mere compilation of, or routine commentary on, these materials. Dr. Lokanathan has thought carefully, gauged developments sympathetically and understandingly, and planned for the future with vision, courage and circumspection. Reading through everyone of the pages of his fascinating book, there is not a word or hint or the slightest trace of bias or prejudice ; he has the complete impartiality of a strictly scientific student. The data he has gathered are intelligently scrutinised and skillfully marshalled ; he has examined the data in a purely scientific spirit ; he states his conclusions fully and frankly—without fear or favour. His aim has been to get at the truth of this matter ; and what need he bother about smiles or frowns in proclaiming the truth? For, there can be no doubt that his mission to discover the truth has been completely successful. Everyone will concur in this judgment of mine on reading his final conclusion which he states thus:—

> There are those who think that the managing agency system has outlived its usefulness and that it must go. No one who has followed the evolution and work of the managing agents, described in the foregoing pages, will agree with such a view. That there are defects, even of a serious kind, may be admitted, but they are capable of solution. On the other hand, in some ways, it will be a great advantage for the country to have the continued services of agency firms with ripe experience and great financial resources. Managing agents perform a wide variety of functions which cannot all be undertaken by ordinary Boards of Directors.
>
> At the same time in the future industrial organisation it may be expected that there will be increasing opportunities for Boards of Directors to function. As each new industry gets started and as experience is gained by the Board of Supervisors, the earlier risks of pioneering and organising would disappear, and the field would become clear for ordinary management typified by a Board of Directors. The managing agency firms will be the spearhead of industry and the vanguard of the industrial army of leaders ; the Board of Directors will follow in their footsteps. Each will gain from contact with the other and the country will be the richer on account of this variety in its industrial leadership.

To those who suppose that if the managing agency system is abolished and industrial control is assumed by Boards of Directors, with a managing director, secretary, or president as the chief executive officer, as in other countries, every difficulty will be solved, Dr. Lokanathan has the ready answer that, in one way or another, those now connected with the several managing agency firms will continue to represent the quintessence of the industrial ability and experience available in the country, and whatever be the form of industrial control that is devised, they will undoubtedly remain the "captains" of industry. In thus advertising the virtues of the managing agency system, the learned doctor is not unaware of the extreme defects which have come to light in a number of cases. In this connection, he makes distinction between the European managing agency firms and the Indian managing agency firms. The remarks, which he makes in comparing and contrasting the two kinds of agency firms, may not prove palatable to such nationalists as have no tolerance for a frank exposure of national defects and deficiencies. But those who have had anything to do with Clive Street and Hornby Road would readily agree that the bouquet which Dr. Lokanathan has presented the European agency houses is as reserved as the brickbat which he hurls at most of the Indian agency firms. The European managing agency firms represent the harmonising of the best features of the *hereditary* system and the *selective* system, while Indian firms are mostly family concerns, allowing sons and heirs of the families to become managing agents irrespective of their ability to perform these tasks.

Dr. Lokanathan proves from the history of the British managing agency firms in India that two types of ability have intermingled in a continuous stream: "The original founder or founders of the agency firm have their family represented on the firm from period to period, but there is always an outside element brought into the business which brings with it not only some capital and industrial experience but knowledge of the technical conditions of some industry or other. The family heir serves to maintain continuity in the ownership of the firm; but there are always two or more partners recruited from the firm's senior assistants. These latter continue as partners as long as their services are available, but on their retirement or death they are not succeeded by their sons, but their place is taken by other assistants from the industry."

As Indian agency firms are more or less conducted as family concerns, the field of selection for managing agency functions is, extremely limited. It is, of course, not to be understood that the succession to a firm by the son or heir of the family is necessarily a mistake; but when this occurs to the exclusion of other talents and experience, the results are unsatisfactory. It is for this reason that Indian agency firms have shown mainly financial capacity but rarely any capacity for expert technical knowledge. Another important difference between the European and the Indian managing agency system is that it is only the former that reveals its distinctive features and harmonises theory with practice. In the words of Dr. Lokanathan,—

> "So long as a managing agency firm manages just one industrial company, the only effect is that it combines the financing function with that of management. But when a large number of units in different industries comes to be controlled by one managing agency firm, very interesting influences on the structure of industry are brought into play. If we exclude a few firms like Messrs. Tata Sons and Co., practically all the Indian managing agents are concerned with one or two or a small number of units belonging to one and the same industry, and therefore have no such influence on the structure of industrial organisation as the typical managing agency unit has. . . . In the case of the European section of the system, both the nautre of the organisation and the men who run the agencies are equally important elements in industry. The administrative 'integration' to which we referred in the last chapter is secured under the British managing agency system, and if, therefore, the system is given up, we shall lose some of the valuable advantages that are associated with it."

Dr. Lokanathan is, therefore, persuaded that what is now prevalent in the case of most of the British agency firms and a few Indian agency firms is worthy and wholesome and must remain a permanent feature of the Indian industrial system. He would like, in the first place, that the Indian firms, which, save for some notable exceptions, have remained financial and not industrial in character, should take steps, on the model of the British firms, to organise their *personnel* and business in a way that will subserve managerial or administrative purposes. In simple terms, what is needed is not only a hereditary system but its association with selective system. Towards this end, attention should be directed to the task of getting into the firms a continuous flow of varied talents on a status which will ensure the best blossoming of such talents. In the second place, Dr. Lokanathan advocates the grouping of a considerable number of units in different industries under one and the same management; and only thus could an Indian industry derive the best possible benefits of co-ordination and economy. Much of the abuses arising from the lack of technical or administrative talents in managing agents are due to the proprietary rights conferred on managing agents over the agency business. The powers of assigning the rights of agency firms tend to exaggerate and foment these abuses. Dr. Lokanathan suggests that the following clause, taken from the latest English Companies Act, must be adopted in India:

> "If in the case of any company provision is made by any agreement entered into between any person and the company for empowering a director or manager of the company to assign his office as such to another person, any assignment of office made in pursuance of the said provision shall, notwithstanding anything to the contrary contained in the said provision, be of no effect unless and until it is approved by a special resolution of the Company."

The incorporation of a simliar provision in the Indian law is urgent and should not be delayed.

But what is really required is a change in outlook and a better appreciation of responsibility. We want new blood, new ideas, new drive, new conception of public duty, new etiquette and integrity. This cannot be achieved by the mere substitution of Boards of directors for managing agents. Nor will the imposition of greater responsibility on directors solve the problem. Dr. Lokanathan advances the original view—and I agree with his view—that under the managing agency system, it is impossible to have a Board of directors in the British sense of the term. A Board of directors can be, alongside a managing agency firm; only a mere ornament to the industrial organisation, or the echo of the managing agents or just figure-heads and no more. The doctor stresses the conclusion that the managing agency system and the system of control by a board of directors are mutually exclusive and opposite and that the failure to recognise this fact has led to the perpetuation of a number of undesirable consequences which could have been remedied by proper legislation. Dr. Lokanathan suggests that the idea of boards of directors must yield place to a Board of Supervision; and the case which he makes out in this behalf must be stated in his own words:

> "What is therefore required is to interpose between the managing agents who are the real 'directors of industry,' and the shareholders, some body or committee of men who must be entrusted with quite specific powers, but whose functions will be very different. Germany and Holland afford examples of great value to India. In Holland, business concerns do not possess Boards of Directors in the British sense of the term. A small body known as the 'commissarissen' is appointed whose duty it is to supervise and report to the shareholders upon the activities of the 'Directeuren.' In Germany the Aufsichstrat performs functions similar to those of the Dutch commissarissen. These functions are important, and include the securing of all relevant information to be placed with the shareholders, the approval of the company's balance-sheet, the right to be consulted on every important new policy and so on. Indian company law must likewise recognise the existence of the managing agency system and provide for the constitution of a Board of Supervision which, while leaving administration in the hands of the managing agents, may exercise general supervision and act as adviser and guide to them, and be responsible to the shareholders for the supply of accurate information. It should also be provided that the balance sheets of the companies managed by managing agents should, before being presented at the shareholders' meeting, be approved by this Board."

As Dr. Lokanathan visualises a future in which there will be ample room for both the managing agency system and the system of management by boards of directors on the English model to work side by side,

he anticipates that the experience which the Board of Supervision would gain as a result of this performing certain definitely assigned, though limited, functions would bring about a wider dispersion of industrial knowledge and experience ; a nucleus of men possessing intimate acquaintance with the general problems of industrial management would thus be formed, who would be able to supply the necessary basis for the constitution of a board of directors for companies that may be formed outside the managing agency system. He sees no need for managing agency in well-established industries and in industries which do not involve difficult problems of finance or high technical ability. Further, in industries of national importance like public utilities, it is dangerous to adopt a system which confers such enourmous powers on the managing agents. Managing agency in relation to banks and insurance companies are a sheer superfluity—the fifth wheel in the coach—analogous to the appendix in the human system, capable of no good but likely set up great harm in the form of appendicitis. Dr. Lokanathan sees, however, two important ways in which the managing agency system can still justify itself: "Where it has the opportunity of performing the useful function of co-ordinated and centralised control in administration great economy can be achieved under the system. Again, where much pioneering work is involved in the establishment of new industries, and where financing requires not merely large resources but considerable waiting, the managing agency system can be of the greatest value to the country."

What the future of the managing agency is, will greatly depend upon the development of certain forms of control, both from within and without. First, as a remedy from within, Dr. Lokanathan advocates the creation of an association of managing agents which would be a kind of self-regulating organisation serving as the best insurance for the safety and permanence of the managing agency system. This association must develop and popularise certain internal rules of conduct and control with a view not merely to eradicate the undesirable elements that have crept into the system but to develop and strengthen those features that justify its continuance. A membership of the association must imply a definite recognition of responsibilities and a loyal conformity to prescribed standards of conduct. At the same time, the association must not be exclusively Indian or European. Both sections must unite. Each will gain by association with the other. The Indian managing agents will find their experience enriched by a knowledge of the methods of co-ordination and control successfully adopted by British managing agents. In turn, the latter will find that in new fields of activity their chances of success improve by closer contact with Indian business men and by co-operation with them. Such co-operation will, by inspiring confidence in the investing public, enable a larger amount of capital to be drawn into industry.

The internal organisation that is necessary in managing agency firms means, as has already been indicated, expansion of the scope of an agency firm to more than hereditary claims. Serious efforts must be made to secure and utilise the service of persons with industrial experience and technical knowledge. The wisest course for the Indian agents will be to recognise that they are no more family properties ; that they are business concerns which should draw in continuously a fresh stream of outside ability which will infuse life and vigour into the business. Changes in the Company Law are overdue. Directors are now dummies ; and auditors do no more than mere formality. The directors should yield place to a Board of Supervisors who will owe their position not to the favouritism of managing agents but to the franchise of shareholders. The auditors must be entrusted with such responsibility and endowed with such a status that audit will, as it should, stand for fearless criticism and independent scrutiny. I do not suggest that auditors as they are at present are

dishonest. But human nature being what it is, a good many of them are willing to connive or wink at practices which, in a more independent position, they would be sure to expose. Above all, the changes that have to be incorporated in the Indian industrial system will be possible only if it is definitely recognised that there is a fundamental difference between the British system and the Indian system of company management, and a not less striking difference between the British investing public and the Indian investing public. This recognition must imply a more stringent Company Law, a more responsible status to the Board of supervisors and to auditors, and a more constant performance of the function of watchdog by the State.

South India seems to be in the mood to translate dreams into facts in the realm of industry. The advertising columns of *Indian Finance* have, in recent months, borne testimony to the increased activity in the South Indian capital market which has been kindly disposed towards new share issues. Madras Presidency is the one part of the country which is far from being over-crowded in the matter of industrial concerns. It is for this reason that ventures promoted under good auspices and located in congenial areas have won the confidence of investors. One such is the Vizagapatam Sugars and Refinery, the prospectus of which appeared in *Indian Finance* a fortnight ago. The factory has been in existence for some time and is now being expanded ; and the capital asked for is for further expansion. The factory owes much to Mr. Ramakrishnan (who was Director of Industries in Madras) for inspiration and planning. Anakapalli is a well-known sugarcane area. *Gur* of good quality is also available in good quantities. Over 15,000 acres of sugarcane are in the immediate vicinity of the factory. The sugarcane grown there is of J. 247 and similar quality of rich sugarcane which has a brix of 18 per cent., sucrose of 16 per cent., with a purity of 68 per cent. and which keeps on for more than one and a half months even after attaining its maximum maturity, and gives 35 tons of millable cane per acre which is very useful for late crushing under factory conditions. Further, Anakapalli is a centre of consumption of sugar which amounts to more than 6,000 tons. By far the greatest advantage which this factory enjoys from the shareholder's point of view is that it is a going concern ; and that the shareholders will earn dividends at the end of the very first year. The farmers in that area have also been interested as shareholders, which renders this concern approximate to what would be a model of its kind.

Another equally advantageous feature is that the company is situated in the midst of a Palmyra-tree area. Palmyra *Gur* will be available to the factory for refining purposes during the off season, that is to say, from April to December. Sugar refined from Palmyra is exempt from the Excise Duty of Rs. 2 per bag and as Palmyra *Gur* is very cheap in this part of the district, the company expects a profit of about Rs. 40,000 from the refining of Palmyra *Gur* during the off season. This working of refinery on Palmyra *Gur* will also cut down the overhead charges which, in the case of a sugar crushing factory, will be an overhead charge during off season without any compensative value, excepting in the case of Deccan Sugars and Abkhari Co., Ltd. No sugar manufacturing factory has this unique advantage both for crushing and refining sugar-cane during season and working on the refining of Palmyra *Gur* during off season. Due to the cheaper capital cost involved in South India, the Company starts with an initial advantage.

The additional capital now required is well within the capacity of the South Indian capital market. An additional guarantee is that the present issue of shares has been under-written by Messrs. Kothari & Sons. The name of Mr. C. M. Kothari, an old and valued friend of mine, must already be familiar to my readers. He has done much to whet the appetite of South Indian investors for industrial shares. In this, he has rendered a service both to the investing public and the promoters of industrial concerns. Kothari understands under-writing ; and his clients pay heed to his recommendation because they know that he understands under-writing. In the case of everyone of his under-writings, there has been substantial over-subscription ; and all the scrips stand at a good premium. A recent venture sponsored by him was the Rajalakshmi Mills, whose preference shares were strongly recommended by me. This issue was four times over-subscribed ; and the preference shares are quoting at a premium of 6 per cent. to 8 per cent. I have no doubt that the proposition which Mr. Kothari has now put forward will meet with equal success.

Mr. V. K. Chetty, who is a well-known figure in the South Indian Chamber of Commerce, has now transferred his affections and activities to Coimbatore, where, through his efforts and under his management, the first composite insurance company of South India has been started under the name and style of the South India Fire and General Insurance Co., (Coimbatore) Ltd. He has gathered together a most influential directorate ; and every director is in a position to assist the company with considerable business of his own. Coimbatore is, as I have often said, the Ahmedabad of South India. It is a cluster of cotton mills. Most of the mills situated in that centre are represented on the Board of the new insurance company. It may, therefore, be assumed that the Company will start with clean and good business of a substantial volume. The paid-up capital at the time of the statutory report was Rs. 2½ lakhs, which is quite a good achievement for a middle class province like Madras. The investments are all in approved securities or in the form of deposits with approved banks. It is noteworthy that the entire capital has been raised without the expenditure of any brokerage, worth mention. The brokerage paid so far amounts to the paltry sum of Rs. 75. I wish the best of luck to Mr. Chetty and his pioneering enterprise.

I understand from my London friends that those who have to return this cold weather are rarely troubled with qualms about travel in the Mediterranean, the Suez and the Red Sea. I have received further confirmation from a letter addressed to us by the authorities of Lloyd Triestino. "We assure you," they say, "that the travelling to and from Italy to-day is just as easy and comfortable as it has been and that travellers by the Lloyd Triestino are treated in the courteous manner for which this Company has become famous. Further, visitors, whether they be private citizens or officials, are received and treated during their sojourn in Italy in a manner that leaves nothing to be desired." In this connection, the following cable received from the Touring Department of the Government of Italy should give a quietus to all rumours:—

> "You are invited to contradict rumours alleged difficulties attending travelling in Italy through frequent communications compiled on the strength of facts to be derived from the Italian and Foreign Press, also from official representatives of Italian Government. We also would draw attention as useful reference to letters from foreigners residing in Italy appeared in *London Times* of October 5, and *Morning Post* October 8. Director General of Tourism. Bonomi."

Eavesdropper

GATEWAY OF INDIA

(From Our Correspondent)

Bombay, Oct. 16.

The recent crisis on the Stock Exchange has led to a rather belated attempt to check the worst features of rash speculation. For some time, certain undesirable activities of sub-brokers have attracted the atention of the authorities of the Stock Exchange. And things came to a head with the recent manipulation, to call it by no other name, of the market for purely speculative purposes. The Stock Exchange, at a meeting, have decided on certain measures which will make it obligatory on sub-brokers, who register their names as members of the Bombay Stock Exchange, to submit themselves to the control of the Board of Directors.

* * *

Mr. K. R. P. Shroff, the President of the Board of Directors, has stated publicly that, in framing the new rules, effect was only being given to the recommendations of the Atlay Commission which was appointed to enquire into malpractices on the Stock Exchange and to suggest measures for the better control and direction of the Exchange transactions. This Committee recommended that, if brokers decided to have sub-brokers, they should register their names with the Share Brokers' Association; they should be subject in all their dealings to their control; and they should, under no circumstances, be permitted to give a contract in their own names or be admitted to the Exchange. As a matter of fact, the Exchange had not, till now, found any necessity of controlling sub-brokers. Some of them, however, became parasites and it was considered necessary to control their shady transactions. Mr. Shroff further stated that the criticism that the new rules invest the President with autocratic powers was baseless. The Board had deemed it necessary to frame the new rules and the President, as such, had nothing to do with them or giving effect to them. No genuine brokers could take exception to the rules which are designed to eliminate abuses and regulate legitimate transactions on the Exchange. Whether the new restrictions should be enforced immediately or be deferred till November 1, will be decided by the Board at a special meeting.

* * *

In the Council, the stormy passage of the Special Powers Bill continues to churn waters of public discontent. Popular opinion has expressed itself in very definie terms against the spirit of the Bill on the well known ground that special powers have a habit of being exercised beyond the scope for which they were originally intended. The Home Member has, as usual, taken an attitude of stubborn opposition to every suggestion of the popular element in the Council, though his *obiter dicta* carries no authority other than the opinion of Government. The spearhead of opposition was whether the Bill should make civil disobedience the ostensible plea for arming the executive with plenary powers. All that the Home Member could say was that, although civil disobedience was definitely suspended, one could not guarantee that the situation would continue to be the same in future. Legislation on a hypothetical supposition is the last resort of autocracy.

* * *

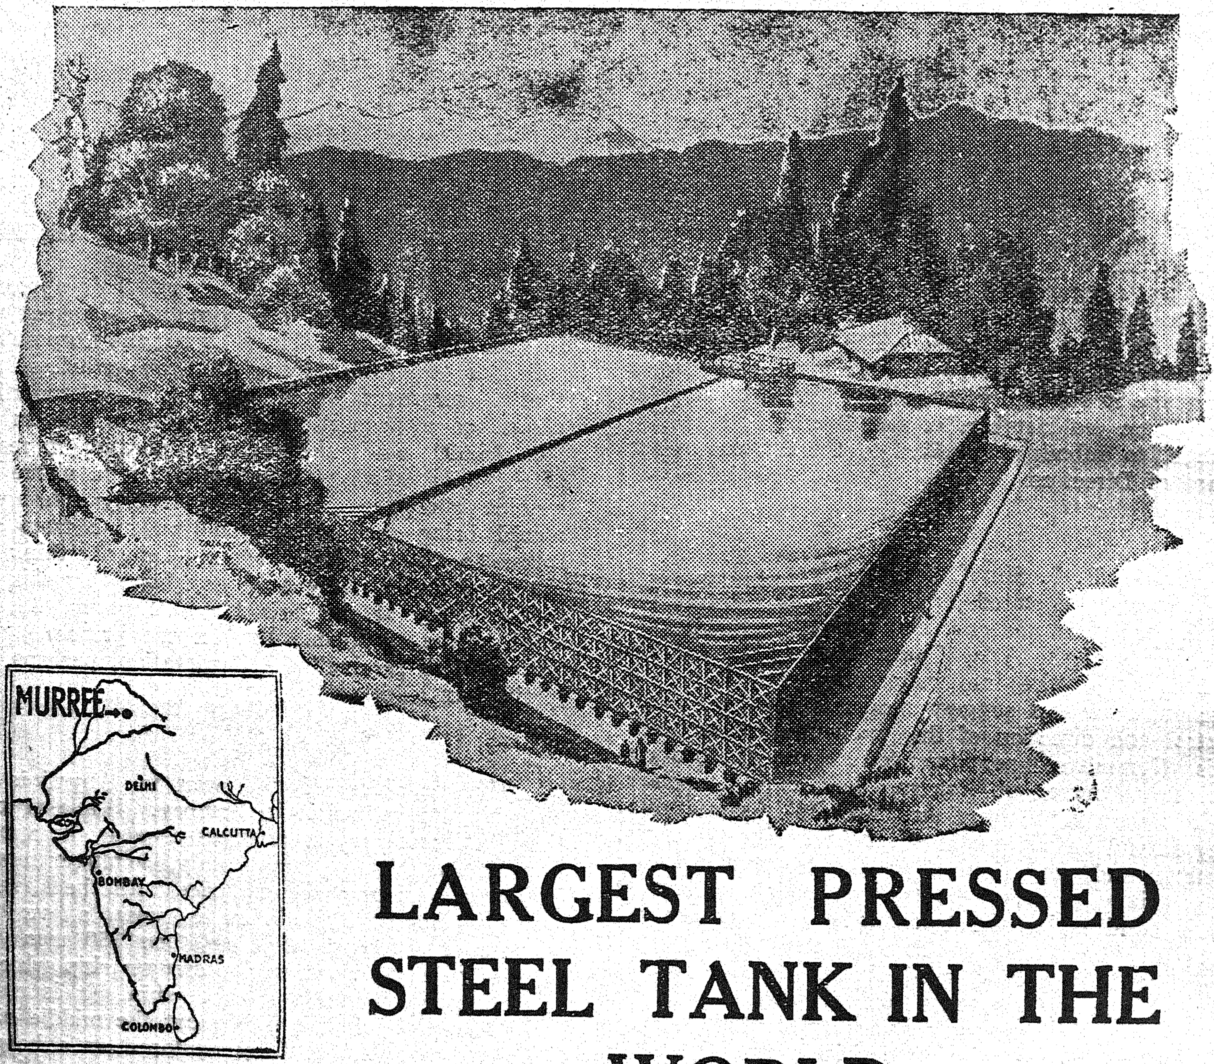
The Corporation have presented the Government with an unanswerable indictment of the Motor Tax Bill. That such an important piece of legislation should have been framed without inviting the opinion of the Corporation was the Corporation's first line of attack. And on statistical data, the Corporation pointed out that the aggregate burden on the owners of motor vehicles would increase from 25 to 100 per cent. and this burden would be exclusive of such fees as might be charged for the registration of motor cars and for driving license. By far the greater number of motor cars is used exclusively for business purposes. To increase, at one stroke, the burden of taxation on them by 25 to 100 per cent. without any proportional relief would compel most of the users of these vehicles to forego their service altogether, thus reducing automatically the earnings of motor car owners. Ending up their appeal on behalf of the citizens, the Corporation suggest that, if Government is not able to accept the Corporation's point of view, the Corporation, nevertheless, trust that Government would consider the Corporation's claim for a proportionate increase in the subsidy (Rs. 25,000) now paid to the Corporation in respect of the tolls levied by the Corporation in virtue of a specific agreement, which, if properly interpreted, would bring the Corporation's revenue from such source to a much larger figure. I do not think that the Corporation really have any hope that this plea for a moiety of the new Motor Taxation Revenue would come to them. But on the principle "Ask and ye shall receive" the Corporation, perhaps, feel justified in asking.

* * *

The reactions of the war in Abyssinia are beginning to be visible in Bombay. While preparations in Europe are in progress towards the application of sanctions against Italy, arrangements in India are obviously keeping pace with the League's activity. Bombay Harbour is now a veritable beehive of shipping. No less than 350 men have been engaged to work on a passenger ship which is to be converted into a hospital ship. It is understood that the ship will sail about the middle of he month to East Africa fully equipped as a hospital ship. It is the same ship that was converted into a hospital ship during the last war. There are other rumours that the G.I.P. and the B.B. and C.I. authorities have received instructions from the headquarters to be ready to convey troops, though official quarters contradict this rumour on the ground that there is no need of any special instructions beforehand as the Railway Board has statutory authority for such emergencies. Bombay itself does not take more than an academic inerest in the war. The apprehension that the conflict in Abyssinia would induce profiteering has not materialised appreciably, although there is a tendency on the part of provisions and stores vendors to put up prices on the pretext of war. The European commercial community seem to think that complications of the war might bring about a crisis in which England could not but, however much against her will, participate.

* * *

A new halo is about to be set around Ahmedabad. Dr. P. K. Ghosh of the Zoological Survey of India, who was deputed by the Government of India to investigate the natural gas field located at Gogha near Ahmedabad, has reported that there are immense commercial possibilities if these potential gasfields are developed along scientific lines. A Company is being formed for the purpose of exploiting these natural resources. The promoters of the Company intend to generate electricity, using naural air as the power units, to supply Ahmedabad and other towns in the neighbourhood. The importance of cheap power for industrial and domestic purposes is obvious. And the successful working of the new enterprise would contribute materially towards the industrial development of Gogha.



LARGEST PRESSED STEEL TANK IN THE WORLD

3½ MILLION GALLON RESERVOIR IN THE HIMALAYAS FOR MURREE

On a site so inaccessible that aerial-ropeway and bullocks provided the only possible forms of transport —where snow for a quarter of the year prevented all possible progress : under such conditions this immense steel tank was completed in under six months, a fitting commentary on the efficiency and resources of the Braithwaite organisation.

SOUTH INDIA

(From Our Correspondent)

Madras, Oct. 16.

Mysore comes out well in the revealing light of retrospect. The address which the Diwan, Sir Mirza Ismael, delivered, in opening the Dusserah session of the Mysore Representative Assembly, illustrated the truism. The Diwan's survey of Government spade work in the field of rural reconstruction and the general economic development of the State was impressive and comprehensive. Among big-scale industrial enterprises, the Bhadravati Iron Works, where steel is to be manufactured; the Sandalwood Oil Factory and the Sugar Factory are in the forefront. Among minor industries, the Soap Factory, along with the manufacture of electrical goods, has passed beyond the experimental stage. Much has been done to develop agriculture, not merely in the raising of commercial crops, but also in the facilities afforded to ryots to rear healthy livestock and undertake subsidiary industries like sericulture. Education, medical relief, sanitation and general uplift stood out from the Diwan's address in attractive form. Sir Mirza Ismael's genius for constructive administration received yet another endorsement in a gathering which included Sir C. V. Raman, Mr. C. Y. Chintamani, Colonel Plowden, Sir Charles Todhunter, Sir K. P. Puttana Chetti, Sir M. O. Forster, Mr. K. Sankaranarayana Rao and Mr. A. Krishna Rao.

* * *

The fundamental quality of the Mysore Government's rural reconstruction scheme is that reconstruction, to be stable, must be broad-based, embracing all departments of life. The ryot cannot be reclaimed economically without dealing with him as a human unit. Another element in the State programme is departmental co-ordination. Sir Mirza Ismael made a special point of this in his address. "The Agricultural Department," he said, "is responsible for the improvement in quantity and quality of a great bulk of raw material. The Department of Commerce and Industry is engaged, not only in perfecting plans for its utilisation, but also in the very important matter of marketing surveys. The Electrical Department supplies cheap power. It falls to the Finance Department to find loans at reasonable rates of interest." The chain of co-ordination links up village punchayats with Government. Mysore has its problems of unemployment, of agricultural indebtedness, of mortality, of primary education. But each in its way is less of a problem to-day than five years ago—a consummation largely due to the statesmanship of Sir Mirza Ismael.

* * *

India is still religious-minded and needs so to remain—that was the essence of Mr. C. Y. Chintamani's Sri Krishnarajendra Silver Jubilee lecture under the auspices of the Mysore University, with Dr. E. R. Metcalfe the Vice-Chancellor as President. The subject was "Religion and Science in National Life," a theme which threw in strong relief the sturdy qualities of Mr. Chintamani's mental and moral calibre. India's national consciousness is steeped in the conviction that there is no conflict between religion and science. India's growth to the full stature of nationhood rests on that elemental basis and Mr. Chintamani did well, with his gift of tongue and artistry of words, to stress the fact at a time when irreverence of things spiritual is creeping into our national life. And, pointing a moral without adorning his tale, Mr. Chintamani drew attention to the material basis of Western civilisation, in which science is used, not to explain, but to destroy life. Mr. Chintamani traversed the ground covered by modern science, emphasising the importance of education in science for the progress of India. "Our educational system," he protested, "was devised primarily to supply subordinate officials for the various departments of public service. The educational system must be adapted to the urgent requirements of the country. This adaptation must take the form of increasing attention to science." I cannot here follow Mr. Chintamani into the delectable exploration of faith versus proof. I share his unalterable conviction that any weakening of religious faith is fatal to the nation as to the individual. It is by faith and faith alone that we "rise on the stepping stones of our dead selves to higher things."

* * *

It will interest readers in Calcutta to know that the Syndicate of the Madras University has appointed a Special Committee, including well-known local journalists, to consider the institution of a diploma course in Journalism. The Committee's report makes out the following points of agreement: (*a*) that the training now given to journalists and the class of persons now taking up journalism were not on the whole satisfactory; (*b*) that there was need for a comprehensive course involving a good knowledge of history, economics, politics and a general knowledge of scientific, municipal, parliamentary and foreign affairs; (*c*) that there was need for a code of journalistic ethics and that the best way to create a body of opinion to prescribe the best standard of conduct in journalism would be by training men in this course, as such men would form the nucleus of an association on the lines of the British Medical Council; (*d*) that there was need for two kinds of journalists in this country-journalists who catered to the English Press and journalists who catered to the vernacular Press—and that the entrance test for a course in journalism might be different in these two cases; (*e*) that the institution of such a course would improve the status of journalists and would prevent a large many ill-educated persons invading the rank of journalists.

* * *

A suggestion under consideration is whether the Port Trust should undertake, with or without special charges, the landing work in the Madras Harbour. The matter came up in connection with a reference from the Trust to the Chamber inviting their views as to the arrangements to be made for landing work in the harbour after September 1937, when the present agreements with steamship companies in regard to that work would terminate. The steamship companies have been doing the work since the construction of the harbour in 1918-19 on terms stipulated by them and approved by the Government and the Port Trust. The mercantile community have been complaining against "unduly heavy rates" being charged for landing work, and they contend that, if left to themselves, they could get the work done at competitive rates, as low as four to eight annas per ton.

* * *

Like the leaves of autumn they come—these prospectuses. 'Punch' said somewhere that a Scotchman's idea of Heaven is a general election everyday. Similarly, I suppose a newspaper-man's idea of heaven is a full page prospectus everyday. I like to feel that these prospectuses mean that South India is getting everyday more investment-minded. Is it a sugar proposition or a cotton mill or an increase of spindles and looms in a prosperous existing mill? Is it a runmoured gold mine in the Nilgiris or a Company for exploiting virgin forests for the purpose of equipping middle class homes with cheap but elegant furniture? South India is always willing to examine the proposition with an open mind. But the South Indian investor is rapidly becoming a rather sophisticated individual. He would have examined the thing from a hundred angles. He is generally a cautious investor, and has developed a fair capacity for discriminating between gold and tinsel. He would, however, like to nurture the comforting notion that he has insured against swindles.

- WHITHER STERLING?

EFFECT OF POLITICAL FACTOR

EXCHANGE ACCOUNT'S TACTICS

By Dr. Paul Einzig.

Special for "INDIAN FINANCE"

London, October 7.

Since the beginning of September there has been a slow but persistent depreciation of sterling. Temporary rallies apart, the tendency was incessantly in the downward direction and within five weeks sterling lost about 2 per cent. of its former value. This depreciation is in itself not excessive but it is necessary to bear in mind that the fall would have been much more pronounced but for the persistent intervention of the Exchange Equalisation Account. For weeks past the "control" had to support sterling day after day and during the second half of the past week the volume of its operations became considerable. But for its intervention we should probably have witnessed a depreciation of sterling comparable with that of previous autumns since 1931. Even as it is, it would be premature to assume that sterling will escape its usual autumn slump this year.

The cause of the weakness of sterling is only too obvious. Rightly or wrongly, there is a widespread uneasiness that Great Britain might become involved in conflict with Italy. Consequently, funds are leaving London to seek refuge in the United States, which country has made it plain that it will keep aloof from European entanglements. In addition to the continental balances which are transferred from London to New York, British capital is also being exported to Wall Street. The volume of the movement is not so far very large. Given the narrowness of the foreign exchange market, however, it was sufficient to cause a depreciation, especially as it coincided with the usual autumn demand for dollars.

A feature of the market has been the almost complete absence of speculative selling of sterling. This is to the credit of the Exchange Equalisation Account, which, together with the United States authorities, has succeeded in making itself felt in the foreign exchange market and in discouraging any attempt on the part of speculators to take advantage of the downward trend. Indeed, it is evident that the authorities have the situation well under control. Although instead of rigidly pegging sterling at an unnatural level they allow it to depreciate, they take good care that the decline should be gradual. It can best be compared with a well-regulated retreat with skilful rearguard action to discourage pursuit. From time to time, the Exchange Equalisation Account takes the offensive and makes itself felt in the market. Speculators are aware that the resources of the Exchange Equalisation Account are considerable. They have been increased as a result of the flight from the gold currencies during the first seven months of the year. So long as the Exchange Equalisation Account possesses a large gold stock which it is prepared to use, it is in a position to squeeze bears at any moment.

The question is, will the resources of the Exchange Equalisation Account not decline materially in the course of the next few weeks or months and will not a stage be reached at which the authorities will feel compelled to leave sterling to its fate? This is what has happened year after year since 1931. Every autumn the adverse pressure was at first resisted and subsequently the Exchange Equalisation Account, having lost too much gold, had to give up the support. Is there any reason to suppose that it will be otherwise this year? The answer is definitely in the negative.

Nobody knows how much gold the Exchange Equalisation Account has accumulated. As, however, the British balance of payments is more or less at equilibrium, the only source from which the authorities were able to increase their gold stock was the influx of overseas sterling deposits. It stands to reason that if owing to political uncertainty these deposits are withdrawn from London, then the Exchange Equalisation Account will be no better off than it was twelve months ago. Although it would be bold to prophesy the course of events in international politics, it appears highly probable that the tension will be prolonged and that from time to time it will be accentuated by incidents and war scares. In the circumstances, the withdrawal of overseas sterling balances is likely to be continuous and may even become accentuated.

There is another reason why the gold resources of the Exchange Equalisation Account are likely to decline within the next few months. In addition to the external pressure, there has been also an internal loss, the figure of which has so far been moderate but which foreshadows important developments. Since the middle of August, the Bank of England has announced from time to time purchase of small amounts of gold. Since it is legally not in a position to pay more than its statutory buying price of 84s. 10d. per ounce it may be safely taken for granted that the gold was acquired from the Exchange Equalisation Account, the latter carrying the bookkeeping loss representing the difference between 84s. 10d. and the price at which gold was actually acquired. Up to now, the amount gradually acquired by the Bank is only £2,000,000. There is reason to believe, however, that between now and the end of December many more millions will be added to it. The object of this increase of the Bank of England's gold reserve is to meet the expansion of the note issue. During the past twelve months, the active note circulation increased by over £20,000,000 and in the absence of any substantial acquistions of gold, the note reserve in the banking department declined almost to a corresponding extent. It is true that even now this note reserve is at the comfortable figures of over £50,000,000, thanks to the large gold purchases made by the Bank in 1932 and 1933. If, however, the expansion of the note issue continues at its present pace, by December it may become difficult to face the end of year pressure which usually requires some £25,000,000 to £30,000,000 of currency. It is reasonable to assume that amidst the feverish rearmament we are likely to witness within the course of the next few months and amidst rising commodity prices the note requirements of trade will increase if anything more rapidly than during the past twelve months. Consequently, the authorities will be confronted with three alternatives. They can either check the rising trend of the note issue by raising the bank rate, or they can increase the fiduciary issue, or they can transfer a large amount of gold from the Exchange Equalisation Account to the Bank of England. The first alternative can be ruled out since according to Mr. Chamberlain's latest statement, the Government is as keen as ever on its policy of cheap money. Indeed, apart from the interest of trade, it is to the Government's interest to maintain money cheap pending the Treasury financing that will have to be done in connection with rearmament. The choice lies between raising the fiduciary issue and transferring gold to the Bank of England out of the resources of the Exchange Equalisation Account. The former solution has many supporters, among others the Midland Bank, which in an article published in its October Review urged the authorities to take that course. The trouble is that everybody on the continent would interpret the increase of the fiduciary issue as an inflationary move and there would be a panic-like

MINOR BUT UNSTABLE BOOM

IRON, COAL AND STEEL SHARES RECOMMENDED

Also "Home Trade" Scrips

By Francis Williams

City Editor: The "Daily Herald," London

(By Air Mail)

(Special for "INDIAN FINANCE")

London, October 7.

At the moment of writing, practically all sections of stock markets are enjoying a minor boom.

They are led, of course, by shares in the armament industry, encouraged by the official announcement that the Air Ministry has just placed a substantial order for Hawker Fury Interceptor Fighter Aeroplanes with General Aircraft Ltd.

But although armament shares are leading the way, all other shares are active, apparently on the belief that the League System is going to prove completely ineffective in face of Mussolini's Abyssinian aggression and that if there are any sanctions imposed at all they will be of so mild a nature as to be completely ineffective.

This does not seem to be a particularly sound reason for a substantial advance in security values, but the stock exchange is notably muddle-headed and never more so than with anythtng dealing with international affairs.

Moreover, it has, at the moment, no particular justification for its belief that the economic sanctions to be imposed by the League will prove very small beer ; for, at the time of writing, nothing has been decided, though by the time you read this, the League Assembly's decision will be public knowledge. But even if there were—and one sincerely hopes there is not—justification for this Stock Exchange belief in the ineffectiveness of the League, it is surely a bear, not a bull, point.

Britain's foreign policy is based on the League, as has been emphasised again and again during the last few weeks by what is, be it noted, a predominantly Conservative Government.

A failure of the League system means a return to international anarchy with the extreme probability that if Mussolini is able to flout world opinion with impunity, Hitler will before long get active in stirring up trouble in Europe.

This is, one would imagine, hardly the sort of prospect to encourage even the most short-sighted speculator.

I should, in any event, strongly advise my readers to keep out of any such speculative movements in the Stock Exchange at present. Most of them are based on the wildest kind of rumours ; and rises are likely to be followed by setbacks.

I still like best of all, for investment at present levels, shares in the iron, coal and steel group, though here as elsewhere, considerable discrimination is desirable. At the moment, however, there seems no reason why the revival, which has been notable in these groups, should not continue at the present time.

Shops and stores generally seem to be doing better. Judging by retail trade statistics, there is sufficient evidence of greater volume of business ; and higher profits seem likely.

Such trades as those dealing predominantly with the home markets are also less likely to be affected by the complications of the international situation.

Fortunately also it now seems clear that while Mr. Neville Chamberlain still pays faithful lip service to the Gold Standard, as an objective in the dim and distant future, he has no inclination whatever for an early return to that standard.

This removes any fear that Britain's internal trade situation might be upset by an unwise linking of our currency to those of other nations at too high a level or at too inopportune a moment.

(Continued from page 1212)

flight from sterling. Once more the disadvantages of the peculiar system of bank return (which the Bank of England refuses to discard notwithstanding the recommendations of the Macmillan Committee, and which it has even succeeded in having adopted in various Dominions Central Banks) become apparent. Were the bank return based on the same system as the one practised by continental Central Banks, the increase of the note circulation would merely cause a decline of the reserve ratio which in a country with inconvertible currency matters but little. As it is, it will necessitate a solution which inevitably causes an unwanted depreciation of sterling. For, even if in order to avoid having to increase the fiduciary issue, the Government were to choose the alternative of transferring gold from the Exchange Equalisation Account to the Bank of England, the result would be inevitably the increase of the semi-pressure on sterling. Such transfers of gold reduce the resources available for counteracting the downward tendency and encourage foreign holders of sterling to transfer their deposits abroad. At the same time, it will also encourage speculators to attack sterling. So far this movement of gold has been so moderate as to escape attention almost completely. When, however, larger amounts are transferred, the weakening of the Exchange Equalisation Account will inevitably produce its effect.

For this reason it is highly probable that before very long sterling will have to be allowed to depreciate to a much larger extent than it has depreciated so far. In the meantime, the authorities are doing their utmost to maintain their control over the market as long as possible. They have adopted very skilful tactics to that end. It is worth noting that on days when selling pressure on sterling is relatively moderate and when it would be comparatively easy to resist the pressure, the authorities usually lower the "peg." While on days there is substantial selling pressure they display very strong resistance. In fact, on Thursday, October 3, which was so far the heaviest day in the market, the Exchange Equalisation Account actually raised the "peg." The explanation of this move is simple. The authorities doubtless realise that they have to allow to some extent sterling to depreciate. If they were to yield to strong pressure, then the market would interpret it as a sign weakness. For this reason, they prefer to allow the inevitable decline to take place on quiet days and reserve active intervention for days when the adverse pressure becomes stronger. Even the most skilful tactics will, however, be unable to do more than slightly postpone the day when sterling will have to be allowed to find its level. Whether this will take place in the immediate future or only towards the end of the year depends upon international political developments. Quite conceivably, a renewed flight from the gold currencies may once more enable the Exchange Equalisation Account to recover some of its lost gold resources, but in the circumstances the trend of the flight will point towards New York instead of London, so that the buying pressure on sterling thus caused will be relatively moderate. Allowing for all this, it appears reasonable to conclude that sterling will be considerably lower by the end of the year than it is now.

OVERSEAS' NEWS: By Air Mail

Week ended Oct. 5, 1935

GREAT BRITAIN

CYCLICAL RECOVERY

Speaking at the Conference of the Consideration of Management Associations at Balliol College, Oxford, Professor J. H. Jones gave a review of the factors likely to affect British industry in the next five years, which has been featured in the Press as a thoughtful contribution. The Professor said that the country was passing through a period of recovery known as cyclical. If the trade cycle theory proves true once more, Britain may expect, subject to a minor recession next year, a continuance of the upward movement in trade till about 1938, when another cyclical depression may cast its shadow. But, the Professor argued, in the absence of a policy of fundamental reconstruction, a cyclical recovery will not restore the position of 1928. The drift of world trade away from Britain continues, principally because of the tariff policy. The use of substitutes for coal is growing, making it easier for manufacturing establishments to be set up in other countries.

According to the Professor, "the drift in world trade was accompanied by a southward movement of industry in Great Britain. This country is now divisible into two areas, the growing south which has already almost emerged from the cyclical depression; and the depressed north, which is suffering from much more than a cyclical depression. In the absence of such a policy as already indicated this drift may be expected to continue, though possibly at a less rapid rate than before. In the near future we shall be called upon to face a double problem, namely that of currency stabilisation and that of securing greater freedom of international trade. These will be jointly considered at an International Conference and, if all goes well in the meantime, it may be expected that in two or three years the gold standard will be restored. There is a danger that our error of 1925 (when sterling was given too high a value) will be repeated and that the effects of such an error will neutralise much of the benefit to be derived from greater freedom of international trade."

The executives of three railway trade unions—the N.W.R., the Associated Society of Locomotive Engineers and Fireman and the Railway Clerks' Association—resolved at a recent meeting that representations should be made to the railway companies for a restoration of the balance of the percentage deductions and of the variations in the rates for overtime, night duty and Sunday work. On a previous occasion, not long ago, railway companies stated specially that earnings had not reached a stage when the restoration demanded by the trade unions could be entertained; and the general traffic position has not since materially changed. For the third successive weak railway traffic returns made a poor showing. The total loss was £29,000, the Great Western being the principal sufferer, with the L.N.E.R., a close second. The unanimous action of the three leading railway companies' employees will not ease the difficulties of railways, while it might introduce dynamic elements. As things are, it is difficult to see how the demands of the unions, reasonable though they be, could be met. The Companies have expressed no opinion on the Union's decision. If there is no settlement the claim will automatically go to the new negotiating bodies which were set up by agreement a few months ago.

The manufacturing section of the Lancashire Cotton Industry has officially decided to deal with the question of redundant looms. The different district associations have been advised to hold meetings to obtain the views of all employers, after which, a special surplus looms Committee will be set up to deal with the whole subject. This is the third redundancy scheme in textile industry, and the weaving employers are following the example of the spinning and finishing sections. So far manufacturers have taken no steps to deal with the question of surplus looms, and the leaders of the Employers' Association feel that the time has now arrived when they should put their own house in order regarding machinery capacity.

It is realised that tens of thousands of looms in Lancashire to-day can be considered redundant, for there is not sufficient business available to run all the looms at anything approaching full capacity. The manufacturing section has, of course, shrunk considerably since pre-war days, for in 1914 over 800,000 looms were in existence, as against 500,000 at present. In some quarters it is estimated that between 100,000 and 150,000 looms can be considered redundant. Included in this number are some thousands which have been standing idle for many years.

The preliminary stages of the Italo-Abyssinian war created a sort of scare as to Britain's defensive equipment which formed the burden of Mr. Neville Chamberlain's address at Kelso in support of the National Government. "There is no nation," the Chancellor of the Exchequer said, "more passionately devoted to peace than our own: none which has more to lose by war than our own, for a war waged in any part of the world must check and hamper that trade by which we live. . . . . We do not desire a force greater than is necessary for our own defence which will enable us to fulfill our obligations." The Parliament has sanctioned large sums for naval and aerial defences and factories and shipyards are humming with concentrated activity. And the country, however pacific it is, knows only too well that unilateral disarmament has proved a failure and might prove to be a danger. Now that a general election is a matter of weeks rather than months, the war drum is being beaten loudly, for nothing rallies the voter to the polls as rumours of war.

The proceedings at Geneva have aggravated public opinion here, because of the tardiness of the League to implement its denouncement of Italy as the aggressor member by applying economic and financial sanctions with a sufficiency and timeliness to impress Italy. Mr. Anthony Eden has been asking that "action must be swift and must be effective, if the League is to achieve the end for which it was set up." The wobbling at Geneva has naturally had no degree of disciplinary restraint on Italy, which is consolidating its aggressive military gains in Abyssinia as if the League did not exist. Britain's plea for more League vitality is countered by France's continued caution in the line of least resistance. There is con-

siderable irritation at France's attitude, though it is admitted that precipitancy might ignite the all too combustible war material in Europe. And so Abyssinia is likely to be yet another victim to the actions and reactions of national inhibitions and ambitions of Europe.

U. S. A.

GOLD RUSH

With the prospect of a European conflict arising out of the Italo-Abyssinian war, the flight of capital from Europe to the United States has been considerable and continuous. Bankers believe that a large part of the £200,000,000 gold estimated to be hoarded in London will be transferred to New York, if the war scare continues. The major portion of the metal belongs to American citizens, so that repatriation, if it comes about, is likely to be permanent.

The full effect on dollars of this flight of capital was not, however, reflected in rates owing to the vigorous support of the £ by London. There was heavy buying of dollars at all European centres and these buying transactions forced the currency to advance rapidly. As the franc remained at gold point against the dollar, the "pegging" of sterling against the franc by the London "control" automatically checked the upward movement of the dollar. The British demand for dollars is the dominating influence on the market. There is some anxiety about gold stored in London for Continental account ; but transfer to New York involves exchange into dollars, since the American laws authorise the United States Treasury alone to hold gold.

Brokers' loans by member banks of the New York Federal Reserve for their own account increased by 23,000,000 dollars in the last week of last month to 879,000,000 dollars. Loans to others were 742,000,000 dollars. The Treasury has announced that it will redeem its outstanding 8,424,000 dollars of "gold clause" bonds and notes at par, plus interest, up to January 1, 1936, thus opening the way for the retirement of the last of the "gold clause" Federal securities, in pursuance of the provisions of a resolution by Congress outlawing "gold clause" suits after January 1.

The value of new securities issued during September was 6,190,000 dollars compared with 6,400,000 dollars in August. Bond offerings in September amounted to 358,950,000 dollars in value, of which industrial offerings totalled 75,250,000 dollars; public utilities, 162,570,000 dollars ; railroads, 5,000,000 dollars (State) and 11,880,000 dollars (Municipal) ; and Miscellaneous, 1,250,000 dollars. There is no haste by holders of the Treasury's Fourth Liberty 4½ per cent. bonds to convert into lower-interest bearing securities. Up to October 1, 826,000,000 dollars of the 1,250,000,000 dollars called for redemption on October 15 have been exchanged. At the same time the Treasury is asking for £500,000,000 dollars of new money in 1½ per cent. 4½ year notes, which seems to indicate the ending of the auction issues (except of Treasury Bills), which had aroused the active resentment of the financial community.

For its new money the Treasury has been relying more and more on the note issue, of which about 2,000 million dollars are now scheduled to mature each year between 1936 and 1940, in which period there are no bond maturities, which begin in 1941. The general scheme of the debt structure at present consists of about 2,000 million dollars of Treasury Bills maturing within any given year and an aggregate maturity of various note issues amounting to 2,000 million dollars a year, followed by a long term debt, whose redemption need be tackled only in the next decade.

In its monthly review for October, The National City Bank of New York says that business reports in the United States indicate progress despite handicaps and there is no abatement of confidence as to the outlook for the next few months. Trade news during September has been up to expectations, particularly in retail business and the general merchandise lines. Department-store sales during the first half of the month in New York City area were more than 10 per cent. above a year ago, the largest increase with one exception since early in 1934. Railroads are moving more freight than at any time in the past four years. The most favourable factors of the month in their effect upon sentiment have been the further advance in prices of farm products and other raw materials, and the continued strong showing made by the machinery business. Sales of copper for the past two months are reported as heavy, with lead and zinc higher on increased activity. Lumber business reflects increased building activity, and machine tool orders are higher for the sixth consecutive month. Under present conditions, machine-tool sales supply a significant indicator of business. They show both reviving confidence and better trade. If manufacturers are to buy new equipment they must believe in their ability to make it pay them a profit, and this implies both increased sales of their products and greater confidence in the general situation and

Air Mail Week

in the recuperative powers of the economic system.

The automobile industry is always one of the leaders in improving its products and methods, and the new models to be introduced next month will be offered at lower or unchanged prices. Undoubtedly automobile operations, together with activity in the parts and accessory companies, and in the industries supplying materials, will be a major support to business this autumn. The upward tendency of business itself leads to expectations of a greater demand for money. In the Government Bond market, the continuing Treasury deficit and the possibility of payment of the veterans' compensation certificates next year are special factors of uncertainty. However, there is no evidence of change in the basic money situation. It is clear that the funds available for business expansion and investment are still enormous and not being reduced in any material way.

FRANCE

A SURPLUS BUDGET.

The French Budget Bill for 1933, which was approved by the Council of Ministers last week, reveals many interesting features. Both the revenue and the expenditure are made to balance at 42,000 million francs with a surplus on the revenue side. The total estimates as approved represents a diminution of more than 5,000 million francs in comparison with the Budget for the year 1935, which, at least on paper, was made to balance at 47,500 million francs. In addition to this ordinary Budget, the Government have announced their decision to revive what amounts to an extra-ordinary Budget: for in the estimates for the next year, expenditure to the tune of some 6,200 million francs, of extra-budgetary items, which were hitherto being financed by the Treasury, has been proposed to be met from new loans. Much of this extra-budgetary expenditure consists of military equipment and outlay. The extra-ordinary budget was abolished years ago, but it did not prevent a continuance and multiplication of the numberous special Budgets and funds or accounts embracing schemes for cheap housing, rural electrification, National Defence and financing, wheat and wine legislation, etc. They have been lumped together under the name of "Treasury's Budget" and escaped Parliamentary control. Now M. Regnier proposes to group these accounts together and to apply the "axe" thereon. The total expenditure for the current year of such extra-budgetary items are estimated to involve an outlay of 12,000 million francs, but it is hoped to reduce this amount to a third by the end of 1936.

The Minister of Finance claims that the Budget is a genuine one and that he has made due allowance for the economic crisis in drawing up the estimates. He is completely satisfied about the prospective Budget position and is of the opinion that, if it had not been for the economy cuts embodied in the Laval decrees of June last, the total expenditure in 1935, budgetary and extra-budgeeary, would have amounted to no less than 60,000 million francs, of which only about 40,000 millions would have been provided by the revenues. Thus the Budget deficit would have been about 18,000 to 20,000 million francs but for the economic decrees. Further, the new Budget hopes for a slight surplus and M. Regnier has certainly been courageous and optimistic in his forecast. The path of deflation that has been followed with such intensity during the last few months has now been completely justified on the basis of the Budget figures: but the other side of the tale is told, not by the Finance Minister, but by the industrialists. It was not very long back that the wheat producers had challenged the Government on the efficacy of the decree legislation. The forcible reduction in the cost of living has brought the selling prices of retailers and farmers into complete disequilibrium with their costs. This week, the Peasants' Defence Committee have instructed the farmers not to pay their taxes as a protest against the present difficult situation.

At the head of this movement, that is gaining momentum, is M. Dorgeres, who had already made his mark as a successful agitator. Under his lead, the Peasants Defence Committee have issued a communique embodying their decisions. And among them are refusal of tax payments by farmers; immediate legislation towards total suppression of foreign imports of cereals, meat, animal products, etc.; massive reduction of import quotas for dairy products, fats, fruits, poultry products; suppression of the temporary permits for the admission of wheat and maize; protective measures for flax and hemp and reduction of taxes on spirits. As has been practically pointed out by the Paris Brokers' Association, the recent rise in the price of wheat would make a rise in the price of bread inevitable. Given the present price of flour, bread ought to cost 1.60 francs instead of 1.50 francs, the official maximum. If the price of wheat should rise by another 20 per cent., as both the Government and the farmer hope it will, the price of bread would have to rise to even a higher figure. The organisation of quasi-Fascist movements is not confined to the farmers only. In the vine-growing districts a bitter strike is in progress against reductions. From another quarter, the Roubaig-Tourcoing district, in which is concentrated

some 85 per cent. of the French wollen industry, finds its trials accentuated by the recent devaluation of the belga. It is not so much a question of increased competition, as one of illustration of the at least temporary advantage of realignment of currency values as a stimulus to internal business in the neighbouring country. In certain cases spinners have found it advantageous to place orders for combed wool with the Belgian factories instead of French. The revenues are beginning to sink further. In July the total revenue was about 15 per cent. below the estimates; the yield of the turn-over tax alone was 25 per cent. below expectations. Trade has also shown signs of dwindling. For the first eight months of the year French imports amounted in value to 14,044 million francs, as compared with 15,930 million francs in the same period in 1934, or a decline of 12 per cent. In the first eight months' imports were down by 1,250,000 tons; exports show an increase of 1,000,000 tons, but when the 11 per cent. fall in value is considered, the figures reflect no sign of recovery from the crisis. There is, on the contrary, more evidence of a continuation of stagnation in business, without the revival of which the hope of the restoration of the national finances is likely to be a forlorn one and probably explains M. Bonnet's plea for a general lowering of trade barriers accompanied by stabilisation of currencies. While the Italo-Abyssinian tension, which is fast rearing a open conflict, is giving sufficient anxiety to M. Laval, the internal affairs prove none the less important and the weeks ahead, when the Parliament will be in session after the holidays, portend many important developments.

HOLLAND

ECONOMIC POLICY

A decided weakness of the guilder is the feature of the financial world in Holland. The foreign exchange and the stock markets have been nervous for the past week or more. Money rates on the open markets have exceeded the official discount rate of the Netherlands Bank. The exchange rate has touched the gold export point both against the dollar and the franc. The forward guilder is being quoted at a very heavy discount. Flight of capital is increasing every day, causing tightness of the money market. The gold reserves of the Bank are fast running down. In one week alone the stocks came down by 37 million guilders. The guilder bonds have touched 91⅞ per cent. The circulation of notes has dropped by 71 million guilders but the gold cover has fallen from 71.4 per cent. to about 67 per cent. The depletion of the gold reserves from the bank has necessitated the raising of the rate from 5 to 6 per cent. These are unmistakable signs that the guilder is undergoing its periodical qualms of nervousness.

While the barren policy of deflation that is pursued by the Government so consistently in its efforts to maintain the gold parity of the guilder is primarily to be accounted for as the cause for their alternative period of currency weakness and strength that has come to be the feature of the monetary history of this country, it cannot be denied that the Budget presented during the last fortnight had its own share in bringing about an increase in the nervousness of the market. Ordinary service expenses are estimated in the budget at 710.94 million florins, as against an estimated revenue of 601.98 million florins, thus leaving a deficit of about 108.95 million florins. In addition to this deficit, the lower excise on wine pilotage and proposed reduction of the excise on beer and spirits will raise the deficit by about 10 million florins, bringing it to about 119 million florins. This huge deficit is to be met by economies and cuts in pursuance of the general policy of obligation. A draft bill proposes to reduce public expenses by 1.77 million florins. By abandoning the disablement fund and administration costs of social insurance, it is hoped to effect a saving of 13.99 million florins. A change in the yearly progression of salaries to a two-year progression, is to account for a saving of one million florins.

The speech from the Throne, outlying Holland's economic policy, contained little or nothing to cheer up those who had eagerly awaited for a change in the economic and monetary policy. The first point of importance in the speech was the reaffirmation that it was impossible to consider any devaluation of Holland's currency or any departure from the gold currency, as a means of improving the position, but exactly in what respects a departure from the accepted policy is not warranted, was not explained. And to those who have before them the example of Belgium, with her revival of trade and prosperity, brought about by a devalued belga, the official speech is no consolation.

Increased taxes, subsidies and higher defence expenditure are not calculated to cause much enthusiasm among financiers—much more so, that these isolated reflationary measures are not likely to prove beneficial as long as the general policy of deflation is maintained. The fact remains that maintenance of an overvalued currency and reflation are incompatible.

JUTE AND JUTE GOODS

JUTE

Calcutta, October 17, 1935.

There was a sharp rise in the jute market during the holidays. The tense European political situation was the principal reason for this rise. Owing to expectations of a big war starting at any moment sellers were entirely absent from the market and under the influence of speculative purchases, prices rose rapidly.

Imports in the up-country are reported to be smaller than what they were at this time last year. There is considerable difference of opinion about the cause of these small imports. Some believe that the crop is not bigger than the Government estimate, while others are of opinion that imports have been held up due to a rising tendency of the market and that jute will be offered freely when the market shows a tendency to decline.

Demand from Overseas was fairly good, though there has been a falling off at the time of writing. Foreign buyers are reported to have confined their attention to Daisee and Tossa varieties and the consignments of the old crop.

Mills are reported to have done only a small business. At the time of writing sellers show more disposition for business with mills holding off.

The immediate outlook of the market appears uncertain and will depend on developments in Europe and movements in other commodity markets.

In the loose jute section earlier in last week business was reported with the mills on the basis of Rs. 5-4 per maund for Indian Jat 4's. On the following days the market was firmer and prices advanced. The nominal quotations at the close were Rs. 5-8 to Rs. 5-10 per maund for Indian Jat 4's.

In the *Pucca* bales section business was done by shippers on the basis of Rs. 35 per bale for Firsts shipment this month. The market is quite at the close with shippers showing small interest in Outports Tossa assortment at Rs. 32-4 per bale.

The *futka* market has recorded an advance of more than Rs. 3. The highest rate touched was Rs. 36-10 and the lowest Rs. 33-8. At the time of writing the price is Rs. 35-8.

JUTE MANUFACTURES

Calcutta, October 17, 1935.

The local hessian market was very much excited during the holidays owing to the war developments in Europe. A sharp rise took place and *futka* was done up to Rs. 8-12. Mills are reported to have sold freely at rising prices.

A portion of the rise has been already lost as there seems little chance of any big European war breaking out.

It is estimated that the mills during the last one and a half months have sold not less than 40 crore yards of hessian. A considerable portion of it was purchased by shippers. The bazar also seems to have purchased a considerable quantity.

American buyers have bought moderately. The enquiry has been mostly for near positions, forward positions being neglected.

There is a great scarcity for near deliveries due to which they are selling at considerable premium.

Mills are sellers for forward deliveries, but buyers are reluctant to enter into any contracts for next year.

A moderate business has been reported in 40″ 7½ oz. at Rs. 8-12 and 40″ 8 oz. at round Rs. 8-10 for October shipment, while April-June 11 Porters have been done around Rs. 10-10.

Heavy goods are quiet with minimum business passing. B. Twills sold at Rs. 23-10 and Liverpools at Rs. 27 for October shipment.

The American stock and consumption figures for the month of September are very encouraging. The comparative figures for the two previous months and September 1934 are as under:—

(In millions of yards)

	Stocks at the end of month Spot	Stocks at the end of month Afloat	Consumption for month
September 1935	125	106	62

JUTE BREVITIES

Jute Trade in Belgium.

During the first six months of 1935, imports of jute yarns into Belgium showed a decline of 50 per cent. amounting to 73,100 kg., as compared with the imports during the corresponding period of last year, amounting to 147,700 kg. Imports of jute tissues were also far smaller amounting to only 4,100 kg., compared with 10,900 kg. imported during the corresponding period last year.

Exports of jute yarns on the other hand showed an increase from 1,689,500 kg. to 2,769,400 kg. Exports of jute tissues also registered an increase amounting to 8,334,000 kg., against 7,934,100 kg. last year.

Russian Jute Industry.

During July the number of jute sacks produced in Russia amounted to 6,800,000. Rope production totalled 1,073 tons, twine 462 tons, harvesting binder twines 1,580 tons and packing twine 812 tons.

Jute Industry in Italy.

The jute industry in Italy has recorded an unseasonal improvement due to extensive orders from the military commissariat. Imports of raw jute in July totalled 4,798,900 kg. against 4,203,300 kg. in June, whereas last year there was an exceptional increase from 5,662,400 kg. to 10,340,500 kg., which was mainly due to the prospect of future import restrictions. Nevertheless, the total imports of jute into Italy from January to July 1935 amounted to 50,897,000 kg., compared with only 38,835,000 kg. last year. The Italian mills are said to have large stocks at their disposal as to be well covered for many months.

Tariff Changes in France.

The importation of jute twines was freed from the currency equalisation tax. The importation of grey jute cloth during the last quarter of 1935 has been made subject to quota restrictions, on the basis of the average import during the year 1933.

RAW JUTE EXPORTS FOR SEPTEMBER

According to the returns received in the Department of Commercial Intelligence and Statistics, the total exports of raw jute from Bengal during September amounted to 214,110 bales of 400 lbs. each, of which 205,391 bales were exported from Calcutta and 8,719 bales from Chittagong.

The total exports from Bengal in September 1933 and September 1934 were 279,059 and 313,466 bales respectively, the shipments from Calcutta being 262,898 and 281,014 bales.

COTTON AND COTTON GOODS

COTTON

Calcutta, October 17, 1935.

As owing to the Puja holidays our issue was not published last week, the present report covers two weeks' trading in the cotton markets.

The Bombay Cotton market witnessed excited trading during the first part of the period under review on receipt of news of outbreak of war in Abyssinia. Influenced by heavy buying of a general nature stimulated by political developments, prices flared up to the maximum limits. Broach April/May touched Rs. 220-8 on October 5. Enlivened by the gigantic operations of a well-known Indore operator, speculators entered into huge long commitments. The firmness was maintained till October 8, when a reaction set in. The publication of the U. S. Bureau Report, which proved to be somewhat bearish, the American Government's threat to liquidate their cotton holdings, the fears that the application of sanctions against Italy may disorganise trade relations and, above all, the cessation of Japanese buying owing to the narrow parity of Indian rates, were factors which adversely affected the sentiment. Heavy liquidation followed and prices sank to low levels, Broach April/May receding to Rs. 212/8 on October 10. The market has improved towards the close on reports of war developments which indicated the spreading of the conflagration to the rest of the world.

Broach April/May, after touching Rs. 218/4 on 14th instant, closed at Rs. 216. Oomra Dec./Jan. contract after touching Rs. 200-4 closed at Rs. 194-12 and Bengal touching the highest rate of Rs. 152-12 has receded to Rs. 148-12 at the close.

The New York Cotton market ruled firm during the first week stimulated by war news and Geneva developments. Influenced by trade and speculative buying prices improved much, December touching the peak of 11.06 and Middling Spot 11.40. The publication of the fourth official Bureau report, however, called a halt to the advance. The report placed the crop at 11,464,000 bales, which showed only a negligible decrease of 25,000 bales as compared with the previous month's estimate. The yield was indicated at 191.5 lbs. per acre and the condition at 64 per cent. of nominal. As the general expectations were for a still reduced crop, the bullish sentiment was dissipated and the market developed a lower tendency. The statement of Mr. Johnson that the cotton held by the Government may be liquidated at a loss, and the fears that sanctions against Italy may affect Continental trade, also adversely affected the market. Prices declined steadily under pressure of heavy hedge-selling and liquidation. Midding spot closed at 11.25 and December at 10.82.

Heavy trade buying owing to fears of a world war was witnessed in Liverpool where a remarkable improvement in prices was recorded. Middling spot rate flared up to 6.65 on October 8. Thereafter, a gradual decline was noticed in sympathy with New York. Middling spot closed at 6.41 and December at 6.08.

There was an increased demand for Egyptian cotton from the trade interests, the prices for which improved steadily. The spot rate touched 8.71 towards the close and October was quoted as high as 8.30.

The Crop Reporting Board of the United States Department of Agriculture has issued their fourth report for the 1935 season estimating the cotton production in United States as on October 1, 1935. It has revealed the following position :—

	Oct. 1, 1935	Sept. 1. 1935	Oct. 1, 1934	Oct. 1 1933
Condition (per cent. of normal)	64.0	64.5	55.9	66.7
Yield per acre (in lbs.) ...	191.5	192	170.9†	208.5†
Production (in '000 bales)	11,464	11,489	9,636†	13,047†
Ginnings (in '000 bales) ...	4,230	2,318*	4,965	5,908

*To Sept. 15. †Final.

Annual world mill consumption of all cottons since the 1927-28 cotton season to 1934-35 has been estimated by the International Cotton Federation as under :—

Season	Bales
1927-28	25,540,000
1928-29	25,882,000
1929-30	25,209,000
1930-31	22,488,000
1931-32	22,322,000
1932-33	24,352,000
1933-34	25,112,000
1934-35 (Excluding Germany) ...	24,416,000

PIECEGOODS

Calcutta, October 17, 1935.

Conditions in the local piecegoods market have improved. There is a general feeling among speculative circles that the outbreak of war in Abyssinia, or rather the turn it may take, would cause a big rise in prices. Several upcountry dealers have entered the market with strong enquiries. The considerable increase in Japanese dhooties and shirtings is an advantage to indigenous trade. A fair amount of business in Japanese shirtings, dhooties and fancy goods is reported. As regards indigenous goods, the improvement has not been very much as compared with Japanese goods. English goods were a dull feature.

In Bombay, on the other hand, conditions have very much improved in indegenous and Japanese goods. Clearances have been satisfactory and prices are ruling firm. The large off-take is no doubt due to the general belief that the Abyssinian war may spread into a Great European war. The market seems to have recovered from the long spell of lethargy. Considerable improvement was noticed in the trade in indigenous goods. A large quantity of grey goods have been cleared at improving rates. Retail off-take in fancies, bleached and dyed goods have been on a satisfactory scale. In Japanese goods also a good activity was in evidence and prices in important styles have advanced. As replacing prices are above ruling rates, forward trade has been restricted. Very little improvement in the off-take of British goods was witnessed. Prices at the other end are firmer, and though there has been a good enquiry, actual business reported was considerably small. The yarn market is healthier with improved off-take and advancing prices.

BULLION

GOLD

Calcutta, October, 17, 1935.

The gold market in Bombay ruled quiet but steady, prices remaining above parity throughout the last fortnight. Internal demand was restricted to a small extent and on the whole business done was confined to small lots. The highest rate touched was on October 8, when the rate for first settlement improved to Rs. 35-4-0. The weakness of sterling in terms of the Dollar and the Franc helped to push up the prices. With the improvement in sterling towards the close the market has assumed a quieter tone. Ready and first settlement were quoted at Rs. 35-1-0, while second settlement closed at Rs. 35-1-9.

Stocks on hand over the week-end are estimated at 2 lakhs of tolas. Daily arrivals are on the average 10,000 tolas, while the offtake remained unchanged at 3,000 tolas a day. Shipment per s.s. *Cathage* amounted to Rs. 43.34 lakhs.

The Calcutta market has been steady after the holidays. Gold bar per tola are quoted at Rs. 35 and sovereigns, improving to Rs. 22-7-0, declined by 6 pies at the close.

In London, the price for gold improved to £7-1-11½ earlier, but declined later steadily to £7-1-7½.

The sterling-franc rate fluctuated between 74.37 and 74.51, the closing rate, while the Dollar rate improved from 4.89 9/16 to 4.91 1/16 at the close.

London—Air Mail week ending October 2.

The Bank of England gold reserve against notes amounted to £193,572,573 on the 25th September, as compared with £193,477,708 on the previous Wednesday.

During the week the Bank announced the purchase of £70,259 in bar gold.

In the open market about £1,900,000 of bar gold changed hands at the daily fixing. Prices have been fixed at about dollar parity and further large shipments have been made to New York, both from this country and from France.

The s.s. *Strathaird* which sailed from Bombay on the 28th September carries gold to the value of about £558,000, of which £415,000 is consigned to London and £143,000 to New York.

The Southern Rhodesian gold output for August, 1035, amounted to 61,399 fine ounces, as compared with 61,237 fine ounces for July, 1935, and 59,471 fine ounces for August, 1934.

SILVER

Calcutta, October 17, 1935.

The silver market in Bombay witnessed a revival of speculative activity and much enthusiastic trading was noticed. Prices fluctuated widely with the ebb and flow of war news. The higher levels were maintained during the first part of the period under review and towards the latter part, when speculative buying subsided, prices declined steadily. The peak was touched on October 8 when the rate for Ready went up to Rs. 68/7, first settlement Rs. 68/9 and second settlement Rs. 68/14. The closing rates were a rupee below the above highest rates.

Stocks on hand over the week-end were 35,000 bars and the daily offtake stood at about 10 bars which is more than offset by arrivals from upcountry. Total imports during last week amounted to Rs. 43,400 in coin.

In London, America was a purchaser throughout at steady rates, while China and speculators appeared as chief sellers. India did not take much interest and was seen buying only occasionally. The spot rate remained steady at 29 3/8d, while forward was 1/16d. higher.

The spot rate for silver in New York was unchanged at 65 3/8c., while the London-Shanghai T. T. fluctuated between 1-6½ and 1-6 1/16.

London—Air Mail week ending October 2.

There has been little movement in prices, but the market has maintained a very steady tone.

With the appreciation of the dollar, the American Treasury increased by slight stages the limit at which they were willing to buy. Purchases of silver for cash delivery were made during the week at current prices.

There has been some speculative re-selling and China and the Indian Bazzars have both bought and sold, but the market on the whole has been rather quiet and there is no indication of any important change in the near future.

Stocks in Shanghai on the 28th September consisted of about 279,000,000 dollars and 41,000,000 ounces in bar silver as compared with about 279,000,000 dollars and 41,600,000 ounces in bar silver on the 21st ultimo

TEA

CALCUTTA AUCTIONS

Calcutta, October 17, 1935.

After a break of one week due to the Puja holidays sales were resumed at Calcutta on the 14th October. The total quantity offered for export was 25,500 packages, of which about 24,000 packages sold at an average price of Rs. 0-9-8 per lb., as compared with the average price of Rs. 0-8-11 at the corresponding auctions last year. The majority of the invoices offered were from Assam and the Dooars showed a slight improvement in quality. There was a strong general demand for all descriptions, and prices showed an irregular advance of 3 to 9 pies against those ruling in the last sale. Leaf grades were a good feature.

At the auctions of teas for internal consumption on October 15, the total offerings amounted to about 19,000 packages, of which 10,600 packages were dusts the balance of other grades. There was strong competition for dusts of all descriptions and previous rates were fully maintained. Among other grades also there was a good demand for all descriptions and prices generally advanced a full 3 pies.

Regarding crop, the outturn up to the end of September was estimated at 227¾ million lbs. as compared with 240¼ millions for the same period last season.

The following are the full particulars of sale No. 18.

Teas with Export Rights.

LONDON AUCTIONS

We have two weeks' auctions to review. The offerings for the week ending October 10, amounted to 50,600 packages of Indian, 20,400 of Ceylon and 7,100 of Java and other teas. The offerings for the week ending October 17, totalled 51,300 packages of Indian, 20,800 of Ceylon and 7,100 of Java and other teas.

Indian Tea.

The market was strong and active last week, with low-priced kinds ¼d. to ½d. per lb. dearer, and fine teas sold well. At the auctions on October 14, the total offerings amounted to 28,200 packages. There was a fair demand for the offerings. Mediums were easier, but other descriptions displayed firmness.

Ceylon Tea.

Ceylon teas were in keen competition at last week's sale, when low-grown and medium teas were dearer by ¼d. to ½d. per lb. Good teas, which showed improvement in quality, were ½d. to 1d. dearer. Suitable shipping types had a very strong market. At the auctions on October 15, common and fine kinds were fully steady but others showed much irregularity and were often easier to buy although not quotably easier.

Java & Other Teas.

At the auctions on October 3, the total offerings of Java and other teas (including Sumatra) amounted to 9,500 packages. Tippy teas showed little change, while other sorts advanced irregularly. On October 10, the market was strong and excited with pronounced all-round advance in prices.

Tea Average.

The following were the average prices of tea in the London market during the week ending October 10, as compared with the previous week:—

	Week Ending October, 3	Week Ending October, 10	
Indian Tea—			
(Northern) ...	16.20d.	15.63d.	per lb.
(Southern) ...	12.53d.	12.87d.	,,
Ceylon Tea ...	15.82d.	16.98d.	,,
Java Tea ...	12.60d.	12.74d.	,,
Sumatra Tea ...	10.17d.	10.88d.	,,

TEA EXPORTS

The following figures of tea exports taken from the Calcutta Customs daily entries and received periodically from Chittagong are issued by the Indian Tea Association.

Quantity of tea entered for export to United Kingdom for the second half of September, 1935.

Calcutta—Black 11,799,958 lbs., Green nil. Chittagong—Black 7,952,031 lbs., Green nil.

Quantity entered during the corresponding period last year.

Calcutta—Black 10,794,346 lbs., Green nil. Chittagong—Black 5,737,242 lbs., Green nil.

Total from April 1, 1935 to September 30, 1935.

Calcutta—Black 69,947,441 lbs., Green nil. Chittagong—Black 40,547,486 lbs., Green nil. Total 110,494,927 lbs.

Total from April 1, 1934 to September 29, 1934, 121,651,020 lbs.

(*Continued from page* 1203)

textile policy is to be guided entirely by a consideration of the interests of Lancashire. Sir Alexander must make it clear that the Indian textile industry comes first and foremost. The industry has been harrassed, in recent years, by repeated enquiries, onslaughts of various kinds as from Japan and China, fluctuating hopes and disappointments, recurring changes in the measure and value of protection. Through this process of inquisitions, harangings, admonitions accompanied by protection offered in a patronising spirit, the industry is as badly off to-day as ever it was. It is only a few upcountry mills that are doing well. Even they cannot feel safe and secure that a minimum of prosperity is assured. The Government will do well to recognise that no other industry has been more battered and badgered by an unkind fate and a still more unkind Government than the cotton mill industry. Let not such meagre protection as exists to-day be attenuated in a way that will re-start the begging expeditions of the mill-owners.

From this point of view, it is idle to suggest that the industry has anything like extravagant protection as against Lancashire. It has nothing of the kind. Even as against Japan and China, it is only a section of the textile industry that has been protected. The South Indian cotton mills are still the victims of the cutthroat competition from the far East. The mills in South India are mainly spinning mills ; but they own no less than one million spindles. In past years the special case of the South Indian cotton industry has gone by default. It is imperative that while the Tariff Board enquires as to what adequate protection means to North Indian mills against Lancashire, it should also look into the grievances of the South Indian mills as against Japan and China. To urge for protective duties against Japan and China may be outside the terms of reference of the present enquiry ; but if the Tariff Board which has begun its task under Sir Alexander Murray has any use or can serve any purpose, it is only in the direction of stabilising the trading conditions for the entire Indian textile industry over a period of years. Let Sir Alexander Murray realise that his task consists in ensuring the prosperity of the Indian textile industry in a manner that spells some measure and degree of permanence ; and that, after achieving this, he could set about devising plans for enabling Lancashire to capture such markets as cannot be catered to by the Indian mills.

SUGAR

Calcutta, October 17, 1935.

The local sugar market has been active during the past fortnight and demand for nearby and distant positions were on a fair scale. The declaration of war, no doubt, is the cause for the general improvement. Prices have made substantial advances for both Java and Desi sugars. Ready stocks of Java and Desi were almost exhausted and this is attributed for the remarkable firmness of ready sugars. Java Refined Ready improved up to Rs. 11, but closed 2 annas lower, while Refined Steamer advanced to Rs. 10-8. Java White Ready and Steamer were quoted Rs. 10-12 and Rs. 10-5 respectively. Desi Sugars were fully steady, White (1st Crystal) quoting Rs. 10-6 to Rs. 10-11 and Brown (2nd Crystal) Rs. 10-4 to Rs. 10-8.

There was a good demand in Bombay for spot and afloat sugars and all the heavy arrivals of the week were absorbed. Prices appreciated by 5 to 7 annas per cwt., in near positions and 3 annas in distants. Importers on this side are reported to have booked a large business. Last week's turnover amounted to about 29,500 tons.

Nivas limits in Java improved to F. 4.20. The total sales last week amounted to 30,000 tons whites and 20,000 tons Browns. London Terminals were higher at the close by 1d. to 2d. at 4s. 11¼d. 5s. 1½d., and 5s. 2¾d. for December March and May respectively.

The Cawnpore market has registered an advance of 3 to 4 annas in spots owing to depleted stocks. New Crop positions improved by about 2 annas. Mills are reported to have sold about 1 lakh bags crystals No. 1 for Nov-Dec. delivery. Desi sugars Ready are quoted at Rs. 14-10 for Kesar and Rs. 14-5 for Saraya.

Arrivals during the week amountted to 7,075 tons Javas and 750 tons Mozambique. The s.s. *Sirsa* is due on 22nd instant with 1,000 tons Javas and African Mail on 19th with 2,000 tons Mozambique.

Stocks in the main ports are:—

(In bags: 10 bags = 1 ton.)

MISCELLANEOUS

WHEAT

Calcutta, October 17, 1935.

The local wheat market during the period under review ruled very strong and active with prices showing an upward tendency. There was a buying campaign in the market and a firm undertone is noticed both locally and upcountry. The general improvement in the demand for flour and the strength of other foodstuffs have also imparted some firmness to the wheat market. Punjab and Cawnpore Ready has steadily advanced to Rs. 3-12, while May Beta is fully firm at Rs. 3-10-3.

In Bombay, the market remained very steady throughout. Prices have registered advances on increased trade buying. Delhi-Cawnpore January improved to Rs. 4-14-6, while May closed at Rs. 4-12-6.

News of the declaration of war by Italy imparted a bullish feeling in the Karachi wheat market, where prices advanced sharply to the extent of over a rupee per candy. Ready wheat sold at Rs. 24-14, which is the highest rate recorded since the middle of January last. A good deal of speculative activity was witnessed, but towards the close prices have eased by 2 to 4 annas from the highest level touched. Trade demand was on a fair scale and spot sales last week totalled about 50,000 bags, out of which about 10,000 bags were purchased by European firms, 16,000 bags by Bombay and Calcutta merchants and the balance by local mills. Arrivals from upcountry averaged 5,000 bags a day and shipments last week totalled 24,900 bags. Stocks are reduced to 4 lakhs bags.

The import and export figures of wheat for the three main British Indian ports as given in the *Indian Trade Journal* from 1st April to October 12, compared with the corresponding period of 1934 are:—

Imports—

	(In tons) 1935 Indian	Foreign	(In tons) 1934 Indian	Foreign

	1935	1934
Calcutta	9	17
Bombay	741	614
Karachi	2,442	8,564

Overseas markets have been firm during the early part, but prices have slightly declined towards the close. In Chicago, the rate for December spurted up to $1.07 5/8 on October 7, but eased steadily towards the close to $1.03 7/8. The rate for May, after advancing to $1.05 1/8, closed at $1.02 3/4. The market is quiet in London. Australian wheat October which was firm at 32s. 9d., have declined to 31s. 9d. at the close. Baruso Parcels are quoted at 29s. 4½d. for October delivery. The yield of wheat in France has declined to 280 million bushels, and the Argentine wheat is estimated at 14 million acres as compared with 18.8 million acres last year. The yield in Canada has been much reduced owing to pest damage and United States is not expected to have any surplus for export.

The latest official estimate of the 1935 wheat crop in France shows the yield at 280,000,000 bushels, which is 60,000,000 bushels and 85,000,000 bushels below the estimated yield of 1934 and 1933 respectively. The price of wheat in France has advanced by 35 per cent. during the last two months.

The Department of Agriculture estimates the U. S. wheat supplies at 747,000,000 bushels, which is approximately equal to domestic needs of 625,000,000 bushels, plus a normal carryover of 125,000,000 bushels.

The Ministry of Agriculture, in their report dated September 21, estimate the sown acreages of wheat in Argentine in 1935 at 14,085,000 acres, as compared with 18,812,000 acres in 1934. The report adds that, though much of the seeded acreage has already been abandoned owing to drought, still a reduction is possible if the drought persists.

LINSEED

Calcutta, October 17, 1935.

Though a quiet but steady tone was in evidence before the holidays the local linseed market was very active for the last three days. Increased buying was witnessed in the market and prices were pushed up. Ready closed at Rs. 5-2, while the rate for May was Rs. 5-3.

In Bombay, the market ruled steady and a rise in values was recorded. Linseed bold improved to Rs. 6-15 and May to Rs. 7-5-6, but closed slightly lower at Rs. 6-14-6 and Rs. 7-4-3 respectively.

In London, the market is ruling quiet and the price for La Plata linseed has fallen by 7½s. from the highest touched. Calcutta October-November closed at £12-13-9.

SHELLAC

Calcutta, October 17, 1935.

As in all other commodity markets, the local shellac market assumed a firm tone during the last fortnight, owing to political developments in Europe. In anticipation of higher prices in future speculators and dealers rushed into the market to buy. Attention was mostly centred round superior quality shellac. At the close a quieter tone was in evidence, but prices are unchanged. Superfine 'Hyper' quality closed at Rs. 33 sellers, 'Ultra' at Rs. 32 buyers and Fines Rs. 31 to Rs. 31-8.

Arrivals in October up to the 12th amounted to 457 tons, while shipments up to 14 aggregated 9971 chests.

A firm tone set in with the outbreak of war in London. Both spot and futures were strong. Spot went up to Rs. 58 to Rs. 62 and December was quoted as high as Rs. 59-6. A dull and easier tone was in evidence at the close and spot and futures have declined by As. 10 and Re. 1 respectively.

Market Tendency :—Firm.

MADRAS MARKETS.

PIECEGOODS

Prices in the Piecegoods section have advanced sharply for Standard styles by 2 as. to 6 as. per piece, chiefly due to excitement in the market owing to the war scare and the rise in war risk insurance. Apart from a little speculative forward business, there has been little doing in the local market owing to the absence of genuine demand from consuming centres. A better tone is noticeable in the Indian Mill goods section with fair demand. The Yarn market continues to rule firm, and prices of Indian and Japanese yarns show an upward tendency. Manchester yarns show no quotable change. Clearances are still poor. A little forward business is passing.

METALS

Prices of Yellow metal and Copper sheets have advanced sharply, owing to firm conditions in the Home markets and speculative buying on the part of dealers and consumers. Prices of Yellow metal have shot up to Rs. 160 per candy against Rs. 145 a fortnight ago. Copper sheets have advanced to Rs. 190 against Rs. 175 a fortnight ago. Sterling quotations are firmer at £45 per ton for English Yellow metal sheets and £53 for Copper sheets against £44/10 and £52/15 last week.

GROUNDNUTS

After three weeks of drought, the monsoon is again active and showers have fallen in South East Madras and Mysore. More rain is needed for the standing groundnut crop. The crop in the Vizagapatam area will be harvested by the end of this month and free arrivals of this crop would commence by the middle of November.

The third Groundnut crop report for the year 1935 estimates the area sown with Groundnut up to the 25th September 1935 at 1,990,500 acres. When compared with the area of 1,937,300 acres estimated for the corresponding period of last year, it reveals an increase of 2.7 per cent. The increase is general outside Ganjam, Vizagapatam, East Godavari, Bellary, Anantapur, Coimbatore and Malabar. The increase is marked in Kurnool, the Central districts (Coimbatore excepted) and Tanjore. The area in Bellary and Anantapur has fallen from 364,000 acres to 253,500 acres due mainly to an increase in the area under Cotton and other dry crops. The Summer crop throughout has been harvested. The yields were generally below normal. The yield of the early crop in Salem and Coimbatore is reported to be slightly below normal due to late sowings and insufficient rains in both the districts besides insect attack in parts of Salem. The condition of the main crop is reported to be generally satisfactory. The crop was affected in parts of the Madura district by drought, insect pest and plant disease to some extent. In the Udayarpalayam taluq of the Trichinopoly district, the crop is reported to have been attacked by hairy caterpillars.

The upward trend of the Groundnut market continued unchecked until Friday when a reaction set in. London quotations for Coromahdel Machined opened on Monday last at £14/16/3 October Sellers and £14/5 November Sellers, and sharply advanced to £15/7/6 October Sellers and £15/1/3 November Sellers on Thursday. On Friday, business was concluded at £15/7/6 for October shipments and £14/18/9 for November. The latest cable advices report that there are sellers of Coromandel Machined at £14/15 for November and £13/18/9 for December. Shippers' buying limits which stood at Rs. 34-8 for Machined and Rs. 30-8 for Ordinary at the beginning of the week advanced to Rs. 38-8 for Machined and Rs. 34-8 for Ordinary on Friday and later declined to Rs. 36-8 for Machined and Rs. 32-8 for Ordinary, per French candy, ex-coast godowns.

The kernel freight market rules firm, but rates are nominal in the absence of business. There is a good demand for space for October/November and December shipment, but steamer Agents are unable to offer same owing to the uncertainty prevailing in the shipping trade.

Arrivals of Groundnut kernels into Madras for the week ending October 12, 1935, amounted to 15,463 bags or 1,271 tons against 11,171 bags or 880 tons in the preceding week and 14,588 bags or 1,149 tons at the corresponding week of last year.

HIDES AND SKINS

Air Mail advices from London report that prices of Tanned Hides have risen still further owing to shortage of supplies but buyers would not follow the advance in Madras, as their immediate requirements have been met. The local Tanned Cow market continues to rule strong, and further increases in prices have been recorded during the week under review. Values are now higher by one anna to an anna and six pies per lb. for all weights and grades on last week's closing rates. Supplies are free and a very active demand continues. London quotations remain stationary at 2½d. above the minimum selling prices but the parity ruling in Madras works out at 4½d. to 5d. higher than the minimum. Replacement costs now average at about 6d. to 7d. above the minimum prices. Tanned Buffalo hides have shown a further rise of 6 pies per lb. for Heavy weights and an increase of one anna per lb. for Light weights. Tanned Buff Calf skins have sharply advanced by an anna and six pies per lb. owing to an expansion of demand. There is a very good inquiry for Tanned Cow Calf skins.

The Calcutta Raw hide market is very strong with poor arrivals and a brisk demand. Wet hides are quoted at 3 as. 6ps. to 4as. 3ps. per lb. and Dacca Drysalted at Rs. 5-12 per 20 lbs. At Cawnpore, supplies continue to be small, and HALALI PACHAM is quoted at Rs. 75 to Rs. Rs. 80 per 20 pieces, while MUNDALI is quoted at Rs. 55 to Rs. 60 per 20 pieces. In Madras, prices of wet hides are quoted at 3 as. 3 ps. to 4 as. per lb.

The following shipments of Tanned Hides and Skins were made from Madras during the week ended October 11, 1935 :—To the United Kingdom : 161 bales Tanned Buffalo, 1,223 bales Tanned Cow hides, 89 bales Tanned Cow Calf skins, 56 bales Tanned Buff Calf, 324 bales Tanned Goat and 264 bales Tanned Sheep. To U. S. A. : 30 bales Tanned Buffalo. To Germany : 4 bales Tanned Goat.

At the public sales of Tanned Goat and Sheep skins proceeding in London this week, 675,000 Madras Goat and 550,000 Madras Cheep would be on offer. Owing to the smaller offering compared with the last series, the out-look is bullish. At yesterday's sale in London, Madras Goat Primes registered an advance of a penny to 2d. whilst Others were up by 2d. to 3d. English demand was good, American fair, French demand moderate and German demand poor.

Investor's Supplement

Vol. XVI. No. 15 SATURDAY, OCTOBER 19, 1935 Price Re. 1

WAR SCARES—WAR PROFIT—AND PROFITEERING

The stock exchanges and commodity markets have borne a livelier look. War spells ruin to many; but it seems that it also spells prosperity to a few.

It is the news of the War which has raised prices alround—exceptionally in jute and hessian. From this point of view, a rise in jute shares is understandable. But how are we to account for the rise in government securities?

The present rise is due to sentimental, not intrinsic, factors—this explains the appreciation in prices in most markets. 3½ per cent. Rupee Paper has risen on the technical position of the market—that is, the technical factor has triumphed over war scare.

War scarce was overdone, in earlier weeks, to pull down the price of 3½ per cent. Paper. War profits are now being overdone to push up other prices. The present phase is as unreal as the past one was unjustified. This is, therefore, the time when one should be wary in his operations and reserved in his commitments.

MARKETS QUIET

(By Special Cable)

(By R. Gordon Cummings)

London, October 17.

Markets quiet on end account influences and forthcoming election.

The dullness may be expected to continue.

How great is the rise is indicated by a study of the several markets.

Jute from a low of Rs. 29-14 on September 14 has risen to Rs. 36-0 on October 15. In London, jute has spurted from £16-15 to £18-7-6d.

9 Porters has risen, in the same period, from Rs. 7-5 to Rs. 8-9. And 11 Porters from Rs. 9-11 to Rs. 10-10. In New York, 9 Porters have gone up from 4.40 to 4.95 and 11 Porters from 5.55 to 6.05.

Howrah shares touched as high a level as Rs. 52-4. Other jute shares, especially Anglo-India and Gourepore, have also risen in value. There was a reaction at the close, due to rumours of a lower dividend on Howrahs and due to two Indian mills proposing to forsake the Indian Jute Mills Association. No confirmation of these rumours is available.

At the Calcutta auctions, tea for export fetched 0-9-8 on October 10 against 0-9-2 five weeks ago. Internal Dust realised 0-5-2 against 0-4-11.

Tea shares have moved up as follows:

	Present Quotation		Quotation a month ago	
	Rs.	A.	Rs.	A.
Bishnauth	28	2	25	4
Central Cachar	79	0	68	0
Dimakushi	26	4	24	4
Dufflaghur	14	4	10	8
East India	12	8	9	8
Jutlibari	15	12	14	0
Tezpore	10	4	9	0

Wheat has advanced from Rs. 3-4-0 on September 11 to Rs. 3-12-0 on October 16. In London, Australian quality has risen from 28sh. 9. to 31sh. 9d. The price in Chicago has gone up from 91¾ cents to 1 dollar 03 7/8 cents.

Turning to linseed, the rise is from Rs. 4-10 to Rs. 5-2 in six weeks. The London price for La Plata quality has advanced from £9-6-3 to £10-10-6. Calcutta quality has risen from £11-12-6 to £12-13-9.

Sugar is no exception. *Desi* Sugar has gone up from about Rs. 9-8 on September 11 to Rs. 10-8 on October 10. Java sugar has also improved by a rupee.

Cotton, from the low of Rs. 192 on August 28 for Broach, was up at Rs. 216 this week. Bengal has improved to Rs. 148-12 from Rs. 121-4; and Oomra from Rs. 171-8 to Rs. 194-12.

MARKETS IRREGULAR

(By Special Cable)

New York, October 17.

Markets closed irregular due to tense European situation.

The improvement in New York cotton from 10.85 to 11.25; and that in Liverpool was from 6.22 to 6.41.

Silver, too, has risen from Rs. 64-6 on August 28 to Rs. 67-8 on October 16. Gold has improved, in this period, from Rs. 34-9-6 to Rs. 35-1-0.

In retail markets, the prices have soared in far higher proportion. There can be no doubt that considerable profiteering is already going on. Ask the housewife, she will give you a graphic account of the wiles of the grocer.

This hectic rise in retail markets is unjustified. It behoves the Government to keep a careful watch and put down profiteering in time.

For purposes of this column, suffice it to warn speculators that the rise in prices must be followed with utmost caution.

Worth-While Investments:

INDIA

FREEDOM FROM EXCISE DUTY

DECCAN SUGAR & ABKHARI CO., LTD.

(By "Watch-dog")

Messrs. Parry and Company Limited, the pioneers in sugar manufacturing in South India, are the Managing Agents of the Deccan Sugar & Abkhari Company. This Company is one of the few which are fortunate enough not to pay the excise duty. It has been exempted from the excise duty, because it produces palmyra sugar. Hence unlike other sugar factories, this company has kept up its previous record of progress.

The Company owns a sugar factory and distillery at Samalkot in the Godavari District, Madras, where palmyra jaggery is refined and various kinds of potable and non-potable spirits are produced. The factory does not crush cane.

A confectionary factory is attached to the sugar factory and a carbonic acid gas collection, purification and compression plant is attached to the distillery.

From the table given below it would be seen that the profits are rather irregular but excepting one or two years they have been at the three lakh limit. The year 1932 has been exceptionally good for the Company. The profits of the year ended 1934 come next after that.

Year ended.		Profit.	Depreciation.	Allocation to funds.	Carry forward.	Dividend. %
1926	...	3,47,448	1,06,616	50,000	2,36,764	20 *
1927	...	2,03,530	71,796	...	1,86,698	20 *
1928	...	3,50,252	72,980	64,000	2,18,170	20 *
1929	...	3,32,986	73,010	1,66,000	1,30,346	20 *
1930	...	1,32,467	75,394	...	13,919	15 *
1931	...	1,96,877	76,725	...	2,071	10
1932	...	5,59,844	76,818	2,00,000	28,598	25 *
1933	...	3,11,935	76,133	...	49,400	20 *
1934	...	4,83,027	87,675	36,000	1,10,752	30 *

* Includes Bonus.

The capital authorised, issued and subscribed is Rs. 15,30,000. Rs. 8,30,000 is in 6,640 ordinary shares of Rs. 100 each fully paid up and 6,640 shares of Rs. 25 each fully paid up and Rs. 7,00,000 in 7,000 cumulative 'A' preference 7 per cent. tax free shares of Rs. 100 each fully paid up.

During 1926, each original ordinary share of Rs. 500 was subdivided into five shares of Rs. 100 each.

During 1930, the capital of the Company was increased from Rs. 13,64,000 to its present figure by the capitalisation of Rs. 1,66,000 being a part of the accumulated profits of the Company to the year ended December 1929 and creating thereby 6,640 ordinary shares of Rs. 25 each fully paid up. These new shares were distributed free to the ordinary shareholders in the proportion of one such share for every share held.

The total reserves are Rs. 15,71,000. The general reserve is Rs. 5,64,000, the Equalisation of Dividend Fund Rs. 5,00,000, the Stock Reserve Rs. 3,00,000, Factory Modernisation Reserve Rs. 2,00,000 and Bad Debts Reserve Rs. 7,000.

Sundry Liabilities are Rs. 2,55,547.

On the assets side, the total block of Rs. 30,03,099 has been depreciated by Rs. 19,88,774 to Rs. 10,14,325. As such the net block value is considerably lower than the total of the paid-up capital.

Stores etc., are Rs. 4,63,922 and stock-in-trade Rs. 9,76,368.

Outstandings are Rs. 1,65,958 of which Rs. 4,200 represents doubtful debts.

Investments are Rs. 80,946 in 4 per cent. Loan 1943 to the value of Rs. 76,500.

Government Paper deposited with Government and others is Rs. 16,596.

Cash and other balances amount to the huge total of Rs. 9,59,698.

The total liquid assets are Rs. 26,79,474.

The profits for the year ended December 1934 are higher than those of the previous year at Rs. 4,83,027 against Rs. 3,11,935. The amount set aside for depreciation is Rs. 87,675 against Rs. 76,133. A dividend of 10 per cent. and a bonus of 20 per cent. has been declared against the same dividend and 10 per cent. bonus the previous year. The carry forward is higher at Rs. 1,10,752 against Rs. 49,400. At the present price of Rs. 350 and Rs. 88 the ordinary shares are extremely attractive because on the basis of the last dividend and bonus the yield is 8.5 per cent. tax-free. 20 per cent. inclusive of bonus has been declared almost throughout and that seems to be the lower level. Even at this level the yield is 5.6 per cent. In view of the large carry forward, the same dividend and bonus as in 1934 may be also declared next year.

Deccan Sugar has special advantages which guarantee assured and continued prosperity. To get a yield of 8½ per cent. tax-free on such a scrip is a golden opportunity for discriminating investors.

INVESTMENT BREVITIES

The profits of the Katras Jherria Coal Company Limited for the half-year ended July 1935 is Rs. 34,488 against Rs. 59,402 the previous year. The amount set aside for depreciation is Rs. 12,410 against Rs. 16,090 and the dividend is lower at eight annas per share against twelve annas the previous half-year. The carry forward is Rs. 10,967 against Rs. 13,889.

* * *

The profits of the Bengal Telephone Corporation for the year ended June 1935 are Rs. 20,03,915 against Rs. 18,28,467 the previous year. The amount set aside for depreciation is Rs. 9,61,276 as against Rs. 9,57,125 and the dividend is maintained at 8 per cent. The carry forward is higher at Rs. 3,28,984 against Rs. 2,17,621.

BRITISH COMPANIES IN INDIA

By R. Gordon Cummings

Barsi Light Railway Report.

Net earnings of *Barsi Light Railway Company*, which operates a line of 202 miles in length from Miraj to Pandharpur, Barsi Town, and the Hyderabad Frontier, and an extension from the Frontier to Latur, for the year ended March 31st, 1935, amounted to £36,793, after charging £14,567 for debenture interest and sinking fund. This compares with £46,088 a year ago, but this year there is included £2,500 (£2,000) transferred from taxation reserve and nothing (£3,804) credit on realisation of investments. As already announced the dividend for the year on the ordinary capital is to be reduced to 5 per cent., from 6 per cent. After provision for this payment and the preference dividend, requiring £38,445 in all, the carry forward is reduced from £7,608 to £5,957.

In their report the directors state that there was a decrease of 72,663 in the number of passengers carried and a fall of Rs. 1,13,553 in coaching traffic and sundry receipts, while goods traffic fell by Rs. 78,437, although the tonnage rose by 2,372 tons. Gross receipts of Rs. 18,10,335 for the past year therefore compare with Rs. 20,02,325 in 1933-34. Working expenses of Rs. 11,34,250 are Rs. 60,980 lower than last year, but owing to the fall in gross receipts they now represent 62.65 per cent., as against 59.69 per cent., of gross earnings. Net earnings have fallen from Rs. 8,07,095 to Rs. 6,76,086.

On the assets side of the balance-sheet capital expenditure during 1934-35 was £734, bringing the total on this account up to £1,165,387. As regards the Latur extension, expenditure was only £55, making a total to date of £139,098. Current assets of £77,841 compare with £64,333 for creditors, including the final dividends. The issued capital remains unchanged at £760,000, of which, £730,320 is in ordinary stock and £29,680 in 6½ per cent. cumulative preference stock. The company's own debentures outstanding comprise £140,000 4 per cent. stock and £60,000 5½ per cent. stock. During the last twelve months the 4 per cent. Latur extension debentures were reduced by £1,400 to £103,700. The total stock and debenture capital is now £1,063,700. Reserve for equalisation of dividends and other purposes remains at £225,000, but the Latur debenture sinking fund has been increased to £23,336.

The past year's decline in profits is attributed by the directors to the general lack of money and to the increasing competition by road transport concerns. This company has been a consistently good dividend payer, and it would be a great pity if profits are to continue being affected by uncontrolled competition from road traffic. The ordinary stock is currently quoted at 85, while the 4 per cent. debentures are 93½, the 5½ per cent. stock 104, and the 4 per cent. Latur extension debentures 98½. Owing to the small amount of stock in issue there is no market in the 6½ per cent. preference.

Steel Brothers' Dividend Disappointment.

The announcement that *Steel Brothers & Company*, the well-known East India and general merchants, is to pass the half-yearly instalment of dividend on the 8 per cent. non-cumulative preferred ordinary shares came as a great disappointment. The directors state that trading results for the current year to date do not justify any payment on October 31st. They have therefore decided to postpone consideration of a dividend until the final results of the current year have been ascertained. The £1 preferred shares have fallen to the nominal price of 17s. 6d.

Sittang Valley Rubber Estate.

The full report of *Sittang Valley Rubber Estate* for the year ended June 30th last is now to hand. This shows net profits of £6,143. The dividend of 4 per cent. takes £3,999, and, after writing off preliminary expanses of £845, a credit balance of £1,299 is left to be carried forward. The crop harvested during the period from March 1st, 1934 to June 30th, 1935 was 815,648 lbs. For the calendar year 1935 the company has been granted a standard assessment of 895,120 lbs. During the period covered by the accounts a large amount of reconditioning work was carried out on the estates taken over from the old company under the reconstruction scheme.

The balance-sheet at June 30th last shows that the estates are valued at £92,360, while liquid assets of £17,218 compare with creditors of £8,310.

The issued capital now comprises £99,970 in 2s. ordinary shares, but shareholders are being asked to sanction an increase in the authorised amount to £150,000 by the creation of 500,000 new 2s. shares. The purpose of this increase is to take advantage of opportunities to acquire suitable estates in Burma by the issue of shares. Arrangements have already been completed to take over on favourable terms an estate of 854 acres, of which 516 acres are planted with good young rubber. This estate is adjacent to the company's own property and can be managed with little extra cost. With the exception of a small payment in cash the purchase price will be satisfied by the allotment to the vendors of £12,191 in shares.

This development is interesting as it may foreshadow a gradual consolidation of rubber interests in Burma. There are very few Burmese rubber companies known to the London stock exchange, but it is evident that although the number is small the size of these companies may soon increase.

Malayalam Plantations Report.

The full report of this leading company, which owns extensive estates in Travancore and Southern India, shows a substantial reduction in profits for the year ended March 31st last. After providing for directors' additional remuneration and transferring £19,000 (£9,000) to taxation reserve, the net profit is £81,071, compared with £138,677 in 1933-34. The last mentioned figure included, however, £6,368 profit on realisation of investments, whereas there was no such windfall in the year under review.

A dividend of 5 per cent., compared with 8 per cent. a year ago, is to be paid on the £1,812,021 ordinary stock, leaving £98,222 to carry forward, as against £90,576 brought in.

The total area of the estates has been increased by 1,952 acres to 72,082 acres, of which 40,181 acres are cultivated—tea, 20,874; rubber 18,625; cardamoms 682. The restricted crop of tea was 9,165,746 lbs. (8,511,388 lbs.), and costs 7.39d. (7.28d.) per lb. compared with an average sale price of 9.32d. (10.69d.) per lb. The rubber crop of 4,644,817 lbs. (3,280,905 lbs.) realised an average net price of 4.80d. (4.56d.) per lb. The cardamom crop was 23,874 (23,837) lbs. and the realised price 21.52d. (20.27d.) per lb.

The whole of the £200,000 general reserve and the £25,000 special reserve set up a year ago from profits have been utilised in writing down the balance-sheet value of buildings, plant, machinery, etc., from £225,186 to the nominal value of £1. Estates have, however, risen by £77,268 to £1,654,677. Liquid and other assets total £398,919, compared with current liabilities of £143,354. Taken at par the valuation of the cultivated areas is £45 per acre.

Indian Brevities.

For the year ended June 30th last the directors of *Anglo-Burma Tin Company* recommend a final dividend of 25 per cent., making a total of 35 per cent. For the previous year the final payment was 22½ per cent., and the total annual distribution 30 per cent.

The interim ordinary dividend of *Calcutta Tramways* is to be maintained at 3½ per cent.

THE WEEK IN THE EXCHANGES

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Friday Oct. 18.

Since the Calcutta Stock Exchange opened (on the 14th October) after the Puja Holidays an all-round improvement, practically in every section, was noticed. On Puja eve the much expected war between Italy and Abyssinia broke out, and as was predicted in these columns, a sharp rise in Jute Mills shares was registered. Quite a fair amount of business took place and outside support was also in evidence. During the holidays Hessian and Jute markets ruled firm, but as the session closed, there was an easier tendency. Government Securities ruled steady on better London advices, and due to higher commodity prices, Coal, Cotton, Sugar and Tea shares had a firm support. Money was in ample supply, and Reserve Bank rate continued to be at 3½ per cent.

Government Securities.—A firm tone was in evidence throughout the session, but the volume of business was limited due to scarcity of scrip. On October 3 the closing rate of 3½ per cent. G. P. Notes had been Rs. 88-4, and during the holidays it fell down to Rs. 87-2. But since the opening of the market after the holidays the rates continued to be well over Rs. 89, closing very firm at Rs. 90-4 (a small lot having been sold even at Rs. 90-8), although the volume of business was small, the market being very short of ready scrip. 3 per cent. New Loan on the other hand was comparatively easier. The rate after fluctuating between Rs. 97-1 and Rs. 96-14, closed at Rs. 96-15, and so was also 3½ per cent Loan 1947-50, which closed at Rs. 102-7. 4 per cent. Loan 1960-70 was better round about Rs. 105-12, although no transaction was recorded on Thursday (October 17). Of the medium-dated Loans 1943's were offered at Rs. 106-14, and 5 per cent. 1944 U. P. Bonds continued to have a good support, which closed at Rs. 112.

Debentures.—As usual, Port Trust and Municipal Debentures had buyers, but very little business was possible owing to there being no sellers. Of the former, small lots of 5 per cent. 1946 and 5½ per cent. 1956-86 changed hands at Rs. 109-8 and Rs. 121 respectively, and in the latter, the only transaction reported was a small lot of 4½ per cent. 1933-50 at Rs. 107-8. Amongst Industrials, 6¾ per cent. Rohtas Sugars were dealt in at Rs. 102 and 5 per cent. Samastipur Sugars (new) at Rs. 102-8. The Dunbar Cotton Mills have notified that the whole of the outstanding Debentures of the "A" series will be repaid on 1st January, 1936.

Preference shares.—A good demand was in evidence in this section, especially in selected Jute Mill issues, but the actual turn-over was small. Transactions were reported in Anglo-India Jutes at Rs. 152 (small lot), Bally Jutes at Rs. 139, Gourepore Jutes at Rs. 128, Kelvin Jutes at Rs. 152, Kamarhattys at Rs. 130 and Hooghlys at Rs. 18-14. Among Miscellaneous Industrials, Bengal Telephones recorded Rs. 14-2, British Ceylon Corporation closed at Rs. 6, Kesoram Cottons at Rs .114-8, New Victoria Cottons at Rs. 4-15 and Darjeeling Himalayan Railways at Rs. 99.

Other Investment Stocks.—An improvement in the rates of Bank shares was noticed, apparently in sympathy with steady Government Securities. Reserve Banks were the outstanding feature in this section, and from Rs. 118 which was the closing rate before the holidays, it rose up to Rs. 122-8 on October 17 (Thursday), but closed easier at Rs. 121. Early in the session however, it was inclined to sag, and a number of transactions were recorded round about Rs. 117. Small lots of Imperial Bank fully paids and contributories were dealt in at Rs. 1,472-8 and Rs. 357 respectively, but Central Banks remained unchanged round Rs. 32-12. A good support in Railway shares was noticed, but as was the case before the market closed, business was not possible for want of sellers. Transactions included Arrah-Sasarams at Rs. 55-8, Howrah-Amtas at Rs. 102, Mymensingh-Bhairab Bazar Guaranteed at Rs. 91-8 and Rebate at Rs. 92, and Sara Serajgunge at Rs. 93-8. In Shipping issues I.G.N. had a firm support and closed at Rs. 99, Calcutta Landings changed hands at Rs. 14-4 and Port Shippings at Rs. 15-10. Of the Insurance Companies, New Asiatics were the only ones which were dealt in throughout the session, and from an opening quotation of Rs. 8, it rose up to Rs. 8-5 at which it closed.

Cottons.—Quotations of cotton mill shares started to advance just before the holidays, and during the period under review a firm tone was witnessed, although on Thursday no transaction was reported owing to scarcity of sellers. Dunbars were as high at Rs. 120, Kesorams at Rs. 3-11, Bengal Nagpurs at Rs. 14-10, New Victorias at Re. 1-6. There were buyers of Mohini Mills round Rs. 11-8, but with nothing offering. Bowreahs were unchanged at Rs. 260, while a parcel of New Rings came to business after a long time at Rs. 72.

Coals.—Considerable interest was centred round this section, but with very limited business passing. In a number of cases prices showed better improvement than what it was before the holidays. Burrakurs were up to Rs. 12-8, Bengals were as high at Rs. 265, Amalgamateds at Rs. 22-4, Equitables rose up to Rs. 36-12 but were easier at the close at Rs. 36-4, Hurriladihs were dealt in at Rs. 17-12, Burra Dhemos hardened up to Rs. 3, Ghusick and Muslias were at Rs. 2-8, Sendras at Rs. 10-12 and Westerns at Rs. 3-2. The enquiry about the last named appeared to have been satisfied for the present. There were sellers of Talchers round about Re. 1, who met with no buyers. North Wests (fully paid) were wanted at Rs. 7 but very few shares were on offer.

Jutes.—In sympathy with strong hessian and jute markets this section steadied up considerably, and Howrahs in unofficial dealing during the holidays were as high at Rs. 52 last week, as against Rs. 50-6, the closing figure of October 3. They opened at Rs. 50-7 after the holidays, but were subject to considerable fluctuations between Rs. 50 and Rs. 52, and in sympathy with easier commodity market on Thursday, closed at Rs. 50-7. Kamarhattys were also fluctuating heavily between Rs. 503 and Rs. 530, closing at Rs. 510. Clives were steady round about Rs. 27-8 and Nationals at Rs. 22-14. Anglo-Indias closed at Rs. 420, Ballys were up to Rs. 205, but closed at Rs. 199, Nuddeas at Rs. 48 and Reliances at Rs. 69-8. It is apparent that dealers find it rather difficult to understand what the tendency of the prices would be, as such, it was not easy to complete transactions. Much depends on an International crisis taking place as a result of Italy's aggression on Abyssinia, drawing other European powers into a Great War.

Electricals.—Conditions in this section were more or less unchanged, and few transactions were reported. It is apparent that buyers' attractions were diverted to other shares. Bengal Telephones changed hands at Rs. 18-10, Dacca Electrics had buyers at round about Rs. 18-8, Upper Jumnas were dealt in at Rs. 11-12 and Bareilly Electrics at Rs. 13-8.

Engineerings.—During the period under review Bengal Irons and Indian Irons continued to have full support, the former closing at Rs. 4-2, and the latter after having touched Rs. 9-1 closed a little easier at Rs. 8-15. In the middle of the session however, there was an indication as if buyers' interest in these two Companies was on the wane, and the rates dropped down to Rs. 3-12 and Rs. 8-8 respectively, but as already stated, recovered at the close. Of other issues, Kumardhubis were as high at Rs. 3 but Marshals were maintaining their old rates, having closed at Re. 1-3.

Sugars.—Buyers were attracted to this section, apparently noticing the rise in commodity prices, and a sharp rise in the rates of shares was recorded. Balrampurs were round about Rs. 17-8, there were buyers still at this rate, but sellers being scarce, no transaction could be made. Bulands were done at Rs. 11-4 Carews at Rs. 19-8, Cawnpores at round about Rs. 35, Champarans at Rs. 19, and Samastipurs at Rs. 8-12. Of the Punjab group, Punjabs changed hands at Rs. 245, and Murree Brewery were crossed at Rs. 170.

Miscellaneous.—Paper shares had a good feature, India Paper having advanced sharply to Rs. 183. Bengal Papers were wanted round about Rs. 99, while Tighur Ordinaries and Deferreds closed at Rs. 22-12 and Rs. 9-8 respectively. Of others Burma Corporations after reaching Rs. 8, closed easier at Rs. 7-10, British India Corporations were on demand at Rs. 3-10, Indian Wood Products rose sharply to Rs. 22 and Indian Cables after recording an advanced rate of Rs. 5-10 closed at Rs. 5-8.

Teas.—Marked all-round improvement in rates due to increased prices for raw material in the local auctions was reflected in this section but at the close owing probably to profit-taking there was a rather quieter feeling in this section. Bishnauths were up to Rs. 27-12, East Indias at Rs. 12-2, Jutlibaris at Rs. 16, Ledos at Rs. 211, Tezpurs at Rs. 10-4, and Hasimaras at Rs. 41 were among the business done. A further rise is anticipated in the next few weeks.

Rubber.—Although few transactions were reported, advices from the Straits indicated steadier conditions in sympathy with the improvement in the commodity price. Ayer Hitams were done at $1.50, Kempas at $1.63, King's Islands at Rs. 2-4 and United Malaccas at $1.50

THE RELIANCE JUTE MILLS CO., LTD.

NOTICE is hereby given that he Fifty-eighth Half-yearly General Meeting of Shareholders will be held at the Registered Office of the Company, No. 4, Clive Row, Calcutta, on Friday, the 15th November, 1935, at 12-10 p.m., to receive the Directors' Report, pass the Audited Accounts to the 30th September, 1935, declare a Dividend, and transact any other business that may be brought forward at an Ordinary General Meeting.

Holders of Scrip under blank transfer are reminded to send in their shares for registration in the Books of the Company as soon as possible, but not later than Thursday, the 31st October, 1935.

To facilitate the issue of Dividend Warrants Shareholders are requested to insert share numbers and the nature of the shares held by them in their applications.

The Share Transfer Register of the Company will be closed from Friday, the 1st November, 1935, to Friday, the 15th November, 1935, both days inclusive.

By Order of the Directors,
JARDINE, SKINNER & CO.,
Managing Agents.

Calcutta, 7th October, 1935.

BOMBAY STOCK EXCHANGE

(*By Wire*)

(From our Correspondent)

Friday evening.

Money Market.—Money continues easy with inter-bank call quoting at ¼ per cent.

Exchange.—This section ruled steady with banks selling T.T. at 1s. 6 7/64d. upto December for near position ; 1s. 6 1/8d. January-March, 1936 ; and 1s. 6 7/64d. April-May.

Securities.—This week there was a decided improvement in rupee securities and 3½ per cent. Paper firmed up from Rs. 89 to 90-*B*. Short-dated and medium-dated securities were in keen demand.

1938/40 Loan has improved to Rs. 108/10 ; 1945/55 finds enquiry around at Rs. 116/8 and even 1960/70 has improved from Rs. 105 to Rs. 106. 1941 was quoted at Rs. 102/1 ; 1947/50 at Rs. 102/6 ; 1943 at Rs. 107 ; 1955/60 at Rs. 113-8 ; 1940/43 at Rs. 109-8 ; 1939/44 at Rs. 108-8 and 6½ per cent. Bombay Development 1935 at Rs. 100-2.

Shares.—On account of the weak bull liquidation, the market was rather easy at the beginning of the week ; but it closed to-day buoyant and firm with particular improvement in steels and hydro-electric shares. The undertone seems healthy and we believe, that the market will maintain the trend.

Textiles.—The continuance of the Italo-Abyssinian War brought about some enquiry in this section, the closing being a shade better. Bombay Dyeing was quoted at Rs. 752-8 ; Central India at Rs. 255 ; Century at Rs. 227-8 ; Colaba at Rs. 136-4 ; Kohinoor at Rs. 182-8 ; and Swadeshi at Rs. 150.

Swadeshis at the current price definitely look a promising lockup in view of their recent renovation of the Spinning Department and the increased income from their lands. The Directors of Central India have

HOWRAH MILLS CO., LTD.

NOTICE is hereby given that the Ninetieth Half-yearly General Meeting of Shareholders will be held at the Registered Office of the Company, No. 4, Clice Row, Calcutta, on Friday, the 15th November, 1935, at 12 o'clock noon to receive the Directors' Report, pass the Audited Accounts to the 30th September, 1935, declare a Dividend, and transact any other business that may be brought forward at an Ordinary General Meeting.

On application, Dividend Warrants will be made out in favour of Share-holders whose names are in the Company's Books on the 31st October, 1935, or their Attorneys authorised to received them. Holders of Scrip under blank transfer are reminded to send in their shares for registration in the Books of the Company as soon as possible, but not later than Thursday, the 31st October, 1935.

To facilitate the issue of Dividend Warrants Shareholders are requested to insert share numbers and the nature of the shares held by them in their applications.

The Share Transfer Register of the Company will be closed from Friday, the 1st November, 1935, to Friday, the 15th November, 1935, both days inclusive.

By Order of the Directors,
JARDINE SKINNER & CO.,
Managing Agents.

Calcutta, 16th October, 1935.

recommended 4 rupees final dividend per share making Rs. 8 for the year ended 30th June, 1935.

Hydro-electrics.—This group closed with prices being the highest of the week. Tata Powers improved from Rs. 1,440 to Rs. 1,477-8 and Andhra Valleys from Rs. 1,532-8 to Rs. 1,582-8. Tata Hydros were steady at Rs. 161-4.

Iron and Steels.—This section ruled a little erratic at the beginning of the week ; but to-day on account of good buying the shares have spurted. Tata Ordinaries which touched as low at Rs. 127 and Deferreds at Rs. 440 have closed firm at Rs. 137-12 and Rs. 528-12 respectively. We expect further improvement. Tata Second Preference Shares finding very good enquiry was quoted around at Rs. 150.

Cements.—Cements ruled rather easy on account of the heavy realisation. The latest reports show that the Shahabad will be entering the cement merger as a holding company in order to maintain its individual entity. We, therefore, believe that Shahabads are fully valued at current price and hence recommend the realisation. Indian Cements were marked down from Rs. 465 to Rs. 449-8 ; but closed better at Rs. 455. We strongly favour purchases of Bundi, Katni Deferreds United India and Okha. Bundi was quoted at Rs. 34-12 ; Gwalior at Rs. 111-4 ; Katni Deferred at Rs. 1,960, Ordinary at Rs. 356-4 ; Okha at Rs. 250 ; Punjab at Rs. 23-8 ; Shahabad at Rs. 482-8 and United at Rs. 120-12.

Miscellaneous.—Bombay Burmas improved from Rs. 350 to Rs. 371-4 and Belapur Sugars, on reports of a higher dividend and distribution of bonus shares, are finding good enquiry at Rs. 336-4. Bombay Trams were better at Rs. 145 ; Bombay Telephones were quoted at Rs. 101 ; Burma Petrols at Rs. 3-15-6 ; Scindhias at Rs. 13-3 ; and Bombay Steams at Rs. 288-12.

Banks and Insurance.—Bank shares closed steady. Reserve Bank was quoted at Rs. 120 ; Imperial fully paids at Rs. 1,472-8, partly paids at Rs. 361-4 ; Barodas at Rs. 97 ; Central Banks at Rs. 32-12 ; Bank of Indias at Rs. 120 ; and Unions at Rs. 5-4-6. In the insurance section Orientals were quoted at Rs. 4,150 ; New Indias at Rs. 38-8 and Vulcans at Rs. 7.

MADRAS STOCK EXCHANGE

(*By Wire*)

(From Our Correspondent)

Thursday evening.

Money.—There was abundance of cheap money during the week under review with borrowers to pay a grudging one per cent. 3½ per cent. Government Paper was quiet and opened at Rs. 89-3 and closed buoyant at Rs. 90-2. Medium and long dated issues were more lively with business in 3 per cent. 1941 at Rs. 101-12 ; 3½ per cent. 1947/50 at Rs. 107-6 and in 5 per cent. 1945/55 at Rs. 116-3 ; 4 per cent. 1960/70 rose to Rs. 105-14 with no sellers. Mysore Loans were listless.

Banks.—Reserve Banks opened low at Rs. 116 and experienced a striking rise to Rs. 121 at the close. Indo-Commercials 'B' were done at Rs. 26-12 and Hindustan Banks at Rs. 30-8.

Textiles.—These were lifeless with stray transactions in Cambodias New Ordinary at Rs. 12-6.

Cements.—Sahabads were done at Rs. 482½; Katnis at Rs. 365 and Gwaliors at Rs. 115-4.

Sugars.—Mysore Sugars sagged to Rs. 26-8.

Planting.—Tea and Rubber shares are a neglected counter. Devasholas were absorbed at Rs. 6-12.

Miscellaneous.—British Burma Petroleums were done at Rs. 4-4 and Singarenis at Rs. 6-12. Burma Corporations were brisk at Rs. 8-3.

NEW YORK STOCK EXCHANGE

The tense situation in Europe is checking activity on the Stock Exchange and the market closed irregular.

	$
Western Union Telegraph	58½
United States Steel	44¼
International Nickel	30¾
Sun Life	385
Anaconda Copper	21¼
General Motors	48½
Socony	11¼
Chase Bank	29½
National City	14

LONDON STOCK EXCHANGE

Markets have been dull and business has been on a very restricted scale. Giltedge was uninteresting. 3½ per cent. Stock 1931 was quoted at 92¾, 4½ per cent. 1958/68 at 113¼ and Consols at 82¼, 3½ per cent. Conversion at 103¼, War Loan at 104⅛ and Victory Bonds at 111¾.

Among other sections, Oils were steady. Teas and rubbers were unchanged. Home Rails were featureless. Tins were better. Industries were inactive and rather irregular.

(*Continued from page* 1226)

The working profit of the North Damuda Coal Company for the half-year ended July 1935 is Rs. 19,271 against Rs. 7,748 in the previous half-year and the amount set aside for depreciation is Rs. 8,913 against Rs. 9,477. The dividend is maintained at 5 per cent. per annum and the carry forward is very much higher at Rs. 3,034 against only Rs. 844.

* * *

The profits of the Central India Spinning Weaving and Manufacturing Company are Rs. 6,12,598 against only Rs. 56,135. A sum of Rs. 5,70,000 was transferred from the Equalisation of Dividend Fund to the Profit and Loss Account last year whereas only Rs. 12,000 have been transferred from the same source to the Profit and Loss account. The dividend has been maintained at 8 per cent. and the carry forward is Rs. 2,237 against Rs. 2,639.

STEADY DECLINE IN PRICES

RISE IN BASE METALS.

By R. Gordon Cummings

By Air Mail

Special for **"INDIAN FINANCE"**

London, October 7th, 1935.

The fortnight which has elapsed since my previous notes were written has witnessed several changes of sentiment in stock markets. The Italo-Abyssinian affair has, of course, been the dominating factor, with the result that, with uncertainty continuing, prices in practically all sections steadily declined, and on certain days sharply declined, until Thursday last, when the war officially commenced.

It was not the possibility of a war which was upsetting the Stock Exchange, however, but the continued uncertainty and doubts as to whether Great Britain would be directly involved or not in any international conflict.

Uncertainty Removed.

The first feeling of uncertainty was removed with the commencement of hostilities. The London Stock Exchange, after a week-end in which to think things out, to-day almost whole-heartedly came to the conclusion that Britain will not be directly involved in any fighting. With their usual buoyant optimism members and speculators saw to it that prices were rapidly raised during the day's session, most brokers reporting a very substantial increase in buying orders, some of which were, however, in respect of closing operations on the part of frightened bears.

As I point out later on, in notes written over a week ago, bull factors have been accumulating during the recent uncertain period, with the result that these are now exerting their influence to very good effect. It still remains to be seen, however, whether the rise will continue or even if prices will be held. There is still he final decision of the League of Nations on the question of sanctions to be settled.

Stimulated by the possibility of heavy demands for munitions, base metals have risen sharply during the period in which stock markets were falling. Alongside with the upward movement in base metals other commodities such as cotton, wheat, hemp, etc., have also advanced to record prices for some considerable time. In my opinion many of these commodities and metals are now rapidly reaching the dangerous stage when a sharp set-back can be expected. While some of the buying has been on genuine trade account, a fair proportion has been definitely of a speculative nature: If hostilities suddenly cease, speculators will be falling over each other to close their commitments.

Closing Quotations for Leading Stocks.

Now for a brief resume of the present position in stock markets. The prices given below are, of course, those at the time of writing and it must be remembered that much lower levels have been seen within the last few days.

In the gilt-edged section stocks closed anything up to one point better on Fridays levels, $2\frac{1}{2}$ *per cent. Consols* being $82\frac{3}{4}$, $3\frac{1}{2}$ *per cent. War Loan* $103\frac{3}{4}$, $3\frac{1}{2}$ *per cent. Conversion* $103\frac{1}{4}$, *Local Loans* $91\frac{3}{4}$. Amongst *India Loans* the $3\frac{1}{2}$ per cent. is 93, the $3\frac{1}{2}$ per cent. 1954/59 103, the 3 per cent. 79 and the new 3 per cent., 3 discount.

Home Rails have been particularly weak on the poorer traffics and a revival of fears regarding an early demand by the employees for the restoration of the remaining wages cut. *Great Western* ordinary is 46, *London Midland and Scottish* $17\frac{1}{2}$, *London and North Eastern* second preference $19\frac{1}{2}$ and *Southern* deferred $18\frac{1}{4}$. Under prevailing conditions, *London Transport* C. stock was little affected by the proposed payment of a final divided of $\frac{1}{2}$ per cent., making $3\frac{1}{2}$ per cent. for the year to June 30th 1934, and a similar final payment of $2\frac{1}{2}$ per cent., making 4 per cent., for the year to June last.

Argentine Rail stocks were heavily marked down on the decision of the directors of two of the leading lines to pay only six months' dividends on the preference stocks. At one time prices were quoted with nominal ranges of up to 10 points, but at the close a firmer tendency was in evidence.

Brewery shares have suffered severely from profit-taking, but to-day all the leading shares staged a good recovery. For instance, *Guinness* are 3s. up at 136s. and *Benskins* 2s. better at 74s. while *Watneys* are 71s. 6d. and *Distillers* 91s.

One of the firmest sections has been that for armament shares, in which there has been considerable activity. *Vickers* have been outstanding with a rise to 19s. 6d., while *John Brown* are 19s. 3d., *Hadfields* 19s., *Hawthorne Leslie* 19s. 9d. and *Swan Hunter* 26s. 9d. Iron and Steel shares have also recovered smartly from the worst, *United Steel* closing at 32s. 3d., *Allied Ironfounders* at 37s. 9d., *Baldwins* at 8s. $4\frac{1}{2}$ d., *Dorman Long* at 20s., *Guest Keen* at 33s., *Staveley Iron* at 47s. 9d., *Stewarts & Lloyds* at 32s. 3d. and *Richard Thomas* at 9s.

Aeroplane shares have also been well bought at rising prices. *General Aircraft* have outstandingly risen to 7s. on official confirmation that the company has secured a large contract from the Air Ministry. Elsewhere *Hawkers* are 31s. 9d. and *Fairey Aviation* 27s.

The electrical manufacturing group was stimulated by the announcement that the cable interests of *Telegraph Construction and Maintenance* have been amalgamated with those of *Siemens Brothers. Associated Electrical Industries* are well above the worst at 34s. 3d., also *Electric Construction* at 23s. 6d., *English Electric* preference at 21s. 9d. and *General Electric* at 62s. 6d.

Most of the leading industrials are again on the up-grade after some heavy falls, current leading quotations being:—*Amalgamated Metal* 25s. 3d., *Associated Cement* 57s., *British Aluminium* 41s. 3d., *British Oxygen* 107s., *Eastwoods* 52s. 6d., *Imperial Chemical* 35s., *London Brick* 79s., *Salt Union* 40s. *Tate and Lyle* 79s. 3d., *United Molasses* 18s. 3d. and *Electric & Musical Industries* 25s. 3d. Amongst the textile group *Courtaulds* are 53s. 9d., *British Celanese* second preference 21s., *English Sewing Cotton* 42s. 3d. *Coats* 60s. 3d. and *Patons & Baldwins* 58s. 6d.

Electric supply shares have continued out of favour, but Tobacco shares have kept reasonably firm. *Dunlop Rubber* were adversely affected by the disappointing interim report and are no better than 36s. Motor shares are recovering after early decided weakness. *Ford Motors* are 33s. 6d. and *Standards* 73s. 3d.

Tea shares have naturally been marked down, but investment support is again appearing. Rubbers have continued to fluctuate in sympathy with the commodity, while Oil shares have followed the prevailing trend in other markets.

Confidence in gold shares has been partly restored by some encouraging developments on certain of the newer South African properties. Public interest, however, is still on the small side. Base metals are at last responding to the rising tendency in the metal markets. Rises in share prices are as yet, however, not in due proportion to the higher levels of the various metals. Tin shares are outstandingly cheap. The position is discussed in a subsequent note.

Market Outlook.

[*As these notes were written a week before those preceding it is interesting to note the market reactions that have since taken place.*—EDITOR.]

For several weeks now I have been discussing the technical position and future possibilities of stock markets with direct reference to political developments, but even yet it is too early to come to any definite conclusion as to the future trend. By the time these notes are in print, however, I shall not be surprised to see the Italo-Abyssinian affair settled one way or another, although I must admit that at the time of writing events are such that the outcome of the continued discussions at Geneva may, or may not, lead to war —a war which might have widespread repercussions on countries not now directly involved in this most unsatisfactory argument.

So far as Great Britain is concerned I would once again point out that I do not for one minute think that we will be directly involved in war. This country will, however, suffer temporarily from a war involving other European countries; and for this reason alone stock markets will be subjected to selling pressure. On the other hand, if the League of Nations can successfully counteract the possibility of a war we can look for a sharp upward movement in practically every section of the Stock Exchange. There are plenty of buyers only awaiting the least sign of good news before putting in large purchasing orders, while apart from this reserve of "bullishness," there is also the general public to consider, together with the speculative following always attracted by rising markets.

To sum up, therefore, war will mean a further temporary recession in prices, while the avoidance of an extensive war will lead to a sharp recovery. All the elements of a bull market have been, and still are, accumulating in the encouraging statistics and company announcements, some of which are discussed below.

Rayon and Retail Trade Statistics.

In accordance with my previous prediction, output of artificial silk in the United Kingdom for August was well below production in July. August, however, was a holiday month and if allowance is made for the fact that many factories were working for little more than two weeks, the output of 7,540,000 lbs. was distinctly encouraging. This figure compares with 10,910,000 lbs. in July, but only 5,700,000 lbs. in August, 1934. For the eight months of the current year to end-August, total output of 79,750,000 lbs. is 19,810,000 lbs. higher than the comparable production for the same period of 1934.

I am almost tired of continually recommending purchases of *Courtaulds* ordinary shares. I must, however, in view of the continued improvement in the statistical position of the industry, be excused for persistently advising a purchase of what I consider to be one of the most promising British industrial equities. This company enjoys an impregnable financial position, and with its steadily expanding interest in the staple fibre business, it is succeeding in meeting a reduction in selling prices by steadily raising its volume of sales.

Evidence of a continuing expansion in public spending is clearly demonstrated by the latest statistics of retail sales for the month of August. Compared with August of 1934, turnover increased by 4.7 per cent., while for the period from February 1st to August 31st, the volume of sales rose by 4.9 per cent. Fears of a European war have not so far had any material effect on the nerves of the British public, which continues to spend a steadily increasing sum of money on living and entertainment. Further expasion can be looked for.

During the recent slump the price of *Harrods* £1 ordinary units has been exceptionally well maintained. Strong investment support has been forthcoming on every temporary reaction, buyers fully appreciating the lock-up merits of this stock. The current price of 80s. does not by any means discount prospects for the current year.

United Steel Results.

The full report for the year ended June 30th last of the *United Steel Companies* is now available. Contrary to my most optimistic expectations the profit figures are not so good as I expected. All the same the net balance of £1,115,205 is £167,525 greater than in the year 1933/34. From this amount £275,000 is again placed to depreciation reserve and £220,000, against £150,000, to tax reserve. Including £37,500 (nil) for debenture redemption, other allocations, apart from £100,000 (nil) to general reserve, total £86,000, compared with only £25,000. After providing for the ordinary dividend of 7 per cent., the balance carried forward is raised by £75,268 to £521,305.

In addition to the above mentioned £100,000 allocated from profits a further sum of £200,000, representing an exceptional credit which became available during the year, is added to general reserve making this £300,000. Depreciation reserve now amounts to £1,175,000, or more than one quarter the value of £4,540,316 placed on properties, plant, etc. The balance-sheet reveals a very strong liquid position, cash alone being £1,374,218. It is pointed out that the future annual service on the £2,500,000 4 per cent. debenture stock will be £137,500. During the past years the saving on this account through the consolidation of the loan indebtedness of the subsidiaries was £22,443, but next year it will be over £34,000.

United Steel £1 ordinary shares have been well-maintained on the report at 32s., at which price they yield 4⅜ per cent. On a comparable basis earnings on the ordinary capital were 15.6 per cent. last year, as against 13.2 per cent. in 1933/34, and only 2 per cent. in 1932/33. The shares are still under-valued.

Another encouraging piece of news from the heavy industries is contained in the annual report of *Vulcan Foundry*, one of the best known manufacturers of locomotives and railway rolling stock. Excluding a surplus of £31,877 on sale of investments, net profit is £31,412, as against a loss of £11,296 in the preceding year. The dividend is increased from 2 per cent., tax free, to 2½ per cent., tax free. As earnings were well in excess of this distribution, the low yield on the £1 ordinary shares should be ignored by investors looking for a promising lock-up holding. Current quotation is 17s. 6d.

Tube Investments, which is closely associated with Stewarts and Lloyds, is again paying a cash dividend of 10 per cent., plus a scrip bonus of 10 per cent., while for the first time since the capital reconstruction in 1930, dividends—for six months—are to be paid on the A and B preference shares of *John Brown*, the shipbuilders and engineers.

Type and Motor Manufacturing Progress.

One of the few disappointing items of news has been the interim statement of *Dunlop Rubber Company*. Disappointment did not arise, however, from the fact that no interim is to be paid on the ordinary capital, as in previous years, but from the directors' statement that although volume of business has been fully maintained, the rise in raw materials and the lag in adjustments of selling prices, coupled with unstable conditions abroad, have to some extent adversely affected profits. The £1 ordinary units, which last year received 8 per cent dividend as a final payment, fell 2s. 6d. to 38s. 9d., and still later to 36s.

Knowing as I do the ultra-conservative policy of the Dunlop directors, I do not think that the above statement on current trading conditions is so bad as certain interests would make it out to be. I fully admit that the company has not been able to fully recoup a higher price for rubber and cotton, of which it is a large consumer, by a proportionate increase in selling prices. It must, however, have succeeded in again expanding its turnover, while it should now be replacing its stocks of raw materials at a lower price than a year ago. There is scope for recovery around 45s. in the £1 ordinary units.

On the other side of the picture *India Rubber Gutta Percha and Telegraph Works* is resuming dividends on the ordinary and preferred ordinary shares with payments of 6 per cent. The previous ordinary dividend was 2½ per cent. in respect of 1929, but since then the capital has been drastically reorganised and the company taken under the control of British Tyre and Rubber.

Austin Motor Dividend.

Although eminently satisfactory in itself, the market was disappointed with the *Austin Motor* dividend, which for the year to July 31st last is 25 per cent., plus a cash bonus of 25 per cent. This goes against 25 per cent. dividend and 75 per cent. cash bonus in 1934. In the interim, however, the capital has been quadrupled by last year's 300 per cent scrip bonus. Even the least optimistic pundits were looking for a minimum of 65 per cent. dividend, while many were expecting anything between 75 per cent. and 100 per cent. The report discloses that despite increases of 23 per cent. in home and 30 per cent. in export sales, trading profits have fallen by £36,000 to £1,469,144 and net profits by £37,357 to £623,923.

I have often pointed out that Austin 5s. ordinary and A ordinary shares are speculative. The latest figures confirm my view, while the market has vented its displeasure by marking the ordinary to 42s. 6d. and A ordinary to 40s., both ex dividend.

Remarkable recovery has taken place in the profits of the *Rover Company*, another popular firm of motor manufacturers. Gross profits for the 12 months to August 3rd last rose by £80,802 to £214,740. After providing over £20,000 more for depreciation and writing off £1,093 capital increase expenses, the net profit of £152,910, together with £49,228 from plant and tools reserve no longer required serves to eliminate the debit balance of £177,073 brought in, and to leave a credit of £20,065 to carry forward after putting £5,000 to development reserve. Although no dividend is to be paid on the £520,000 ordinary capital, the way is now clear for resumption of distributions at an early date. The 8s. shares are an interesting speculation if obtainable at 17s.

Rolls-Royce is maintaining the interim dividend at 5 per cent. on the ordinary stock. *Joseph Lucas,* manufacturers of motor and cycle lamps, etc., is closely identified with the motor trade. For the past year the final dividend is again being maintained at 10 per cent., making, with the 2½ per cent. interim 12½ per cent. in all. Profits have risen by £6,286 to the new high record of £263,668.

E. M. I. Profit increase.

Preliminary figures of *Electric and Musical Industries*, the big gramophone and radio manufacturing combine, whose future possibilities I dealt with some weeks ago, disclose net profits of £451,002, compared with £420,710 in the previous year. A sum of £114,544 is, however, added this time from profits on sale of investments, making a total of £565,546. Including a 2½ per cent. bonus, the distribution on the 10s. ordinary shares is to be 12½ per cent., compared with only 10 per cent. Owing to prevailing market conditions the shares failed to benefit from these encouraging figures and have actually fallen to 25s. 3d. ex div. Recovery will be quick and substantial when it takes place.

Other items of news relating to industrial companies are, apart from that of *British Aluminium,* which, contrary to many expectations, is not paying any interim on the ordinary capital, of an encouraging nature.

Murex, which owns and operates patent rights for ore concentration and separation, is distributing a 2½ per cent. scrip bonus in addition to making up the ordinary dividend to 20 per cent. by a final of 10 per cent. For the previous year 35 per cent. was paid, together with a 100 per cent. capital bonus. The £1 ordinary shares stand at 126s. 3d.

Barry and Staines Linoleum is raising the interim dividend by 1 per cent. to 5 per cent., *Smiths Potato Crisps* is increasing the interim by 2½ per cent. to 7½ per cent., while *J. & J. Colman,* the mustard, starch, etc., manufacturers, is distributing a 5 per cent. interim on account of the first year as a public company. These are the most important of the interim dividend announcements of the week.

Financial News Profit increase.

Readers will no doubt remember that I drew attention some months ago to the rapid increase which was taking place in financial advertising following more prosperous times and the broadening of interest and business in the new issue market. Apart from financial companies directly connected with the capital market, I pointed out that such concerns as the *Financial News* and *Financial Times* were carrying more and more columns of advertising matter.

In their report for the twelve months to June 30th last the directors of *The Financial News* state that circulation and advertising revenues of all the papers owned by the company have steadily increased. Net profits are £40,660, compared with only £16,508 a year ago. After a lapse of several years, 10 per cent. is to be paid on the ordinary capital, but even after allowing for this distribution and preference dividends, the amount of £50,118 to be carried forward is £22,242 more than the balance brought in. Allowing for the fact that £52,492 of the ordinary capital ranks for only half the year's dividend, earnings are the equivalent of 46.4 per cent. The balance-sheet has been considerably strengthend by the repayment of a secured loan of £50,000. The liquid position is now very good.

Apart from the *Financial News* this company controls the *Investors' Chronicle* and the *Banker,* while it holds a big interest in the Economist. I fully expect that the chairman will have some encouraging statements to make at the annual meeting. On the latest balance-sheet the 2s. ordinary shares look under-valued at 4s. 3d. Next year I expect a dividend of at least 15 per cent., providing of course, that there is no set-back in advertising revenue.

Rubber Quota Reduced.

Contrary to the opinion of many market experts I have been consistently bullish of rubber shares. At this stage I must admit however, that my faith in the ultimate recovery of the rubber industry has not been reflected in market quotations. Rather the reverse, the continued and steady decline in the price of the commodity having had a correspondingly depressing effect on share values.

It is not to be wondered at, therefore, that I was very pleased to learn that the International Rubber Regulation Committee had decided to reduce the export quota from 65 per cent. to 60 per cent. as from October 1st until the end of this year. The immediate reaction was a sharp jump of 3/8d. to 5⅞d. per lb. in the price of the commodity, which, however, has subsequently settled down to a price of around 5¾d. From this level slow but steady recovery can be looked for.

The reduction in the quota was welcomed in Mincing Lane, which interprets the action of the Committee as a sign of strength, particularly as in certain quarters it was feared that it would not be strong enough to enforce another cut before next year. Of more importance, however, to my way of thinking, is the fact that the reduction would not have been made had those in authority not been confident that it would be possible in the near future to effectively control exports of native rubber from the Dutch East Indies. These exports have been of the greatest bugbears to the effective working of Restriction. Instead of decreasing they have been steadily increasing, and it looked at one time as though the Dutch Government would be powerless to take the matter in hand. It is now evident that uncontrolled output from this source will be effectively curtailed.

I am reasonably confident that the Restriction Scheme will now commence to function in a proper manner. Stocks of rubber should now tend to fall to an economic level. Rubber shares have naturally responded to the better outlook, but despite the present moderate recovery they still provide a promising field for investors in a position to put shares away for another twelve months.

Tin and Copper Pointers.

I have also consistently supported the view that tin shares were very much under-valued on early prospects, although at times I have been almost alone in voicing my faith in the ultimate recovery of this industry. Latest statistics disclose that world consumption of tin during the seven months ended July rose by 15.7 per cent. to 79,620 tons. Consumption throughout the world is still on the increase with the result, that despite the recent raising of the output quota from 60 per cent. to 65 per cent., it has now been necessary to make a further increase to 70 per cent. with retrospective effect to July 1st. As stocks of tin have fallen to less than one months' consumption and as trade demand is still rising this action on the part of the Committee was vitally necessary if a serious position in the metal market was to be avoided. The effect of the increased quota will be to raise supplies by about 4,500 tons between now and end December.

I have no doubt that investors will soon be forced to take an interest in tin shares. As soon as moderate buying develops we shall see some very sharp increases in values. Purchases should not be delayed.

Consumption of copper is still on the up-grade. A large part of the present world production is now voluntarily controlled, with the result that the price of the metal should be maintained at an economic level.

One of the most promising fields of investment is provided by the Rhodesian companies. Judging by the decision of the directors of the biggest producing concern, the *Rhokana Corporation,* to pay a maiden dividend of 12½ per cent., it is clear that those in authority view the outlook with confidence. I am perfectly certain that profits of this Corporation for the year ended June 30th last will disclose a big surplus over and above the amount required for the dividend. Furthermore, *Roan Antelope,* another of the big producers, has entered the dividend list with a distribution of 1s. on each 5s. share, which can now be bought at 28s. 3d.

Market Pointers.

Despite the issue of 50,000 new ordinary shares in March last, *General Accident Fire and Life Assurance Corporation* is paying 7s. per share interim dividend, as against 6s. last year. The £5 ordinary shares are 25s. paid up. Current price is £22¾.

An interim dividend, the first for many years, is to be paid on the participating preference shares of *Handley Page,* the aeroplane manufacturers. The distribution is 5 per cent. actual.

Last week I indicated that the *Alvis Car Company* would shortly enter into a manufacturing agreement with a leading aeroplane engine company. I now learn that the licence will be granted by the French company manufacturing the famous Gnome aero engines.

For the first time since 1929, *Hoffmann Manufacturing Company* is paying an interim dividend—of 4 per cent. This company, which manufactures ball and roller bearings, paid 10 per cent. for the whole of last year.

O. K. Bazaars (1929), the South African chain-store business, is paying a 50 per cent. dividend on the old ordinary capital. The 5s. A. ordinary shares are in active demand at 34s. 6d., compared with a price of around 22s. 6d. some months ago when I drew attention to the possibilities of the company.

The report of *Trinidad Leaseholds* for the year to June 30th last shows a big increase in profits. The dividend is raised by 5 per cent. to 17½ per cent. Since this British oil company commenced distributing its own brand of petrol throughout the United Kingdom it has returned very good results. The £1 shares can be bought at 66s. 6d.

ANGLO-INDIA JUTE MILLS CO., LTD.

NOTICE

Notice is hereby given that the Share Transfer Books of the Company will be closed from 24th October to 4th November 1935, both days inclusive.

By order of the Board of Directors,
DUNCAN BROTHERS & CO., LTD.,
Managing Agents.

101, Clive Street,
Calcutta, 14th October, 1935.

CORPORATION OF CALCUTTA

NOTIFICATION

Repayment of 4 per cent. Calcutta Municipal Debenture Loan of 1905-06

The 4 per cent. Calcutta Municipal Debenture Loan of 1st January 1906, for Rs. 15,00,000 is repayable on the 1st January, 1936, from which date all interest on it will cease. Holders of Debentures of this loan should tender their Debentures at the Local Authorities Loan Section, Imperial Bank of India, Calcutta, at least three weeks before the due date of repayment with the following endorsement on the back of each Debenture:—

> *"Received payment in full of all demand for principal and interest hereon."*
>
> ....
> *Signature of Holder.*

BHASKAR MUKERJI,
B.A. (Cantab.), B.Sc. (Cal.),
Offg. Secretary to the Corporation.

The 1st October, 1935.

WALL STREET IN AIR MAIL WEEK

EUROPEAN SITUATION DOMINATES MARKETS

GOOD BUSINESS NEWS IGNORED

By F. Rocke.

By Air Mail

Special for "INDIAN FINANCE"

Wall Street was entirely dominated by the European situation and activity as a consequence was on a very small scale. The rise in steel mill activity, and better business news were of no avail though they temporarily sustained the markets. There was a wave of heavy selling on Wednesday on alarmist reports from the continent and prices were down by two to three points. The New York Railroad controversy slumped the market further. But the closing was better and there was some recovery noticeable. The declaration of a dividend of 20 c. by Columbia Gas was welcome and quite unexpected.

On the Bond market, Treasury Bonds slacked and Italians were lower.

The Treasury will offer next week $100,000,000. short term discount bills instead of the usual $50,000,000. If this policy is continued no new long term financing will be necessary until December 18, when $418,000,000 2½ per cent. Notes mature.

Rails were weak on account of heavy selling pressure from London. The New York Railroad controversy between the bankers and R.F.C. was mainly responsible for this.

The strike in the soft coal industry has been settled.

Oils were better at the beginning. But later developments threaten oil prices. The independant Californian producers agreed to keep the state output within 531,000 barrels daily by voluntary co-operation but later the Curtailment Committee gave out that the quota was raised to 590,000 barrels daily. The Texas Railroad Commission has abandoned its plan for a complete East Texas shut down to test the capacity of the field and will close 100 wells for this purpose.

The same body is trying to offset the "hot-oil" flow by a further reduction in the legal "allowable." The October allowable has been fixed at 1,011,090 barrels daily, a reduction of 33,233 from the current level and 14,410 below the Bureau of Mines' recommendation.

Directors of important utility companies have been called to confer with the S. E. C. in the discussion of the registration of utility companies under the new law.

The Standard Gas and Electric Company has filed a petition in the Federal Court at Wilmington (Delawere) for reorganisation under the National Bankruptcy Act owing to financial difficulties chiefly centering on $24,000,000 of obligations due on October 1.

Apparently with the intention of connecting separate parts of its system Associated Gas Electric has purchased from the Chase National Bank utility companies in Virginia and Maryland. These had fallen into the Bank's hands when they foreclosed on loans.

The Columbia Gas and Electric dividend of 20 c. was wholly unexpected.

According to the *Iron Age* steel mill activity during the past week was at 52.5 per cent. of capacity against 51.5 per cent. the previous week. The rise has been consistent over the last two weeks and is expected to be maintained for sometime to come in view of the increase in automobile demand.

Various rumours are current regarding the United Steel Corporation's capital plans.

They arise from the fact that the company is to spend $140,000,000 on re-equipment and expansion in the near future and from the strong feeling among the preferred stock holders that this should not be financed by delaying the resumption of full Preferred dividend payments and funding arrears which will total $16.25 per share on December 31.

The Corporation is pushing forward its plans to cut its costs by merging its subsidiaries.

The automobile industry is busy with the production of new models.

Automobile production in August totalled 182,390 passenger cars and 57,600 trucks, against 276,080 and 60,970 respectively in July.

Business Pointers.

Freight Car loadings in the week ended September 21, totalled 707,600 cars on increase of 7,200 over the previous week and 64,500 over the corresponding period last year.

Pig Iron production in September totalled 1,773,000 tons against 1,761,000 tons in August.

Power output in the past week totalled 1,857,470,000 Kilowatt hours, an increase of 12.6 per cent. over the corresponding period last year.

Bank clearings in the week ended October 2, totalled $6,401,820,000 an increase of 37.1 per cent. over the corresponding week of 1934.

Brokers' Loans increased $23,000,000 to $879,000,000 in the week ended October 2.

October 4, 1935.

BENGAL TELEPHONE CORPORATION, LTD.

NOTICE

The Thirteenth Annual General Meeting of the Shareholders of the above Company will be held at the Registered Office of the Company, No. 8, Hare Street, Calcutta, at 3-30 p.m., on Monday, the 28th October, 1935, to receive the Directors' Report, pass the Audited Accounts for the year ending 30th June, 1935, declare a dividend, and transact any other business that may be brought before the Meeting.

The Share Transfer Books of the Company will be closed from the 14th to the 28th October, both days inclusive, and Warrants for such dividend, as may be declared, will be issued on application to those Ordinary Shareholders whose names stand in the Register Books of the Company on the 28th October, 1935.

By order of the Board,
W. H. THOMPSON,
General Manager.

8, Hare Street,
Calcutta, 30th September, 1935.

BOURSES IN AIR MAIL WEEK

Paris.

The Bourse continued to be dominated by the political situation in Europe during the fortnight under review. The more hopeful turn of events in Geneva gave some stimulus to the market at the beginning and there was a slight improvement noticeable in prices. Rentes were among the first to improve. Banks were slightly better and Internationals were higher than last levels though barely steady.

But later, on the news of outbreak of hostilities the general tendency was towards levels. Rentes and Banks were not very much affected. But Internationals were considerably lower, Suez Canals in particular. The effect of war news was less dractic than in other centres owing to the fact that they had been considerably discounted earlier.

On the Conlisse, Diamond Shares were somewhat easier and shares in the Gold Mining Group were irregular though no great changes were noted in either direction. At close the tendency was towards lower levels.

		Sep. 20	Sep. 26	Oct. 3

Berlin.

Weakness prevailed on the Bourse at the beginning of the fortnight under review, but there was an alround improvement later on. But prices once again sagged on account of selling pressure. The closing, however, was better with some rises.

COMPANY REPORTS

BENGAL TELEPHONE CORPORATION, LTD.

The Directors beg to submit to the Shareholders a Statement of Accounts for the year ending 30th June, 1935.

After appropriating Rs. 9,61,276-0-0 to Depreciation, the Profit and Loss Account shows a profit for

	Rs.	A.	P.
the year of ...	10,42,638	14	6
From which is deducted the dividend on Preference Shares for the half-year ending 31st December, 1934, paid at that time ...	1,05,000	0	0
and the dividend on these shares for the half-year ending 30th June, 1935, payment of which has already been authorised by the Directors ...	1,05,000	0	0
	2,10,000	0	0
Leaving	8,32,638	14	6
To which has to be added the amount carried forward from the last Account ...	2,17,621	1	10
Making a total available for distribution of	10,50,260	0	4

In the circumstances and in view of the fact that at the moment the prospects of business in Calcutta generally are by no means bright the Directors propose a dividend of 8 per cent. free of tax for the Ordinary Shares, which is at the same rate as the dividend for last year.

	Rs.	A.	P.
This will absorb	7,21,276	0	0
Leaving an amount to be carried forward of	3,28,984	0	4

Directors:—H. F. Bensly, G. R. Campbell, Narendra Nath Law, W. M. Craddock J. A. McKerrow, K. L. Jatia and W. H. Thompson.

THE HARDWAR-DEHRA BRANCH RLY. CO. LTD.

Accounts.—The Directors beg to submit the Audited Accounts of the Company for the year ended 31st March, 1935.

Capital.—The total paid-up capital of the Company on 31st March, 1935, was Rs. 31,50,000. The Capital Expenditure for the year amounted to Rs. 38,580-12-6, making the total expenditure from the commencement of the operations to 31st March, 1935, Rs. 35,20,591-1-5.

Net Revenue.—The net earnings received by the East Indian Railway for the year amounted to Rs. 3,84,302-8-2, as compared with Rs. 3,92,172-1-6 for the year ended 31st March, 1934.

In the last Report reference was made to an Income Tax matter which was outstanding. The Authorities claimed Tax on the share of the Surplus Profits which is retained by Government through the East India Railway, the Working Agents. The amount involved in conection with the Fiscal Year 1933/34 was debited in the Company's accounts for the year. The Directors have since been successful in getting this decision reversed, on appeal, with the result that the amount of Tax paid for the Fiscal Year 1934/35, and debited in these accounts, is considerably less than that which was paid for 1933/34. Therefore, in spite of a decrease of Rs. 7,870 in the nett earnings of the Company, the nett Profits for the year under review were higher at Rs. 96,356/-, as compared with Rs. 83,498/- for the year 1933/34.

Since the close of the Financial Year the directors have also been successful in collecting from the Income Tax Authorities a refund of Rs. 32,648-2-0 due in respect of the excess payment for the Fiscal Year 1933/34, and this amount will be taken into the Accounts for 1935/36.

The Company's Share of Surplus Profits amounts to Rs. 1,39,698-0-4, as compared with Rs. 1,43,998-8-0 in the previous year.

Profit and Loss.—The amount available for distribution at 31st March, 1935 including the amount brought forward, is Rs. 1,14,068-8-3 as compared with Rs. 112,212-6-4 at 31st March, 1934. Out of this they propose to pay a dividend of Rs. 3/- per share (less Income Tax), making a total distribution of 6 per cent. for the year. This distribution will absorb Rs. 94,500/- and leave, after payment of Managing Agent's Commission, Rs. 10,118-8-3 to be carried forward, as compared with Rs. 8,262-6-4 brought into the year's Accounts.

Managing Agents.—Gillanders Arbuthnot & Co.

THE CENTRAL INDIA SPINNING, WEAVING & MANUFACTURING COMPANY, LIMITED.

The Directors beg to submit the Audited Statements of Accounts for the year ended 30th June, 1935.

Profit for the year is ...		Rs. 6,12,598	9	11
Add—Balance brought forward from the accounts of the previous year ...		Rs. 2,638	12	4
making a total of ...		Rs. 6,15,237	6	3
Less—Amount paid as an Ad-Interim Dividend, Free of Income-tax, for the half-year ended 31st December, 1934:—				
On Preference Shares at Rs. 12-8 per Share ...	Rs. 1,25,000			
On Ordinary Shares at Rs. 4 per share ...	Rs. 1,87,500			
		Rs. 3,12,500	0	0
Leaving a balance of		Rs. 3,02,737	6	3
The Directors have carried from the Equalisation of Dividend Fund to Profit and Loss Account the sum of		Rs. 12,000	0	0
Which when added to the above balance will make		Rs. 3,14,737	6	3

Of this sum they recommend the following distribution:—

Payment of Dividend, Free of Income-Tax, for the half year ended 30th June, 1935:—				
On Preference Shares at Rs. 12-8 per share ...	Rs. 1,25,000			
On Ordinary Shares at Rs. 4 per Share ...	Rs. 1,87,500			
		Rs. 3,12,500	0	0
Balance to be carried forward ...		Rs. 2,237	6	3
		Rs. 3,14,737	6	3

The Directors wish to point out that the figure of Profits shown above is subject to Depreciation which amount now comes to nearly Rs. 5 lacs per annum. Owing to the fall in the earnings of the Company they have not been able to set aside from profits any sum for the past five years to Depreciation Fund although last year a sum of Rs. 15 lacs was transferred to this fund from the Insurance Fund.

Although during the year there was a good demand both for yarn and cloth manufactured by the Company, the demand for coth considerably slackened off during the last two months May and June 1935 owing to the general depression in the textile, trade, which also had an adverse effect on prices realised.

During the year the Directors also sanctioned the purchase of 2 Slasher Sizing Machines costing Rs. 14,846.

In the last year's report the Shareholders were informed about the reduction in the rate of interest on the debentures of the Tata Mills, Ld. Subsequently, a Scheme of Arrangement was proposed by the Tata Mills, which, among other things, provided for payment of interest on the debentures out of profits, the interest being made cumulative, and the extension of the date of redemption from 1st April 1937 to 31st December, 1940. The Debentureholders, at their meeting held on 28th December, 1934, accepted the Scheme of Arrrangement. On a very careful consideration of all the circumstances the Directors were convinced that it was in the interests of the Company to support the proposal of the Tata Mills, and they, accordingly, agreed to the scheme.

Tata Sons Ltd.,—*Managing Agents.*
N. B. Sakalatvala—*Chairman.*

Synopsis of the balance sheet:

	Year ended 30-6-1935 Rs.

THE KHATAU MAKANJI SPINNING & WEAVING COMPANY, LIMITED.

The Directors beg to submit their Annual Report and Audited Balance Sheet and Profit and Loss Account for the year ended 30th June, 1935, showing a profit of Rs. 4,48,690-8-9 from which has to be deducted the preceding year's debit balance of Rs. 1,33,158-10-3 leaving a surplus of Rs. 3,15,531-14-6 which has been transferred to Machinery Depreciation Fund.

As the Directors are aware, last year the Managing Agents gave up claims against the Company amounting in all to Rs. 6,06,493-2-8. This year they have again agreed to forego Rs. 47,569-0-9 out of the total commission of Rs. 62,569-0-9 which became payable to them. Mr. Tulsidas Gordhandas Khatau gave up Rs. 12,374-0-0 out of Rs. 27,374 payable to him and the sons of the late Mr. Mulraj Khatua gave up Rs. 35,195-0-9 being the entire sum payable to them. It must be a matter of no small gratification to the Shareholders that the Company is being served by Agents who have given such repeated proofs of their self-sacrifice. The necessity for this Company to renovate its machinery and reduce its borrowings is clear and every rupee saved now for either of these purposes will prove in course of time of considerable value.

During the year under report orders have been placed for new machinery of the total value of Rs. 3,95,466-0-0. It has been further decided to equip the whole of the Mill with electrical drive and for the supply of energy an agreement has been entered into with The Tata Power Co., Ltd.

Chairman.—Sir Purshotamdas Thakurdas.

Director.—Sir Purshotamdas Thakurdas, Morarji Mulraj Khatau, Tulsidas Gordhandas, Sir Jehangir B. Bomon-Behram, F. E. Dinshaw and Dharamsey M. Khatua.

THE BASTI SUGAR MILLS CO., LTD.

Directors' Report for the year ending 30th April 1935.

	Rs. A. P.
From the Balance Sheet it would appear that the net profits for the year ending 30th April, 1935, after paying Rs. 2,36,937-9-0, on account of Income-tax and Rs. 2,78,374-0-6, on account of Excise duty from the profits of the year and the amount carried forward in the last Balance Sheet comes to	2,77,022 14 7
The Directors recommend the appropriation thereof as follows:—	
To dividend at 15 per cent. annum on the paid up capital of Rs. 11,99,600	1,79,940 0 0
Charity Fund	4,082 14 7
To be carried forward	93,000 0 0

It will be noticed that the **profit** this year has been comparatively small. There have been four reasons for this. The first, of course, is the heavy excise duty which has taken away Rs. 2,78,374-0-6. Secondly, the cane crop was too short owing to lack of rains at the proper time which badly cut short the crushing season with the result that the quantity of cane crushed was much smaller than last year. Shortage of cane began to be felt even in the month of January and continued right to the end of the crushing season. Thirdly, owing to the short supply higher prices had to be paid for cane. Fourthly, the supply of cane being short in the months of February and March when the extraction is at its highest the average percentage of recovery was materially affected.

The working of the Mills was, however, excellent as in spite of all these circumstances the recovery has been highly satisfactory and the Directors expect that if the crop does not fall below the normal the Mills will continue to show good results.

Directors.—S. R. Laul, Dev Raj Narang, and Shiv Datt.

Calcutta, Thursday Evening.

Monetary conditions in Hornby Road and Clive Street have remained unchanged, though it must be added that, towards the finish, a slightly—very slight, indeed—steadier feeling was noticed in Calcutta. Throughout the week, the quotable rate in this centre was ½ per cent., lenders over; there were a few borrowers on the closing day. For the shade firmer feeling in the money market, no special explanation is called for. It may be for no other reason than that one or two banks might have had some special demand for short credits. It must also be remembered that the accepted applications on the sterling tender day in the current week came to the full amount of £1 million. This means that there will be a considerable inflow of funds into the market against its sales of sterling. We should, therefore, think that the slight demand that was noticeable on Thursday could not be construed as an indication of impending hardening of rates. It is, however, necessary to consider, in this connection, the position as regards Treasury Bills sales and Maturities in the next few weeks. There are no Treasury Bills Maturities right up to the beginning of December. On the other hand, the current omens seem to suggest that the weekly auctions will be kept at the figure of Rs. 2 crores. Inclusive of the 2 crores sold last Tuesday, the total of the flating debt is now Rs. 29½ crores. On the assumption that the offer every Tuesday is to be Rs. 2 crores, the total Treasury Bills outstandings might come to be in the neighbourhood of Rs. 40 crores by the end of November. This will be fully Rs. 20 crores in excess of the limit suggested the ways and means estimates at the time of the budget.

As we explained in an earlier issue, it is quite a normal feature for Treasury Bills to be on the large side in the third quarter of the financial year; the heavier revenue collections of the final quarter would enable the Treasury to liquidate a good portion of the floating debt in January-March. While we are ourselves responsible for this explanation and understand its full force and significance, we must say that it is certainly unusual for the floating debt at any one period being double of the total assumed in the budget estimates. We are quite prepared to understand that, in the third quarter of the fiscal year, Treasury Bills outstandings might have to be anything like Rs. 30 crores. But the increase of the floating debt to Rs. 40 crores is certainly at variance with the plans which were formulated in the budget speech of the Finance Member.

We may now consider whether this increase in the floating debt to Rs. 40 crores will mean a tighter money market in the latter half of November. In answering this question, we have to take into account one or two important factors. Throughout the period during which Treasury Bills were sold at the tap rate, the Treasury was securing an extremely favourable rate for itself. Since then, however, there has been a pronounced tendency for a somewhat sharp rise in the average discount rate. On October 8, the average rate of accepted tenders was As. 12-6. On October 15, the rate was As. 15-9. The rate in the current week was Rs. 1-2-3. It is true that while the Government secured, in the earlier period, anything like Rs. 20 crores, the rate was below 12 annas per cent. But this favourable rate was more a matter of luck on the part of the Government than an index of intrinsic conditions in banking circles. We are not sorry that there has been some hardening in the discount rate. If the rate is made too low, banks in general cease to take any great interest in Treasury Bills. Treasury Bills sales become transactions between special quarters. It is of the greatest importance that there must be general participation of banks in Treasury Bills. Towards this end, a rate roundabout one per cent. seems to be the correct level. At the kind of rate that was forthcoming in this week's auction, it is possible to expect exchange banks finding it remunerative to bring funds from London and utilising them in Treasury Bills. If our line of reasoning be correct, it follows that with the continuance of the average discount rate roundabout the present level, London may well seek investment in India's three months bills. Further, the uncertainty, which prevailed in London market a few days ago because of the political developments, is gradually wearing off. Banks in India will now be able to get from their Home Offices a better rate for borrowed funds than they were able to a fortnight ago. Of the future sales of Treasury Bills, a good proportion is likely to represent funds brought in by exchange banks from London. If developments should prove to be on these lines, the increase in the floating debt to Rs. 40 crores must not make much difference to the money market conditions.

Above all, it is necessary to remember that there is as yet no sign of any trade demand. Nor are there indications that there will be any early demand for finance on account of trade. The consolidated statement for the position of Scheduled Banks as on July 5 showed total Advances in India at Rs. 102.85 crores. The latest return, which is for the close of business as on October 18, shows advances at Rs. 84.22 crores. There has, therefore, been a drop of Rs. 18½ crores in the Advances made by banks in India. It is also significant that the Demand liabilities of banks have risen from Rs. 109.81 crores on July 5 to Rs. 122.50 crores on October 18. While the demand for money has thus gone down considerably, the deposits with banks have also increased considerably. In these conditions, there is no reason to expect that the anticipated increase in the total of the floating debt will mean dearer money rates.

The statements of the Reserve Bank for the week ended October 18 hardly call for any comment. Rupee Coin has again shown an increase and it is now Rs. 58.35 crores. Total notes issued are again higher at Rs. 194.84 crores. But we need only add again that the increase in total notes is more or less due to the return of silver coin from circulation. The statement for the Banking Department shows a fall in Government Deposits from Rs. 10.92 crores to Rs. 8.16 crores and in foreign balances from Rs. 12.65 crores to Rs. 9.21 crores. This coincidence in the fall in Government Deposits with a fall in foreign balances seems to indicate that the Secretary of State should have withdrawn a considerable amount of money last week. The Imperial Bank's statement shows a further rise in Investments from Rs. 45.60 crores to Rs. 46.78 crores. This is, doubtless, due to further purchases of Treasury Bills. The cash balance of the Imperial Bank has gone down to Rs. 18.93 crores against Rs. 19.66 crores in the previous week. On September 6, the cash balance was Rs. 26.11 crores.

Conditions in the exchange market have been idle. On account of the ramp in the bullion market earlier in the week, there was a fair amount of remittance enquiry. But, otherwise, there has been very little business. On the weekly sterling tender day, applications for £1,255,000 at 1s. 6 1/8., were received and allotted approximately 80 per cent.

The closing rates are: 1s. 6 3/32d., T. T. all through.

Bills may be quoted: 1s. 6 7/32d., all through.

Money was easy. The rate for interbank call money was ¼ per cent. in Bombay and ½ per cent. in Calcutta. In the early days of the week there were lenders over at this rate. On Thursday there were a few borrowers in Calcutta.

Firms' money for call, three days' notice, seven days' notice and onemonth twomonth and threemonth deposits ¾ per cent.; fourmonths 1 per cent.; and twelvemonths 2 per cent.

*=Unquoted.

International exchanges continue to be in a kind of supended animation. They seem to mark time. They are not sure what the morning's news will bring. Operators are chary of undertaking large or long-term commitments. Gamblers might, perhaps wish to do something dramatic on the principle that the sunshine time for making hay does not last long. But the gamblers find themselves pitted against equally adroit manipulations carried on by the so-called exchange equalisation accounts. The operations of this kind of control are a new tenchnique. But it must be said to the credit of the authorities that they have mastered the new technique in a comparatively short time and with comparatively great ease. There is, on this side of the Pacific, the British Exchange Equalisation Account which has been, in its control, developing greater nimbleness, surer effectiveness and deadlier timeliness. On the other side of the Pacific, the American authorities have been operating their control with no less accuracy of aim and certainty of results. That the financial organisations of the two countries have so readily lent themselves to the fashioning and perfecting of a technique so delicate and so complicated as exchange control, speaks volumes for the skill and tact of those to whom this important task has been entrusted.

It may be said, in general terms, that the aim of the American control has been to prevent the dollar from recording any undue appreciation; and that the British control has been concerning itself with regulating the movements of sterling. The dollar is definitely undervalued; the American authorities have endeavoured, might and main, to keep it undervalued. Sterling is definitely overvalued; but the British authorities have taken no steps to find out what exactly is the correct valuation basis for sterling. They have been content with preventing extravagant gyrations in the value of sterling in terms of the other currencies. If the influences at work in any period tend to depress sterling, all that the control has done is to prevent a precipitate fall of sterling. Conversely, if the dominant forces at any moment are calculated to push up sterling, the British control have endeavoured to regulate the pace of the rise.

From the point of view of the individual objectives of the countries concerned, the methods adopted and the results achieved by the countries must be considered satisfactory.

But Mr. J. M. Keynes, in the course of an article which appears in the *Lloyds Bank Monthly* in the Air Mal week, offers vigorous but pertinent criticism as regards the undue mystery and mystification which surrounds the doings and goings-on of the exchange equalisation account. The latest report of the International Bank for Settlements has also some hard things to say about the veil of secrecy that shrouds the operations of British Exchange Equalisation Account. If most of the leading countries of the world were to conceal their movements of gold and of currencies through the setting up of exchange equalisation accounts, what will become of international statistics as regards gold and currencies; this is the main question which Mr. Keynes poses.

Moreover, all this secrecy about British Exchange Control lends colour to the suspicion that England is operating this Account to selfish ends and against the interest of other countries. Why should the United Kingdom give rise to this unjustified suspicion? The time has arrived when the British monetary authorities would do well to consider how far and in what manner the operations of the Exchange Equalisation Fund could be made known to the public.

TREASURY BILLS

Tenders for Rs. 2 crores of 3 months' Treasury Bills were opened on Tuesday, October 22. The total amount offered was Rs. 2,96,25,000. Tenders at Rs. 99-11-3 per cent. and above were accepted in full and those at Rs. 99-11-0 per cent. allotted approximately 53 per cent. The total amount accepted was Rs. 2 crores, the average rate of accepted tenders being Rs. 1-2-3 per cent. per annum.

Tenders for Rs. 2 crores of 3 months' Treasury Bills will be received on Tuesday October 29. Successful tenderers should make payment on Friday November 1. Other conditions are as usual.

STERLING TENDERS

On Wednesday, October 23 tenders to the amount of £1,255,000 at 1-6⅛d. were received and were allotted approximately 80 per cent. Lower tenders were rejected.

£1 million will be offered on Wednesday October 30. Successful tenderers will have to take delivery of the allotments on Friday November 1.

The total amount of sterling purchased by the Reserve Bank of India during the week ended October 18 was £345,000 at 1-6⅛d.

OUR BALANCE SHEETS TELL THE TALE

Founded in the wake of Swadeshism, the "NATIONAL" of Calcutta has grown from strength to strength with the result that it is to-day one of the leading Life Offices of the East. During nearly thirty years of buisness-building it has been able to accumulate assets worth more than Rs. 2,50,00,000 despite the fact that within so short a period a sum exceeding Rs. 1,30,00,000 has been paid away by way of Claims to the Policyholders and their beneficiaries. These are facts which merit the earnest consideration of those who do not want to gamble with the savings of a life-time. Why not yours?

You have only to let us know your requirement and leave the rest to us.

RESERVE BANK LOCAL BOARDS

The elections for the Local Boards of the Reserve Bank will take place on November 12; and the nominations of candidates were completed early this week. The list of candidates, whose nominations have been found to be valid, is now available for three areas, namely, Calcutta, Madras and Bombay. In the case of Calcutta, prominent amongst the candidates are Sir David Ezra, Mr. Brij Mohan Birla, and Mr. Durga Prasad Khaitan. That these three members will be elected by a substantial majority, may be taken as certain. Another candidate, Mr. Jain from Arrah, is said to have secured a large number of proxies in his favour; it is quite likely that he, too, succeeds in the election. This will leave one seat—and only one seat—for the Bengalee community. Amongst the Bengalees who have stood for election, there is a conspicuous absence of any representative from commerce or industry, save for Mr. A. K. Ghosh who, we understand, has made careful preparations and hopes to succeed. Another Bengalee candidate, whose family is connected with business, is Rai Bahadur Parama Nath Mullick, who is known as a critic of the Imperial Bank. Mr. S. C. Mitra, who was a member of the Imperial Legislative Assembly, is also wooing the electors on the plea that he did much to liberalise the constitution of the Reserve Bank. All that we need point out is that he was not a signatory to the minority report of the Joint Select Committee. It may also be recalled that he opposed the reservation of a percentage of shares for Indians in a speech which was acclaimed as a statesmanlike utterance by the European group. All factors taken into account, it is unfortunate that none of the leaders of the Bengalee community like Hon. Mr. B. K. Basu or Mr. Nalini Ranjan Sarker have cared to contest the Local Board elections. The result is that the Bengalee element will be negligible in the Local Board and will not include any outstanding personality.

* * *

The Central Board will do well to bear this in mind in making the nominations of the three members required to complete the Local Board. We would like to see a Bengalee representative of agricultural interests included in the nomination. One like Mr. I. B. Dutt of Comilla, with his association with the co-operative movement, should prove a valuable asset; and this will remove the grievance that the Local Board does not contain an adequate proportion of the local people. It is also necessary to remember that the Mahommedan community must not be given any occasion for a grouse in this matter. One of the three nominations must, therefore, go to a Moslem. And who is more worthy for nomination than Mr. Adamjee Haji Dawood, who is admittedly the premier businessman and industrialist amongst the Moslems of this province. Mr. Adamjee would have fought the elections except for the unfortunate fact that while everyone in his family and firm is a shareholder of the Bank, he himself is not one. This oversight put him out of the pale of suitable candidates. Had he stood for election, his success was assured. The other nomination should go to a representative of European business. We understood that the original intention was to set up Mr. MacCaw as a candidate but, as is well-known, Clive Street bosses are rarely in the habit of fighting elections. Elections in the case of the Bengal Chamber of Commerce are agreed affairs; and there is rarely any contest. It is for this reason that Mr. MacCaw must have given up his original plan of sending in his nomination. Be this as it may, it is in the fitness of things that the Local Board for the Calcutta area must include a representative of Clive Street interests. We would, therefore, strongly urge that the Central Board must include Mr. MacCaw as one of the three nominees.

* * *

The list of nominations for the Bombay area has a special interest as two of the Directors of the Central Board of the Reserve Bank are to retire at the end of the official year and they will seek re-election through the Local Board. It is this circumstance which accounts for Sir Purshotamdas Thakurdas and Mr. F. E. Dinshaw seeking election on November 12. In all other areas, no member of the Central Board is seeking election for the Local Board. We give below a full list of candidates whose nominations have been found to be valid for the Bombay elections:

Mr. Sultan M. Chinoy;
Mr. Devidas Madhowji Thackedsey;
Mr. F. E. Dinshaw;
Mr. Jafferbhoy Abdoolabhoy Laljee;
Mr. S. K. Mankeshwar;
Mr. R. P. Masani;
Mr. Motilal Agarwal;
Mr. Pursram Detaram;
Sir Purshotamdas Thakurdas.

It seems safe to say that the first four and Sir Purshotamdas will come out successful. If this forecast turns out correct, the Bombay Local Board can claim to have a very competitive team indeed. We may add that Mr. Pursram Detaram is no other than the redoubtable Mr. P. D. Shamdasani.

* * *

Turning to the Madras register, the candidates validly nominated include a retired Chief Justice, a retired Dewan of a Native State and the talented Editor of a Vernacular paper. The full list is as follows:

Dewan Bahadur Govinddoss Chathoorbhujadoss;
Mr. B. Narasinga Row;
Dewan Bahadur T. Raghaviah, C.S.I.;
Mr. S. Rajagopalchary;
Mr. Pl. V. A. V. Ramanathan Chettiar;
Mr. Patruni Rama Rao;
Sir Vepa Ramesam;
Dewan Bahadur P. Ranganatham Chetti;
Rao Sahib C. Sabapathy Mudaliar;
Mr. S. Sankaranarayana Ayyar;
Mr. C. R. Srinivasan.

Sir Vepa Ramesam, Dewan Bahadur T. Raghaviah and Mr. C. R. Srinivasan are sure to command a comfortable majority. The same can be said of Dewan Bahadur Govindoss Chathoorbhoojadoss who belongs to a well-known family of businessmen in

Madras and who has been, intimately, connected with banking.

* * *

The managers of the local offices of the Reserve Bank have had a very arduous time in planning arrangements for the elections. Full lists had to be published and kept ready in proper time. Elaborate arrangements are necessary for conducting the voting on November 12. The staffs in most offices are yet new to the job ; and they will be called upon to cope with an enormous volume of work and to cope with it in a way which will leave no room for complaint from the public. From the reports which we have received, Herculean efforts are being made to ensure the conduct of the elections in a way that will leave everyone satisfied. Nevertheless, there is a grievance, in certain quarters, that the lists of shareholders which have been published do not give the registered numbers of the scrips held by them. Nor are the Bank authorities prepared to supply information about the registered numbers when they are requested to do so. This has caused some inconvenience to the candidates standing for election. Many voters have had to sign their proxies at centres away from the places in which their scrips have been kept in safe custody. The proxy forms insist on the voters giving the numbers of their shares. The officer in charge of elections will also demand full information about shareholders and their share numbers, from those who hold the proxies and appear in person to record the votes. It should not have been a difficult matter for the Reserve Bank to have stretched a point and to supply information about share numbers in all those cases where shareholders had written to them for this information. The denial of this facility is all the more grievous because shareholders were not allowed inspection of the share registers for a few days prior to the closing of the transfer books. Under the Reserve Bank Act, every shareholder is entitled to inspect the share registers. Though the Act awards this right and the Reserve Bank officials were anxious to allow this right, the shareholders could not exercise this right because the registers were all required for the making up of the lists to be sent to the printing press. In view of the fact that shareholders were deprived of this valuable privilege, it would have been becoming on the part of the Reserve Bank authorities if they had supplied the information that was asked of them. That they did not do so, is bound to be made a sore point. In an election that promises to be satisfactory from all points of view, it is unfortunate that any room should have been given for a sore point such as this.

CO-OPERATION IN BENGAL

The Press Note on the Co-operative Movement in Bengal, for the year ending 30th June, 1934, makes it clear that the recent debate in the Legislative Council on the Co-operative Department was nothing but an evidence of disappointments in appointments, as a Member had remarked. The general depression during the past five years, which has had a very deleterious effect upon the movement, has not yet changed for the better. In India, the main activity of the co-operative movement is restricted to agricultural credit. As such, the effect of the depression and the concomitant low prices of raw produce have proved a severe handicap to the agriculturists in the discharge of their obligations. In the face of such disquieting conditions, it is hard to expect the Department to show any record of great achievements. Though evidence is not lacking as to the interest of the public in co-operation generally, it cannot be said that large masses of the people have come to look upon the movement as a faith. Under these circumstances, the Department has done eminently well to devote its attention to arresting the deterioration, as best it can.

* * *

The number and variety of societies in Bengal are numerous and interesting. But this can hardly be construed as indicative of the hold of the co-operative idea upon the people. There is still much work and propaganda to be done for popularising the movement, more by example than by precept. In this respect, it should be the function of the Bengal Co-operative Organisation Society, Ltd., whose affiliations number 18,830, to devise means to cultivate the interest of the people in the many-sided possibility of co-operation.

* * *

Before we turn our attention to the work done by the Department, it is best to indicate the general position of the movement in the province. It is reassuring that the total collections of the Central Banks rose from Rs. 75.97 lakhs to Rs. 87.72 lakhs. The percentage of repayment of principal loans of Central Banks increased from Rs. 18.59 lakhs to Rs. 23.97 lakhs, and the payment of interest from Rs. 30.98 lakhs to Rs. 33.09 lakhs. But when we come to the repayment of principal by members of agricultural societies, we are, at once, face to face with an almost baffling problem. The percentage of repayment increased from 8.4 to 8.5 only. The increase is so slight that it leaves no ground for any satisfaction. It may even mean a mere book jugglery. The same is the case with the percentage of overdues from these members, which fall from 80.9 to 79.9 per cent. This improvement of one per cent. leaves the amount of overdues at the huge figure of Rs. 340 lakhs, so far as the agricultural societies are concerned. But the situation is not really alarming. Whatever reason here may be for this unhappy situation, the main cause of it is beyond the control of the agricultural population. Until world economic conditions improve and the general price level goes up, it is futile to expect any improvement, as regards agricultural societies. Intrinsically, the posi-

tion is sound, as comparatively large loans have been taken by village headmen, who have more lands and who dominate over the affairs of the societies. In spite of their enviable position, they find themselves in the sad predicament of being unable to pay their debts, owing to their depleted income. It is clear, therefore, that, when their incomes increase as a result of a general economic recovery, they will discharge their obligations to the last pie. The problem, however, is whether the accumulation of the load of interest will not become far too onerous. It is here that the services of the Department are so commendably directed by Khan Bahadur Arshad Ali, the Registrar of Co-operative Societies.

* * *

It is only possible, in the short space here just to have a bird's eye view of the many innovations and improvements, which the Department has brought about for starting the movement again on the up-grade. Through the personal influence of the Registrar, in conferences specially arranged, interest on fixed deposits was reduced through amicable arrangements and almost voluntary action, from the average of 7½ to 4½ per cent. A relief of 3 per cent. is no small advantage to the co-operative banks. As for the relief to the constituents of the Central Banks, their working capital is taken into consideration ; and, accordingly, the interest in the case of societies was reduced from 12½ to 10 15/16 or 9 3/8 per cent., as the case may be. In the case of individual members, the reduction of interest is from 15 5/8 per cent. to 12½ or 10 15/16 per cent. Although the effect of this will be to stimulate payment, there is still much room for improvement as regards the relief to societies and individual members. When the interest on fixed deposits is only 4½ per cent., it is preposterous that the interest, charged on the loans to societies and members, should be as high as 9 3/8 and 10 15/16 per cent. respectively. It should be realised, however, that the time is not yet for tackling this aspect of the question. It is only, when overdues reach a vanishing point, this matter can safely be attended to. Another improvement, introduced by the Department, is to initiate a system of easy instalments extended over 5 to 10 years for collection of arrears of interest.

* * *

It is gratifying to note that the Department realises the possibility, in view of the present condition of the money market, of encouraging the Central Banks to renew deposits for longer periods at reasonably attractive rates. This move is nothing but an adaptation of "conversions" from the financial books of the Government of India. When this system is actually adopted, it would ease the situation very much for the Central Banks, as it would not interfere with their working capital, and would give them some measure of peace of mind for longer periods. Yet another step, taken by the Department for ensuring a good future, is the introduction of arrangements for the maintenance, by the Central Banks, of statements of members of societies regarding their property, debt and normal credit. It is only by these means that it will be possible to avoid over-financing of the societies.

* * *

The present Registrar has succeeded in creating real interest in the members of co-operative societies by giving them an indirect voice in the administration. This element of popularity was a sad desideratum till now in the administration of the Co-operative Movement by the official agency. It is proposed to create audit circles, consisting of about 75 societies, placing each circle under an auditor, whose additional function is to maintain an economic history of the members of societies under his charge, and to encourage the formation of an advisory body in the circle for the purpose of improving the working of societies, of promoting schemes of rural reconstruction and of assisting the Central Banks in the collection of their dues from rural societies. If only the Department is given the fullest co-operation by public men and if its activities are further popularised

by the Bengal Co-operative Organisation Society, there is no doubt that the future of the Co-operative Movement in Bengal is promising.

* * *

It will not be out of place here to suggest to the Department that they must get out of the rut and draw upon its imagination in finding new lines of activity for co-operative societies. Time was when progress was retarded for lack of capital. But to-day, the complaint is that capital is unemployable ; and yet it is a noticeable fact that large numbers of educated and efficient persons and trained workers are without employment. We are, therefore, confronted with a situation, where all the ingredients for successful economic life are present, and yet success is not only absent, but baffles its being brought about. Having capital and workers, to say that economic activities cannot be started, is nothing but a reflection upon the competence of leaders. The Bengal Provincial Co-operative Bank Ltd., with a membership of 156, complains, for instance, of a surfeit of funds. With a view to repel all kinds of deposits, it reduced the rate of interest, and had no necessity to operate on the cash-credit of Rs. 30 lakhs, granted by the Imperial Bank on the guarantee given by the Government. Here again, the Department and the Bengal Co-operative Organisation Society, should come together to evolve plans for finding uses for the surplus money. The only solution of the problem is to give the Co-operative Societies a hand, however indirect, in the affairs of the Department. When it is clear to the non-official participants in the movement that their suggestions are not only welcome but are also adopted, at least in a number of cases, they will not hesitate to push forward schemes for the amelioration of the economic well-being of the people. The one man, whom, we can expect to bring about this result, is the Registrar of Co-operative Societies, who rose from the ranks and is in active sympathy with the aspirations of the people. It is also idle to expect everything from the Department. The responsibility of the Bengal Co-operative Organisation Society is as great as, if not more than, that of the Department. Mere numbers lead us nowhere. The affilliation of 18,830 Societies is of no value, if frequent conferences are not held among them and all practical schemes threshed out, with a view to commend the good ones for acceptance by the Department.

"UNCLE ARTHUR"

Right Honourable Arthur Henderson, N.L., passed away at an hour, when, in the interests of the British Labour Party, he should be living. More than any other Labour Leader, he ensured the prestige of his party in the British Parliament. He was popular not only in British politics, but also in the international. He was listened to with the greatest respect in the House of Commons, and was held in the highest esteem by all parties. His career in public life is a unique example of glorious achievements in a negative sense;—a fragrance without any substance to cause it. He, however, excelled himself as an organiser. But for him, the Labour Party would not have assumed the strength, which it did, in the House of Commons. It is this service of his party, that would be sadly wanted at the coming elections. Mr. Ramsay Macdonald, through his defection in 1931, is not in the good books of the Labour party. The only other leader, who excels "Uncle Arthur" as he is endearingly known in public life, is Mr. George Lansbury. But then, the latter, while enjoying a large measure of popularity, is not recognised as the equal of Mr. Henderson in powers of organisation. The field is thus left to Major Atlee. It is unfortunate he cannot quite substitute either Henderson or Lansbury. To this extent, the Labour Party is in for a severe handicap, which may almost end in a serious disappointment at the polls. One characteristic of Mr. Henderson's parliamentary career which arrests one's attention is that he had a genius for failure at the general elections and success at by-elections. He had

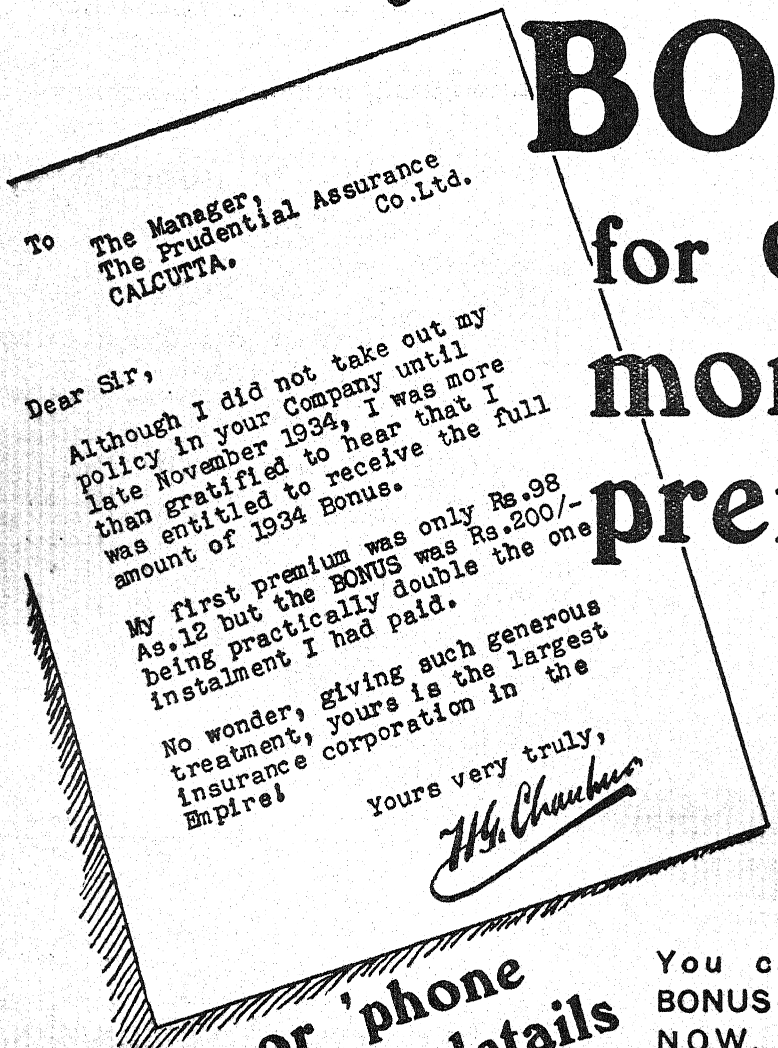
his early training and discipline, though he was but a workman, in the civic life of Newcastle and Durham. As early as 1895, he was offered, by the then great Liberal Party, a seat to contest at Newcastle along with the famous John Morley. For one reason or another, he declined the chance, but worked as agent for the Liberals at Bernard Castle. His direct relationship with the constituency stood him in good stead, when the seat fell vacant some time after ; and he stood as a candidate, in the interests of Labour, in 1903, and entered the Parliament.

* * *

By far the only occasion, when he may be known to have come in for acrimonious criticism, was when he turned labour, in spite of his intimate connections with the Liberal Party. The occasion for his conversion was the denial by the employers to recognise the right of workmen to stand as candidates for the Parliament. The storm of criticism, however, blew over soon, as the sincerity and the impartiality of Henderson was disarming to a degree. He became the elected Chairman of the Parliamentary Labour Party in 1908. Even when the House of Commons was under the control of such an all-talents ministry as that of Asquith's, he was regarded as a lay peacher in politics. He held this position of leader of his party for two years. On the outbreak of the War, Mr. Ramsay Macdonald, who happened to be the then Chairman, became unpopular



One year's BONUS for one month's premium!

To The Manager,
The Prudential Assurance Co.Ltd.
CALCUTTA.

Dear Sir,

Although I did not take out my policy in your Company until late November 1934, I was more than gratified to hear that I was entitled to receive the full amount of 1934 Bonus.

My first premium was only Rs.98 As.12 but the BONUS was Rs.200/- being practically double the one instalment I had paid.

No wonder, giving such generous treatment, yours is the largest insurance corporation in the Empire!

Yours very truly,
H.G. Chauhan

owing to his pacific views. Mr. Henderson had then the chance of becoming the Chairman, once again. He was a whole-hearted supporter of the then Government, and was keen on prosecuting the War to a finish. It is strange that the pacifist Macdonald of those days should degenerate in course of time, while Mr. Henderson should crown the evening of his life with the Nobel Prize for peace. The contrast lies in the pacifism of Macdonald being emotional, and that of Henderson being logical. Mr. Henderson was not for pacifism at any cost. He would not betray the interests of his country for the sake of pacifist principles ; but, he would see that the whole world adopted pacifist views.

* * *

As a recognition of his loyalty to the national cause, he was taken into Mr. Asquith's coalition ministry in 1915, when he was consulted on labour questions at every stage, though he held only the portfolio of education. His zeal for a vigorous prosecution of the War made him support Mr. Lloyd George in 1916, when the Asquith Ministry broke up. Under Mr. Lloyd George, he became an original member of the War Cabinet of four, without a portfolio. In 1917, he visited Russia, soon after the revolution. As a result of that visit, he came to the conclusion that British Labour should be present at the International Labour Conference at Stockholm. Mr. Lloyd George seemed to have been in agreement with Mr. Henderson at the beginning. The British Labour also held two conferences supporting Mr. Henderson ; but the other members of the Cabinet were against British Labour attending the Stockholm Conference, where they would have to meet German delegates, while the war was still raging. This was enough for the sensitive Mr. Henderson to resign from the Cabinet. Since then, he stood for a free and independent labour platform. In 1924, when Mr. Ramsay Macdonald became the Prime Minister, he was the Minister for Home Affairs, and in 1929 he became Minister for Foreign Affairs. It was during his tenure of Foreign Minister, that he became popular with international politicians, so much so that he was unanimously elected, in 1931, as the one man in Europe to be Chairman of the World Disarmament Conference. In 1931, when the National Government was formed, he was one of the very few Labour leaders, who did not follow Mr. Ramsay Macdonald. The Labour Party was in bewilderment owing to the defection of prominent leaders like Messrs. Macdonald, Snowden and Thomas. To Mr. Henderson falls the entire credit for putting fresh spirit into the Labour heart, and impelling them to work for the future.

* * *

During the years, 1932-33, he was busy with international politics as President of the World Disarmament Conference. He was untiring in his zeel, and spared no pains or physical discomfort for achieving the much-desired result. He circumvented, or surmounted, one crisis after another. Though he was baffled in his aspirations, he left an indelible mark upon the international mind, that he was identical with the Disaramament cause. The last straw, that brake the Disarmament camel's back, was the Four-Power Pact, which induced a sense of false security amongst the great Powers of Europe. How false the security is, the current events, especially the Italo-Abyssinian War, promise to show. It is, however, fitting that Mr. Henderson's services to the cause of world peace earned, for him, the Nobel peace prize in 1934.

ECONOMIC SANCTIONS

Now that the League of Nations has set in motion its machinery for economic and financial sanctions against Italy, the actual position is made clear in a publication of the Royal Institute of International Affairs. There is a good deal of misunderstanding on the subject, as there is no precedent to go by. In the special article on the subject by Dr. Paul Einzig in this issue, some of the points are clarified. Never bfore has there been an application of sanctions against a Covenant breaker. In the Sino-Japanese War, sanctions would have been impractical without the active co-operation of the United States and Soviet Russia, neither of whom were members of the League. And then it would have meant a big naval engagement. The Bolivia-Paraguay dispute was a very minor ruffle of the waters of European peace ; and its remoteness liquidated in a sense the League's obligations, which were not sought by other South American governments. This hazy background leaves people guessing as to how, when and by whom sanctions should be applied.

* * *

The essentials are known. If a League member "resorts to war" in defiance of its obligations, if it attacks before the necessary three-month interval has elapsed after the Council report, or if at any time it attacks the member which has accepted the Council's unanimous recommendations, then "it shall *ipso facto* be deemed to have committed an act of war against all other members of the League". Each member is bound at once to break off all social and economic relations ; that is, any member may legitamately go to war with the Covenant breaker and the boycott must forthwith be operative. Technically or rather textually, the situation is involved. There is no definition of the phrase "resort to war" and there is no provision for a collective application of sanctions. Immediate boycott is obligatory on individual members of the League on a finding that the Covenant has been broken; and the members are, however, in the air as to the time, method and range of sanctions. The whole idea of the Covenant is that resistance

should be collective and concerted. And on this point the Council of the League has no defined authority. All it can do is to issue recommendations, which would not be constitutionally binding or necessarily unanimous. They would aim at co-ordinating the measures taken by members.

* * *

Broadly, sanctions consist of three types—moral and diplomatic, economic and military. From the first, little can be expected. Moral and diplomatic pressure can be brought to bear only before the actual breach has taken place. World opinion, indeed, can have little effect on the population of a non-democratic State. The real sinews of sanctions lie in the economic measures. And the selection of the right sanctions to apply depends upon the individual member. It is not intelligent, for instance, to cut off the supply of arms and ammunition from a country which makes its own. It is a different matter to cut off he supply of the raw materials necessary for their manufacture, especially when the aggressor happens to be dependent upon imports. The practical difficulty of an embargo on exports, whether of arms, war raw materials or merchandise, is effective organisation. It must be universal, for which two conditions are necessary. The non-member States must join in with the League. Some arrangement may also have to be made to compensate those League members which have a very large favourable balance with the aggressor State. The incidence of an embargo will bear very differently on the various members. The embargo would eventually have to become a blockade, and this increases the danger of military and naval clashes. There is a better chance of making the blockade good if it is directed against a State with a large seaboard than if it is directed against a land-bound State. But in the blockade lie dangers of an extension rather than a restriction of the war zone. The recession of Bulgaria and Czechoslovakia from the economic boycott scheme planned by the League against Italy illustrates the difficulty of collective resistance.

PUBLIC HEALTH

As a rule statistics leave one cold. They are impersonal and often uniformative. They give percentages and totals and averages, which do no always project a picture. Not infrequently, they are, or appear to be, confusing and meaningless. Health statistics, however, are an exception. They deal with birth, death, disease, and maternity, which are human experiences common to man. When health statistics are explained, they form a vivid setting to the life of a people. The report of Colonel Russel, Public Health Commissioner with the Government of India, is of immense interest. In its pages the grim tragedy, continuous from generation to generation, of India's. mortality is unfolded by a series of satistics, of which the meaning is made clear. Colonel Russel makes it a point to elucidate his statistics in terms of human wastage.

* * *

The national health of India in 1933, which is covered by the report, makes one gasp. Total births numbered 9.7 million, giving a birth-rate of 35.5 per mile as compared with 33.7 in 1932. Total deaths numbered 6.1 million, giving a death-rate of 22.4 per mile, as compared with 21.6 in 1932. Colonel Russel thinks that, on a conservative estimate, the total population of India must now be approximately 370 millions. "There seems little doubt," he says, "that by 1941, when the next census is taken, the population of India will considerably exceed 400 millions." The Colonel, discussing the gravity of the food problem, arising out of this rapid growth of India's population, observes: "The total land in British India amounts to 667 million acres, of which only 232 million acres are now cultivated and sown. 47 millions lie fallow; 154 millions are culturable, but uncultivated; 154 millions are not available and 89 million acres consist of forests. But even making the ridiculous assumption that all the 667 million acres of land would be available, it would work out at only 2.44 acres per head of he population." Even if intensive methods of cultivation were adopted and additional food supplies made available, the difficulty would be put back for a few years only, because the larger population would absorb the surplus. In sugesting birth control to cope with the menace of increasing population, Colonel Russel takes a view prevalent in the West, but which is outside the range of practicability in India at the present time. No one questions his contention that, by practising certain methods of 'birth control,' it is possible not only to save the lives of many infants, now doomed to an early death, but to lessen a terrible amount of suffering, illness and death, which are the lot of thousands of mothers of all ages in this country. Birth control is repucnant to the traditions and temperament of the people of India, both literate and illiterate: and we cannot see a time when Colonel Russel's remedy will be popular.

* * *

When we come to cholera, plague, and smallpox, India's triple seasonal visitations, we envisage the horror of public insanitation. These preventible scourges accounted for a quarter of a million deaths according to official reckoning. A third more would probably approximate to the actual mortality Malaria is responsible for 20 per cent. of the total recorded deaths, while many millions more lose thereby their earning capacity. As regards infant mortality, 45 per cent. of the total deaths were of children below 5 years of age, and over 50 per cent. of children below 10 years. Colonel Russel thinks that "pure water supplies, better conservency and more effective removal of sewage will all have a profound effect on the appalling infant mortality still taking place in this country."

* * *

On the data, collected by him, it is not surprising that Colonel Russel remarks that the results achieved by the Provincial Health Departments have been disappointing, and regrets the sweeping reductions made in public health budgets on the ground of retrenchment, which he terms "dangerous." He suggests that public health departments should be more suitably equipped before the next crisis of "epidemic outbursts."

The greedy ones are the easiest to dupe. The gamblers in the various *phatka* markets have thus a special proneness for *gup* and gossip of every kind. And rumour-mongers command a premium in such circles. In any other society, they will be dubbed busybodies who should be kept at arm's length. *'Kya khabar saheb?'*—is the slogan which the *phatkawalla* addresses to outsiders who pretend to intimacy with influential quarters, what time he asks his compeer and colleague *'kya dham?'* Curiosity is an inseparable attribute of cupidity. And *khabar* of any description, of whatever degree of reliability, has a value in the market-place. When shares of a famous group were, in the early twenties, flaring up each half-hour during an excited week, a rumour-monger brought the news that one of the partners of the group had committed suicide. The retailer of this precious tit-bit could not be located ; but the news spread like wild-fire. And prices took a nose-dive. It should have been easy to verify the accuracy of the information so gratuitously vouchsafed ; but no one thought of it as each one was busy hurling shares on a steeply declining market. It was only after considerable havoc had been wrought, that another member of the news-vending fraternity turned up with the announcement that he had telephoned the office and learnt authoritatively that the news about the suicide of the partner was a pure canard.

To suit their machinations, the gamblers are upto anything—they will send men to Hades ; they will proclaim a war ; they will report imaginary operations of big institutions ; they will concoct letters ; they will manoeuvre press messages ; they will humour journals to publish comments apt for their purpose ; they will canvass shrewd support from commercial bodies ; they will press noted politicians into service. The latest sensation is the hoax about the imposition of an export duty on gold and the removal of the import duty on silver—a hoax, whose origin appeared to be New Delhi; whose vehicle was communications purporting to emanate from the Imperial Secretariat and to be complete with authoritative enclosures ; and whose destination was sundry bullion operators. Pandemonium reigned in the market. Price of gold tumbled—there were wild gyrations of prices—there were frantic interchanges of telephone calls—the trunk lines kept buzzing —and within the few minutes before the arrival of news exposing the hoax, thousands of tolas had changed hands. Many lost heavily ; and a few gained extravagantly. Even Calcutta was caught in the meshes of this manipulation. In our office, we had no less than a score of telephone enquiries roundabout Monday noon. Excitement subsided by the afternoon and many an operator, looking back on the two hours, is sure that it was the most hideous nightmare he had ever had.

I am led to believe that the letters that were received in Bombay bore the signature of a Secretariat official who is non-existent and was couched in language which was distinctly flamboyant. One thing about Secretariat memoranda and communications is that they are flamboyant. There is a standard of dignity and concise fluency which stands out in Secretariatt draftsmanship. This stamp of literary quality is unmistakable. It is a definite personality. That our Bombay friends failed to apply so simple a test to so crude a performance, does not reflect credit on them. Moreover, no one by himself could have executed a hoax of this kind. He should have had sundry abettors. It should not, therefore, be difficult to unravel the crime and expose the perpetrators. I hope that better luck will attend the efforts of the detectives than was the case in regard to the notorious letter which Sir George Schuster read in the Assembly in the course of the Reserve Bank Bill discussions. On that occasion, Sir George, in indignant tones, dilated on the unscrupulous speculators who could forge a letter in the name of the Financial Secretary, get it typed on the latter's notepaper and on the typing machine of his personal assistant, arrange for its despatch in the peon book of the Financial Secretariatt. His righteous indignation would have led one to think that he would not be content till the culprits had been found out. It should not have been a difficult matter to trace the crime to its source. For, the elements of the crime were so simple and the way in which Secretariatt materials had been used was such, that suspicion could have fallen only on a very limited number of persons. And to discover the criminal amongst them must have been an easy affair. This episode, of which Sir George made so much in an important speech and through which he sought to win considerable votes, has ended in smoke.

As I sat in the President's gallery listening to the speech of the Finance Member, the thought came to me that Sir Basil Blackett, too, quoted from a handy letter which came to his apt aid in the ratio discussion of 1926-27. I have heard it freely said that the letter involved in the episode of 1926-27 was more or less a myth. In the case of last Monday's hallucinations, however, the letter was not a myth ; it was an absolute reality ; to many, it is a stark tragedy. The repercussions from this letter have been more far-flung and far more serious. It embraces the Imperial Capital and the capitals of three presidencies. It has dragged the name

of the Government and purported to quote the *Gazette of India*. The interests of the Government as well as of the public demand that no effort should be spared to track down the criminals.

The Bombay bullion market scoop reminds me of a similar episode thirty years ago. Russophobia was then the supreme obsession of the Government of India. Lord Curzon had it as badly as his Viceregal predecessors. A member of the staff of the *Indian Daily News*, then the local leading Anglo-Indian daily, conspired with a couple of friends, one of whom was a government official and the other a municipal official, to raid the Calcutta share market. The journalist went to Darjeeling, ostensibly on a holiday. After a week he wired to his paper that the advance columns of a large Russian army had been seen heading towards Darjeeling through Tibet. The wire was featured in the *Indian Daily News* and, amidst tumutlous scenes, government bonds were selling at any price. The journalist's friends cleared out the market, knowing that the next day's denial of the report would lead to a spate of buying, when they would unload on a broad margin. Lord Curzon, who was in residence in Calcutta, upset their apple cart. He had the report contradicted at once and had the "Syndicate" prosecuted. The journalist got a few years in which to ponder in jail on the vanity of wealth, while his would-be brothers in spoil left the country without the formalities of farewell. The journalist is now a pathetic figure in the bye-ways of Calcutta's newspaper world.

In the course of a chequered career in the fourth estate, it has been my lot to collect a motley experience. I have come up, professionally of course, against all sorts and conditions of men and things. I have to add another to the collection. In his judgment on the Benda case, the Sessions Judge, Mr. H. G. Gruer, I.C.S., agreeing with the unanimous verdict of the jury, sentenced ten accused British soldiers to varying terms of imprisonment for "a brutal raid on unarmed Indians," which involved beating a man to death who attempted to save his daughter from being outraged. The sentences were mitigated on the ground of youth and "boredom of barrack life." Apparently, if Mr. Gruer is to be considered an authority, barrack life is not what Kipling ballads said it was. I wonder if a lesser or a bigger poet than Kipling will immortalise a Ballad of Boredom of Barracks. Whatever the metrical appeal of such a ballad might be, the judicial value of "boredom" as an extenuation of a deliberate series of the most dastardly crimes is a unique addition to my collection. I suffer, not gladly, boredom; and if murderous thoughts then possess my soul, I might have cultivated the comfort of Mr. Gruer's sanction, were I in barracks. Tommies in barracks have a new grouse. If barrack boredom is to lead to murder and rape and rioting, whose the blame ?

Mr. C. M. Kothari, about whose underwriting of the Vizagapatam Sugar and Refineries I had much to say last week, writes to me that the share list was open only for three days and that it was subscribed twice over. The shares are now Rs. 4 paid-up. They are bid for upto 8 annas premium ; and sellers could not be found at a premium of even a rupee. Mr. Kothari is to be warmly congratulated. Equally deserving of felicitations is the Vizagapatam Sugar. And, Mr. Kothari adds in his communication, I, too, come in for a due share of congrats. For, he says, "not a little of the success is due to your blessing and your discriminating commendation." Thanks very much for this kind thought. Thanks all the more, because I have had more certain brickbats when I go away than bouquets when I prove right. I like to help those who help themselves ; so, I must feel grateful to those who are grateful to me.

OLYMPUS

(From Our Correspondent)

New Delhi, October 22.

The first news I heard on descending to the terrestreal region was that the Viceroy and Lady Willingdon had decided to make another history for the Imperial Capital. They have already made one by naming "Delhi Time." Now they propose to give the Capital the dignity of witnessing the transfer of imperial authority on its soil from one Viceroy to another. Lord Linlithgow will be sworn Governor-General in New Delhi and the outgoing Viceroy will fly homeward.

* * *

I am told this decision was not taken without a pang ; for, Lord Willingdon would have very much liked to leave by the Gateway of India and say good-bye to his many old friends in Bombay amidst the scene of colour and human touch which characterises ceremony on such occasions. I witnessed two such ceremonies and can testify to having seen tears trickling through the eyes of outgoing Pro-Consuls of the Empire.

* * *

One result of this change of procedure regarding Viceroyalty is that the Executive Councillors must remain in New Delhi till after the middle of April. They would not like the heat of Delhi but will have some compensation in the revenge they will have on the legislators by making them sit longer in April. Which means that the Budget Session may not begin till first Monday in February.

* * *

Perhaps, later counsels will change this outlook as the official business, both pending and contemplated, will be so heavy as to make it impossible for Government to get its programme through the next session unless it is prepared to begin early and sit late in the Session. Among the new Bills, there will be Tariff legislation dealing with cotton industry, woollen industry and paper industry.

* * *

The Bill may prove very contentious, or it may not. The Government knows that Sir H. P. Mody has no alternative to accepting its scheme. He has no friends among the Congress and it will not pay him to vote for rejection of the measure. For the moment, official opinion has been rather struck by the manner Ahmadabad and Bombay have been trying to put up a "united front."

* * *

I hear somewhispers about Cotton Excise Duty. Perhaps, they are without foundation ; but they have been persistent. The story behind these rumours is that Bombay may agree to protection even at the cost of such a duty but that the other Centres may rather stand out of protection than submit to reimposition of the duty. Any way, I would not put much value yet on these rumours.

* * *

Delhi has had a laugh at the expense of Bombay. That a financial centre which prides in its astuteness should have fallen prey to a hoax of the kind played on it, passes one's comprehension. If an Extraordinary Gazette had been issued over the signature of Mr. H. Dow, surely Press Agency would have carried it over the wires—by phone even more than by telegraph. The fact that copies of the notification were posted by some obliging person to the financial operators in Bombay, makes the position worse from the point of view of those who believed it.

* * *

There was another instance in the past of a similar attempt, but the vigilence of the A. P. I. caused its detection in time and the mischief was nipped in the bud. Apparently the culprits on that occasion went unpunished ; and they, or some of their class, have again played this hoax. It would pay the Finance Department to make a thorough enquiry into the matter and trace the source of this wicked episode.

* * *

Apparently, the mischief-monger chose his time cleverly. The Government of India Secretariat is on the move and its normal machinery is not functioning properly yet. Someone acquainted with the use of the machinery, in the Secretariat sense, chose the occasion to play the hoax with a view to make some financial interest benefit as a result. Mr. Nixon has a very alert mind ; and, I think, if he looks into the matter he may be able to prevent recurrence of such incidents in future.

* * *

One of the problems that has been baffling the Government of India for a fortnight is the League's threat of sanctions against Italy. What these imply, no one yet knows. India's balance of trade with Italy is still very favourable but she would naturally like to fall into line with the rest of the League Members in carrying out whatever sanctions are declared to be necessary. The main fact stands that there is no commodity which Italy exports to India that cannot be replaced by local or foreign sources ; on the other hand, there are certain raw produces which Italy imports from India that she cannot very well find a substitute for.

* * *

There is, however, a danger in the scheme of sanctions. Supposing India stopped exporting raw cotton to Italy, but U. S. A. did not. India would lose her market and Italy would not be the worse off for the imposition of the embargo. Again, what is there to prevent Germany importing gunny bags from India and passing them on to Italy. These are the considerations which are weighing with the Government of India in the matter and they have made these known to the British Ministers who are negotiating in Geneva on the subject.

* * *

Of course, so far as the legal aspect of the case goes, there is no difficulty in India acting at a moment's notice. The Sea Customs Act gives them the widest power to stop import or export of any commodity into or from India. That power can be exercised by a simple notification in the Gazette of India and the entire trade with Italy can be stopped in no time. The financial sanctions would, however, require legislative remedy. For instance, there is nothing in the existing Acts to enable remittances being prohibited to Italy nor can an Indian be prohibited from buying Italian stock or State loan. These can be dealt with by an Ordinance and no doubt a skeleton of such an Ordinance is already in being for quick disposal, should such a course become advisable.

* * *

There is also preparation here on the supposition that England may be involved in a War with Italy. Popular Indian feeling, which is definitely on the side of Abyssinia, has helped the Government of India to get over the fear that there would be any unfavourable reaction in India should India be tied to England's chariot wheel. I should not, however, be understood to indicate that War of that kind is probable.

* * *

It should be a relief to the money market circle to know that definite information has been received here about Sir Osborne Smith's return to India on November 10. He may spend a day or two in Bombay and will reach Calcutta by mid-November.

(From Our Correspondent)

Bombay, Oct. 23.

Mr. C. G. Freke, Finance Secretary, made a brave attempt in Council to reconcile public opinion to the Motor Vehicles Bill—so brave that Mr. L. R. Tairsee admitted amidst cheers that there are redeeming features in the Bill. Having made that concession, Mr. Tairsee unburdened his mind of the conviction that "in this matter the city and rural areas have been pitted against each other." That Bombay was about to be bled white was the sanguinary accusation he levelled at Government. Bombay, Mr. Tairsee said, has about 10,000 cars, which are to pay Rs. 25 to Rs. 30 more each, or Rs. 2 lakhs more than what was expected from the last Bill. Was Bombay City to be taxed out of existence?—asked Mr. Tairsee. The Council did not share Mr. Tairsee's apprehensions and the first reading of the Bill passed without a division.

* * *

The last minute relief to agriculturists to the extent of Rs. 9 lakhs leviable by toll on bullock carts took the wind out of the sail of the opposition. The Council approved of the sentiment of the Finance Secretary that the prosperity of Bombay is inseparable from the prosperity of the mofussil. During the last ten years the lowest figure of expenditure on roads in the Presidency was Rs. 36 lakhs, while last year's figure was Rs. 38 lakhs. With a revenue approaching Rs. 30 lakhs from tolls, the Finance Secretary suggested that it could not be maintained that the money was not spent on road, which is the special grouse of the motorist. The Council did not agree with the Finance Secretary on this point; hence the demand for a guarantee from Government that the revenue secured over and above the present income would be earmarked for the up-keep and repair of roads.

* * *

The bullion market has had an experience which has left many sadder, poorer and wiser. The connection between war and finance is so intimate that some brainy, but unscrupulous men exploited the Italo-Abyssinian situation to rattle the market badly and collect the shekels. Rumours of the removal of the Indian import duty on silver and the levying of an export duty on gold at first filtered and then deluged the market, causing frenzied buying in silver and reckless selling in gold. Prices went up like a rocket, silver having been freely bought at Rs. 70-8 for first settlement. On the other hand, gold dropped precipitously to Rs. 31-8 for first settlement. Then sanity saved the situation. Enquiries proved that the whole affair was engineered cunningly to create a scare. The police have taken up the investigation to trace the crooks and rather sensational disclosures might come to light. About Rs. 15 lakhs represent the price Bombay has paid for its speculative flair.

* * *

Nasik will be remembered, if these things are remembered, as the jumping-off platform of a promiscuous religious plunge into the waters of conversion. Dr. Ambedkar's impulse—I can call it nothing else—to lead, with himself as shepherd, the Harijans in the Presidency from the inequalities of Hinduism to a common heaven of conversion may be magnificent: but it is not cricket. The Doctor is catholic in his conversion mood; it matters not a whit whether he and his Harijans go over to Islamism, Christianity, Buddhism or Mormonism provided the equality of humanity is theirs. That is his crude solution of the Harijan problem and his violent protest against the faith in which he was born. Every caste Hindu, unless he is of the repulsive type which all religions throw up, will appreciate the humiliation and the duress that have driven Dr. Ambedkar to so drastic a decision.

* * *

The lot of the Harijan is a blot on Hinduism which nothing can excuse. Mass conversion without conviction would not improve, except in words, the status of the Harijan. It would be so outrageous a change-over that the considerations which alone can justify a conversion of faith would be flagrantly non-existent. And I cannot understand the rather effusive overtures which have been made to accommodate Dr. Ambedkar. The disabilities of Harijans are unfortunately imbedded into the social and religious structure of Hinduism. The process of emancipation must necessarily be slow and painful. But that the process is in operation is indisputable and it is gathering momentum. Bombay, after its first shock, regards Dr. Ambedkar's gesture as most unseemly. The country in general takes the same view.

* * *

The Liberals of Bombay have been setting their party organisation in order. So much was signified in a series of speeches in the Presidency, culminating in a meeting, at which Pundit Hirdaynath Kunzru, President of the Indian National Liberal Federation, made it clear that, however dissatisfied Liberals might be with the Government of India Act, they are prepared to extract the maximum good from it. Sir Cowasji Jehangir has been the personage behind the scenes to close up the breach in the Liberal Party; and at the meeting the Parsi Knight gave a lead to his party. He does not expect future Ministers to go out of their way to seek deadlocks, nor does he expect them, in order to avoid deadlocks, to give up any of their principles or administrative measures that might be of advantage to the country. The voice of what is called the Liberty Party is a voice crying to-day in the wilderness. Constructiveness is their plank. The constitunal cynic asks—what is there to construct.

"MUNICIPAL AND GENERAL" GROUP OF TRUSTS
FOREIGN GOVERNMENT BOND TRUST
TO THE HOLDERS IN INDIA OF BOND-UNIT CERTIFICATES

DISTRIBUTION 1ST OCTOBER, 1935.

NOTICE is hereby given that Coupon No. 3 maturing 1st October, 1935, will be PAID at the rate of FIVE PENCE (5*d.*) per Bond-Unit on all Bond-Unit Certificates issued as at 6th September, 1935.

Coupons may be presented for encashment at current rate of exchange to LLOYD BANK LIMITED, at: Bombay, Calcutta, Karachi, Rangoon, Amritsar, Delhi, New Delhi, Lahore, Rawalpindi, Simla and Srinagar (Kashmir).

The above-mentioned payment will be nett, and not subject to British Income Tax, and is equivalent to a gross yield of £5-7-6 per cent. per annum on the initial issue price of 20*s.* 0*d.* per Bond-Unit. Bond-Unit Certificate holders resident abroad may reclaim British Income Tax. Income Tax Certificates will be supplied by the Trustee, Lloyds Bank Limited, London, through its Branches in India as above. The Tax Certificates will be accepted by the British Inland Revenue authorities in support of repayment claims as Vouchers for British Income Tax already deducted from the income now distributed.

By order of the Managers,
MUNICIPAL AND GENERAL SECURITIES CO., LTD.

SOUTH INDIA

(From Our Correspondent)

Madras, October 22.

One of our upcountry politicians, who has developed a keen eye for the absurdities of life, made some time ago the good-humoured observation that South India was getting much more conference-minded. Dubious as the compliment sounds, we console ourselves with the reflection that we can, after all, do worse than become conference-minded. But the crowded week through which Madras has just passed bears out the correctness of that observation to a degree. We have had quite a bunch of these conferences and meetings last week. The All-India Congress Committee met and decided to postpone decision on the thorny question of office acceptance to the Lucknow session of the Congress. Thanks to a business-like President, who levied a severe embargo on long speeches, the session was a brief one. Among the other gatherings, were a women's provincial conference, over which Mrs. M. E. Cousins presided, a Radical Youth conference, and several public addresses by the distinguished visitors to the city. The South Indian Teachers Union also selected this particular time for launching their Education Week, an annual affair. The more fashionable and exclusive city folk were responsible for a plethoric number of social fixtures in honour of the visitors; and to the caterers it proved a bumper season.

* * *

Madras, like other centres, is apt to develop a parochial political outlook, now that Delimitation Committees, allocation of provincial revenues, special electorates and economic rennovation are heralding, on a blatant trumpet, the advance of provincial autonomy. The Congress Campaign envisaged the larger all-India outlook. There was nothing new that Babu Rajendra Prasad or Mr. Bhulabhai Desai or Mr. Satyamurthi or Mr. Nariman or Sirdar Patel said. They, each in his way, re-affirmed cardinal political values, which are as old and as stable as the elements. There can be nothing new in politics. Equality, liberty, and fraternity are the holy trinity of national politics—immutable and immaculate. You may worship this trinity in the austerity of privacy or with the incense of sacrifice or with the ritual of publicity or with the litany of adoration. So long as we do not miss the essential for the ephemeral, politics are fundamentally the same.

Quite a first-class sensation was caused by Mr. Nariman's civil but curt refusal of a civic address from the Corporation of Madras last week. His statement in explanation of his refusal was courteous and dignified, if also full of implied sarcasm. He said that if Babu Rajendra Prasad, the President of the Congress, came on too political a mission to Madras to deserve an address, his (Mr. Nariman's) mission to the city had similar political significance; and the fact of his being the Mayor of a sister city did not diminish the political complexion of his visit. What is sauce for the goose is sauce for the gander; and he clothed the proverb in language appropriate to the occasion. I do hope the sarcasm of his statement will not be lost on our serious-minded city fathers, who, in their anxiety to enhance the value of a civic address by being discriminating in its presentation, found that Babu Rajendra Prasad's credentials did not entitle him to a civic welcome.

* * *

The forthcoming Reserve Bank Local Board elections have led to brisk collection of proxies by candidates. These latter are numerous. Among them are found an ex-Chief Justice, the editor of a leading Tamil paper and an ex-Dewan of a South Indian State. With the voting procedure complicated, cumbersome and mystifying, shareholders are having an embarassing time of it. The local newspapers contain sketches of candidates in the form of manifestos. It promises to be a lively fight with everybody wanting your first vote and nothing less.

Cochin was busy towards the close of last week entertaining Lord Erskine. The occasion of the state-banquet was availed of by the resourceful Dewan, Sir R. K. Shanmukham Chetty, to impress on the distinguished visitor the importance of the Harbour of Cochin and of the necessity of the Cochin and Madras Governments working in close co-operation generally. Lord Erskine expressed the hope that the differences in regard to the harbour question will be shortly settled. One wishes His Excellency had risen above the formalities of a post-prandial pronouncement and given the Cochin Government some material assurance in regard to the Harbour. Of course, the matter is going to be settled in New Delhi and is now *sub judice*. But the Harbour had been rather an apple of discord for a long period now; and let us hope that, in the process of settlement, the Government of Cochin will not be negotiated out of her just and proper share.

* * *

The Senate of the Madras University has resolved, at its meeting last week, to institute a Degree in Journalism and has given the necessary directions to the Syndicate to bring the faculty into shape. The idea has taken long in materialising. However, our senators deserve to be felicitated on the step. The complaint has always been that journalism has not, (present company excepted!), attracted the best brains in India. Now that it has been decided by the University to give the profession this belated recognition, let us hope the profession will attract into its fold men and women of the highest calibre, who, in their own time, will elevate professional standards and reduce petty-minded intrigues and personal prejudices. Anyway, it is no small satisfaction that it is Madras's privilege to give a lead in this matter to other universities.

ECONOMIC SANCTIONS

DEMANDS FOR COMPENSATION

THE "GENEVA SPIRIT"

By Dr. Paul Einzig

Special for "INDIAN FINANCE"

London, Oct. 14.

At the time of writing, negotiations are in progress in Geneva for establishing the detailed rules which the economic and financial sanctions to be adopted against Italy are to follow. The fundamental principles have been adopted unreservedly by fifty countries out of fifty-four. None of the speakers of these countries missed an opportunity during the last few weeks to emphasise the willingness of their Governments to uphold the Covenant. Indeed, they were outbidding each other in their keenness to serve the principle of collective security and do their bit in the proposed collective action against the aggressor. League enthusiasts followed the speeches almost with tears in their eyes. They regarded the all but universal enthusiasm of fifty nations to co-operate in the interests of peace as a landmark of a new and happy era in which no country would again dare to defy the authority of the League.

And now the Geneva statesmen have come down to brass tacks. It is no longer a question of stating lofty principles. That stage having been passed, it was inevitable to settle down to discuss practical details. Immediately the whole atmosphere changed. Those who, a few days ago, were willing to defend the Covenant with the last drop of their blood have now begun to think in terms of oil and wheat and coal. The same statesmen, who, a few days ago, were competing with each other in showing the highest degree of eagerness to serve the cause of peace, are now competing in their efforts to emphasise the extent to which their collaboration in economic and financial sanctions would inflict losses upon their nationals. This does not mean that they are not prepared to go on with sanctions. The mere suggestion would fill the statesmen of Geneva with righteous indignation. They severely condemn Austria, Hungary, Albania and Switzerland for being unwilling to become hundred per cent. sanctionists owing to considerations of trade. On the other hand, they all ask each other simultaneously "Are you going to compensate me for my losses?" The representative of Russia discovered that, keen as his country was on imposing sanctions upon Italy, it can ill afford to do without the Italian market for Russian oil. The same discovery was made by the representative of Rumania, who until now has made a valiant effort to out-Eden Mr. Eden in demanding the immediate application of the maximum sanctions. It is true that, a few days earlier, the Rumanian Government stopped the export of oil to Italy because of the difficulties of obtaining payment for earlier deliveries. This does not, however, prevent it from demanding compensation in markets or in cash for the loss that will be inflicted upon its country by the self-denial of suspending the export of oil and wheat to Italy. These are only two examples indicating the spirit that now prevails at Geneva. Judging by the statements made during the last few days, it would appear as though the whole world depended for its existence on trade with Italy, the loss of which would inflict upon the nations despair, depression, destruction, chaos and collapse.

Nevertheless, they are all ready to proceed with sanctions. All they want is someone else who would relieve them of the burden of these sacrifices. And it is hardly necessary to add that all eyes are directed towards Great Britain as the supreme source of compensation for the losses. After all, it is on British initiative that the idea of sanctions has been adopted. What would be more natural than an undertaking on the part of Great Britain to pay the cost? This, at any rate, is the view taken by Europe and to some extent by other continents.

Up to the time of writing, two concrete suggestions have been made about the method of compensation for losses. One was that markets should be created for the products which will, in future, be withheld from Italy. In practice, this means that Great Britain should, in future, buy all the Russian oil, all the Rumanian wheat, all the Jugoslav pigs, etc., etc., which have hitherto been sold to Italy. The other suggestion is for the establishment of a common fund, out of which those who will suffer unduly large losses—and who will not?—through sanctions, should receive compensation in cash. In plain English, this means that Great Britain should subsidise the countries which have declared themselves willing to collaborate with her in economic sanctions.

Whichever of the two solutions is adopted, it is evident that the full burden of economic sanctions will fall upon the shoulders of Great Britain. After all, if Great Britain buys more Rumanian wheat, she will have to buy less wheat from the Argentine, Australia or Canada. Will these countries nevertheless maintain their purchases of British goods? It remains to be seen. The result of the arrangements would be a complete reshuffling of international trade relations not only with Italy but with every country, and the country which has the most liberal foreign trade policy stands to lose the most. Notwithstanding the changes since 1931, Great Britain is still in the forefront of economic liberalism. She has no exchange clearing and cannot, therefore, compel Jugoslavia to buy more British goods in return for the increased British purchases of Jugoslav pigs. Other countries are, in this respect, in a stronger position and are both able and willing to look after their interests.

We shall witness a series of thoroughly hard bargains; and since Great Britain is keener than any other country that economic sanctions should be enforced, she will have to give way in every direction. She will, in one form or another, have to cover the losses of other countries. Who will then cover the losses of British exporters to Italy, and those of British creditors to Italy? These losses will, in all probability, be quite substantial. South Wales will miss Italian orders for coal to no slight extent. Indeed, it is estimated that the loss of these orders means unemployment for 30,000 miners. There are also the creditors to be considered. The unpaid balance owed to British exporters on the British-Italian clearing account is over £2,000,000. In addition, there is a still larger amount owed outside the clearing to British exporters of oil and other products and manufactures. There are also the outstanding Italian acceptance credits. Although, in August, most London banks cancelled these credits, it will take several months before all outstanding bills become due. The chances are that the immediate consequence of economic and financial sanctions will be default upon all these debts. There are also some Italian long-term loans held in the London market. All told, the total of British claim on Italy must be in the vicinity of some £10,000,000. Thus, if the British Government only had to compensate its own nationals for their losses through sanctions, it would have its hands fairly full. If, in addition, it undertakes to compensate the

UNCERTAINTY OF OUTLOOK

LOWER BUILDING ACTIVITY

HANDS OFF SPECULATION

By Francis Williams

City Editor: The " Daily Herald," London

(By Air Mail)

(Special for "INDIAN FINANCE")

London, Oct. 14.

With the decision to impose financial sanctions against Italy and the probability of wider economic sanctions without much delay, not only the international situation but the investment situation becomes very complicated.

It seems inevitable that in order to impart financial sanctions and to prevent the utilisation by the Italian Government of foreign exchange resources and foreign bonds, which it has commandeered from its nationals, a fairly tight control of the foreign exchange market will become necessary.

Only by such a control of all foreign exchange dealings can loopholes through which Italian funds might be transferred to League countries be blocked.

Such foreign exchange control, praiseworthy as its immediate object will be, must check international trade generally and lead probably to a general setback in markets.

Moreover, the imposition of economic sanctions, while it will not have any very serious effect on any British industries, particularly if such sanctions are restricted for the time being to a ban on imports, must create uncertainty as to the industrial outlook. Even apart from this, the position is not particularly rosy. Latest Board of Trade returns show a setback in British export trade ; and, internally, authorities in the building industry report a slowing down of activity.

One well-known brick firm privately estimates that, even on the most favourable forecast, the peak of the building activity is likely to be passed not later than February of next year. Already indeed estate companies are finding much more difficulty in selling middle-class houses. When one considers the substantial part played by building in the general economic revival in this country, a slowing down of this activity cannot but be regarded with anxiety.

On the other hand, I understand that it is extremely probable that, at the forthcoming election, the National Government will go all out for a big loan partly to finance defence measures and partly as a sop to public opinion roused by the Labour Party and by the Lloyd George New Deal proposals for slum clearance and for the assistance of the distressed areas.

Such a loan, if it comes off, would stimulate activity in the iron, steel and engineering industries and help to check the recession which would probably otherwise take place in the building industry. Expectations of a big Government loan must have a depressing effect on the guilt-edged market.

Altogether, therefore, I am afraid it is difficult to be optimistic as to the immediate investment outlook. The only thing to advise the ordinary person is to keep away from speculation for the time being and to stick to securities preferably in the heavy industries which have behind them a reasonably good dividend record.

(*Continued from page 1288*)

nationals of other countries, economic sanctions will prove to be rather a costly proposition for the British exchequer.

Will the British Government allow itself to be blackmailed at Geneva by the greedy foreign statesmen, who, while making idealistic statements about their determination to uphold the Covenant, are, at the same time, holding out their hands for *baksheesh*? The British attitude in face of the barrage of demands for compensation is significant not only from a financial but also from a political point of view. If it agrees to compensate the participants in sanctions for their losses, then it is difficult to see where the great innovation through the application of League principles comes in. After all, it was possible, in the past, to obtain support for the policy advocated by Great Britain with the aid of subsidies granted to continental Governments. In adopting this course in the present instance, the moral significance of sanctions would become considerably reduced. It is only unselfish collaboration, irrespective of sacrifices, that could produce the effect on would-be aggressors that genuine adherents of the idea of collective security are desirous of producing.

There are few discomforts so great as a leaky roof during the monsoon. You are warned to see that your roofs are fully repaired before the rains set in.

That sounds like an expensive undertaking but really it is not if you use Burn's Raneegunge Tiles. Burn's Tiles are neat, free of upkeep costs and easy to lay. They last for ages. But beware of imitations. Every genuine tile is branded "Burn," and is made at The Potteries, Raniganj.

POTTERY DEPARTMENT

BURN & CO.

12, Mission Row, CALCUTTA

PUBLICATIONS OF THE LEAGUE OF NATIONS

"BALANCES OF PAYMENTS, 1933"

Price: Rs. 4-2-0

Only existing statistical book of reference concerning international accounts (trade in goods and services, gold, long and short-term capital operations). Figures, are given for 32 countries, in the majority of cases for a series of years up to 1933 inclusive. Information is also supplied concerning outstanding international liabilities and assets. In a summary chapter the general tendencies up to September, 1934, are dealt with, special consideration being given to the effect of currency depreciation.

"ARMAMENTS' YEAR-BOOK, 1934"

Price: Rs. 13-12-0

This edition contains monographs on 64 countries, both members and non-members of the League. The information contained is derived from two sources: the communications from various Governments to the Secretariat on the occasion of the Conference for the Reduction and Limitation of Armaments and the official publications of the different countries, such as collections of laws, army gazettes, etc

"NATIONAL PUBLIC WORKS"

Price: Rs. 8-4-0

This book has just been issued by the Communications and Transit Organisation of the League of Nation and is the result of a letter addressed by the Secretary General of the League requesting various Governments to communicate to him the following particulars: (1) A brief description of the main public works undertaken since the beginning of the year 1929; (2) The principal administrative methods followed or contemplated for the execution of such work; (3) The principal methods employed for financing such work; (4) An estimate, as far as possible, of the allocation of expenditure on the execution of the possible works.

"INTERNATIONAL TRADE STATISTICS, 1933"

Price: Rs. 6-14-0

This volume analyses the foreign trade during the years 1931, 1932 and 1933 of 65 countries accounting for 95% of the total world trade. It contains more than 300 tables, which are accompanied by explanatory notes. The data it gives illustrate strikingly the great changes undergone in recent years in the composition and direction of foreign trade, and their effect in the position of the individual countries. The synoptical tables show the percentage distribution of each country's imports and exports by provenance and destination.

GREAT BRITAIN

BUDGET FORECAST

The first half-year's receipts form some sort of of a base for a forecast of the budget which Mr. Chamberlain will present next April. The prospect of a surplus, for instance, has faded almost to invisibility. The Chancellor's estimates, together with the supplementary estimates of expenditure which have so far been presented, envisaged an increase in revenue of £18,029,000 and an increase in expenditure of £35,140,772. Last year there was a surplus of £7,562,000 (excluding the £12,343,000 by which the actual cost of the debt service fell below the statutory £224,000,000; that difference is always put to debt redemption). If the budget is to balance, revenue must exceed estimate by £9,550,000 or expenditure fall short of it by a like amount. Already, revenue has exceeded last year's figure by £13,016,873. The yields from Estate, Customs and Excise duties have increased by £12,368,000, although an increase of only £,868,000 was expected on the full year. If the income and surtaxes come up to estimate—and the former has so far been surprisingly buoyant—it would appear that the estimates may be exceeded by the amount required to cover the gap of £9,550,000.

On the expenditure side, however, the position is the reverse. The supply services have cost £18,923,780 more, against an estimate for the whole year of £36,280,000. Of the extra spending, £5,525,000 is attributable to defence. The estimates provided for £15,874,000. Again, excluding the extra "dole" cost, the estimates allowed for an extra £19,206,000. Already, £12,198,780 more has been spent, which suggests that the estimates may be exceeded by as much as £5,000,000. And it must be remembered that the coming half-year is the more expensive in unemployment benefit and that there may yet be supplementaries to come, in the civil as well as in the military departments. Although, therefore, the revenue is coming in better than most people had expected, the expenditure is swelling sufficiently rapidly to cover it. Already Mr. Chamberlain is committed to the expenditure of an extra £1,500,000 next year and a reduction of £5,750,000 taxation. Total ordinary Revenue and Expenditure are as follows:—

The compelling art of coercion is very much in evidence in Wales where the Miners' Federation has called a strike at the collieries in the Rhonda district to rope in non-unionists. About 14,000 men are involved and it is expected that the strike, being of the nature of shock tactics, will be brief. About 2 per cent. of men employed at the collieries were outside the Union: the idea is to compel the collieries to remain idle until a 100 per cent. union membership is registered. The response, if that is the right word, is said to be "magnificent;" and the executive of the Miners Federation anticipate resumption of work over the week-end.

Having been shaken out of a security complex by Italy, the British lion is bestirring himself hastily. At a conference at Bournemouth, the Conservative Party, shepherded by Mr. Winston Churchill and Sir Edward Grigg, unanimously carried a resolution, calling on the Government "to repair the serious deficiencies in the Defence Forces of the Crown" and to rebuild the Navy. Mr. Chamberlain, who followed the two movers of the resolution, said that Britain must fill the gaps in her defence to make the country safe, preserve the Empire and fulfill obligations. Sir Phillip Cunliffe-Lister, Secretary for Air, welcomed on Government's behalf, the resolution to maintain the parity between Britain's home defence air force and the home air force of the strongest Western European air power. The programme which the Air Ministry was working out had been very carefully considered by the Government as being necessary, in order to meet the declared intention of the policy and anticipated programmes of other countries. If there were any change in those programmes or policies, then the policy of Great Britain would also change.

France's passivity, from the British point of view, will be quickened by the despatch of a British note, asking how far French support could be relied upon in case of a sudden attack on the British fleet in the Mediterranean. The genesis of the Note was the recent discovery at Geneva of a "gap in the Covenant." Under Section 3 of Article XVI, it is provided that members of the League should stand together and give one another mutual aid if an attack is made upon any member, after collective action had been decided upon. No such safeguard exists, however, if the attack is made before any decision upon collective action has been taken. Satisfaction is expressed in Whitehall about the French reply to the British enquiry. One or two points in the reply to the British enquiry. One or two points in the reply will need further elucidation; but apart from these, it is felt that the French Government has gone as far as could have been expected.

The employment returns for September are again good showing and they beat the record of last month. According to the Ministry of Labour returns, there were approximately 10,435,000 insured persons in employment on September 23. This was 11,000 more than a month before and 192,000 more than the previous year. There was, however, an increase of 10,646 in unemployment on the month, the numbers of unemployed persons on the register being 1,958,610, which was 1,23,377 less than a year before. The total included 1,576,425 wholly unemployed 298,845 temporarily stopped and 83,340 normally in casual employment. In August the number wholly unemployed was 1,533,259.

U. S. A.

PRESIDENT'S BUDGET HOPES

President Roosevelt's proclamation has come as a happy relief. It is important that it officially proclaims the existence of a state of war between Italy and Abyssinia and automatically puts into force an embargo on the export of munitions to the two belli-

ASIAN POLICY
STANDS FOR
LOW PREMIUMS - HIGH BONUS

Air Mail Week

gerents under the Neutrality Act. "I desire it to be understood," the President says, "that any of our people who voluntarily engage in transactions of any character with either of the belligerents do so at their own risk." This indicates American anxiety not to entangle themselves in any hostilities and also to shorten the duration of the war even if it were localised. In some quarters, it is interpreted that this is intended to aid League action. But the list drawn up containing articles on which embargo is placed is considered by others as inadequate as all articles are considered materials of war. But it is effective because Italy is a defaulter and at best she can take goods only to the extent of her bank credit which is not large.

Mr. Morgenthau is now in the south of France. The change in his original plan to stay in Spain and Portugal is attributed by officials to the President's warning to American citizens to discontinue using the steamships of any Italian line. So long as Mr. Morgenthau is absent from home, it is expected that there will be a standstill to the silver policy.

Banks are anxious to know the budget position and the anxiety to reduce their holdings or at least not to increase their holdings of bonds is evident from the fact that the National City Bank has reduced its holdings by $45,000,000.

Although bankers know that they ought not to be carrying such a load of bonds, what worries them is that President Roosevelt retains the power to devalue existing currency by a large amount. By a stroke of the pen, he may cut the weight of the dollar from 59.06 (old) gold cents to 50 (old) gold cents. There is a well-founded apprehension in banking circles that the Executive will not hesitate to exercise this power, should the President think it desirable. Naturally, currency and everything stated in terms of it, assume a speculative character. And many big bankers, who recognise the need of international stablisation, want to know something definite about the rate of stablisation, without a knowledge of which speculative conditions are the more hazardous. Banks have told the Treasury authorities that the two following conditions are essential, if the Department is to float more bonds and go on financing a deficit (*a*) conversion of the debt as rapidly as possible into long-term securities and sale of the latter to permanent investors; and (*b*) stablisation of the currency in terms of other currencies and entire abandonment of further threats of a price-raising policy and of the present silver policy. That is a tall order and there is no sort of indication that the bankers' view is acceptable to Government. Whether something is in the offing of Mr. Morgenthau's Continental excursion is yet a secret.

The pre-Italo-Abyssinian flight of capital from Europe to New York continues. The demand for dollars shows signs of forcing starling lower; but with the authorities in London holding the sterling franc rate and Austria pegging the dollar-franc exchange in the Paris market, the rigidity of sterling-dollar-franc triangle remains unshaken. Most of the £770,000 of gold sold in the London bullion market has been shiped to this country. Arrangements have also been made to import 29,700,000 dollars of gold from France; 5,300,000 from England; 2,200,000 from Canada; and 1,500,000 from India.

In an optimistic review of the 1935-36 Budget, President Roosevelt decided that output and trade are expanding and he forecasts a reduced deficit in 1936-37. He also contradicts reports to the effect that heavy increases in taxation will be required to balance the Budget and retire the public debt. After pointing out that the net deficit in 1935-36 of 2,730,983,000 dollars is due entirely to emergency expenditure and almost wholly on account of unemployment relief, President Roosevelt says: "The underlying rate of recovery points to a speedy decline in Federal expenditure for emergency activities." President Roosevelt anicipates the deficit for 1935-36 will be 300,000,000 under 1934-35, and points out that the estimates contemplate the continued collection of processing taxes.

FRANCE

LABOUR-SOCIALIST UNION

The publication of the budget figures for 1936 and the fact, that the total revenues and expenditure have been made to balance about 20 per cent. lower than in the previous, have brought to the fore the probability of a realignment in the position of the various political parties, especially those that are opposed in principle to M. Laval's policy of deflation. The first visible signs of this possible realignment is noticeable in the progress, made in the attempts to re-unite the Socialist and Communist trade union federations. The Congress of these two organisations met in joint session only last week-end, and it has been decided that membership cards, from January 1, 1936, will be distributed by the United Organisation. The issuing of membership cards is, perhaps, the easiest that can be done. There are vital differences between the two organisations, that have to be made up, if the union is to be complete. The Socialists fear that, after all, the union may prove to be anything but a reasonable contract, and that the Communist trade unionists may use the new union to their advantage in the coming elections, in spite of the Socialists' desire to keep their trade union free from politics. It is also felt that it may be found to be practically impossible for typical Socialist Trade Union leaders, like Mr. Janhaux, to work in perfect harmony with radical communists.

Air Mail Week

At the Socialist Conference, M. Janhaux outlined the famous plan of the *Confederation Generale du Travail* for economic recovery. The programme provides for a vast scheme of public works, and a complete reorganisation of the Bank of France, comprising the compulsory discontinuity of Treasury bonds; for various nationalisation schemes and for the formation of the Supreme Economic Council, working in close contact with the Government. M. Janhaux also spoke against any independent devaluation of the franc, and pleaded for an international alignment of currencies. The Communists, on the other hand, include, in their programme, a scheme for a capital levy of a drastic kind, an immediate devaluation etc. It would thus be evident that on fundamentals, there are differences that exist. As far as the Government is concerned, the potentiality of this joint organisation to oust the ministry from office, in the ensuing session of the Chamber, is at least only a probability, and until events take a more definite move, M. Laval may have nothing to be seriously up against, in his home policy.

That M. Regnier, the present Finance Minister, has been wise in estimating the 1936 Budget receipts at about 20 per cent. below those for 1935, is fully vindicated by the publication of the actual revenue returns for the current year up to date. For the past five years, scarcely a single month has passed without showing actual collections from indirect taxes below the estimates, owing to the inability of successive Finance Ministers to face the prospect of constant diminution of economic activity. The returns for August, published last week, tell the same tale, for, like the preceding seven weeks, they show the yield from indirect taxes below the estimates. In August, the deficiency is 18 per cent., and for the 8 months it is fourteen per cent. The revenue receipts for the first eight months of 1935, as compared with the corresponding figures for 1934, are as follows:—

000's omitted.

Direct taxes ...	4,274,000	−1,016,000
Registration and Stamp duties	3,507,000	− 117,000
Luxury tax	187,000	− 254,000
Alcohol and powder ...	1,994,000	+ 821,000
Cushions and Indirect taxes	10,065,000	−1,052,000
Estates	112,000	+ 13,000
TOTAL ...	20,141,000	−1,607,000

Hopes of any considerable revival in business in the autumn are faint, though a slight revival is possible, if international and internal politics take a favourable turn.

GERMANY

"NEW PLAN" IN RETROSPECT

Dr. Schacht's "New Plan," for raising Germany to the highest pitch of economic self-sufficiency, inaugurated in September 1934, has now been functioning for one year; and it is worth while reviewing the progress that the country has made under its aegis. There have been many developments, since the advent of the New Plan, in fields other than economics, among them being the rearmament programme, which necessitated fresh measures. To some extent, the progress that the nation would have made has been retarded by this military programme; for, however much attempts may be made to keep the interests of the consumers in view, a sudden heavy expenditure, that a general conscription scheme must involve, should, in the nature of things, affect the general finances. Yet the progress made is remarkable, and that this was possible, in spite of the military programme, is a matter for appreciation. For one thing, the profits of German industry have registered a substantial improvement since the low point, reached in 1932. According to a report of the German Institute of Business Research, the profits of 325 share companies, published in June last, have increased to 5.92 per cent. of the share capital, compared with only 4.37 per cent. in June 1934, and with a loss of 2.15 per cent. in June 1933. The improved results, reflected by these figures, are now supported by an elaborate investigation, of the German statistical office, into the annual results of 1024 German share companies, with a combined share capital of 8,231 million Reichsmarks. The number of companies, registering a nett profit, has advanced to 869 from 773 a year ago, whereas the companies, showing a loss, have declined from 224 to 128. Net profits of those companies, showing profits, have advanced by about 15 per cent., while the losses have declined to about one-sixth of the 1933 figure. In 1934, as in 1933, dividend payments have not increased at the same rate as the nett profit. The average dividend has only advanced to 4.24 per cent. for 1934, from 3.63 per cent. for 1933, compared with 3.42 per cent. in 1932. The number of companies, paying no dividend, has declined from 49.4 per cent. in 1933 to 38.1 per cent. in 1934. The number of companies, paying a dividend from 5 to 10 per cent., has advanced from 18.5 per cent. to 27.6 per cent., whereas those, paying more than 10 per cent., have only slightly increased from 7.2 to 7.7 per cent. The reduced dividend, in spite of the increased profit, is to be accounted for by the legislative enactments, passed some months back, as a part of the German

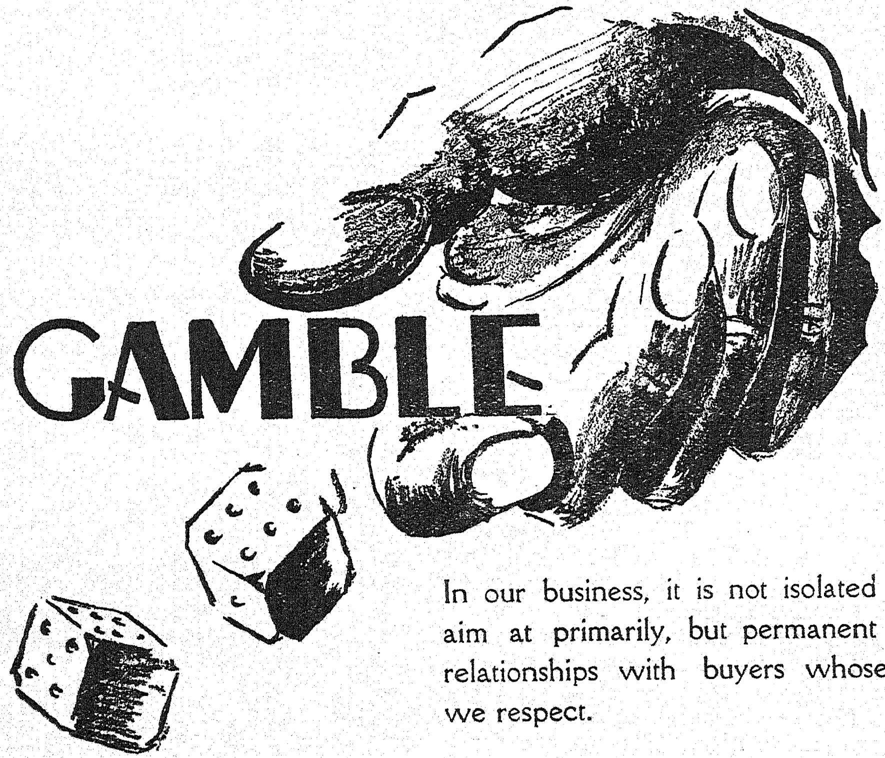
WE CAN'T AFFORD TO GAMBLE



In our business, it is not isolated orders we aim at primarily, but permanent established relationships with buyers whose judgment we respect.

That is why, as iron founders, we cannot afford to gamble on the quality of the castings we turn out. The job must be first class every time if we are to retain confidence or even justify modern well equipped foundries, trained workmen and expert supervision such as we have at our Kulti Works.

If you require castings, come to us. You can be sure we can give you complete satisfaction.

JUTE AND JUTE GOODS

JUTE

Calcutta, October 23, 1935.

There is practically no change to report in the jute market, which continues quiet but steady, with very little business. Dealers are in a disposition to await fresh developments in the political situation in Europe as the recent reports from Europe indicate a lull in the situation.

Mills are completely out of the market and foreign buyers, too, are taking little interest at the moment.

Arrivals in the up-country show very little improvement. It is reported that the total arrivals this year till now are less by 30 per cent. than those of last year. It is believed by certain people that this year's crop is late while in some quarters it is said that the present crop is really a short one. Prices in all up-country centres are steady.

In the loose jute section, sellers are showing more disposition for business, but mills are taking no interest. Prices are slightly easier and Indian Jat 4's are quoting on the basis of Rs. 5-6 per maund.

Very little business is reported in the *pucca* bales section, where the tone is very quiet. Small lots of First on the basis of Rs. 33-14 to Rs. 34 per bale and Lightnings at Rs. 30 were the only transactions of the week.

In the *Futka* market fluctuations are not wide, but the market is maintaining a steady tone. The lowest price of the week was Rs. 34-14 touched on October 17 and the highest Rs. 35-12. At the time of writing the market is quiet at Rs. 35-8.

JUTE MANUFACTURES

Calcutta, October 23, 1935.

The local hessian market has been quiet during the past week with values nominally unchanged. Business was on a restricted scale. Towards the close a steady tone is in evidence and *Fatka* is quoting at the time of writing Rs. 8-5.

North American buyers have confined their attention mostly to ready goods of which there is a great shortage at present, especially in 40″ × 7½oz. Mills are keen sellers for forward positions.

Yesterday was the last date for shipping instructions and it is expected that shipments during this month will be very satisfactory.

Business reported has been small and mostly of a covering nature. 11 Porters Ready were dealt in at Rs. 10-5 and July/Sept. delivery at Rs. 10, while Rs. 8-8 was paid for October 40″ ×8oz.

Heavy Goods are dull and inactive, and there is very little business passing. B. Twills have been done at Rs. 32-2 November, and D. W. Flours at Rs. 27-8 Jan./March. Liverpool Twills are quoted Rs. 26-8 and Cornsacks July/Sept. at Rs. 23.

Total reported sales for the week ending Saturday the 19th October, 1935.

JUTE BREVITIES

Denmark Market Captured by Great Britain.

The figures of jute and jute goods imports into Denmark during 1934 reveal that the United Kingdom has been the leading supplier for that country. Imports of raw jute into Denmark during 1934 amounted to 927,000 Kg., valued at 266,000 Kr., of which two-thirds was shipped from Great Britain, and the remainder came *via* Germany. Imports of grey jute yarns totalled 209,400 Kg., valued at 167,000 Kr., of which Great Britain supplied 120,000 Kg., while the second place was occupied by Germany who supplied 61,800 Kg. Jute binder twine imports amounted to 161,400 Kg., of which the majority was supplied by Germany. Thirty per cent. of the imports of grey sackings during the year, amounting to 3,182,200 Kg., came from Great Britain. Sack imports amounted to 1,292,300 Kg., valued at 1,128,000 Kr., of which the share of Great Britain amounted to 233,000 Kg.

Freight Charge on Jute Yarns Reduced.

Reduced rates have been introduced on the Czechoslovakian and Jugoslavian railways for jute yarns in consignments of not less than 10 tons despatched from certain Czech stations to the Jugoslavian station Mladenavac.

U. S. A. Burlap Imports.

The following table shows the imports of burlap into the United States of America from 1st January to 31st July, 1935, as compared with the corresponding period last year:—

Imported from	1935 Tons	1934 Tons
India	103,125	87,410
United Kingdom	8,501	5,301

COTTON AND COTTON GOODS

COTTON

Calcutta, October 23, 1935.

With the political tension in Europe somewhat relieved by events during the week under review, operators in the Bombay cotton market are cautious in their commitments. Business was on a restricted scale and the market has been quiet throughout the week. Prices were pushed up on 19th instant on export houses buying and the highest rate touched for Broach April/May was Rs. 217-12. A gradual decline was noticed since then, Broach April/May declining to Rs. 213-8 towards the close. Prices would have seen lower levels, but for the support of the trade purchasing at every decline.

Oomra Dec./Jan., after touching Rs. 196 in midweek, receded to Rs. 193-4 at the close, while Bengal Dec./Jan. declined to Rs. 148 towards the close from the highest rate of Rs. 150-4 touched in the course of the week.

A further set-back in cotton price has been witnessed in New York. The pending decision of the Supreme Court on the constitutionality of the A. A. A. and the processing taxes is hanging as the "Damocles Sword" over the market. The majority of the operators are reluctant to enter into any commitments and have adopted the policy of "wait and see." Though it is believed in certain quarters that the Supreme Court may turn down the processing taxes as *ultra vires,* there is another school of thought which believes that the amended A. A. A. recently passed by the Senate is capable of meeting any contingency. The recent drastic liquidation by 'longs' has considerably strengthened the technical position of the market. Heavy hedge-selling continued throughout the week causing a decline of 10 points in the spot rate. But for the support extended by Far East and Trade buying, prices would have further declined. Middling spot closed at 11.15, December at 10.78 and March at 10.70.

In Liverpool, the activity in the spot market and the remarkable strength of the Egyptian cotton were encouraging factors. The present position, regarding stocks of cotton, especially of Egyptian varieties, which are very low, is causing much uneasiness, in view of the possible interference with shipping if sanctions were introduced against Italy. Lancashire is the largest consumer of Egyptian cotton, the stocks of which in Liverpool at the beginning of the month stood at only 40,230 bales as compared with 122,000 bales a year ago. American cotton stocks amounted to 111,000 bales against 301,000 bales 12 months ago. Stocks of all cottons in Liverpool are very low at 427,610 bales as against 967,000 bales at the same date last year.

This low stock position, coupled with continued trade buying, helped prices to soar high in Liverpool in spite of the fall in other markets. Egyptian Sakel spot spurted up to 8.97 from last week's closing rate of 8.67, while Liverpool middling spot improved to 6.48 and October to 6.13. Closing rates were lower by 6 points from the above prices, while Egyptian Sakel spot closed at 8.87.

Indian Cotton Crop Forecast.

The second forecast of the cotton crop of India for 1935-36, which was issued by the Indian Central Cotton Committee, Bombay, on Friday afternoon, showed the estimated area of cotton to be 22,118,000 acres, an increase of eight per cent. over the revised estimate of the corresponding date last year.

The forecast is based upon reports which generally relate to sowings made up to October 1. On the average of the last ten years, the area reported in the second forecast has been 83.6 per cent. of the total area reported in the final (fifth) forecast.

The statement below shows the present estimates of area classified according to the recognised trade description of cotton:—

	Area in acres.
Oomras	10,400,000
Bengals	3,442,000
Dholleras	2,247,000
Broach	1,337,000
Americans	1,450,000
Others	3,242,000
Total	22,118,000

World consumption of American cotton during August 1935 has been estimated by the New York Cotton Exchange Service at 911,000 bales against 885,000 bales during July 1935 and 957,000 bales in August 1934.

PIECEGOODS

Calcutta, October 23, 1935.

The local piecegoods market was firm and active during the past week and a good business has been reported, especially in Japanese and Indian goods. Prices have made sufficient recovery from the low levels that were ruling before the holidays.
holidays.

Indian mills secured a major portion of the business. In Japanese goods dhooties and shirtings sold well at improved prices. Business in fancies was rendered difficult by the sharp rise in prices. More attention was paid to Lancashire goods and transactions on a moderate scale resulted in this section after a long time of dull conditions.

The yarn market has been firm and very good business was reported in both Japanese and Indian yarns.

The Bombay market witnessed an all round improved. The market has been very active and clearances of goods continue on a satisfactory scale. As regards Indian goods are concerned, the offtake has been very encouraging and prices have also advanced rapidly. Stocks with the mills are on the decline, the total quantity reported by the end of September being about 95,000 packages. It is reported that of this nearly 70 to 72 thousand packages are sold but undelivered goods. A further substantial reduction in stocks is expected by the end of this month in view of the very satisfactory demand at present. Dealers are hopeful of doing a large business during the Divali festivities. Negotiations are afoot for large forward business during the Moorut occasion. There has been good activity in Japanese goods also at steady rates. Prices have recovered in all styles. White shirting No. 800, 500 and 16,000 are in demand at Rs. 10-15, Rs. 11-6 and Rs. 11-6-6 respectively, while No. 7,870 mulls fetch about Rs. 4 and "Bow and Arrow" fetches about Rs. 9 a piece. British Goods, after a long period of slack demand, have improved. In bleached cloths, superior shirtings and heavy mulls have been in demand. Dhooties, printed and fancy goods and white shirting have been finding purchasers for fair retail quantities. An all-round steady feeling is in evidence in the yarn section, though activity shows a slight set-back from last week.

There was a substantial increase in the imports of both cotton yarn and piecegoods into British India during the month of August as compared with the previous month.

Takings of cotton yarn of all descriptions amounted 4.5 million lbs. as against 3.1 million lbs. in July. Imports from China rose by 1.5 million lbs. to 2.8 million lbs., those from Japan were stationary at 1½ million lbs., while those from the United Kingdom dropped by 111,000 lbs., to 693,000 lbs.

The total imports of cotton piecegoods at 78.5 million yards registered an advance of 19.6 million yards as compared with July. Sendings from the United Kingdom rose by 6.6 million yards to 39.2 million yards and those from Japan by 12.5 million yards to 38 million yards.

Imports of fents at 5.2 million yards were 800,000 yards more than in the previous month, the whole of the increase going to the credit of Japan, who sent 4.3 million yards, while the sendings from U. S. A. fell off by 30,000 yards to 427,000 yards.

BULLION

GOLD

Calcutta, October 23, 1935.

The most important topic of the week in the Bombay bullion market was the gigantic hoax perpetrated in the markets on Monday, the 21st instant, which resulted in serious financial loss to several people. It was reported that a number of European bankers and prominent brokers received a letter from Simla purported to have been issued by the Government of India, stating that the existing import duty on silver had been removed and that a duty of Rs. 10 per ounce had been levied on the export of gold. On receipt of the information considerable excitement was witnessed in the markets. The price of gold for first settlement suffered a sharp decline from Rs. 35-1-3 to Rs. 31-12-0 per tola, while silver advanced from Rs. 67-10 to Rs. 70-12. Later on, when inquiries in official circles at the Reserve Bank and Customs revealed that the alleged letter was a bogus one, prices rapidly resumed their normal levels. Gold rose to Rs. 34-14 and silver receded to Rs. 68. Several banks and speculators are reported to have plunged into heavy commitments. It is estimated that the hoax has cost the traders over Rs. 13 lakhs in the course of a few hours.

The market has been steady earlier in the week, following a decline in the cross rates. The rate for first settlement advanced to Rs. 35-1-3. The market at the close was steady, Ready and first settlement quoting Rs. 34-15, and second settlement Rs. 35-0-3.

Stocks on hand over the week-end were estimated at about 1 lakh tolas. Arrivals from upcountry continued at 10,000 tolas a day, while the offtake remained unchanged at 3,000 tolas. Shipments per s.s. *Viceroy of India* amounted to Rs. 15-10 lakhs, while total imports during last week totalled Rs. 44,825 in bar and coin.

Calcutta has also been a victim to the hoax. There was a violent excitement in the local bullion market on receipt of telegrams from Bombay regarding the imposition of export duty on gold. Panicky selling of gold was witnessed and in the course of a few minutes prices fell down from Rs. 35 to Rs. 31-8. When the truth was revealed later, prices soon rose to the normal levels. The market closed steady at Rs. 34-14.

The price of gold in London fluctuated irregularly in consonance with the cross rates. Receding to £7-1-3½ from £7-1-6, the price of gold per fine oz. went up to £7-1-7½ on 19th instant, and after again receding to £7-1-5 closed at £7-1-7.

The Sterling-Dollar and Franc rates witnessed wide fluctuations. The former moved down from 74.71 to 74.51, while the latter moved between 4.92 7/16 and 4.90 13/16.

London—Air Mail week ending October 9.

The Bank of England gold reserve against notes amounted to £193,642,833 on the 2nd October as compared with £193,572,573 on the previous Wednesday.

During the week the Bank announced the purchase of £30,433 in bar gold.

In the open market, prices have ruled at about dollar parity. Business has been active, the amount dealt with at fixing during the week being about £3,100,000, the bulk of which is understood to have been taken for the United States of America. There have also been further large shipments of gold to New York from France.

The following were the United Kingdom imports and exports of gold registered from mid-day on the 30th September to mid-day on the 7th October:—

Imports	£

SILVER

Calcutta, October 23, 1935.

The Bombay silver market has been steady during the week under review. A gradual advance in prices was noticed day by day, first settlement rising up to Rs. 67-14-0 on the 19th instant. On the following day, due to the alleged hoax the price for first settlement, after advancing to Rs. 70-12-0, closed at Rs. 68. Towards the close Ready and first settlement were quiet at Rs. 67-9, while second settlement receded to Rs. 67-14-0.

Stocks on hand remained unchanged at 35,000 bars. The daily off-take is some 5 to 7 bars, while arrivals from up-country are almost nil. Total imports during last week amounted to Rs. 1,02,426.

Excitement was witnessed in the local market on 21st instant on rumours of the abolition of the existing duty on imports of silver. The prices soon advanced to Rs. 70-3 per 100 tolaas, later receding to Rs. 67-4. The closing rate was Rs. 67-8-0.

The spot rate for silver in London was steady at 29 5/16d., while the forward rate, after receding once to 29¼d., recovered to 29 5/16d. America has been a steady buyer throughout the week, while both India and China appeared as sellers.

The New York spot rate was unchanged at 65⅜c. at which level the price has been remaining from August 16, 1935. The London-Shanghai T. T. fluctuated between 1-5⅞ and 1-5⅝.

The total exports of silver from U. K. during the week ended October 11, 1935 amounted to £1,796,000 of which £1,783,000 was shipped to U.S.A. The total imports of the metal into U. K. during the same week amounted to £1,009,000 of which £374,000 came from Japan, £20,000 from Belgium and £516,000 from Persia.

London—Air Mail week ending October 9.

Movements were slightly wider during the past week and prices showed an advance following some speculative enquiry; the advantage, however, was not maintained. There was further buying by the Indian Bazaars and purchases were made by China; the latter also sold and sales on Continental account were in evidence.

American Government purchases were limited, as on occasion demand from other quarters carried prices beyond their buying limit and there was no disposition to follow a rise.

The market has been rather more active and the tone seems very steady at about the present level.

The following were the United Kingdom imports and exports of silver registered from mid-day on the 30th September to mid-day on the 7th October.

TEA

CALCUTTA AUCTIONS

Calcutta, October 23, 1935.

The total offerings of teas for export at the auctions on October 21 amounted to 29,200 packages. The selection was representative of all districts, and quality often showed slight improvement. There was a good general demand for all descriptions at last week's rates. Except in the case of medium B. O. P's. which advanced by about 3 to 6 pies, values showed little change.

At the auctions for internal consumption on October 22, the total offerings amounted to 16,400 packages, of which 7,000 packages were of leaf and broken grades and the remainder dusts. There was a strong general demand for all descriptions and prices were fully firm to slightly dearer against last week's rates. Dusts were rather stronger.

The following are the full particulars of sale No. 19.

Teas with Export Rights.

LONDON AUCTIONS

The offerings at the London auctions for the week ending 24th October comprise 53,200 packages of Indian, 25,100 of Ceylon and 5,900 of Java teas.

Indian Tea.

The demand for all descriptions was as usual strong. The market was active for all grades and qualities and prices were steady except for slight irregularity among Assam brogens.

Ceylon Tea.

At the Ceylon sales, there was a strong demand for export types and prices for these advanced from ½d. to 1d. per pound. Good quality with strength and colour met with keen competition, but some of the thin liquoring kinds showed weakness. Tea for good prices was steady but all mediums were easier from a farthing to three farthings per pound.

Java & Other Teas.

At the auctions of Java and other teas (including Sumatra) on October 17, the total offerings amounted to 7,200 packages. The market was quieter. Best tippy teas were irregular but leaf-grades were strong and dearer.

Tea Average.

The following were the average prices of tea in the London market during the week ending Oct ber 17, as compared with the week previous :—

		Week Ending October, 10	Week Ending October, 17
Indian Tea (Northern)	...	15.63d.	15.34d.
Indian Tea (Southern)	...	12.87d.	12.79d.
Ceylon Tea	...	16.98d.	16.76d.
Java Tea	...	12.74d.	13.15d.
Sumatra Tea	...	10.88d.	11.05d.

TEA EXPORTS

The following figures of tea exports taken from the Calcutta Customs daily entries and received periodically from Chittagong are issued by the Indian Tea Association.

Quantity of tea entered for export to United Kingdom for the first half of October 1935.

Calcutta—Black 10,235,964 lbs.; Green nil.

Chittagong—Black 4,995,557 lbs.; Green nil.

Quantity entered during the corresponding period last year:

Calcutta—Black 10,325,964 lbs.; Green nil.

Chittagong—Black 6,539,169 lbs.; Green.

Total from April 1, 1935 to October 15, 1935:

Calcutta—Black 80,273,405 lbs.; Green nil.

Chittagong—Black 45,543,043 lbs.; Green nil. Total 125,816,448 lbs.

Total from April 1, 1934, to October 13, 1934. 140,123,924 lbs.

U. K. TEA IMPORTS

Imports of tea of all kinds into the United Kingdom during September compared with the previous month and with September 1934, were as follows:—

	September 1934 lb.	August 1335 lb.	September 1935 lb.
From British East Indies (except Ceylon) ...	32,473	24,300	29,730
From Ceylon	11,379	11,493	9,956
From China (including Hongkong and Macao) ...	3,029	1935	541
From other Countries ...	3,425	5,155	3,334
Total amount in stock ...	...	238,532	...

(000's omitted).

SUGAR

Calcutta, October 23, 1935.

The local sugar market has been fully steady during the week under review and prices for both Java and Desi sugar were well maintained. Regular buying orders are in evidence due to the advent of the Divali festivities. Java Refined Ready was quoted at Rs. 10-14-0 and Steamer at Rs. 10-12, while Java White Ready and First Steamer were quoted at Rs. 10-10.

Prices of Desi sugars were fully maintained. White (1st Crystal) was quoting Rs. 10-6 to Rs. 10-10, while Brown (2nd Crystal) was ruling at Rs. 10-2 to Rs. 10-8.

The market in Bombay was active and further improvement in prices were recorded in sympathy with firm Java advices and due to Divali enquiries. Demand for spot and afloat sugars was exceptionally good. Importers were able to sell about 5,000 tons November-December at Rs. 4-9 to Rs. 4-11-6, while dealers and outsiders sold about 4,000 tons. Due to heavy selling of a profit-taking nature prices declined at the close by 4 annas from the highest rate of the week.

The Nivas in Java, after selling about 30,000 tons at F. 4.20, put up limits to F 4.60. The freight rate from Java to India has improved by 50 per cent. from F 4 to F 6 per ton.

The Cawnpore market ruled quieter and rates for spot and January-March deliveries were lower by ½ to 1 anna, owing to selling by mills and profit-taking. Deshi sugar stocks are small with quotations ruling at Rs. 15-1 for Kesar and Rs. 14-12-6 for Saraya.

Arrivals.—The s.s. *Viceroy of India* brought in 1,000 tons British Refined, and the African Mail 2,500 tons Mozambique. The s.s. Sirsa is due on 25th instant with 1,500 tons Java.

Stocks in the main ports are:—

(In bags : 10 bags=1 ton.)

	1935		1934

MISCELLANEOUS

WHEAT

Calcutta, October 23, 1935.

The wheat market assumed a firm tone during the week under review and a further rise in prices was recorded in all centres. Advices from wheat growing areas indicate that new crop sowings of wheat and other foodstuffs are in need of moisture and this is expected to have an adverse effect on the outturn. The possibility of an increase in demand owing to war prospects and reports of large orders for flour estimated at 30,000 bags, having been placed for despatch from Karachi to Sudan, did also influence the bullish sentiment. Speculative purchases have been in full swing both in the local and up-country markets and a large turnover has been reported. Prices in the local market have improved, Punjab and Cawnpore Ready rising up to Rs. 3-12-6, while May Beta touched Rs. 3-10-6, but closed quiet at Rs. 3-10-0.

The Bombay market ruled strong and active. Prices were pushed up on renewed buying. Selling was almost absent and under the influence of speculative buying, the rate for Delhi-Cawnpore wheat for January delivery soared up to the high level of Rs. 5-2-0, while May contract touched Rs. 4-14-3. Towards the close, on receipt of weak foreign advices, prices have suffered a set-back the rate for January and May contracts declining by about 2 to 3 annas.

The bullish feeling was more dominant in the Karachi market, where prices advanced principally owing to good trade demand, reduced stocks, firm up-country bases and the dry weather.

MADRAS MARKETS.

PIECEGOODS

In the local bazaar, speculative activity has slackened and prices are barely steady. The off-take has been comparatively poor for the *Deepavali* season due pricipally to the restriction of credit. India Mill goods move rather more freely. A limited amount of forward business was booked during the week. There has been a re-action in the Yarn section and prices for Japanese yarns are now lower by, 2as. to 3as. per bundle. 60's Manchester are likewise easier by an anna per bundle. A little forward business has been passing in Manchester Creys, but Red yarns continue to be neglected. Indian yarns remain steady.

METALS

Owing to the fall in sterling quotations and the consequent nervousness of weak holders, the local market for Yellow Metal and Copper sheets has declined sharply and prices are now quoted at Rs. 155/- per candy of 500 lbs. for English and "Dittmann" Yellow metal sheets and Rs. 184/- per candy for Copper sheets a decline of Rs. 5/- per candy in the case of Yellow metal and of Rs. 6/- per candy for Copper sheets on the previous week's levels.

GROUNDNUTS

The Groundnut market has been very firm with prices soaring. London quotations opened on Monday last at £15/2/6 November Paid and Rs. 14/7/6 December Sellers and sharply advanced to £15/12/6 November Paid and £14/12/6 December Paid on Friday. The latest cable advice report that there are sellers for November at £15/12/6 and at £14/12/6 for December position. Shippers' buying limits are Rs. 34/10 for Ordinary per French Candy of, 531 lbs, ex-coast godowns. At Vizagapatam, shippers are canvassing November 30 delivery for Machined kernels. At Pollachi, ROSE variety Machined is quoted at Rs. 35/8 and "RED" variety Machined at Rs. 34/8, per French Candy, ex-sellers' godowns.

The Kernel freight market continues to rule very firm. A booking for early November shipment to North continental ports has been placed at 32s. 6d. per ton of 20 cwts., while a Charter is reported for November/December loading at 28s. 6d. from Madras and Coast ports to one U. K. or one Continental port. There are no further sellers of space for any position.

Arrivals of Groundnut kernels into Madras for the week ended October 19, 1935 amounted to 16,868 bags or 1,328 tons as against 15,463 bags or 1,217 tons in the preceding week and 7,450 bags or 587 tons at the corresponding week of last year.

HIDES AND SKINS

Air Mail advices from London report that although there has been a considerably better demand at advanced rates, the market has not reached the level of Madras prices. Further to this, there have been many sales of Kips by Curriers who prefer to take the profit on the Kips by re-sale rather than dress them. The latest cable advices from London state that Sellers are unable to operate owing to dressers re-selling considerable quantities of rough Kips at much below Madras market rates. There has thus been a lull at the moment in the local Tanned Cow market owing to lack of support from Home buyers. Prices on the other side are now 3d. to 3½d. higher than the minimum selling prices and there is no parity between London quotations and the price levels on Madras which are now in the region of 5d. above the minimum. Dealers have, in some cases, been forced to make some concession in prices and values have generally receded by 3 pies to 6 pies per lb. About 20,000 pieces changed hands yesterday at the lower price-level. The undertone of the market is nevertheless firm, and prices are likely to be matained. The market for Tanned Buffalo hides continues steady with good clearances. Prices of Heavy weights are, however, easier by 3 pies per lb. while Light weights show no change in value. Tanned Buff calf skins continue to rule firm with a good demand and values are maintained unchanged. Tanned Cow Calf have again advanced by 3 pies per lb. and demand continues satisfactory.

Madras Tanned Goat sales concluded on Wednesday last at 2d. above last sales closing prices. On Thursdav, Bombay Goat skins closed at an advance of 2d. to 3d. 650,000 pieces Madras Goat and 145,000 pieces Bombay Goast passed the hammer. On Friday, Tanned Sheep sales opened with advances of Id. to 2d. in the case of Madras Sheep Primes, 2d. to 3d. for Medium quality and 3d. to 6d. for common tannage. Later, there was some improvement and prices for all tannages advanced by 3d. to 6d. Tanned Sheep sales closed firm Yesterday. Madras Sheep registered an advance of 5d. to 6d.

The following shipments of hides and skins were made from Madras for the week ending October 18,1935 :—To the United Kingdom : 56 bales Raw Goats, 35 bales Tanned Buff Calf, 274 bales 113 bales Tanned Cow Calf, 22 bales Tanned Buff Calf, 274 bales Tanned Goat and 164 bales Tanned Sheep. To U. S. A. : 10 bales Tanned Buffalo hides. To Germany : 5 bales Tanned Goat. To Austria : 2 bales Tanned Goat.

(*Continued from page 1293*)

Banking Law Reform, requiring a strengthening of the Reserves.

The balance sheets of these companies reflect an improvement, owing to a revival in the German domestic industry. Current assets and liabilities in most cases have grown, mainly on account of the increase in the credits, taken by the companies, to buy goods, and in the bigger bonus, granted to the customers. Stocks of goods increased by 13.5 per cent, those of semi-finished products by 63 per cent., and raw materials by 17 per cent. The accounts of "plants and accessories," are smaller by 3.2 per cent. than last year, as a result of increased write-offs. Owing to the bigger financial needs as the result of the larger turnovers, the securities, held, have grown only 28.3 per cent. compared with 57.9 per cent. a year ago. The Institute has estimated that the industries, on an average, are working at almost 70 per cent. of the economic capacity, as against 63—67 per cent. in the first half of 1935 and about 60 per cent. in 1934. It is just a year back that Germany found herself in the throes of an acute exchange crisis, and faced extreme difficulty in securing her essential raw materials. Expert opinion both in, and outside of, Germany, freely predicted that, ere long, there would be a period of declining industrial activity and an almost complete shortage of raw materials. All this has been falsified. Industrial activity is higher than at any time last year, and with a judicious enforcement of economy in the use of raw materials, it has not assumed a first place to the exclusion of other economic problems.

And yet this is only one side of the picture. Despite this activity, the fact remains that there has been disparity in the production of capital goods and consumption goods. The official index of the production of capital goods (1928=100) was 1035 in July this year, as compared with 79.0 a year ago. Conversely, the production index of consumption goods has declined from 89.7 in July 1934 to 80.9 in July this year. And since the beginning of 1933, the agricultural price index has risen from 86.8 to 104 in August 1935. The problem of food shortage is beginning to cause some concern. Meat prices are rising again owing to shortage. But beef showed a sudden unofficial increase of over 4d. a pound, raising it to the record of three shillings a pound. Pork supplies almost disappeared over the week-end. The connection between the rearmament programme and an increased cost of living cannot be ignored.

Investor's Supplement

Vol. XVI. No. 16 FRIDAY, OCTOBER 25, 1935 Price Re. 1

YOUR INCOME FROM 52 GREAT BRITISH INDUSTRIAL COMPANIES

Do you know that by investing about £22 upwards in the THIRD and FOURTH BRITISH FIXED TRUSTS you can become part-owner of 52 GREAT COMPANIES and thus safeguard your capital by spreading it over the leading branches of British Industry?

The 52 Companies are divided into two groups or "Units"—28 in a "THIRD BRITISH" Trust Unit and 24 in a "FOURTH BRITISH" Trust Unit.

THE BRITISH FIXED TRUST Sub-Units provide investors abroad with:

(1) A SOUND LONG-TERM INVESTMENT in the form of a Bearer Certificate.

(2) REGULAR QUARTERLY DIVIDENDS collected and distributed by the Trustee.

(3) EXACT KNOWLEDGE of what they hold and its day-to-day value.

(4) A MARKETABLE SECURITY.—All the shares are quoted on the London Stock Exchange.

(5) PROSPECTS of capital appreciation and increased dividends as trade revives.

(6) SERVICES of: (a) The Trustee—LLOYDS BANK LIMITED
(b) Auditors—PRICE, WATERHOUSE & Company
(c) MANAGERS with limited powers.

Ten Sub-Unit Certificates and upwards (costing around £11) may be purchased in either of the Trusts. The buying and selling prices of the Sub-Units are based on the current market prices of the constituent shares. You may sell your holding at any time you may wish to do so. British subjects not resident in the United Kingdom holding British Fixed Trust Sub-Units are entitled to claim repayment of British Income Tax under certain conditions, particulars of which are given in the booklet.

Coupons may be presented for encashment at the current rate of exchange at the undermentioned Branches of Lloyds Bank Limited.

Write for explanatory booklet and daily quotations to LLOYDS BANK LIMITED at: Bombay, Calcutta, Karachi, Rangoon, Amritsar, Delhi, New Delhi, Lahore. Rawalpindi, Simla, Srinagar (Kashmir),

to the undermentioned Brokers:

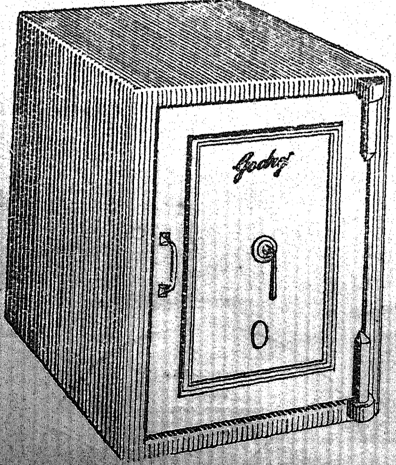
THEY CANNOT MAKE SAFES
WITH CHISELS AND HAMMERS

The proverb is that you cannot make bricks with straw. Nor can small shops make real Safes with chisels and hammers. Small hand tools and crude hand work could in no way take the place of modern machinery. Some important operations could never be performed except by machines only. Good Safes can be made only with the help of suitable and special machines.



THIS PATENT
16-CORNER-BEND

GODREJ SAFE

has no outside joints in its body or door frame. Its 16 corners are bent cold by a powerful 15 ton press.

You are always welcome at the Godrej Works and Show Rooms.

Investor's Supplement

NEMISIS FOR THE BEARS

All the markets have shown substantial recovery.

The threat of over-production in the jute industry has been offset by the prospects of war in Abyssinia. The collapse, which seemed to be unavoidable on the Bombay Stock Exchange, has been averted by the timely and courageous measures taken by Mr. K. R. P. Shroff, the President. The debacle in 3½ per cent. Rupee Paper has taken a swift contrary turn, thanks to the overdone tactics of the bears.

MARKETS STRONGER

(By Special Cable)

(By R. Gordon Cummings)

London, October 23.

Stronger tendency of markets reflects more optimistic feeling.

Caution is advisable until after election

The bears, in the case of the giltedge market, have dug their own grave. But it was up to the Reserve Bank to have cribbed, cabined and buried the bears. Had the Bank authorities acted in time and with courage, as did Mr. K. R. P. Shroff, the giltedge market would have been spared the nightmare of the past three months.

What is the position today? 3½ per cent. Rupee Paper, from a level of roundabout Rs. 90 till last week, has spurted to over Rs. 92-8. This price of Rs. 92-8 is only for delivery at the next settlement. Price for ready scrip is fully 8 annas to 11 annas higher.

A premium of over 8 annas for ready scrip is unheard of in the annals of the giltedge market.

It gives a measure of the unchecked pranks which the bears have been allowed to indulge in.

But the proverb reminds us that the longer the rope, the surer is the hanging. The bear is now being hung, unwept, unhonoured, and unsung.

A shrewd understanding of the developments of recent weeks makes out that neither the bull nor the bear has cause to feel grateful for the policy pursued by the monetary authorities. If the policy of the authorities does not commend itself to the bears, we need not worry about it. But if their policy offends and disgusts the bulls, the prospects of the subsequent new loan issues are blighted.

The truculence of the Reserve Bank has done as much harm to its own future operations as to the investors who trusted the Government and put out their funds in their securities.

We have, again and again, pointed out in these columns that it is anomolous that while all other scrips in the giltedge market have more or less kept up their prices, 3½ per cent. Paper was allowed to suffer a serious and steep retrogression.

We also pointed out, again and again, that, from a technical point of view and from the point of view of Government of India finances, the fall in 3½ per cent. Paper was unjustified.

Markets Firm

(By Special Cable)

New York, October 23.

Markets were generally firm.

American Power and Light declared 62½ cents dividend on 5 per cent. preference and 75 cents. on 7 per cent. preference.

But the Reserve Bank has been a kind of orphan all these days. Sir James Grigg and his colleagues have been far too obsessed with their own omnipotence and omniscience.

Our Simla Correspondent gives us the heartening news that Sir Osborne Smith will be back at his post by the 10th of November. The Reserve Bank will no longer be an orphan from mid-November.

We believe that this in itself is a bullish factor of great significance.

Other indications, too, are of bullish import.

But, let not the speculators overdo the bullish stunt as they did the bear stunt. It is to be hoped that the giltedged market will be of more normal tenour and bear a more healthy look in the future.

INDIA

MAMMOTH TEA CONCERN

PATRAKOLA TEA CO.

(By "Watch-dog")

At the present moment, there is a greater enquiry for tea shares; and the view is generally held that the present season would prove more favourable for tea companies as a whole than the last one. Already reports of rise in prices and increased demand at the local and London auctions are coming in; and we may expect better profits. In such circumstances, it would be advisable if investors pick up selected shares of tea companies, that is, those investors who can afford a "lock-up." The Patrakola Tea Company is one of the few big tea companies which have an excellent past record. It is under the able managing agency of Messrs. Duncan Brothers & Co.

From a glance at the table given below, it will be seen that the Company has declared 100 per cent. dividend for four consecutive years till 1927. The years 1930 and 1931 were lean years, which was not anything peculiar to this company because the tea industry as a whole suffered reverses during that period. The fact that Patrakola did not go dividendless while maintaining the carry-forward above the three lakh limit, speaks to the credit of the Company. Dividends have been fluctuating but the Company is in a position to distribute most of its profits owing to its impregnable financial position. Consequently with a rise in profits, there may be a stepping-up in the dividend.

Year Ended		Profit Rs.	Depreciation & Reserve Rs.	Carry Forward Rs.	Dividend per cent.
1924	...	20,88,127	9,65,000	6,04,907	100
1925	...	16,35,123	...	9,68,030	100
1926	...	14,47,922	...	11,43,952	100
1927	...	17,75,944	8,20,000	8,27,896	100
1928	...	10,35,821	...	8,31,717	80
1929	...	4,02,842	...	6,82,559	40
1930	...	56,850	...	4,47,409	10
1931	...	85,367	...	3,40,776	10
1932	...	4,57,044	...	4,25,819	25
1933	...	10,02,294	...	3,96,113	80
1934	...	7,80,890	...	3,88,741	55

This company has seven gardens, namely, Patrakola, Kurmah, Madabpore and Champarai in Sylhet; Rampore in Cachar; Jiajuri in Assam; and Kotamullai in Travancore. The total grants aggregate 18,260 acres.

The company also purchased in 1927, 2,000 acres of land in the Peermade District, Travancore.

The capital authorised, issued and subscribed is Rs. 24 lakhs. Rs. 12 lakhs is in 12.000 ordinary shares of Rs. 100 each, fully paid-up and Rs. 12 lakhs in 12,000, 6 per cent. cumulative tax-free preference shares of Rs. 100 each fully paid up, carrying preferential claim to repayment of capital.

In 1923, the capital of the company was increased from Rs. 18 lakhs to it's present figure by the capitalisation of Rs. 6 lakhs out of Rs. 13 lakhs standing to the credit of Reserve Fund and creating thereby 6,000 new ordinary shares of Rs. 100 each which were distributed amongst the existing shareholders in the proportion of one share for each old share held.

The total reserves are Rs. 37 lakhs, of which the Block Reserve Fund is Rs. 16.00,000 and the General Reserve Fund is Rs. 21,00,000.

Sundry liabilities are Rs. 1,93,606.

On the assets side, the gross block value is Rs. 40 lakhs. Against this, as we have indicated before, there is a Block Reserve of Rs. 16 lakhs.

Stores are valued at Rs. 1,31,986.

Outstandings are Rs. 6,89,588.

Tea sales (sold and receivable after December 31, 1934) are Rs. 6,67,826 and tea seed sales receivable are Rs. 7,888. Advances are Rs. 13,874.

Tea unsold is estimated to realise Rs. 2,61,032.

Accrued interest is Rs. 19,817.

Investments are Rs. 18,78,296. Rs. 18,77,696 are in 5 per cent. Government of India 194 -55 securities at cost to the value of Rs. 19 lakhs. The market value exceeds the book value by Rs. 3 lakhs. Rs. 600 are in 5 per cent. debentures in the Misa Gymkhana Club of Rs. 50 each at cost. The investments are a good source of revenue, accounting for nearly a lakhs of rupees every year.

The cash on hand is Rs. 2,77,629.

The total liquid assets are Rs. 29,97,315.

The outturn in 1934 was 51,251 maunds against 49,974 maunds in 1933 and the average price realised per lb. was 7 as. 6 pies against 8 as. 7 pies.

The estimate for 1935 provides for a total crop of 49,900 maunds at a cost of Rs. 12,35,851 including inland freight and sale charges.

The profits for the year ended 1934 were Rs. 7,80,890 against Rs. 10,02,294 the previous year and Rs. 4,57,044 in 1932. A dividend of 55 per cent. has been declared against 80 per cent. previously. The carry-forward is Rs. 3,88,741 against Rs. 3,96,113.

At the present price of around Rs. 794, the yield is 6.9 per cent. In view of the distinctly more favourable prospects, the yield must be deemed attractive.

BRITISH COMPANIES IN INDIA

By R. Gordon Cummings

Developments in respect of British companies operating in India are considerably greater this week than they have been for some time past. Amongst the important statements dealt with below the remarks of the chairman at the annual general meeting of Malayalam Plantations and the Burmah Oil interim dividend are of the most importance, although interest will naturally attach to the final dividend announcements of three of the Indian railway companies.

* * *

An Authoritative view on Tea and Rubber.

One of the largest companies in the tea and rubber industry is *Malayalam Plantations,* which owns extensive estates in Southern India. At the annual meeting held during the past week Mr. H. J. Welch, the chairman, ventured to forecast that in his opinion it appeared probable that prices for low and low-medium types of teas would advance still further in the near future.

In his opinion the present high stocks of the commodity were unnecessary and undesirable from the point of view of consumers, as tea now reached them at an average of 7 to 8 months after its arrival in the United Kingdom. It would be beneficial to producers, distributors and consumers alike if the bonded stock could be further reduced by about 50,000,000 lbs. The preferential duty applicable to Empire grown teas was displacing them in foreign markets. It should be removed or materially reduced.

After also dealing with the brighter outlook for the rubber industry the chairman emphasised that plantation companies operating in India were favourably placed owing to the comparatively large markets for local consumption of tea and rubber. New rubber factories had been, or were being, started by Indians and Europeans, and the company was securing its fair share of local sales without export licences.

The new National quotas for rubber exports from India which had been agreed upon would benefit the company. For instance, each penny per lb. profit on tea during the current year would equal £40,000, or 2.2 per cent. upon the capital, while each penny per lb. profit on rubber would represent about £24,000, or 1.3 per cent. upon the capital. It was gratifying to know, he concluded, that in view of the better prices now ruling for tea and rubber, that about three-fourths of the tea crop and two-thirds of the rubber crop for the current financial year of the company had yet to be realised.

Malayalam Plantations £1 ordinary shares are one of the most attractive purchases in the plantations group. On the 5 per cent. dividend for last year the yield is not very great at the current price of 30s. There is no doubt, however, that the company will do much better during the current year. There is plenty of room for appreciation to around 35s.

* * *

Burmah Oil Disappointing Dividend.

During the few days preceding the announcement the oil share market was enlivened by some strong buying of *Burmah Oil* ordinary stock, speculators having come to the conclusion that the interim dividend would be increased. Mere maintenance of the distribution at 3¾ per cent. came as a disappointment, with the result that there was a temporary set-back in quotations. The fact that the directors have not increased the interim payment cannot, however, be taken as an indication that the final will not be more than last year's payment of 11¼ per cent.

On many previous occasions I have emphasised that Burmahs were one of the finest investment stocks in the oil market. At the present time I see no reason whatsoever for changing my opinion. All being well the £1 ordinary units should soon recover from around 75s. to over 80s. Investors must remember that through their holding in Burmahs they are also interested in Anglo-Iranian Oil and Shell-Transport and Trading.

* * *

Railway Dividends.

Of the three Indian railway companies to announce their final dividends in respect of their years ended March 31st last, only one, *Bengal Dooars,* is maintaining the distribution at last year's level.

Madras and Southern Mahratta Railway is paying a final dividend of only 4½ per cent., making 9 per cent. for the year. This compares with a final of 5 per cent. and a total distribution of 9½ per cent. for 1933/34, but is at the same total rate as for 1932/33.

Including the usual guaranteed interest of 1¾ per cent., the half-yearly distribution of *South Indian Railway* is 3¼ per cent., making 6½ per cent. in all for the twelve months, compared with 8 per cent. for a number of years previously.

As indicated above, *Bengal Dooars Railway* is maintaining the annual dividend. By a final payment of 4 per cent. the year's distribution is again brought up to 7 per cent., as for the previous three years, and compared with 8 per cent. for 1930/31.

* * *

Calcutta Electric Supply Corporation.

The interim dividend on the ordinary capital of *Calcutta Electric Supply Corporation* ordinary stock is being maintained at 5 per cent. actual, free of income tax. During recent years this well-known company has made remarkable progress, and at the same time has played an important part in promoting the use of electricity in Calcutta and surrounding districts. In order to cope with future expansion the directors recently offered to ordinary shareholders approximately 180,000 new ordinary shares at the price of 45s. each. As the current market price of the old ordinary shares is well in excess of the offered price shareholders are receiving a substantial bonus.

* * *

Tea, Rubber and Coffee Results.

Annual reports of three companies operating rubber, tea and coffee estate in India are now available. These show that in the case of coffee selling prices have fallen sharply, while the average price for tea has declined. On the other hand the profits from rubber have materially expanded.

Indian Peninsula Rubber and Tea Estates owns a total area of 1,814 acres in the Madras Province, of which 326 acres are planted with rubber, 1,179 acres with coffee and 30 acres with camphor, etc. The issued capital is £71,386, in 2s. shares. Estates are valued at £15,037, while liquid assets, including £53,121 in respect of investments, totalled £60,166 at June 30th last, compared with current liabilities of £3,499.

During the year ended June 30th 1935 the coffee crop harvested was 2,342 (3,743) cwts., of which 1,115 (3,657) cwts. were sold at an average price of 56s. 4d. (71s. 2d.) per cwt. after crediting £242 (£1,078) realised on sale of investments, there was a net loss of £1,591, compared with a profit of £3,256 in 1933/34. As against 2½ per cent. a year ago there is to be no dividend this time, the balance carried

(*Continued on page 1311*)

THE WEEK IN THE EXCHANGES

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Thursday evening.

The week under review at the Calcutta Stock Exchange was almost as it was last week, with the exception of 3½ per cent. Government Papers, which remained very firm on receipt of strong London advices. The greatest sensation of the week, however, was that caused by the ingenious hoax perpetrated in Bombay by a bogus letter received by them from Simla purported to have issued by the Government of India stating that a duty of Rs. 10 per ounce was levied on exports of gold and the existing duty on silver was abolished. This had created great excitement in the bullion markets, not only in Bombay, but also in Calcutta and Madras, resulting in heavy losses to several people. This had, however, no adverse reflections on the Stock Exchange here. Jute shares as well as Coal, Tea and Sugar shares maintained their advanced rates, although transactions recorded were rather few. Money market was steady but dull, and Reserve Bank rate continued at 3½ per cent.

Government Securities.—There was much more activity in this section during the last few days, and 3½ per cent. Government Paper rose from Rs. 89-6 to Rs. 91-15 on Wednesday, closing a bit easier at Rs. 91-3. At the time of writing the rate has reached Rs. 92-6. This rise is attributed to shortage of ready scrips and a more hopeful outlook in the European political situation. Short-term Loans also came in for good demand, the most notable being the 3 per cent. New Loan 1951-54, which advanced sharply, closing at Rs. 97-7. 3½ per cent. Loan 1941 closed at round about Rs. 102, 4 per cent. Loan 1960/70 changed hands at Rs. 106-14, 5 per cent. Loan 1939-44 at Rs. 108-10 and 5 per cent. Loan 1945-55 at Rs. 117-9. 5 per cent. U. P. Bonds 1944 maintained their last week's closing rate, but towards the close eased off to Rs. 111-14.

Debentures.—Among Port Trust and the Municipal Debentures, 5 per cent. 1916-46 Port Trusts changed hands at Rs. 109-10, while 4 per cent. 1933/50 and 3½ per cent. 1935/65 Calcutta Municipals were done at Rs. 103-8 and Rs. 95-12 respectively. Sellers as usual, were scarce, which prevented dealers to close transactions, although there were quite a number of buyers. Of Industrial Debentures, 6 per cent. 1896/36 Dunbar Cottons were dealt in at par, 7 per cent. 1919/35 Gohpur Tea at Rs. 97, 5 per cent. 1935/55 Samastipur Sugars at Rs. 102-12 and 6½ per cent. 1923/53 Kalighat-Falta Railways at Rs. 102.

Preference Shares.—Demand for selected preferences continued, but not much business was recorded for want of sellers. In Jute preference shares, Clives "A" were dealt in at Rs. 135, Hukumchands at Rs. 106 (small lot) and Soorahs at Rs. 113. Amongst others, B. I. Corporations were on request at Rs. 141, Indian Standard Wagons changed hands at Rs. 124, Bengal Telephones at Rs. 14-4 and Pussimbing Teas at Rs. 98. Tezpur Teas were crossed at Rs. 10-14.

Other Investment Stocks.—The Bank shares were maintaining their improved rates, recorded last week. Reserve Banks were however fluctuating, having dropped down to Rs. 119-12 on Monday, but closing firm at Rs. 122-8 on Wednesday. Imperial Bank Fully paids closed as high as Rs. 1,480, and Contributories at Rs. 370. There was good support for Railway shares, but the volume of business transacted was very small. Bukhtiarpur-Bihar Railways were dealt in at Rs. 59/-, Chaparmukh Silghats at Rs. 86 while Sara Serajgunges were crossed at Rs. 93. In Shipping Companies I. G. N. were a shade easier, than last week, having closed at Rs. 98. Of the Insurance Companies, Concords after some time were dealt in at Rs. 11-9 prem.

Cottons.—Cotton shares were a bit easier this week in sympathy with a decline in raw material values. Kesorams closed at Rs. 3-7, New Victorias at Rs. 1-5, and Dunbars at Rs. 118. Reports from well-informed circles indicate that the last named Company's position is very strong and the scrip would prove a profitable levy at current rates. Bengal-Nagpurs also came to business at the lower rate of Rs. 14-6.

Coals.—Prices of last week were maintained in this section, although business done was on a limited scale. Bengals were dealt in at Rs. 257, Burra Dhemos at Rs. 3 and Equitables at Rs. 35-8.

Jutes.—There was a tendency on Saturday (October 19) for the prices to sag, but as the session progressed, this was arrested in sympathy with steady commodity market, and at the time of writing Howrahs are quoted at around Rs. 51. Kamarhattys after having dropped down to Rs. 504, recovered, and closed on Wednesday at Rs. 510. Clives were steady at Rs. 26-12, having dropped down to Rs. 25-12, and Nationals changed hands at round about Rs. 22-9. Anglo-Indias and Ballys attracted some attention, the former having been reported likely to declare a dividend of Rs. 15 and the latter at Rs. 6 ; the rates for these closed at Rs. 424 and Rs. 202 respectively. Gourepores were dealt in at Rs. 662, Hukumchands at Rs. 11-6 and Kanknarrahs at Rs. 425-8 (small lot). Rameshwaras came to business after a long time at about Rs. 10.

Electricals.—Not much change was noticed in this section. Dacca Electrics were wanted at Rs. 18-10, Bhagalpur Electrics were dealt in at Rs. 8, Rawalpindis at Rs. 20 and U. P. Electrics at Rs. 157.

Engineerings.—As the session progressed, less support was given to Bengal Irons and Indian Irons, the former having dropped down to Rs. 3-13 and the latter to Rs. 8-10. Kumardhubi Engineering, which on Monday were crossed at the high rate of Rs. 3-10, also lacked support, and after being dealt in at Rs. 2-14, closed at Rs. 3. Burn & Co. changed hands at Rs. 227-8 and Marshalls were almost maintaining their old rate around Rs. 1-3.

Sugars.—An all-round improvement on last week's prices was recorded, Balrampurs having gone up to Rs. 18-8 against Rs. 17-8, Murree Breweries to Rs. 177 from Rs. 170 ; Samastipurs were maintaining their old rate of Rs. 8-12, and Razas were dealt in at Rs. 112.

Miscellaneous.—Bengal Papers changed hands at Rs. 99-8, Titaghur Papers at their last week's rates of Rs. 22-12 (ordinary) and Deferreds Rs. 9-8. India Paper Pulps were a shade easier, being quoted round about Rs. 180, but it is anticipated in bazar circles that their dividend will be increased from 4 per cent. to 6 per cent. this half-year. Of others, B. I. C. closed at Rs. 3-13. If sanctions are enforced against Italy and woollen goods are not imported from that country, there is a likelihood of these shares going up, as one of the Woollen Mills in Cawnpore is under their management. Burma Corporations were dealt in at Rs. 7-12 and Indian Wood Products were crossed at Rs. 20.

Teas.—An unchanged market is reported with very little doing. There were buyers of Bishnauths at Rs. 28, Dimakusi at Rs. 26-2, Hattikhiras at Rs. 25-12 and Teloijans at Rs. 6-8. East Indias were dealt with at Rs. 12 and Tezpurs closed at Rs. 10-6.

BOMBAY STOCK EXCHANGE

(By Wire)

(From our Correspondent)

Thursday evening.

Money Market.—Money continues easy with inter-bank call quoting at ¼ per cent.

Exchange.—This section was steady with banks selling T. T. at 1s. 6 7/64d. October-November; 1s. 6⅛d. December-March 1936; 1s. 6 7/32d. April; and 1s. 6 3/32d. May-December. Banks were buying three months bills at 1s. 6 7/32d.

Securities.—On reassuring speeches by Sir Samuel Hoare and Baldwin, London Giltedged Market firmed up and our rupee security market moved up remarkably with 3½ per cent. Paper up from Rs. 90 to Rs. 93. Medium and short-dated loans have also moved up. 1941 Loan closed at Rs. 102-4; 1951/54 at Rs. 97-6; 1947/50 at Rs. 103-6; 1943 at Rs. 107-2; 1960/70 at Rs. 107; 1955/60 at Rs. 113-12; 1939/44 at Rs. 108-10; 1940/43 at Rs. 109-10; 1938/40 at Rs. 108-11; 1945/55 at Rs. 117-6; and 6½ per cent. Bombay Development at Rs. 100-1.

Shares.—Sentiment has been bullish and the market has been healthy. Steels are doing exceedingly well. All other sections have improved and closed at highest for the week.

Textiles.—Further rise is possible, but we recommend profit-taking in view of the fact that mills are working with very little margin of profit and uncertainty of the results of the deliberations by the newly set up Tariff Board to enquire into the duties on Lancashire import. Bombay Dyeing closed at Rs. 765; Central India at Rs. 256-4 ex-dividend; Century at Rs. 231-14; Colaba at Rs. 138-12; Gokak at Rs. 175; Kohinoor at Rs. 197-8; and Swadeshi at Rs. 160.

Hydro-electrics.—The firmness in security market and better tone in other sections had the desired effect and the shares closed strong, with Tata Power at Rs. 1,476-4; Andhra Valley at Rs. 1,575 and Tata Hydros at Rs. 161-4.

Steels.—This had a rapid rise on bull support. Tata Ordinaries touched a high level of Rs. 143 as against Rs. 137 in the beginning of the week and Deferreds touched Rs. 560. Though closing slightly lower with Ordinaries at Rs. 140-12 and Deferreds at Rs. 547-8. Tata Second Preferences were firm at Rs. 151-8.

Cements.—Though easy in the beginning, cements firmed up at close. We favour purchases of Bundi, Katni Deferred and Okha. Bundi closed at Rs. 35-10 after touching Rs. 36; Gwalior at Rs. 113-12; Indian at Rs. 471-4; Katni Deferred at Rs. 2,150; Ordinary at Rs. 367-8; Okha at Rs. 261-4; Punjab at Rs. 23-14; Shahabad at Rs. 483-12; and United at ws. 124.

Miscellaneous.—Bombay Burmahs closed at Rs. 363-12; Belapur Sugars at Rs. 331-4; Bombay Steams at Rs. 288-12. We advise liquidation of Bombay-Burmah, Belapur and Bombay Steams at current levels. Bombay Telephones are quoted at Rs. 100-8; Bombay Trams at Rs. 143-12 ex-dividend; Burmah Petrols at Rs. 3-13-6. Scindiahs were steady at Rs. 12-15. Premier Constructions were better at Rs. 76-8.

Banks and Isurance.—The section was better on improved outlook in the giltedged market with Reserve Banks higher at Rs. 124. Imperial fully paids were quoted at Rs. 1,472-8; and partly paids at Rs. 362-8. Barodas closed at Rs. 96-12; Centrals at Rs. 34-4; Bank of India at Rs. 121-8; and Unions at Rs. 5-4-6.

In the Insurance section, New Indias closed at Rs. 38-12; Orientals at Rs. 4,150 and Vulcans at Rs. 7.

MADRAS STOCK EXCHANGE

(By Wire)

(From Our Correspondent)

Wednesday evening.

The week under review was erratic in securities generally with a higher tendency on account of the favourable turn in the political situation and easy money conditions. The difference between the London market and Bombay has been narrowed and a further rise appears to be not improbable. A large business passed in 3½ Government Paper. 4 per cent. 1960/70 Loan rose to Rs. 107/2; 5 per cent. 1945/55 improved to Rs. 117-5 and the 3 per cent. New Loan was first quoted at Rs. 97-2 and later at Rs. 97-6. 3½ per cent. 1947/50 which suddenly came into favour closed at Rs. 103-6. Medium dated Loans, while remaining unchanged, had several good buyers with little scrip offering. Business was completed on a satisfactory scale. 5 per cent. Cochin Loan was appreciably higher at Rs. 108-8 and looks a better purchase than Mysore Loans at the moment. Mysore Loans with the exception of 6¼ per cent. and 6½ per cent. came in for a fair enquiry. 5½ Mysore Loan was in good demand and the price rose to Rs. 107-8. The demand for Corporation Loans remained unsatisfied, whilst amongst Joint Stock Company debentures Pankajas were taken at par and Nilgiri Neerugundis at Rs. 102. Business was also done in Cochin Malabars at Rs. 105. The Tata Preference Share market was also active and Tata Second Preferences were done at Rs. 151-8. Vasantas improved to Rs. 106-8 and Spencers 'A' were done at Rs. 10-8.

Banks.—The bank shares were firmer. Imperial Bank fully paids closed at Rs. 1,480 and the Contributories at Rs. 365. Reserve Banks noted several deals between Rs. 120 and Rs. 121-8. A solitary deal was reported in Bank of Hindustan at Rs. 30-8 with sellers over. Indo-Commercial Banks had good buyers. Quilon Banks were done at Rs. 26-4 with nothing offering by buyers. Travancore Nationals were quoted at Rs. 54-8.

(Continued on page 1336)

THE NUDDEA MILLS CO., LTD.

NOTICE

Notice is hereby given that the Half-yearly General Meeting of Shareholders will be held at the Registered Office of the Company, No. 2, Fairlie Place, Calcutta, on Tuesday, 12th November, 1935, at 12-10 p.m. in order to receive and pass the Directors' Report and Accounts for the half-year ended 30th September, 1935, declare a Dividend, and transact any other business that may be brought forward.

The Share Transfer Books of the Company will be closed from the 30th October to 12th November, 1935, both days inclusive.

Holders of Scrip under blank transfer are reminded to send in their Shares for registration in the Books of the Company as soon as possible but not later than 29th October, 1935. Unless permanent instructions for disposal have been given to the undersigned, Dividends will be paid to registered Shareholders only upon application by them or their duly authorised Attorneys.

By Order of the Directors,
BARRY & CO.,
Secretaries & Agents,
THE NUDDEA MILLS CO., LTD.

CALCUTTA,
23rd October, 1935.

MARKETS QUIET

TIN SHARES PROMINENT

By R. Gordon Cummings

By Air Mail

Special for "INDIAN FINANCE"

London, October 14th, 1935.

The past week has witnessed a steady upward movement in almost every section of the Stock Exchange. Business, although still disappointing, has shown definite signs of expansion, buyers being attracted partly by what is considered cheap prices, and partly by the somewhat over-exhuberant optimism of many market operators.

While the public is certainly taking more interest in markets a large part of the buying has been on professional account. Prices at the close are if anything easier.

Apart from minor reactions the gilt-edged market has steadily risen. Rises, however, are not spectacular and at the time of writing the tone is if anything somewhat uncertain. *War Loan* closes at $103\frac{5}{8}$, $2\frac{1}{2}$ *per cent. Consols* at $82\frac{1}{4}$, $3\frac{1}{2}$ *per cent. Conversion* at 103 and *Local Loans* at $91\frac{1}{2}$. *India Loans* have been firmer at rising prices, the $3\frac{1}{2}$ per cent. being 93, the 3 per cent. $79\frac{1}{2}$, the $2\frac{1}{2}$ per cent. $68\frac{1}{2}$, the 4 per cent. 105, and the new 3 per cent. 3 discount. *British Municipal* and *Colonial* loans have improved in sympathy with the general trend.

With the Italo-Abyssinian dispute now definitely settled for the worst interest in the loans of countries not directly connected with the fighting has steadily expanded. There has been a substantial recovery in *German* and certain other European stocks, while *Brazilian* loans have continued to improve. *Chinese* and *Japanese* bonds have been well bought.

Business in the Home Railway market has kept comparatively small, but prices have risen in sympathy with the more encouraging weekly traffics. Attention has been mainly directed to the senior stocks, and in particular to *Southern Railway* issues. *Great Western* is now 46, *London Midland and Scottish* 18, *London and North Eastern* second preference 20, *Southern* deferred $19\frac{1}{4}$, and *Southern* preferred $76\frac{1}{4}$. *London Transport C.* stock has recovered to 99. Foreign rails have been very dull, with Argentines again weak.

Outstanding movements in the Industrial and Miscellaneous markets have been in armament and shipping shares. Interest in Textiles is steadily broadening, but Breweries are somewhat below the best. On cessation of some recent liquidation shares of the leading Tobacco companies have improved.

Prices of the leading issues are: *Associated News* 24s. 9d., *Boots Drug* 47s. 9d., *British Aluminium* 42s. 6d., *Associated Cement* 57s. 9d., *Amalgamated Metal* 25s. 3d., *Dunlops* 35s. 6d., *Eastwoods* 53s. 9d., *Fairey Aviation* 27s., *Hawker Aircraft* 32s., *Imperial Chemical* 34s. 9d., *London Brick* 79s., *Radiation* 68s., *Salt Union* 40s., *Tate and Lyle* 82s., *Turner & Newall* 56s., *United Molasses* 18s. 6d. and *Electric & Musical Industries* 25s. 3d. In the Tobacco group, *Carreras A.* are $7\frac{7}{8}$, *British-American* $5\frac{5}{8}$ and *Imperial Tobacco* $6\frac{7}{8}$.

Textiles have been bought on the assumption that the Government will shortly do something to assist the industry and that Italian imports will diminish. *Coats* are 62s., *English Sewing Cott* 42s. 3d. and *Calico Printers* 8s. 3d. The Rayon market was enlivened by the *British Celanese* preference dividend announcement (discussed below). *Courtaulds* have risen to 53s. 9d. and *British Celanese* second preference to 21s. 9d.

Following earlier activity at rising prices the iron and steel market has now settled down to comparative quietude. All the same prices are well maintained, *Allied Iron* being 38s. 3d., *Baldwins* 8s. $4\frac{1}{2}$d., *John Brown* 19s. 3d., *Guest Keen* 32s. 6d., *Hadfields* 19s., *Imperial Smelting* 15s. 6d., *Staveley Iron* 48s. 6d., *Stewarts & Lloyds* 32s. 6d., *Richard Thomas* 9s. $1\frac{1}{2}$d. *United Steel* 32s. 6d. and *Vickers* 19s. Interest in shipbuilding shares has continued. *Swan Hunter* finish firm at 26s. 6d. and *Hawthorne Leslie* at 20s. 3d.

Electrical equipment shares have advanced in places and kept firm elsewhere. *Associated Electrical* are 35s. 3d., *British Insulated Cable* 87s. and *General Electric* 62s. 6d.

A considerable broadening of interest has taken place in shipping shares, where some useful rises from depressed levels have been seen on buying brought about by the recent improvement in freight rates. The outstanding movement has been the appreciation of several shillings to 19s. in *Peninsular and Oriental* and a rise to 17s. 9d. in *Furness Withy*.

Although there was a temporary reaction following the *Burmah* interim dividend announcement, oil shares have moved to higher levels and have provided a number of firm features. *Attocks* have provided the main feature with a rise of 3s. to 15s. 6d. on rumours of favourable developments.

Rubber shares have responded to the sharp rise in the commodity, while Teas have recovered earlier losses.

Amongst the mining markets Tin shares have been notably prominent, both as regards a big increase in public interest and the greatest proportion of substantial rises. This group has fully reflected the sharp increase in the price of the metal, discussed later. One of the outstanding features has been a big demand for *British Tin Investment Corporation* 10s. shares which have spurted to 14s. Other outstanding movements include a rise to 8s. 6d. in *Associated Tin Mines of Nigeria* and a strong demand for the shares of the leading Eastern companies, such as *Siamese Tin* and *Tronoh*.

Copper shares have also been better with the Rhodesian issues in prominent demand. Base metals responded to the improving outlook for the various commodities.

In the gold mining markets Kaffirs have received more attention and have maintained a very cheerful tone. Several West Africans have recovered, while Australian mining shares are being picked up by far-seeing speculators. *Commonwealth Mining* have recovered to 11s. 9d. and *Great Boulder Mining and Finance* close at 3s. 6d.

Stock Markets and Sanctions.

It has been evident for some time that stock markets were only awaiting a definite political lead, either adverse or promising. Continued uncertainty has always been one of the main bug-bears, and whatever the outcome of any major developments, it has usually been found that operators, and often investors, vent their relief by a strong buying movement.

The Italo-Abyssinian affair has proved no exception to the general rule. While hostilities were in abeyance prices kept on drifting to lower and lower levels. But once it was known that war had actually been declared there was an immediate influx of buying orders, resulting in a complete reversal of the previous tendency. As usual many stocks overshot the mark and subsequently reacted to a more normal level.

After several days of actual warfare it is now possible to come to some more definite opinion on the general outlook for stock markets.

With its usual disregard of possibilities and reactions the Stock Exchange chose at first to ignore the probable effect of Sanctions. Even the most conservative of members argued that the only thing to take into account was the immediate limitation of war to the two countries involved. Sanctions would look after themselves.

It is now being realised, however, that the full imposition of Sanctions will almost certainly lead to a disorganisation, possibly only temporary, but all the same actual, in international trade. As one of the leading manufacturing companies in the world Great Britain will suffer from any slowing up of the international exchange of goods. She will also be affected indirectly through a decline in the demand for her services on the "invisible" side, in respect of banking, insurance and other financial services.

We can look, therefore,, for a slowing up of demand for, if not a reaction, industrial shares. This will in all probability only be temporary, but all the same uncertainty will continue while Sanctions are effective. Favourable news of British trade developments have continued for some time with the result that they provide an accumulating store of bullishness. Their effects will not, however, be felt until there is more confidence in the International outlook.

That there must be some outlet for speculators has been amply evidenced by the revival of interest in gold-mining shares and the sharp rise in tin and other base metal issues. Speculators will, however, soon rush to cover on any signs of adverse developments. Hence, these markets are at the present moment in a somewhat vulnerable condition. Providing everything goes well rises will continue ; but purchasers at the present stage must be prepared to take up their stock and to hold it through thick and thin for the next six months.

Recovery in Steel Output.

Production of steel in Great Britain during the month of September rose to the highest level achieved since October, 1929. Output of 855,900 tons was 96,000 tons higher than in August last, while it compared with only 734,700 tons in September, 1934.

On the other hand production of pig-iron declined by 13,800 tons to 529,600 tons. Compared, however, with September, 1934, output was 29,300 tons better.

In normal times excellent figures such as these would have been immediately reflected in sharp upward movements in the prices of steel shares. The only effect this time has been a mere maintenance of prices. All the same investors should not overlook the fact that the iron and steel industry in this country is continuing to expand at a highly gratifying rate. Favourable trade news from other sources and a clearer view of the political outlook would soon serve to throw into the limelight the statistical improvement in this most important industry.

On various sides I hear the opinion ventilated that there is now little to go for in steel shares. I cannot subscribe to this absurd theory. In my opinion the steel share market still provides one of the best and safest investment medium in the whole of the Stock Exchange. This, I am sure, will be amply proved by the results of most companies for the current year.

Investors, and speculators, need have no hesitation in buying *United Steel* £1 ordinary, *Guest Keen* £1 ordinary, *Baldwins* 4s. ordinary, and *Staveley Coal and Iron* £1 ordinary shares. They can also safely retain *John Brown* and *Hadfields* for higher prices.

Home Railway Sentiment Improving.

After a steady run of disappointing traffics the revenues of the Home Railway companies took a decided turn for the better during last week, the aggregate "takes" of the four main lines being £84,000 more than in the similar week of last year. This increase was well spread, passenger traffics accounting for £43,000 of the total and goods traffics for the balance of £41,000. Of the individual lines the *London, Midland and Scottish* was far and away the best with an increase of £37,000, while the *Great Western* netted only £12,000 more than a year ago.

Junior stocks made a moderate response to the better statistical position. Until, however, the wages uncertainty is cleared up and the House of Lords has made its decision on the forthcoming rating appeal of the Southern Railway, it would be hopeless to expect any spectacular recovery in prices.

The *Southern* rating appeal has been postponed until the end of this month. Although it would be foolish to make any definite statement on the possible outcome of this important case, I venture to forecast that it is likely to be favourable. Should this supposition prove correct the railway companies will save annual sums which should go a long way towards meeting the extra cost likely to fall on revenues from the eventual restoration of the workmen's wages cuts.

I view the outlook with equanimity and strongly advise holders of railway stocks to see matters through. If they have plenty of courage they should buy on every reaction.

Important Industrial Announcements.

That the internal trade of this country is being maintained, and even increased, is clearly evident from the steady flow of satisfactory company reports and dividend announcements. Several of these have appeared during the last week.

From the Midlands area, which district succeeded in maintaining a high degree of prosperity throughout the slump, there are two companies which have done better during their financial years ending the beginning of August. The directors of *Serck Radiators,* manufacturers of motor-car and aeroplane radiators, etc., are not only maintaining the dividend at 10 per cent., but they are increasing the bonus from 2½ per cent. to 5½ per cent. Moreover, these distributions are made on an ordinary capital increased last year by £30,000 to £150,000 through the issue of a share bonus.

Profits of *Thomas Smith's Stamping Works,* manufacturers of radiators, etc., rose by £4,348 to £13,830. After an interval of four years the £250,000 ordinary capital is restored to the dividend list with a payment of 6 per cent.

Babcock and Wilcox, the famous boiler makers and engineers, are maintaining the interim ordinary dividend at 4 per cent. Although the market was disappointed with the distribution I confidently feel that profits for the current year will record a substantial increase over those of 1934.

In the flour milling industry the dividend on the 5s. ordinary shares of *Ranks* is being made up to 15 per cent. by a final payment of 12 per cent. This is at the same annual rate as for the first financial period of the company as a public concern.

The final ordinary dividend of *United Dairies,* which is responsible for a large proportion of

London's milk supply, is again to be 7½ per cent., making a total of 12½ per cent. for the twelve months to June 30th last. As the capital was increased last year by a 10 per cent. scrip bonus it is evident that profits have expanded.

British Celanese Preference Dividend Arrears.

A full year's dividend is to be paid on the 7 per cent. first cumulative preference shares of *British Celanese,* the big rayon manufacturing company. This will bring matters up to April 30th, 1934, leaving only 1½ years' arrears outstanding. During this year alone three years' dividend arrears have been paid on the £2,000,000 first preference capital.

I fully expect that payments will be brought up to date within the next few months, thus clearing the way for paying off the large accumulated arrears, now equal to 8s. 3d. per share, on the second preference capital. The annual report for the year to June 30th last, which is shortly due, will, I am almost certain, disclose a big improvement in trading profits. It is generally felt that the directors will soon decide on the policy to adopt for getting rid of the second preference arrears and of initiating dividends on the ordinary capital.

Although I originally recommended *British Celanese* second preference shares at around 15s., I later advocated the taking of profits at over 20s. Since then the shares have been up to almost 25s. and back to 20s. In view of recent developments I have revised my opinion. The shares should be worth buying again at 22s. for recovery to anything over 25s.

Improving Prospects for Rubber.

Recent developments in the rubber industry have lead to a more confident feeling in trade circles. Until recently the Dutch-Indies Government had not adopted a very constructive policy. After a considerable period of dilatoriness it has now, however, taken strong action with a view to remedying one of the bugbears of the market—exports of native rubber. Not only has Government decided to buy up 20,000 tons of rubber, but it has also increased the export duty to a level which should effectively keep down exports to a fair level.

The immediate effect of these announcements was a sharp rise in the commodity, which is now 6¼d. per lb., compared with almost 5d. per lb. some months ago.

A steady increase in the price to over 7d. per lb. can be anticipated. Many of the leading companies now working on a basis permitting them to pay reasonable dividends will thus be enabled to increase their profits.

Once again I have no hesitation in advising immediate purchases of leading rubber shares, such as *Rubber Plantations Investment Trust* £1 ordinary, *Anglo-Dutch Plantations of Java* £1 ordinary, *London Asiatic* 2s. ordinary and *British Rubber Estates of Java* 2s. ordinary.

What is the Outlook for Tin?

All through the troublous times since I first drew attention to the attractive lock-up merits of tin shares, I have not lost my faith in the eventual recovery in market prices. I am sure that readers who acted on my earlier advices will have had some nasty things to say about my optimism. I only hope that they have had the courage to see matters through, for at the present time most of my original selections are showing reasonable profits with prospects of rising still further.

The position in the metal market is serious. The price of tin has been rushed up in a few days by over £20 to £248 per ton. Stocks in this country and abroad are only a small proportion of annual demands, and unless something is done to ease the position the price of the metal may rise to a fantastic level or the International Tin Committee will have to take immediate and drastic action by again increasing the output quotas.

From what I can gather part of the rise in the metal is due to speculative buying on behalf of a group anxious to see the share market on the upgrade. Hence, a technical reaction in both the metal and the share markets can be expected.

As the long term outlook is promising, even with the metal at only £220 per ton, I would have no hesitation in again buying shares on any material set-back.

Three days ago I was asked to give some suitable recommendations. In reply I pointed out that almost any tin share was worth buying, but of those listed on the London Stock Exchange the most promising were *British Tin Investment Corporation, Siamese Tin, Associated Tin Mines of Nigeria* and *London Nigerian Tin.*

An Authoritative View on Tea Shares.

Considerable interest has been aroused in the City by an article appearing in to-day's *Financial Times* on the outlook for tea stocks and prices. As this article was written by one of the leading experts, Mr. Louis G. Stephens, the Editor of the *Tea Share Manual,* the views expressed therein are worth serious consideration.

Mr. Stephens points out that "the Tea share market has been rather more active during recent weeks, with a fair rise in some shares, particularly those of the companies which have been securing high prices for the quality teas which have been put up for sale. It is thought that even better conditions would have been experienced but for the general lack of interest in all markets, due to the political situation.

"In considering tea shares at the present time, a good deal of caution is advisable. Past earnings and profits are not of necessity a reliable guide as to earnings under present conditions. Costs in many cases have risen, and will remain at higher levels, especially if the estates are to be kept in a good state of cultivation.

"Under restriction the reduction in crops makes for a higher ratio of expenditure. *Taken on the whole, there is scope for a recoveryy in share values,* especially if the anticipated improvement in the statistical position is realised, and it can be demonstrated that the restriction scheme is capable of fulfilling the purpose for which it was intended."

Market Pointers.

Activity in shipping shares has expanded following an increase in freight rates and a demand for laid-up ships. The improvement may continue for some time, but I expect an eventual reaction.

In the gold-mining markets there has been some very good buying of *Klerksdorp Consolidated* 5s. shares, which are now 5s. 6d. bid. They are bound for higher levels.

At long last *Atta Gold* have recovered sharply to well over 4s. on encouraging development cables.

I look for expanding interest and rising prices amongst Australian gold shares. *Commonwealth Mining* should be held, while *Great Boulder Mining and Finance* should be bought at 3s. 6d.

WALL STREET IN AIR MAIL WEEK

MARKETS STILL HESITANT

GOOD RISE IN COPPERS

By F. Rocke.

By Air Mail

Special for "INDIAN FINANCE"

The political situation continues to hamper business on Wall Street and there was a certain amount of hesitancy in evidence. The stocks that were likely to be benefitted as a result of war improved. Chemicals and Aviation shares were the leaders. Copper shares were strong on the strength of the export price and the expected advance in the domestic price. Rails were lower on decreased carloadings. Utilities were steady to firm. The market seemed to be little affected by the war material embargo announced by President Roosevelt on Monday night. The week closed strong on the speech made by Mr. Gay, the President of the Stock Exchange, regarding credit inflation. The statement caused a wave of buying as the majority of speculators believed that the necessary preventive steps would not be taken for some months.

On the bond market, Treasury bonds and other Government obligations were steady. Italian bonds were better.

Rails were low, at the beginning of the week on decreased carloadings which was due to the strike in the coal industry. Later, however, they steadied up on improved individual carloadings.

Oils were featureless.

The daily average production of crude oil in the United States in the week ended October 5, was 2,719,600 barrels, against 2,763,000 in the previous week, according to the figures of the American Petroleum institute.

Gasoline stocks in the United States on October 5, totalled 42,372,000 barrels.

Copper shares were active during the week. A rise in the price of copper from 9c. to 9¼c. a pound was announced on Monday.

Domestic Copper sales over the week-end amounted to 23,244,000 lbs., bringing the total for the month up to October 7, to 34,942,000 lbs.

Owing to indications of a sustained pressure of demand for both domestic and foreign copper another ¼ cent increase is expected in the near future.

An issue of 4½ per cent. Debentures of Anaconda Copper Mining Co. is expected next week at 98½ to yield 4.6 per cent.

Utilities were steady to firm. The Securities and Exchange Commission has issued rules relating to the registration of holding companies under the Public Utility Act and also regulations for filing applications for exemption from the provisions of the Act.

A complete reorganisation of the Associated Gas and Electric Co., is under way, with the ultimate purpose of bringing this complicated organization down to one or two holding companies.

The year ended June 30 last resulted in a loss of $302,542 for Utilities Power & Light Co., against a profit of $456,685 in the previous year.

According to *Iron Age* steel mill activity for the week was at 52 per cent. of capacity against 52.5 per cent. the previous week. Demand from the automobile industry has improved but not enough to offset a reduction in sales to other users.

The President of the U. S. Steel Corporation estimates steel ingot output this year at 32,000,000 tons against 19,273,357 tons actual in 1934. If this estimate is to prove correct the monthly output in the last four months of this year must be 2,750,000 tons against 1,581,440 in the same period of 1934.

Motor shares were rather quiet and hesitant on the widespread rumour that the prices of Ford's new models would be reduced by 10 per cent.

Nash Motors have declared their regular quarterly dividend of 25c. In the quarter ended August 31, there was loss of $161,878 against a loss of $628,517 a year earlier.

Cadillac, a General Motors Unit, has substantially reduced the prices of all its 1936 models.

The sales of General Motors Corporation by dealers to purchasers in the United States during September totalled 66,500 cars compared with 127,350 in August.

General Motors foreign sales in September were 22,909 units an increase of 33 per cent. over September 1934.

Business Pointers.

Freight car loadings in the week ended September 28, totalled 630,800 cars according to the American Railway Association. This is 76,800 tons lower than in the previous week and 13,800 tons lower than in the corresponding week last year.

Power output in the week ended October 5, totalled 1,863,483,000 killowatt hours, an increase of 12.3 per cent. over the same period last year.

Brokers' loans fell $54,000,000 in the week ended October 9, to $825,000,000.

October 12, 1935.

(*Continued from page 1305*)

forward on profit and loss account being reduced from £1,910 to £318. Standard production of rubber for the year 1935 has been fixed at 75,121 lbs.

Gudalur (Nilgiri) Tea and Coffee Estates owns a total area of 1,215 acres in the Nilgiri Hills. The planted area is 830 acres, of which coffee accounts for 490 acres and tea 340 acres. In addition to the issued capital of £40,000, in £1 ordinary shares, debentures outstanding are £10,000, while there was a loan of £13,661 due by the company on June 30th last. Estate account, etc., stands at £35,293, while liquid assets of £3,571 exceeded creditors by £2,290.

Crops harvested during the twelve months to June 30th 1935 were: Tea, 88,464 (75,794) lbs.; Coffee 2,774 (1,228) cwts. Realised prices averaged 8.95d. (9.76d.) for tea and 54s. 5d. (70s.) for coffee. Owing to the larger coffee crop the net loss has been reduced from £2,260 in 1933/34 to £797. Adding this to the balance brought forward there is a debit of £7,869 to carry forward on profit and loss account.

Ceylon Land and Produce owns estates having a total area of 7,647 acres in Ceylon and Nilgiri. The cultivated area is 6,551 acres—tea 3,106; rubber 2,790; coffee, cocoa, etc. 655. Including £50,000 in 6 per cent. preference shares the issued capital is £191,000. Estates, etc. are valued at £323,533, but against this there is a general reserve of £141,000.

During the year ended June 30th last the tea crop of 1,286,146 lbs. (1,478,883 lbs.) realised an average of 11.21d. (12.27d.) per lb., while the rubber crop of 486,040 lbs. (375,427 lbs.) brought an average of 5.21d. (4.07d.) per lb. The net result was a profit of £6,582, compared with £15,775 in 1933/34. No interim payment was made, but a final of 2½ per cent. is now forthcoming, on the ordinary shares leaving £6,594 (£6,537) to carry forward. Including a 2½ per cent. interim the total distribution for the previous year was 7½ per cent.

FOREIGN GOVERNMENT BOND TRUST

The Foreign Government Bond Trust was formed in April, 1934, to enable investors to effect diversification over a large range of foreign bonds, and secure an excellent income yield, together with prospects of good capital appreciation.

The varying conditions of the Foreign Bond Market and the problems of redemption dates and drawn Bonds make a Fixed Trust in Foreign Bond impracticable. The Foreign Government Bond Trust combines the advantages of the Fixed and Management Trusts.

The Trust has a published panel of over 100 Bonds. Not more than 5 per cent. of the Trust's funds may be invested in any one Bond within the panel.

The basis of operation is a Trust Deed between the Managers of the Trustee, Lloyds Bank Limited.

Certificates of part ownership of the Trust property, called Bond-Unit-Certificates, are issued by the Trustee in "Bearer" form in convenient denominations of 10 Bon-Units upwards, with coupons attached payable 1st April 1st October.

There are so uncalled liabilities whatever attaching either to the underlying Bonds in the Trust or to the Bond-Units themselves. All the Bonds are dealt in on the London Stock Exchange.

The Bond-Units prices are quoted daily in the Press and reflect the value of the Trust's assets from day to day.

The third income distribution of 5d. per Bond-Unit tax-free was declared payable 1st October.

The distribution covers a period of six months to 6th September, and is derived from the interest received on the Foreign Government bonds selected from the list of 117 bonds in which the Trust is permitted to invest. The distribution for the corresponding period last year was 5d. for the initial five months, and 6d. on 1st April for the half-year.

The Trust has now been in operation for 17 months. The present half-yearly distribution gives a gross yield equivalent to £5-7-6d. per cent. annum on the initial issue price of 20s. per bond-unit, and £5-17-6d. for the 12 ronths.

THE GOURIPORE CO., LTD.

NOTICE

Notice is hereby given that the Half-yearly General Meeting of Shareholders will be held at the Registered Office of the Company, No. 2, Fairlie Place, Calcutta, on Tuesday, 12th November, 1935, at 12 noon in order to receive and pass the Directors' Report and Accounts for the half-year ended 30th September, 1935, declare a Dividend, and transact any other business that may be brought forward.

The Share Transfer Books of the Company will be closed from the 30th October to 12th November, 1935, both days inclusive.

Holders of Scrip under blank transfer are reminded to send in their Shares for registration in the Books of the Company as soon as possible but not later than 29th October, 1935. Unless permanent instructions for disposal have been given to the undersigned, Dividends will be paid to registered Shareholders only upon application by them or their duly authorised Attorneys.

By Order of the Directors,
BARRY & CO.,
Secretaries & Agents,
THE GOURIPORE CO., LTD.

CALCUTTA,
23rd October, 1935.

BOURSES IN AIR MAIL WEEK

Paris.

The Bourse continued to be dominated by the political situation. Activity was on a restricted scale and even the little improvement that was gained earlier in the week owing to a more favourable attitude taken by operators regarding the political situation was lost. Rentes were weaker and Industrials also lost some ground. Internationals were better under the lead of Suez Canal shares though even these were slightly easier towards the close.

On the Coulisse, greater activity was witnessed and some gains were recorded in both diamond and gold mining shares. De Beers preferred rose to 1,030.

	Oct. 4	Oct. 7	Oct. 10
4½% Rentes, 1932 "A"	86.05	87.35	86.25
4½% Rentes 1932 "B"	87.10	88.40	87.40
Banque de France	8,900.00	9,050.00	8,925.00
Credit Foncier de France	3,055.00	3,095.00	3,090.00
Suez Canal Shares	16,860.00	17,220.00	17,270.00
Thomas Houston	138.00	141.50	136.50
Chargeurs Reunis	132.00	127.00	130.00

Rand Mines	558.00	564.00	566.00
Sub-Nigel	903.00	915.00	915.00

Berlin.

The strength in evidence in the various sections of the Bourse during the first half of the week gave place to an undecided tendency. During the early days of the week an alround improvement was recorded gains being noticed in most sections. Electricals advanced under the lead of Siemens, Industrials under the lead of Farbenindustries and Minings under the lead of Harpeners. After a two days' relapse there was a more cheerful sentiment prevalent on the last day.

	Oct. 4	Oct. 7	Oct. 10
Reichsbank	171.00	172.50	172.00
Farbenindustrie	148.75	151.10	150.50

COMPANY REPORTS

REWA COALFIELDS LTD.

Report for the half-year ended June 30, 1935.

The working for the half-year shows a gross profit of Rs. 1,66,298-3-10.

To which has to be added:

	Rs.	A.	P.	Rs.	A.	P.
The amount brought forward from last half-year				16,966	8	9
Managing a total of				1,83,264	12	7
After providing for:						
Depreciation	44,336	4	0			
Reserve for taxation and Managers' commission ...	29,912	4	0			
General Reserve	25,000	0	0	99,248	15	2
There remains a balance of ...				84,015	13	5

Which the Company recommends should be dealt with as follows:—

	Rs.	A.	P.
In payment, on application, of a dividend of annas eight per share, or at the rate of 10 per cent. per annum, free of Income Tax	67,500	0	0
Leaving to be carried forward ...	16,515	13	5

Output and despatches of all grades of coal for the past three half-years compare as follows:

Half-year ended	Net Output Tons	Despatches Tons
June 30, 1935	150,512	150,676
Dec. 31, 1934	136,193	136,126
June 30, 1934	124,373	127,026

Demand for Burhar coal continues to be satisfactory and the colliery is working to full production.

Offtake from Umaria Colliery is below capacity and working days are regulated to meet orders on hand.

During the half-year Burhar Colliery was honoured with a visit from H. H. the Maharaja of Rewa who displayed a keen interest in the working of the colliery.

Directors.—Messrs. H. D. Townend, P. C. Chaudhuri, E. L. Watts, B. N. Zutshi and Brajendra Nath.

Managing Agents.—Messrs. Shaw Wallace & Co.

INVESMENT BREVITIES

The gross profit of the Rewa Coalfields for the half-year ended June 1935 are Rs. 1,66,298 against Rs. 1,34,941. The amount set aside for depreciation is Rs. 44,337 against Rs. 42,050 and the amount set aside for depreciation is Rs. 25,000 against Rs. 20,000. The dividend is annas eight per share against annas six and the carry forward is Rs. 16,516 against Rs. 16,967.

* * *

The profits on revenue account of the Gopalichuck Coal Company Limited is Rs. 18,319 against a loss of Rs. 481 previously. The debit balance carried forward has been increased from Rs. 3,50,212 to Rs. 4,03,735.

* * *

The profit on revenue account of the Waverely Jute Mills Company Limited for the half-year ended July 1935 is Rs. 1,73,208 against Rs. 1,88,210. The debit balance carried forward is lower at Rs. 3,39,047 against Rs. 4,45,037.

* * *

The profit on revenue account of the Alliance Jute Mills Limited for the half-year ended July 1935 is Rs. 3,36,470 against Rs. 3,39,605. The amount set aside for depreciation is Rs. 1,50,000 against Rs. 1,25,000 and the dividend is 8 per cent. against 10 per cent. The carry forward is Rs. 54,532 against Rs. 58,246.

* * *

The profit on revenue account of the Craig Jute Mills Limited for the half-year ended July, 1935, is Rs. 1,49,423 against Rs. 1,41,682. The debit balance carried forward is reduced to Rs. 3,51,851 from Rs. 4,34,115.

(*Continued from page 1307*)

Public Utilities.—In this section the Vellore Electric Corporation Limited declared on the 22nd instant an *ad-interim* dividend at the rate of 5½ annas per share free of Income-Tax compared with 5 annas free of tax for the corresponding half-year in 1934. The shares were firm at Rs. 14-12 *cum-dividend.* West Coast Electrics were popular and were several times transacted at par and at Rs. 10-2 *cum-dividend.* Rangoon Electric Tramways were in demand at Rs. 25-12 *ex-dividend* with nothing offering at this price. Madras Telephones were steady with no interest displayed. Local cotton shares were active with a rising tendency. Buckingham and Carnatics jumped to Rs. 215 whilst Bangalores have buyers at about Rs. 137-8. Gokaks after touching Rs. 185 reacted to Rs. 173-8 closing at Rs. 177-8. Vasanta Ordinary shares were firm and were taken up at Rs. 111 with probable buyers over. The other Coimbatore Mills shares can also be placed if sellers appear. Cambodias were done at Rs. 13-4 and Pankajas at Rs. 100.

Sugar.—Sugar Shares were dull with the exception of isolated enquiries for Mysore. India Sugars had several sellers at Rs. 7.

Cement.—In this section Indian Cement closed at Rs. 465.

Miscellaneous.—This section was most lively with several deals reported in Tata Ordinary shares between Rs. 130 and Rs. 143 and in the Deferreds between Rs. 490 and Rs. 540. Burma Corporations were also better at Rs. 8-4. Spencer Ordinary was done at Rs. 8; Cochin Malabar at Rs. 2-1; and Highland produce at Rs. 15.

LONDON STOCK EXCHANGE ......

The general tone on the Stock Exchange was definitely better and an alround improvement in prices was witnessed. Owing to renewed investment demand giltedged were quoted higher. 3½ per cent. Indian Stock 1931 was at 93½, 4½ per cent. 1958/68 at 113, 4½ per cent. 1950/55 at 108½ and Consols at 83 3/8, 3½ per cent. Conversion at 104¼, War Loan at 105 and Victory Bonds at 113. Among other sections, Oils were quoted higher, Anglo-Iranians being at 65s. and Venedeulas at 38s. 9d. Among Minings, Nundydroogs were higher and Kaffirs were very steady. Teas remained unchanged and Rubbers recorded some advances. Among Industrials tobacco shares were prominent.

NEW YORK STOCK EXCHANGE

The market was generally firm. American Power & Light has declared 62½ cents dividend on 5 per cent. Preference and 75 cents on 6 per cent. Preference.

Banking business of every description transacted on terms which may be ascertained on application.

M. V. WILSON
General Manager.

Martins **SUGGEST**

that there is great scope in Calcutta for the development of the Modern Service Flat. This type of residence, which has taken the world by storm, undoubtedly solves the living problems of thousands pof semi-well-to-do people temporarily settled in big cities. They would be very pleased to co-operate in any enterprise that proposed putting up a block of flats to be an outstanding architectural landmark in Calcutta.

Calcutta, Friday Evening.

There is no change to report in money market conditions. Super-abundant credits are available at ½ per cent. both in Calcutta and Bombay, with borrowers evincing no interest. It is generally believed that the present slack monetary conditions will continue practically right to the end of the year. Considerable sums are being released in November on account of the redemption of the Bombay Development Loan. The off-take in Treasury Bills is well within the capacity of the market, especially when it is remembered that the Imperial Bank has, by virtue of its large cash balance, to rely largely on Treasury Bills for earning some measure of return on its idle funds. While the Imperial Bank by itself is in a position to absorb Treasury Bills for anything like Rs. 20 crores, the weekly sales of Treasuries for Rs. 2 crores can cause no squeeze in the market for money. Due to the sharp decline in the average rate of accepted tenders in earlier weeks, the discount in respect of last week's sales of Treasury Bills showed an appreciable rise to Rs. 1-2-3 per cent. per annum. There has now been a reaction in the present week. Applications on October 29, came to the lagre amount of Rs. 4.08 crores as compared with Rs. 2.96 crores on October 22. The average rate of accepted tenders was Rs. 1 per cent. as against Rs. 1-2-3 last week.

For our part, we would not like to see any further reduction in the rate. The problem in connection with Treasury Bills is not only that the Government should be able to secure their short-term needs at favourable rates, but that the Treasury Bills should enjoy general popularity and play a prominent part in the fluidity and resilience of the money market. Unduly low rates for Treasury Bills might, on a superficial view, suit the Treasury; but such rates tend to lessen the interest of banks in short-term Bills. It is to be hoped that with the return of Sir Osborne Smith, steps will be taken to create in India a Treasury Bills market comparable to what is in existence in London. Should the Reserve Bank authorities succeed in creating a market of this kind, the volume of the floating debt can be kept at a much larger figure; and the rates at which Treasury Bills are sold from week to week will prove a truer index of intrinsic monetary conditions. There is all the greater urgency to tackle the problem of Treasury Bills as trade bills are conspicuous by their sparsity. The consolidated statement of Scheduled Banks issued every week affords impressive evidence in regard to the paucity of trade bills. The total bills discounted in India by all the Scheduled Banks put together are no more than Rs. 2.30 crores. On October 18, bills discounted were shown at Rs. 4.48 crores. The sudden drop of Rs. 2.18 crores is explained as being due "to one of the Scheduled Banks having, in error, included their investments in Treasury Bills under this head in their weekly statements in previous weeks." The total trade bills of Rs. 2¼ crores amongst all the Scheduled Banks must be considered a poor record. It need only be added that more than half of this total is accounted for by the Imperial Bank which has in its trade bills portfolio Rs. 1.28 crores.

The Reserve Bank elections come off on November 12; and proxies are to be lodged early next week. It was pointed out in *Indian Finance* last week that the Bank authorities must be prepared to supply information about the registered numbers of shares when the shareholders apply for this information. The entire situation in this regard was fully examined; and it was suggested that as shareholders were deprived of the valued privilege of examining the share register during the last few days before the closing of transfer books, the denial of information about share numbers at the present stage would seriously prejudice the efforts of the candidates for election to the local boards. We are glad that this question has been taken up by the President of the Southern India Chamber of Commerce who has sent the following telegram to the Governor of the Reserve Bank:

> "The decision refusing access to the share register to the proxy-holders is both unfortunate and unfair. It imposes a severe handicap on the candidates, infringes voters' right and is open to strong public criticism. Pray reconsider and issue immediate instructions to the Bank authorities to fill in the share numbers if access is not to be allowed."

We understand that this matter has occasioned serious complaints. We also understand that some of the members of the Central Board of the Reserve Bank are themselves in favour of the Bank giving the information asked for. We cannot understand why the Bank authorities are refusing to comply with so simple a request. Obstinacy in this matter will put them in an altogether unsatisfactory relationship with those who are to be members of the local board shortly. Even if, according to the strict letter of the law, the Bank is not bound to give information, is it at all prudence or policy to stand on strict formalities? If the Bank persists in this attitude, anything like a thousand votes will be rendered null and void in each of the five areas. This is not a development which the Bank authorities should like to cause by their refusal to listen to appeals made from influential quarters.

The giltedge market has been gathering strength throughout this week; 3½ per cent. Rupee Paper touched Rs. 93-12 at one stage. Further rise was arrested by the reported sales of ready scrips from special quarters. We do not know how far this report about such sales is to be believed. Even if this be true, we cannot see any objection to the authorities having intervened for the purpose of regulating the rise. There has been far too steep a rise; and at the rate at which the market was advancing, another unhealthy position like that of a few weeks ago might have been built up. What is needed in the giltedge market is the prevalence of steady conditions. We are prepared for the launching of open market operations when prices show a hectic rise just because we urge the initiation of open market purchases when prices show undue sagging. The bears had certainly overdone the trick. The difference between ready scrip and forward delivery was as much as annas 8 at one time, that is, annas 8 premium for ready scrip for fourteen days. This showed the extent to which the bears had gone. Since the reported sale of ready scrip from special quarters, the premium on ready scrip has disappeared. The price of 3½ per cent. Paper has also suffered a retrogression. At the time of writing, the price is Rs. 93. From all indications, the market seems to be headed for a rise. Nevertheless, utmost caution is required to ensure that no unhealthy speculation sets in. It is also important to remember that this is the month during which the General Election in England is to take place. It is not exactly a bullish factor in the giltedge market in London. As rupee securities have been prone to follow the price of sterling securities, the bearing of General Election on security prices must never be lost sight of throughout this month.

The exchange market has been dull all through the week. On the weekly sterling tender day, the Reserve Bank received applications for £1,075,000 at 1s. 6⅛d. Applicants received allotment on the basis of 93 per cent. That, in a week during which the rupee-rate ruled dull, the Bank was able to get Councils for the full amount of £1 million, must be due to bills in respect of gold exports.

The closing rates are: 1s. 6 3/32d., T. T. up to a year ahead; 1s. 6⅛d., was available for January/March T. T. though this was not an open rate.

Bills may be quoted: 1s. 6 7/32d., for any position.

Money was in plentiful supply, with lenders over at ½ per cent.

Firms' money for call, three days' notice, seven days' notice and term deposits for onemonth, twomonths and threemonths quoted ¾ per cent.; fourthmonth deposits quoted 1 per cent.; and twelvemonth deposits 2 per cent. to 2¼ per cent.

SAVINGS

It may not be easy to save money at the present time, but it is even more necessary than in the past.

A convenient method of preparing for the payment of periodical demands for such purposes as holidays, insurance premiums, income tax, passages, medical expenses and school fees is to open a SAVINGS BANK ACCOUNT with Lloyds Bank and to place a small sum away regularly.

Interest is allowed at the rate of 2½% per annum. WITHDRAWALS CAN BE MADE BY CHEQUE.

Branches in the East:

Thursday Evening.

Both the sterling-dollar and sterlin-franc rates have pursued an even tenour during the current week. This is, however, the kind of calm which conceals the numberless and more or less violent eddies below. There are various factors at work, whose effects and counter-effects seem to produce a measure of balance, though, in the main, such balance as obtains must be deemed to be due to the activities and operations of the Controls on the two sides of the Atlantic. The seasonal pressure on sterling has not yet come to an end. The kaleidoscopic changes in the European situation and the attitude of the several countries to Sanctions are largely calculated to favour a flight from all currencies to the dollar. All currencies include, of course, sterling. The British Control has had to intervene actively and for substantial amounts. In the earlier period, the intervention of the authorities took the form of sales of francs. This seems to have caused embarassment to the French authorities. A change of tactics has been the result ; and the British Exchange Equalisation Account has now been selling gold. In broad terms, the difference between the sale of francs and the sale of gold by the Control is that, on the one hand, sale of gold can be carried out with more secrecy than the sale of francs, as the City interests have now, by their experience of the past few years, become experts in tracing the 'hidden hand' whenever the Control intervenes in the exchange market ; and that, on the other, sale of gold is not as effective a weapon for the purpose in view as sale of francs. It is beleived that the new technique has been mastered by the Control with rapid and facile ease.

Meantime, the American authorities are by no means willing to allow all this influx of funds into New York, to strengthen the dollar. Towards this end, America has been buying gold wherever it is possible to buy gold and importing it. American purchases of silver which are reported to have been heavy in the last few days are also intended to arrest the appreciation of the dollar. The task of the American authorities has been made more difficult because the flight to the dollar is not only a result of the war portents in Europe but also the natural development flowing from the steadily appreciating security values in New York. Details of American gold imports since September 1934, are taken from the *Economist* of October 19, and reproduced below.

Gold Imports into the United States

	July	16
	September	152†

* Export.
† Provisional figures.

This means that America has imported no less than 1,200 million dollars of gold between October 1934 and September 1935. The imports of gold in October 1935 have been equally heavy. So far as gold movements are concerned, it seems to be a one-way traffic—from all over the world to New York. Mr. Henry Morgenthau, in a Press statement issued from Paris, was particular to stress that all the gold that has flowed into America would amount to less than the gold mined in the year ; and that the gold stocks in the Central Banks of the world have not been, in any way, adversely affected. It is pointed out that though the favourable trade balance of U. S. A. was only 29 million dollers in the first six months of 1935, gold imports dur'ng this period came to $802 million and silver imports to $79 million. It is obvious that the imports of precious metals are not due to merchandise surplus but to the invisible items. According to the estimates of the Department of Commerce, there has been a net influx of $100 million of long-term funds and $560 million of short-term funds into America. Be this as it may, it would be idle to expect that a currency can be kept at a deliberately lower and silver imports to $79 million. It is obvious that level by the continued acquisition of vast quantities of precious metals from abroad.

Meantime, the extremely artificial position of sterling is emphasised by these developments. That sterling is definitely overvalued in relation to the dollar, admits of no doubt. That sterling will go down sooner or later is the opinion held in authoritative circles. But it is difficult to gauge the immediate or near future of the course of sterling as the factors at work are controlled by powerful Exchange Equalisation Accounts. It is reported, during the current week, that Mr. Morgenthau, while in Paris, assured the Bank of France that there would be no further devaluation of the dollar. And the message adds: "If the rumour is true, it means that foreign exchanges are virtually stabilised, with America preventing sterling from depreciating while the British Control Fund will prevent any appreciation." Natural forces are against the maintenance of sterling-dollar rate at the present parity.

TREASURY BILLS

Tenders for 2 crores of three months' Treasury Bills were opened on Tuesday, October 29. The total amount offered was Rs. 4,08,00,000. Tenders at Rs. 99-12-0 per cent. were allotted approximately 98 per cent. Lower tenders were rejected. The total amount accepted was Rs. 2 crores, the average rate of accepted tenders being Re. 1 per cent. per annum.

Tenders for Rs. 2 crores of three months' Treasury Bills will be received on Wednesday, November 6. Successful tenderers should make payment on Thursday, November 7. Other conditions are as usual.

During the week ended October 25 bills for Rs. 44,50,000 were renewed in favour of the Issue Department of the Reserve Bank.

STERLING TENDERS

On Wednesday, October 30, tenders to the amount of £1,075,000 at 1s. 6⅛d. were received and were allotted approximately 93 ner cent.

£1 million will be offered on Wednesday, November 6. Successful tenderers will have to take delivery of the allotments on Thursday, November 7.

The total amount of sterling purchased by the Reserve Bank of India during the week ended October 25 was £1,000,000 at 1s. 6⅛d.

OUR BALANCE SHEETS TELL THE TALE

Founded in the wake of Swadeshism, the "NATIONAL" of Calcutta has grown from strength to strength with the result that it is to-day one of the leading Life Offices of the East. During nearly thirty years of buisness-building it has been able to accumulate assets worth more than Rs. 2,50,00,000 despite the fact that within so short a period a sum exceeding Rs. 1,30,00,000 has been paid away by way of Claims to the Policyholders and their beneficiaries. These are facts which merit the earnest consideration of those who do not want to gamble with the savings of a life-time. Why not yours?

You have only to let us know your requirement and leave the rest to us.

PROGRESS OF INDIAN INSURANCE

The Government Actuary's annual review of insurance companies operating in India has just been released to the press and affords good grounds for satisfaction and ample material for sad thought. There must be satisfaction because Indian insurance companies have certainly been making good headway; and there must be disquietude because the very success of these companies has led to a large mushroom growth, which threatens the life and vitality of the healthier concerns. It is in respect of life business that Indian offices have forged ahead in sturdy style. In regard to general insurance business, foreign companies have still a considerable pull. This should not, however, be construed as a disheartening feature. For, except for Triton Insurance Company and Clive Insurance Company, there were hardly any Indian composite insurance companies till the end of the second decade of this century. Which means, that with regard to fire, marine, accident and other general business, indigenous ventures came into the field only a decade and a half ago while Indian life offices have been transacting business for over half a century. There are nearly a dozen companies which have been writing life business for over 25 years. It will thus be seen that in regard to life business, Indian enterprise came to the field much earlier and has, therefore, succeeded in winning larger grounds. Considering that, so far as general business is concerned, the Indian companies have been operating for a decade and a half, the progress so far achieved must be considered extremely satisfactory.

* * *

Moreover, life insurance business is secured by an appeal to the sentiment of the middle-class educated community while general business is under the patronage of hard-headed businessmen to whom lucre has more value than patriotism. Nor should it be forgotten that, in such industrial cities as Calcutta and Cawnpore, the bulk of the available general insurance business is in the hands of European managing agents who have yet to realise their duty to Indian banks and Indian insurance companies. The only exception, which has come to our knowledge in this regard, is that of Andrew Yules who hold an agency for Jupiter General Insurance Company. And we understand that the Birds are shortly taking the chief agency for the New India. These are, however, exceptions which prove the rule that the entire business of the jute mills and Clive Street companies is more or less outside the influence of indigenous insurance companies. Taking all these factors into account, we should find all the greater reason for satisfaction at the gains so far won. The figures for general insurance business in respect of Indian and non-Indian companies are contained in the following extract from the report of the Government Actuary:—

> "The net Indian premium income of all companies doing insurance business other than life assurance during 1933 was Rs. 2½ crores, of which the Indian companies' share was Rs. 71 lakhs and that of the non-Indian companies Rs. 179 lakhs. The total amount composed of Rs. 128 lakhs from fire, Rs. 42 lakhs from marine and Rs. 80½ lakhs from miscellaneous insurance business. The Indian companies received Rs. 30½ lakhs from fire, Rs. 6¾ lakhs from marine and Rs. 33¾ lakhs from miscellaneous insurance business."

It will thus be seen that the Indian companies are now getting 30 per cent. of the total general insurance business in the country. There is, no doubt, room for further considerable expansion. In fact, it is the legitimate claim of Indian companies that they should get a lion's share of the business that is forthcoming in India. There are over half a dozen Indian composite companies which are to-day in the position to offer service and security comparable to that of any foreign company. Some of the Indian companies have begun to operate under a system of merger for branch purposes. By this and other means, it is to be hoped that the share of Indian companies will show steady increase. But no progress worth the name can be achieved unless the European industrialists in India are made to realise that their continued non-operation with Indian companies is not playing the game by a country from which they have extracted onerous safeguards for their own interests. The shareholders in the concerns under the managing agency of foreign firms must bring pressure on the authorities to divert a portion of the insurance business to Indian offices.

* * *

Turning to life business, it is a more cheerful record. The figures for the life insurance business transacted by Indian offices and non-Indian offices are detailed in the following extract:—

> "The total new life assurance business (excluding business on the dividing plan) effected in India during the year 1933 amounted to 183 thousand policies, assuring a sum of Rs. 33 crores, and yielding a premium income of Rs. 1¾ crores, of which the new business done by Indian companies amounted to 155 thousand policies assuring a sum of Rs. 24 crores and having a premium income of Rs. 1¼ crores. The share of the British companies in respect of new sums assured is Rs. 3½ crores, of the Dominion and Colonial companies Rs. 5 crores, and of the single German company nearly Rs. ½ crore. The average sum assured under the new policies issued by the Indian companies is Rs. 1,555 and under those issued by non-Indian companies Rs. 3,120."

It is a matter for gratification that while the total life business was Rs. 33 crores, Indian companies secured Rs. 24 crores, that is, 73 per cent. of the total. The progress which Indian offices have been making is indicated by a comprison of their proportion of business to total business in 1933 with the proportion of their share in the total life assurance business in force in India. The total life assurances effected in India and remaining in force at the end of 1933 were Rs. 193 crores, of which the share of Indian companies was Rs. 114 crores or 59 per cent. This proves that, in earlier years, foreign companies had a bigger share in Indian life business. Though, Indian companies are thus gaining ground and are now able to cater to 75 per cent. of the requirements of the country, it is to be regretted tha the position in the insurance world is far from healthy. In regard to general insurance business, the system of clandestine rebates is rampant despite tariff regulations and so-called surveillance by the Insurance Association. Some of the more prominent members of the committee of the association are themselves guilty of this pernicious practice. What can we expect of the humbler members? Competition is marked by insane and unprofitable methods; and the authorities of the association have to devise methods which will be more strictly fool-proof and knave-proof. As for life business, the scramble for business is even more disgraceful. There is hardly any decorum or etiquette as amongst the companies in the matter of employing agents who have left the service of one company, exchange of medical reports etc. Business at any price seems to be the vogue. The cost of procuring business seems to be a secondary consideration. This cut-throat competition is primarily due to the numberless new companies which have sprung into existence. *Indian Finance* has, over the past seven years, uttered repeated warnings that legislative steps should be taken to prevent the starting of mushroom companies. Our warnings have not been given heed to. It is to be hoped that the Commerce Member will pay greater heed to the gravity of the situation as expounded by the Government Actuary in his last report. His remarks in this regard must occasion serious misgivings and call for immediate action:

> "With the exception of a few of the oldest companies which have been transacting business for over 25 years, a large number of companies of over 10 years' standing have not yet been able to pay any dividend to their shareholders. The advent of a large number of new companies has resulted in intensifying the struggle for existence and forcing up expenses to uneconomic levels. Most of the companies of under 20 years' standing have not yet secured a footing and the indiscriminate flotation of new life assurance companies will not be conducive to the best interests of the enterprise in India, specially in view of the fact that more than 80 companies have been established in the last five years."

Is the Government Actuary's plea also to prove another cry in the wilderness?

THE INDUSTRIES CONFERENCE

Sir Frank Noyce, in opening the Indian Industries Conference at New Delhi, surveyed the situation created by Government's initiative and indicated the lines on which Government propose to renovate the industrial structure of the country. Development schemes are in operation in all the Provinces and, though it is too soon to gauge their collective results, it is desirable to plan development in conformity with experience. The principle which Government have decided on, rightly we think, is that official initiative should be confined to selected industries that are linked up with the economic life of the masses. At present the activities of the Conference are mainly directed to the revival of the handloom and sericultural industries. The handloom industry is an essential industry, providing a vanishing livelihood for millions. It is, moreover, one of India's ancient handicrafts in which the weaver had attained remarkable success. It still affords a meagre living to a large body of people and its economic alignment to present-day conditions is one of the cardinal responsibilities of the Conference. Like the handloom, sericulture has a broad bearing on the well-being of a large class of artisans who have been driven away from their hereditary occupation by a re-orientation of economic forces which they, of themselves, are powerless to divert to their advantage. Both these bodies of skilled craftsmen are too poor and too ignorant to appreciate the trend of economic movements, with the result that they are marooned on a small island, in the midst of a sea of organised industrialism.

* * *

It is heartening to learn from Sir Frank Noyce's address that the Industries Conference is paying special attention, not only to improve the technique of cottage industries, but to find markets for them. The Indian artisan, illiterate though he is, has a remarkable aptitude for the work of his hands and a little intelligent direction in respect of better technique would suffice to educate him for the improvement of his outturn. For generations, he has plied his trade after the manner of his forbears, without taking count of the changes in taste and texture which a new order of sartorial civilisation has wrought. More attractive styles introduced from abroad have captured popular patronage ; and, what was once the daily wear of the country, is now disowned, if not discredited. Markets have faded away ; yarn at suitable prices is not available ; cocoons are scarce. It is an old story—the story of mechanisation versus man-power. In other countries, where industrialism has opened vast avenues of employment, the story has a new setting. In this country, where scattered cottage industries continue to be the only means of livelihood of millions, the beginnings of industrialism have disturbed the equilibrium of the national economic balance.

* * *

Provincial needs are pressing and the allocation of the Government of India grant is a problem which the Conference has to consider carefully. A certain amount of dissatisfaction has gathered round last year's allocation from a rather parochial outlook which the provinces have unfortunately developed. It is impossible, with the funds available, to appease wholly the new-born hunger of provincial economic re-construction, though the intensity of the hunger is the most hopeful element, from the national point of view. The Conference has again this year adhered to the excellent maxim—first things, first. As the handloom industry is first in the programme of provincial schemes, the Conference has decided that grants should be scaled *pro rata* to the extent of the importance of the industry in the Provinces. A computation was made on the quantity of yarn consumed and on the respective provincial expenditure in the last five years. The Industrial Intelligence and Research Bureau, a recent creation of the Government of India, has planned an Industrial Exhibition at Patna next year, which ought to

JESSOP'S "STATION" PUMP

Is designed for situation where an efficient, robust and trouble-free Pumping Set is a necessity.

It is not a trade pump but nevertheless it is moderate in cost.

It can be supplied either for hand operation or power drive.

Full particulars on application to :—

JESSOP & Co. LTD
INDIA & BURMA
ESTABLISHED IN CALCUTTA 1799
93, CLIVE STREET, CALCUTTA

help to expand markets for handloom products. Several non-official organisations have sprung up all over the country which would implement the official machinery ; and it is to be hoped that Government will not fall into the error of ignoring or antagonising these organisations. Government money, which is the people's money, would be best spent in collaboration with the people's representatives.

* * *

Sir Frank Noyce's reference to the regulation of labour conditions was apposite. This year's Conference took up the consideration of this vital aspect of Industrial planning. Man makes or mars schemes ; and, unless the man is physically fit, schemes will not avail him much. The human factor has lately crept into the official programme of economic uplift ; and the direction which Sir Frank Noyce gave to the Conference indicated a balated appreciation of human economic values. The worker and his occupation stand in value in a natural sequence ; and it would be, as it has been, idle to inverse the sequence. Make the man and efficient economic unit before hitching him to economic schemes which depend on health and strength for success. And we commend heartily Sir Frank Noyce's suggestion that Ministers of Industry should, under the new constitution, undertake responsibility for labour welfare work.

NEW INDIA ASSURANCE COMPANY

The annual report and accounts of the New India Assurance Company for the year ending March 31, 1935, show uniformly splendid results in all its branches. Substantially increased premium incomes in all its four departments, further augmenting of reserves in each, another record new business in the life department and a fall in the life expense ratio are the more important features revealed by the balance sheet and accounts. The combined premium income of New India, which is easily the biggest composite Indian Insurance Company, during the year under review amounts to the huge sum of Rs. 82,33 lakhs showing an increase of nearly Rs. 8 lakhs over the previous year's figure. The total funds have increased by Rs. 15 lakhs to Rs. 1,81 lakhs, the total assets exceeding the two crore mark.

* * *

The net premiums received in the fire department during the year amounted to Rs. 35.92 lakhs, representing an increase of Rs. 1.13 lakhs over the 1933-34 amount. It is noteworthy that the loss ratio has fallen down considerably from 57 per cent to 47 per cent., the actual claims paid amounting to Rs. 16.91 lakhs. Management expenses absorbed Rs. 15.37 lakhs or 44.2 per cent. as against 45.1 per cent. in the previous year. The favourable claim experienced combined with the reduction in expenses, has enabled the account to show a surplus of Rs. 4.04 lakhs, of which Rs. 2.29 lakhs has been transferred to the profit and loss account and an amount of Rs. 1.75 lakhs added to the additional reserve which now amounts to Rs. 22.10 lakhs. The total reserves of the department amount to Rs. 36.47 lakhs or Rs. 101. 5 per cent. of the premium income as against a ratio of 98. 5 per cent. for the previous year.

* * *

The marine premiums at Rs. 19.45 lakhs show a slight increase of Rs. 9,000 compared with the figure of last year. Claims paid and outstandings have increased by Rs. 1.57 lakhs to Rs. 16.23 lakhs. Commission and management expenses absorbed Rs. 3.77 lakhs or 19.4 per cent. The marine fund stands at Rs. 25.10 lakhs or 129.1 per cent. of the premium income. A sum of Rs. 12,000 is transferred to the profit and loss account from this department.

* * *

The accident premiums received during the year have increased by the substantial amount of Rs. 1

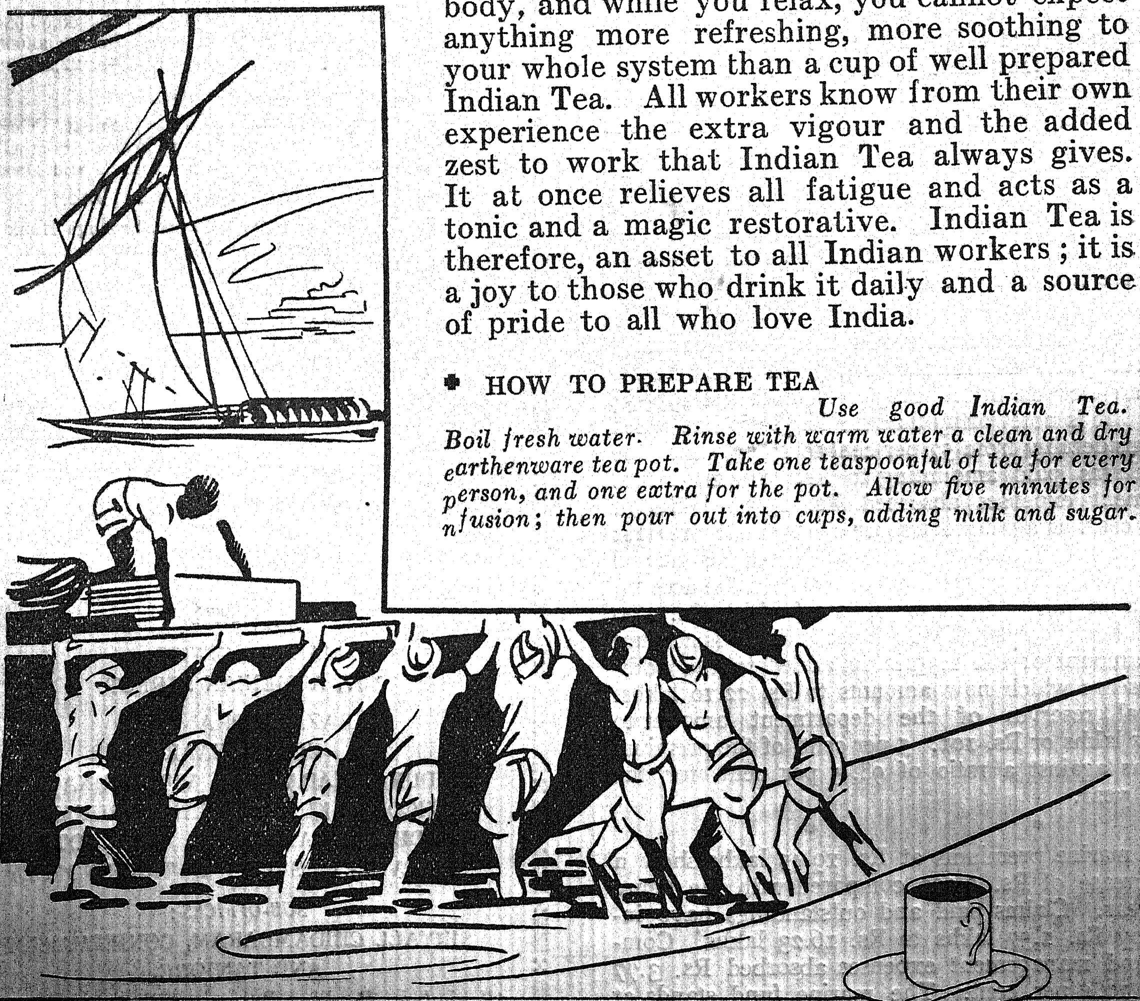
INDIAN TEA
adds zest to work and strength to the worker

After a long period of strenuous physical work, you naturally want to relax your body, and while you relax, you cannot expect anything more refreshing, more soothing to your whole system than a cup of well prepared Indian Tea. All workers know from their own experience the extra vigour and the added zest to work that Indian Tea always gives. It at once relieves all fatigue and acts as a tonic and a magic restorative. Indian Tea is therefore, an asset to all Indian workers ; it is a joy to those who drink it daily and a source of pride to all who love India.

✦ HOW TO PREPARE TEA

Use good Indian Tea. Boil fresh water. Rinse with warm water a clean and dry earthenware tea pot. Take one teaspoonful of tea for every person, and one extra for the pot. Allow five minutes for infusion; then pour out into cups, adding milk and sugar.



India's joy and pride ■ INDIAN TEA

I.K. 23

lakh to Rs. 6.43 lakhs. Claims accounted for Rs. 2.68 lakhs or 42 per cent, while expenses absorbed Rs. 2.41 lakhs or 37.5 per cent. The account shows a surplus of Rs. 1.14 lakhs, of which Rs. 90,000 is added to the additional reserve of the department and Rs. 24,000 is transferred to the profit and loss account. The combined reserved stand at Rs. 6.47 lakhs or 100.7 per cent. of the premium income compared with 95.3 per cent. of the previous year.

* * *

The life account shows a substantial rise of more than 25 per cent. in the new business secured by the company. During the year under review, the company received 7,659 proposals for assurances amounting to Rs. 1.82, crores of which 6,309 proposals resulted into policies assuring a sum of Rs. 1.41 crores as against Rs. 1.12 crores of policies issued during last year. The total premium income is shown at Rs. 20.53 lakhs. Interest income amounts to Rs. 98,000, and considerations received for annuities granted amount to Rs. 24,000. On the outgo side, claims by death amounted to Rs. 2.11 lakhs. Management expenses including commission absorbed Rs. 8.15 lakhs, working out to an expense ratio of 39.7 per cent. It is noteworthy that the expense ratio has been reduced by the substantial amount of 7.3 per cent. and particularly in a year when the new business has been increased by 25 per cent. Considering the fact that the life department was opened only five years ago, a modest expense ratio like 39.7 per cent. reflects great credit on the management. The life fund at the end of the year has been increased by the appreciable sum of Rs. 11 lakhs to Rs. 26.34 lakhs.

* * *

The profit and loss account shows a total available sum of Rs. 9.31 lakhs, including a sum of Rs. 2.15 lakhs brought forward from last year's account and the various departmental transfers. Of this, a sum of Rs. 5.93 lakhs is utilised in paying dividends to shareholders at the rate of Rs. 1-4-0 per share against Rs. 1-3-0 in 1933-34 and Rs. 1-2-0 in 1932-33; and, after other allocations, a sum of Rs. 2.38 lakhs is carried forward.

* * *

The balance sheet of the company as on March 31, 1935 shows, on the liabilities side, a paid-up capital of Rs. 71.21 lakhs, various funds amounting to Rs. 1,09.69 lakhs, outstanding claims of Rs. 5 lakhs, outstanding liabilities of life account to the extent of Rs. 6.51 lakhs and other liabilities amounting to Rs. 10.5 lakhs. On the assets side, out of the total assets of Rs. 2,03 lakhs, mode than 75 per cent. or Rs. 1,57 lakhs is invested in stock exchange securities, most of which are giltedged or trustee securities. The rest is distributed among cash, mortgages and other loans, outstanding premiums and other sundry items. Thus the funds are all well-secured, and the position of the company is unassailable in every respect. The company has, in the general department, built reserves which exceed 100 per cent. in each case—an achievement which places the New India among the first-rate companies of the world of much longer standing. It has developed life business with prudence and with success so much so that, in the fifth year, new business is nearly Rs. $1\frac{1}{2}$ crores per year and life fund exceeds Rs. 25 lakhs. The three criteria of an insurance office are I.M.S., which, set out in full, stands for Investment, Management and Selection. The New India comes off triumphantly by every test.

THE BRITISH ELECTION

For several months now, the National Government has been manœuvring for a *Muhurth* for appearing at the polls. By all tokens, the dissolution of the Parliament, a year before its time, invests it with the character of snap-vote tactics. There was no justification for consulting the country for a mandate. The performance of the National Government was so sorry, both at home and abroad, that it needed adventitous aids, such as weddings and jubilees, to see it through the polls. The election seed, sown at the wedding of the Duke of Kent, has to be reaped a week after that of the Duke of Gloucester. The anxiety of the National Government seems to be, somehow, to come into power, even if it be without strength, for another five years, rather than to exercise its present party power for a year. The shambles of "disarmament", perpetrated by Sir John Simon by alternately cajoling and exasperating France or Germany, needed reconstruction by Sir Samuel Hoare. The impression, produced by Sir Samuel Hoare at Geneva on the issue of collective security, suited admirably the National Government to rush the election. On this issue, it found it preposterous to go to the country. There was already the amplest evidence of universal approval of League Sanctions, though, here and there, there had been discordance, as uttered by Mr. Amery.

* * *

The trouble of the National Government is to find an election programme. Of all the Empire countries, Canada benefited most by the Ottawa Agreement; and yet, it has failed to capture the vote for the Conservatives. Mr. Bennett, the "great Imperial statesman," was hurled into insignificance by the phenomenal land-slide at the recent election.

Mr. Bennett, like the National Government of U. K., relied upon higher and higher protection as a certain guarantee, not merely of high profits, but also

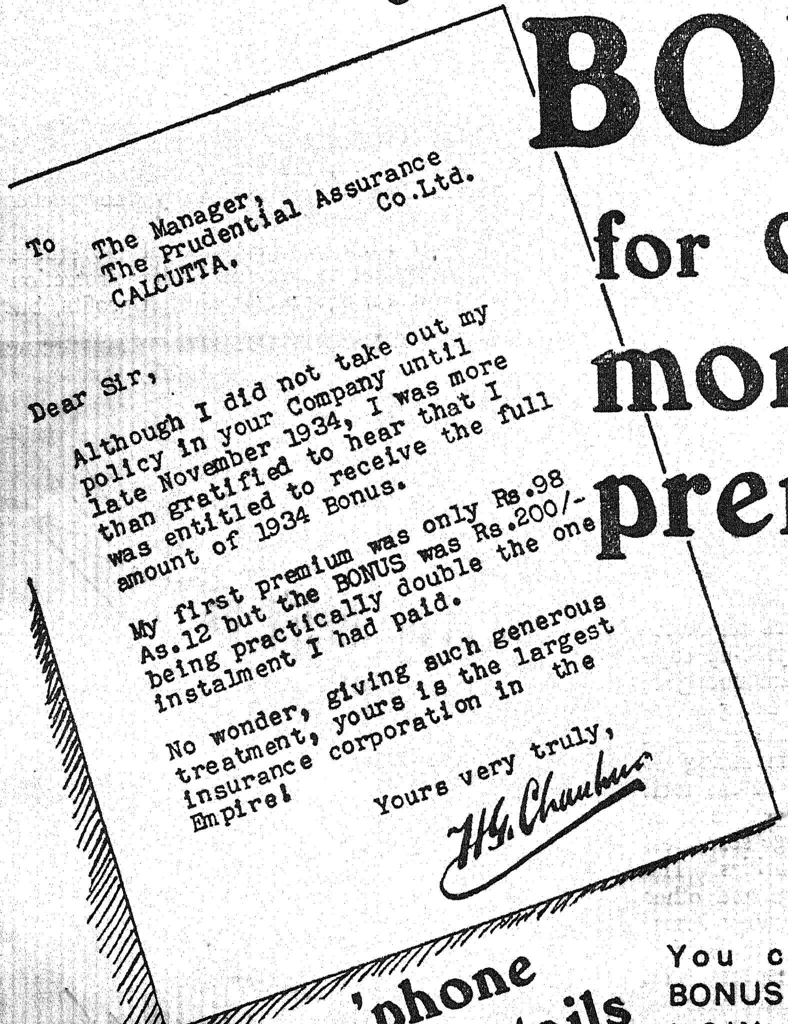
of high wages and employment. He was, however, clear-headed enough to realise his mistake, and made his "death-bed repentance" in January last in the following terms: "Any attempt to operate capitalism under the old system is doomed to failure owing to the low scale of wages in comparison with profits and interest".

The National Government of the United Kingdom does not seem to have realised this truth yet. It simply evades the issue, and is trying to run the election on the time-honoured stunt of unfitness and insufficiency of defence, demanding considerable re-armament. The blatant claim of "sane policy and administration" has, so far, had no response. The public mind seems to have been confused by the League Sanctions and re-armament prospects. Whether there is to be a general European war or not, rests in the hands of the Italian Dictator. Mr. Amery has not, therefore, been slow to create an atmosphere of opposition to the League Sanctions, his slogan "No lad to die for Abyssinia". The advocacy of re-armament by Macdonald and Churchill is in direct opposition to the implications of League Sanctions. The combination of Lloyd George and Philip Snowden is bound to make the task of the candidates of the National Government very difficult at the polls. Whatever agitation they may carry on, is bound to wean voters from the Conservative fold. As they are

One year's BONUS for one month's premium!



To The Manager,
The Prudential Assurance Co.Ltd.
CALCUTTA.

Dear Sir,

Although I did not take out my policy in your Company until late November 1934, I was more than gratified to hear that I was entitled to receive the full amount of 1934 Bonus.

My first premium was only Rs.98 As.12 but the BONUS was Rs.200/- being practically double the one instalment I had paid.

No wonder, giving such generous treatment, yours is the largest insurance corporation in the Empire!

Yours very truly,

Write or 'phone for full details

You can share in this BONUS by taking out a policy NOW. It is not necessary that a full year's premium be paid. Only the first instalment is required to enable you to participate.

not running their own candidates, the deflected votes are sure to settle in the Labour camp.

* * *

The absence of outstanding leaders in the Labour Party is apparently a severe handicap. The prospects of the party, however, cannot suffer. The rank and file of the Labour Party have been well organised by the late Mr. Henderson, and, among the junior leaders, talent is not lacking. As though to supply the want in real leadership, Lloyd George and Snowden should, in the nature of things, prove stump orators for the Labour Party, as events promise to show. Mr. Lansbury, whose retirement from active politics is to be deplored, especially in view of the near election, has, however, been growing popular in connection with his protest against the re-armament programme. All these factors are bound to tell against the Conservative chances of success. In these circumstances, Major Atlee, as the accredited leader of the Labour Party, takes his stand upon obtaining "security from the war menace and security of the means of livelihood".

* * *

From the present indications, Labour is sure to secure not a few successes and inflict many losses upon the National Government. Had the National Government plainly stood for Sanctions or Re-armament, the country would respond enthusiastically. From the analysis of the speeches made by the leaders of the National Government, it is clear that a mandate is asked by them for Sanctions and Re-armament, thus causing, in the minds of the public, a suspicion as to their peace or military intentions. It should also be remembered that there are always millions of floating votes in the country. The international happenings are such as to rouse the indefinite voters to come upon the stage this time, and dip the balance one way or the other. By all tokens, the non-party vote will show its partiality for the League Sanctions. Under these circumstances, it will be no matter for surprise, if the present Government experiences fate not different from that of Mr. Bennett of Canada, thus enabling Labour to hold a more dominant position in the new Parliament.

"When will India start birth control propaganda in right earnest?"—asked Mrs. Laski at our very first meeting. "You are", she continued, "adding to your population at the rate of over three million per year. In a few years, you will be exceeding the four hundred million mark. What are your government and your leaders doing about it?" What could they do?—I enquired. Preach birth control; practise birth control—she replied with vehemence. She added that a deputation of some of the birth control enthusiasts in Great Britain was shortly visiting India; and that all those to whom the interests of India were dear must give the deputation all possible help and every encouragement. It was, as is usual on Sunday evenings, a large gathering of enquiring students of all shades of opinion, of all ages and of both sexes, that had met in Professor Laski's house to partake of the flow of soul and the feast of reason. The topic, which was thus brought up by the communist wife of the socialist thinker, was, however, a trifle delicate for frank discussion in the company as it was composed; and we could not thresh out all the *pros* and *cons*. I just enquired how much these birth control recipes would cost the user in the month. Three or four shillings —came the reply. Which meant, I pointed out, fifty per cent. of the *per capita* income of the Indian.

That seems, in my view, to sum up the Indian situation; correct diagnosis is one thing; to afford the subsequent treatment is another thing. Of the imperative and urgent need of crying a halt to this insensate and intemperate multiplication of the species, there can be no two opinions. In the trilogy making up the *American Discourses*, 'On Numbers' has always intrigued me as affording a line of reasoning and of historical perspective which, true enough in the setting furnished by Matthew Arnold, is proved entirely misleading and incorrect by its application to India. The theory developed in 'On Numbers' is that the glory of ancient Greece and the splendour of the Roman Empire faded into the light of common day only because, in both cases, the population lacked in numbers. A larger population in Greece or in Rome would have, Matthew Arnold argues, saved both the civilisations. The paucity of Numbers wrought the ruin of these ancient stalwarts amongst the nations of the world. The plethora of Numbers is, slowly but surely, accelerating the ruin of modern India. That the problem presented by the rapid increase in the Indian Census figures is a matter of grave anxiety and of immediate urgency, is again brought to public notice by the report published last week by the Public Health Commissioner with the Government of India. The studied restraint of the following passage taken from the report stresses the force and emphasis of Colonel Russell's observations:—

> "Numbers are so intimately bound up with economics that the problem is one which affects every department of Government and every class of citizen. It is a question which will shortly force itself upon the attention of every man and woman in this country; it is to be hoped that it will receive adequate notice before disaster befalls."

What Numbers mean in terms of the economic stamina of the nation, is carefully analysed and unreservedly exposed in this document which should engage the serious and earnest attention of every public man. Mrs. Laski in far-off London has a truer measure of the gravity of the problem than the few hundreds who pose as the leaders of these increasing millions. I will not deny that there are innumerable—almost insuperable—practical difficulties. But I do suggest that our leaders have not even shown an awareness of the existence of such a problem. In a land of notorious backwardness in industry, there is mass output in the cottage industry of child production. Prudery in the case of a few, ignorance in the case of most, and apathy in the case of all account for a situation in which everyone seems to think that whatever happens—including these three million more per year—happens for the best. To talk of birth control is an offence to religious susceptibilities, a perpetration of the worst taste, corruption of pristine morality, a defiance of Nature, a wanton distortion of divine intentions, an unnatural crime, a vice bred by modern fads. It is time, we realise that, religion or no religion, sentiment or no sentiment, Nature-wise or otherwise, India has to evolve a plan and a method whereby her masses could be persuaded and helped to control of births.

I need only mention a few salient figures to underline the truth that the dividing line between a menace and a disaster is thin indeed. In the ten years covered by the last census, the population of India was increasing at the rate of three millions per annum. It would now appear that the pace has been accelerated in this decade. While, in the earlier

THE NEW INDIA AS

The Directors have pleasure in submitting their Report, together with Audited Accounts and Balance Sheet, for the year ending 31st March, 1935.

FIRE DEPARTMENT

The net premiums amounted to Rs. 35,92,450-14-3 showing an increase of Rs. 1,13,037-1-3 as compared with the previous year. The net claims, paid and outstanding, amounted to Rs. 16,91,369-0-6.

Commission, Expenses of Management and Foreign Taxes, etc., amounted to 44.2% of the premium income, as against 45.1% for the previous year.

The Account shows a surplus of Rs. 4,03,706-6-8, out of which an amount of Rs. 2,28,706-6-8 has been transferred to Profit and Loss Account.

The Reserve for unexpired liability remains at 40% of the premium income for the year, and an amount of Rs. 1,75,000, has been added to the Additional Reserve, now amounting to Rs. 22,10,000. The combined Reserves equal 101.5% of the premium income, as against a ratio of 98.5% for the previous year.

MARINE DEPARTMENT

The net premiums amounted to Rs. 19,44,794-3-8 showing an increase of Rs. 8,768-0-1 as compared with the previous year, and the net claims, paid and outstanding, to Rs. 16,23,324-11-5.

Commission and Expenses of Management amounted to 19.4% of the premium income as against 17.7% for the previous year. The Fund has been increased to Rs. 25,10,000 which equals 129.1% of the premium income, as against a ratio of 128.1% for the previous year.

An amount of Rs. 12,315-6-9 has been tranferred to Profit and Loss Account.

ACCIDENT DEPARTMENT

The net premiums amounted to Rs. 6,42,974-8-8 showing an increase of Rs. 1,01,030-0-6 as compared with the previous year, and the claims, paid and outstanding, to Rs. 2,68,467-13-1.

Commission and Expenses of Management amounted to 37.5% of the premium income, as against 37.8% for the previous year.

The Account shows a surplus of Rs. 1,13,945-14-9 out of which Rs. 23,945-14-9 has been transferred to Profit and Loss Account, and Rs. 90,000 added to the Additional Reserve.

The Reserve for unexpired liability remains at 40% of the premium income, and the Additional Reserve is Rs. 3,90,000. The Combined Reserves equal 100.7% of the premium income, as against a ratio of 95.3% for the previous year.

LIFE DEPARTMENT

During the year under review 7,659 proposals were received for assurance amounting to Rs. 1,81,50,200. Of these, and a few others awaiting completion at the end of the previous year, 6,309 proposals resulted in policies for Rs. 1,41,02,450. In addition, an Immediate Annuity Bond for a consideration of Rs. 24,000 and a Deferred Annuity Policy for an annual premium of Rs. 777-1-0 were issued.

The total number of ordinary policies in force is 15,839 assuring, with bonuses, a sum of Rs. 3,85,43,292-8-0 of which Rs. 30,17,000-0-0 is reassured.

SURANCE CO., LTD.

Claims by death of 87 policyholders amounted to Rs. 2,15,100/- after deduction of reassurances.

One third proportion of Shareholders' profits arising from the last Valuation of the Company's assets and liabilities *viz.*, Rs. 8,579-0-0 has been transferred to Profit and Loss Account.

PROFIT AND LOSS

The approximate Interest earned by the Revenue Accounts has been credited to those Accounts. The remaining Interest, plus Transfer Fees and Exchange Adjustments amount to Rs. 4,41,861-12-9. An amount of Rs. 2,28,706-6-8 has been transferred from Fire Account, Rs. 12,315-6-9 from Marine Account, Rs. 23,945-14-9 from Accident Account and Rs. 8,579-0-0 from Life Account.

After providing for all other outgo, and bringing in the balance of last year amounting to Rs. 2,15,322-6-9, there remains a balance of Rs. 8,31,822-7-10, which the Directors recommend shall be dealt with as follows:—

Payment of a dividend at the rate of Rs. 1-4-0 per Share, which will absorb an amount of Rs. 5,93,421-4-0 leaving Rs. 2,38,401-3-10 to be carried forward to next account.

SECURITIES

Securities are valued in the Balance Sheets at or below cost price. At the close of the year under review the aggregate market value exceeded the book value in each of the Balance Sheets.

GENERAL

EXCHANGE. Sterling is taken at 1/6d., and American Exchange at Rs. 275 to $100.

FUNDS

The financial position of the Company stands as follows:—

	Rs.	A.	P.	Rs.	A.	P.
Capital Paid up ...	...			71,21,055	0	0

period, the growth of population of the whole of India was three millions, the increase in 1933 for only British India was three and a half millions. What is true of British India must be true of the Indian States; for, "these States are in such intimate relationship with different parts of British India that any factor tending to reduce numbers in one would exert a similar force in the other." Colonel Russell believes that, "on a conservative estimate, the total for India must now be approximately 370 millions." He concludes that, by 1941, when the next census is taken, the population of India will considerably exceed the estimate of 400 millions given in his last year's report. The Public Health Commissioner deplores the scepticism of "certain authorities who continue to ignore facts;" he has, therefore, subjected the problem to a further examination from an angle which has not yet been given sufficient attention. His remarks on the relationship between the millions of the population and the millions of cultivated or culturable land, are of paramount importance and deserve to be quoted in full:

> "The total land in British India amounts to 667 million acres, but of this total only 232 million acres were cultivated and sown, 47 millions lying fallow, 154 millions being culturable but uncultivated, 145 millions being not available and 89 million acres consisting of forests. Even making the ridiculous assumptoin that the whole 667 million acres of land were available, this works out at only 2.44 acres per head of the population. A more reasonable assumption would be to take the acreage made up of cultivated and sown, fallow and culturable but uncultivated. These three items total 481 million acres which gives only 1.75 acres per head of the population. But some land must be allowed to lie fallow, as additional proportion must be given over to the cultivation of crops other than food and during 1933-34 the total acreage under food crops amounted to only 206½ million acres. *This gives only 0.72 acres per head of the population in British India and it does not require more than an elementary knowledge of agriculture to realise that it is impossible to provide a sufficiency of food for the present population of India from an acreage of this* dimension. It may even he held that, were all available cultivable land given over to food production alone, the supply would fall short of reasonable and adequate demand." (Italics mine).

The problem thus posed, it is to be hoped that there will be a wider and more earnest appreciation of its importance, both amongst the Government departments and amongst the public. Having said this, I may revert to my observations in the Laski discussion. Can India afford the luxury of birth control novelties? Poverty, no less than ignorance and bigotry, lies at the root of the matter. Till the economic stamina of the masses is raised to a far higher level, all measures of reform calculated to build the nation on a healthier and sounder basis are outside the range of practical politics. Has the country, the State as well as the public leaders, realised that, in the interests of all, immediate steps must be devised for planning national economy in such a way and on such lines that there will be, as there can be, rapid and substantial improvement in the national income. *Indian Finance* has stood for economic planning and for the setting-up of a National Economic Council. The former Finance Member was at least prepared to toy with these ideas. The present Finance Member has faith only in himself and in his ideas. I must commend to his careful perusal *The Next Five Years—An Essay in Political Agreement* (Macmillan 5/). This book is a sequel to the manifesto on 'Liberty and Democratic Leadership' published a year and a half ago by a number of Britishers who had made a mark in varied walks of life and who represented varied political parties and varied sections of thought. There are no less than 152 signatories to the common plan of action propounded in this book; and notable amongst the signatories are Sir Francis Ackland, Sir Norman Angell, Mr. G. N. Barnes, Lord Cecil, Sir Oliver Lodge, Lord Lytton, Mr. Hugh Molson, Sir Arthur Pugh, Lord Rutherford, Sir Evelyn Wrench and the Archbishop of York. I desire, in particular, to draw attention to the proposal for the creation of a "Government Planning Committee" which will be assisted by an "Economic General Staff" which, in its turn, would requisition the assistance of regional *ad hoc* committees for special subjects. The whole idea is to set up an active, virile and comprehensive machinery for economic direction, initiative and surveillance. To throw ridicule on the proposals for adopting economic planning, may suit a Finance Member who is responsible to no one; but it is against modern authoritative thought. An economic programme for India, sympathetically conceived, boldly planned and vigorously executed, can effect a marvellous transformation in the economy of India. As I have, again and again, said, India is potentially very much like the United States of America. She can actually become as great if only the Government and the people will have faith in the efficacy and potency of economic planning.

Mr. S. N. Gupta has issued a booklet under the name of *Insurance Treasury;* and the whole purpose of this small but interesting brochure is to impress on the insuring public that they should, rather than trust statements of eager canvassers, look into the thing for themselves. As it is, most people take out policies, not from any recognition of the importance of insurance, nor from any understanding of the comparative merits of the various companies, but through the coaxing or coercive efforts of the ubiquitous canvasser. If the insurer understands the responsibility of insuring and can gauge the intrinsic merits of companies in some common sense way, it will greatly help canvassers of good offices and put out of action those of unsound offices. Mr. Gupta has got together a number of notable passages, a perusal of which must quicken the conscience of the insuring public and teach them commonsense methods of judging life offices.

CALCUTTA BOMBAY MADRAS KARACHI NEW DELHI

OLYMPUS

(From Our Correspondent)

New Delhi, October 30.

"Either they trace the culprit or face dismissal for incompetency." That is the kind of challenge which has rung out of the North Block of the Imperial Secretariat in New Delhi. Every day enquiries are made of the extent of progress made in the investigation by the police and some adjectives are hurled at "slow" methods. Sir James Grigg has always suspected that speculators prowl about the Secretariat and try to establish "contacts". He has now got a case and will not rest till he has had his revenge and passed "deterrent" punishment.

* * *

Another factor which makes the matter lively is that he has found in Mr. Nixon a Secretary who is a live wire and has no idea of peace or rest when he is in the thick of a case. And the hoax played on the various markets of India is a good case for the use of his energy and drive.

* * *

All told, therefore, one may expect that really no stone will be left unturned to track the culprits and bring their crime home to them and to their class. What is particularly important is that should any one in the Secretariat be found to be involved in the conspiracy, their punishment would be a standing warning to others and would prevent not only repetitions of such wicked deeds but also prevent leakage of information which occasionally occurs in some Departments of the Government of India.

* * *

About sanctions which India may enact against Italy I made detailed mention last week. The story I gave then is confirmed by further enquiries. Mr. Stewart and Mr. Nixon have been at it for a number of days and have prepared all the material for the purpose. India would follow the lead of the United Kingdom, no doubt, but there is a pang felt here at the loss of trade that would occur because in spite of the restrictions imposed by Italy against Indian imports this country has not suffered and her exports to Italy have been satisfactory. If these are now cut out in some directions, it will have adverse effect on the trade concerned. Of course, no one wants Italy to get out of these attempts at barbed-wiring her ; but, if some one else buys from India and passes it on to Italy, there is no remedy. Perhaps the producer in India will not be altogether unhappy, if this happens!

* * *

I feel some sympathy for Mr. Stewart. He is always loaded with some special work or other ; he works too hard and was in need of some holiday. His normal holiday would have come a little later ; but the kind thought of Sir James and Lady Grigg gave Mr. Stewart a little trip to Kashmir.

* * *

Preparations are afoot here for the Wheeler Committee reception. The Secretariat is full of excitement. The matter touches their pockets and their future. All that the Secretariat can fight for, they will ; but their plan is not necessarily one conceived in the interest of India. The plain truth is that the I.C.S. fraternity wants all high Secretariat jobs to be reserved for itself, whether in the domain of administration or such highly technical subjects as finance and tariffs.

* * *

Their real fight will be to knock the Indians out by throwing the Indian Audit and Accounts Service either out of the pale of selection or relegating them to the background. This service is manned generally by Indians and the calibre of its officials has been a great credit to the service and has advanced the cause of Indianisation of the Secretariat. In fact, the I.C.S. clique has begun to feel that this service has assumed the position of a potent rival. They have failed by administrative devices and pin-pricks to dislodge its Members from positions of authority but now is their chance to have a revenge.

* * *

Sir Henry Wheeler is himself a retired I.C.S. and he has been a great champion of the Service. Sir James Rae of the Indian office has a soft corner for the Civil Service. Thus the brunt of defence of the Indian Audit and Account Service may fall on Sir C. P. Ramaswamy Iyer. The ex-Commerce Member is a very talented politician and one with great experience as Departmental head. But he generally has too many irons in the fire. Will he devote enough attention to all the implications of the Wheeler enquiry and its likely reaction on Indianisation?

* * *

As for the Niemeyer enquiry, it seems that no organization has yet been set up to collect material. The Provincial Governments are beginning to send in their proposals but it will be only in the first week of January that the special Secretariat will assemble. This one-man commission will have its difficulties in appraising the situation unless, of course, the two Secretaries are really made into assessors who would assist the Commissioner to come to conclusions after hearing their points of view.

* * *

If this role is filled by them, then the purely ministerial part of the work would have to be handled by some junior official. There should be some attempt to do so especially as a great part of the work of a routine nature should not be thrown on the two Secretaries who should be free to help Sir Otto Niemeyer in the handling of the main case which he is to investigate.

* * *

The Industries Conference has been holding its sitting here. I always like the way Sir Frank Noyce handles such shows. He is genuinely anxious to do his job well and his frankness and sincerity infects the Conference so that he succeeded in getting a unanimous verdict on the question of basis of allotment of financial grants to the provinces remaining unaltered. On his part, he promised a much larger grant than previously so that handloom industry may prosper.

* * *

The Delhi Register voters of the Reserve Bank are asked to make choice of their Directors. Frankly, the nominees for election are not outstanding figures and one hardly feels that any one among them is better qualified than the other. In the City of Delhi alone there are 2,000 voters and I doubt whether even ten per cent. of them would be able to exercise their vote, considering that candidates have not put forth much in the matter of canvassing.

(FROM OUR CORRESPONDENT)

Bombay, Oct. 30.

Bombay's legal world is greatly exercised in mind at the refusal of the Judicial Commissioner's Court at Nagpur to recognise certain decrees of the Bombay High Court in respect of "suits for land." This particular class of suits affords, I believe, the legal mind great scope for legal talent. Be that as it may, it is not the legal over-riding, whether right or wrong, of the Judicial Commissioner's Court that concerns the public. It is not a mere point of law for lawyers, but a matter of great importance, involving a vital constitutional principle.

* * *

A conflict between judicial authorities would, from the public point of view, be most unfortunate. The Nagpur Court's action runs athwart precedents and procedure. There is the precedent of the Allahabad and Lahore High Courts which, out of respect for a sister court of plenary jurisdiction and on the principle of comity of judicial tribunals, assumed that the Bombay High Court was right, and refused to re-open the question. That is, apart from legal quibbles, the correct constitutional attitude. A hopeless confusion of jurisdiction would otherwise enmesh the litigant. There would be no finality to any decree ; and decrees in one province would be made nugatory by fresh proceedings in another province. That would be an intolerable situation.

* * *

Port Trusts have an unsavoury reputation among Indians. Their administration is a law unto themselves, without regard to the larger questions of public policy and economy. The Bombay Port Trust is a case in point. Instances pile on instances of irresponsibility. Not long ago, the scandal of obtaining electric energy from the Electric Supply Company at rates substantially higher than those quoted by Tata, was exposed. Undeterred in the determination to adhere to the code of uncompromising intolerance of responsibility, the Port Trust's offices are to be wired at the rate of Rs. 25 a point, at a total cost of Rs. 12,500. Rs. 2 to Rs. 3 a point is the current rate ; a little more was paid for installation in the palatial buildings at Malabar Hill and Napean Sea Road. The Bombay Port Trust is above competitive rates. A mere Rs. 12,500 thrown into the yawning chasm of administrative extravagance does not worry the Port Trust.

* * *

Bombay is quick in industrial uptake. The Weights and Measures Act, which has been in force for about three months, has created a new industry—the local manufacture of weights and measures. Thousands are engaged in the industry: and the Department in charge of the working of the Act is satisfied with the quality of the metal used by Indian manufacturers. At present the Act is operative in 11 districts, including Karachi and Sukkur. From March next, the Act will be extended to the rest of the Presidency, which will automatically spread the industry. In these days of economic depression, a new industry, which provides a living to thousands, is heartening.

* * *

There is more than a fluttering in Labour circles on the apprehension that the representation of Trade Unions in the new Provincial legislature might be captured by "outsiders." The Delimitation Committee has made no provision for the representation separately of trade union organisations, leaving Labour guessing as to the character of future Labour constituencies. Secret efforts are being made to create new Labour organisations, which would be chosen to represent the working classes. One railway workshop is busy enrolling members for a new organisation, which is open to Anglo-Indians and Europeans. Moreover, a hitherto exclusive European and Anglo-Indian body is inviting Indian members, obviously to strengthen its claim to Labour representation. The idea is to get a European or Anglo-Indian as Labour representative in the forthcoming legislatures. And labour fears the wolf in sheep's clothing more than the sheep in wolf's clothing.

* * *

Bombay lets herself go at Divali, the festival of lights. The festive spirit possessed Bombay engrossingly this year. The illuminations were gorgeous, and the night sky scintillated and blazed alternately or concurrently with pyrotechnic displays. Streets, lanes, parks, terraces and verandahs accommodated happy humanity, who were crowding gaiety into fleeting hours. And if outward visible signs are an index, Bombay's prosperity was reflected in the lights which cloaked the city in a wonderful radiance. Bombay does not show up too well in the garish light of day: in the glamour of the Festival of Lights, it looked a bewitching Gateway. And having bathed herself anew, body and soul, in the chastening light of Divali, Bombay resumed her daily occupations with greater zest.

* * *

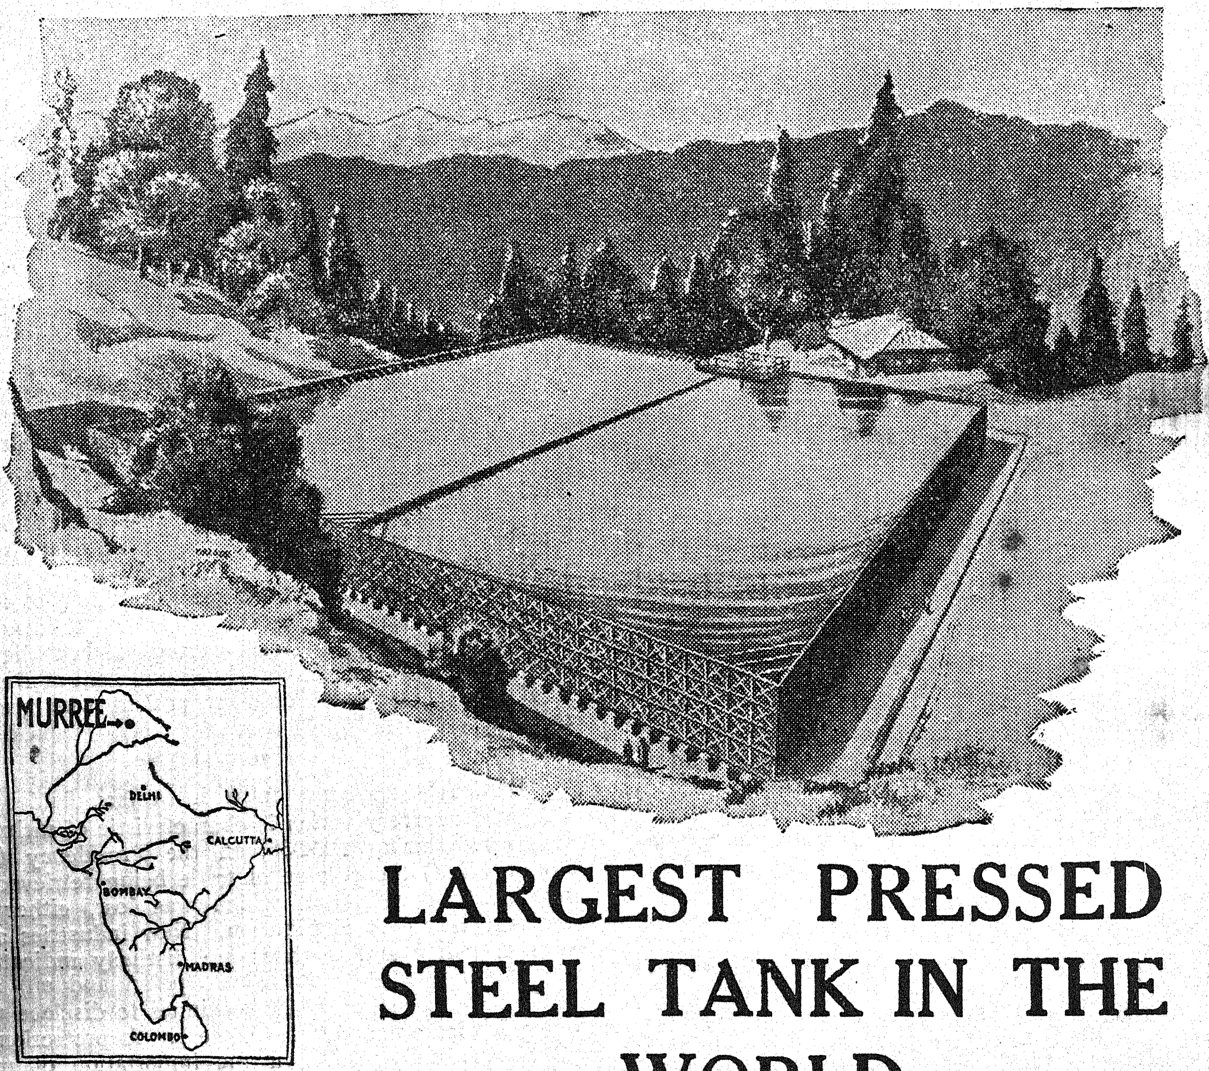
Bombay's sea-borne trade is in that fluid state of partial recovery which is characteristic of ultimate recovery. During 1934-35, in the Presidency (excluding Sind) the volume of trade being retrieved is not identical with that which was lost, either in commodities or in distribution. New industries and modern policy and methods are distincly indicated. The motor and allied industries (petrol and oil) are resilient ; and artificial silk continues to displace the older fabrics as an article of wear. A protectionist policy in India results in the importation of mill machinery, apparatus, and materials for manufacture, instead of the manufactured articles, namely, cotton, dyes, chemicals, etc. For a somewhat different reason, the demand for films in India suitable for Indian audiences has necessitated the importation of considerable electrical and other equipment for production, in addition to that required for the exhibition of both Indian and foreign films. As regards dstribution the disturbance of economic conditions arising out of the War resulted in transference towards the East, and particularly to Japan. This tendency continues.

* * *

The percentage distribution of Bombay's trade shows that the United Kingdom has again yielded pride of place, which she had regained last year, to Japan, whose share increased by over 8 per cent. while that of the United Kingdom decreased by over 1¾ per cent. The trade with the Continent of Europe declined by 4¼ per cent. and that with America by nearly ½ per cent.

* * *

Chasing the elusive rupee on the race course is a tragic adventure, which the cautious avoid as they would the plagues of Egypt. The human desire to take a chance, to hazard a stake, cannot however be wholly repressed. Which is why sweepstakes have a world-wide clientele, the only channel through which wealth or competence or happy days might flow to the fortunate. And as life itself is a gamble, men and women, without losing their sense of proportion, put a little out of the family till into sweepstakes. The Cambridgeshire is one of the big sweepstakes, offering substantial sums to winners. Bombay has been the luckiest of the provinces ; no fewer than five of the major draws having fallen to the city.



LARGEST PRESSED STEEL TANK IN THE WORLD

$3\frac{1}{2}$ MILLION GALLON RESERVOIR IN THE HIMALAYAS FOR MURREE

SOUTH INDIA

(From Our Correspondent)

Madras, Oct. 30.

Deepavali has come and gone. The season's greetings have been exchanged, with resultant release, by the telegraph office, of much of its ornate stationery. Children look with as much sadness at their depleted stock of crackers as at the termination of their holiday from school. The piece-goods man (who, to judge by his furious activity, is consumed by an overwhelming desire to see his clients arrayed in sartorial splendour of the approved oriental type) has plyed a roaring trade. The holiday feeling still persists.

It is said that sales figures of the Deepavali season are a fair index of the general prosperity of the community. Judged by this test, South India continues to be in the octopus-grip of the depression. Our grain prices have not shown any substantial improvement. Our cottage industry products have a rather precarious market. The handloom weaver, who plays so significant a part in the economy of South India, plies his shuttle in poorly spirit, but he plies it all the same, because he has to keep his home-fire burning, though in a feeble way. The agriculturist and the artisan of South India were never worse off than to-day and never required greater fortitude. Both continue the struggle in grim silence, leaving economists to discuss such recondite things as purchasing power, and pressure of population on land.

* * *

There is much talk down here about the educated unemployed. Organisations are being formed and even a conference was held recently. But the remedy seems as far away as ever. The phrases "Rural reconstruction" and "Back to the village" have been worked to death. One wishes that half the number that mouth the nimble phrases believed seriously in the efficacy of such remedies. It does not look as if either the over-flowing sympathy of our leaders or the numerous omnibus resolutions, which we are fond of adopting at conferences, will take us one jot nearer the solution of the problem. Meanwhile, the problem is assuming more serious proportions every day. The general feeling is that it is high time we imported into discussions of this question an atmosphere of reality and got to brasstacks.

Practical-minded men are convinced that our educated unemployed are not going to be persuaded into settling down to the humdrum, cinema-less, restuarant-less village life devoutly as we may wish for such a consummation. The average young man, to use the words of Henry Ford, "has been systematically educated away from life. He could do very little that a gramaphone cannot do and it costs more to keep him than to keep a gramaphone." It is necessary for a young man to learn a trade and to recover the nature resourcefulness, of which a transplanted (if to a degree beneficent) system of education has deprived him. It is admitted, on all hands, that it is not desirable that we should let the situation develop into anything like a crisis and thus allow the problem to solve itself. It is, therefore, important that both the elders and our young men should pool their intellectual resources in finding for the problem a less anæmic and more practical solution than "back to the village" or "rural reconstruction."

* * *

Local board administration in South India has its lighter side. Some municipalities are superseded. Some municipalities have Commissioners thrust on them. Some of these take revenge by passing "no confidence" motions on these unwanted Commissioners. The Commissioners seem to be quick at distinguishing themselves for their tactlessness. The Councils and the Commissioners continue to carry on the administration with swords crossed. The Council thinks the Commissioner a costly futility; the Commissioner reciprocates the sentiment and sniffs at the Council as a contemptible form of representative government.

* * *

Municipal finances are becoming a depressing chapter. Mr. D. N. Strathie, I.C.S., Collector of Guntur District, in his report of the Municipal Administration of Guntur Town, refers in the following terms to the parlous condition of the finances:

"With the financial resources now at its disposal, I do not see how the Guntur Municipality can fulfil its proper functions. It cannot go on living on loans, as it is at present."

Of course, it cannot. In fact, even if the Municipality does get into the confortable habit of living on loans, after a certain stage the Municipality will find that loans are not forthcoming. Our good wishes go to Mr. Strathie in his having launched on one of the Labours of Hercules—cleansing the Municipal stables.

* * *

Interesting correspondence has passed between the Bangalore Trades Association and the Director-General of Posts and Telegraphs on the subject of postal rates between England and India. It was represented on behalf of the Bangalore Trades Association that, while ordinary letters posted from Great Britain to India had to be stamped only for the value of 1½d., letters from India to Great Britain had to be stamped with ½d. The Association pleaded for a reduction in the rate from India to England as a matter of reciprocity. The Director-General stated that postal rates fixed by the various countries were governed by considerations of internal finance and that reciprocity in rates was not among the Universal Postal Union Regulations. The reply of the Director-General, at least the second half of it, is strongly reminiscent of the reply of Theodore Roosevelt at an election meeting. Somebody accused him of inconsistency and he retorted "Consistency is not among the ten commandments." The Director-General suavely added that air mail letters are charged the usual rates plus an additional air mail fee of 6 annas. The question raised by the Association is only part of the larger question of burdensome postal rates. Curiously enough, the Government of India do not seem to look upon the prevailing exhorbitant rates as a temporary measure. Rather does the Director General appear to think that we are getting so used to the prevailing rates that we shall get thoroughly reconciled to them. The irony of one of the poorest countries in the world being made to bear these unprecedented postal rates cannot be lost on the Director General. The country is getting impatient of Budget season apologies for non-reduction. Will the next budget, too, prove true to the norm?

EMPIRE CENTRAL BANKING

PRINCIPLE OF RECIPROCITY

BANK OF ENGLAND'S ATTITUDE

By Dr. Paul Einzig

Special for "INDIAN FINANCE"

London, Oct. 21.

The establishment of Central Banks by the various Dominions since the war constituted the most important step in the financial evolution of the British Empire. It went a long way towards making it plain that, from a monetary point of view, the Dominions are independent units. It was, indeed, necessary to rule out misunderstanding and misconception in this respect which prevailed not only abroad but even to a large extent in this country itself, as is shown by the fact that in 1933 a law suit was brought before the courts in London in which one of the parties claimed that the Australian pound and the pound sterling were the same thing. Needless to say, the claim was rejected by the law court, but the popular misconception continued to prevail. The existence of Central Banks in all Dominions will go a long way towards making it evident that, from a monetary point of view, as from a political point of view, the Dominions are their own masters. If they choose to maintain close links with the motherland in the political, economic and monetary sphere, it is because they fully realise the immense advantage of these links.

It is the policy of the Bank of England to maintain the closest possible relations with the Central Banks of the Empire. Indeed, the Bank of England played an important part in the organisation of these banks and their statutes definitely bear the hallmark of Threadneedle Street. Even the division into issue department and banking department with all its advantages and drawbacks has been adopted by some Empire Central Banks. In addition, in every case, former senior officials of the Bank of England have been appointed to occupy key positions in the new Central Banks. The advantages of giving the new institutions the benefit of its experience acquired during two and a half centuries cannot be over-emphasised. The Empire Central Banks benefit by the experience of the Bank of England also through the close personal contact that is being maintained with Threadneedle Street. For that purpose, liaison officers have been appointed by the Bank of England with the task of paying visits from time to time to the Dominion Central Banks. One of these liaison officers is Mr. Gilbert Jackson, formerly professor at Toronto University and economist of the Bank of Nova Scotia. On his departure from Canada to take up his new appointment with the Bank of England, he published a volume of essays,* two of which deal with the problems of the new Canadian Central Bank. It is worth remarking that at the time when these essays were originally published, Mr. Jackson was, so to speak, on the other side of the barricade. He was one of the strongest opponents of the idea of establishing a Central Bank in Canada in the form it was officially proposed, and was in a way the spokesman of Canadian banking interests who were opposed to the scheme. Notwithstanding this, he appreciated the advantages for Canada of establishing close relations with the Bank of England. "Of all the Central Banks in the world I venture to say that in our generation only one has proved quite adequate to the tasks imposed upon it—the Bank of England." This is as handsome a compliment, coming as it did from an expert who at the time was opposed to the Bank of England's imperial banking scheme, as any that has ever been paid to the Old Lady of Threadneedle Street. Mr. Jackson rejected the criticism directed against the Canadian Central Bank scheme on the ground that it would be too close to the Bank of England. Whatever other objections he may have had to the scheme, this was certainly not amongst them. On the contrary, he emphasised that "in these days of stormy financial weather, I doubt if we could anywhere find a more water-tight umbrella than that of the Old Lady of Threadneedle Street."

It is of great importance that public opinion in Canada and in other Dominious should realise the advantage of the close co-operation of their Central Bank with the Bank of England. From this point of view, it is essential to allay any suspicion that the Bank of England aims at influencing the monetary policy of the Dominions. The Bank of England is regarded as one of the few remaining strongholds of ultra-orthodox monetary principles. This is not the place to examine whether the attitude of the Bank towards monetary policy is right or wrong. From the point of view of collaboration within the Empire, it is essential that public opinion in the Dominions should not be antagonised by any attempts to force upon their Central Banks a similarly orthodox policy. Otherwise public opinion in these communities will undoubtedly find a way to make itself felt by strong opposition to collaboration with the Bank of England. Signs of such opposition were already noticeable in Canada when on the occasion of his recent holiday trip, Mr. Montagu Norman was reported to be a daily visitor at the Bank of Canada. There was an outcry in the Canadian Press, protesting against a suspected attempt to influence the monetary policy of the Dominion in a sense that would be detrimental to producers. Whether or not the suspicion was well-founded, the experience shows how essential it is to handle the relations between the Bank of England and the Dominion Central Banks with the utmost tact. Conceivably, had Mr. Norman paid an official visit to the junior Central Bank, everybody would have thought it quite natural. The attempt at secrecy, however, produced its usual effect by creating the impression that some sinister schemes were afoot. Feelings were so strong on the matter in Canada at the time that, as a well-informed student of Canadian affairs pointed out to the writer of this article "If Mr. Bennett is defeated at the election, he will have to thank Mr. Norman for it." Although this may be one-sided exaggeration, the suspected attempt to influence the Canadian monetary policy from London certainly did not help the Government in office.

Unquestionably, co-operation between Empire Central Banks is inconceivable without adopting a high degree of uniformity of monetary policy. It is essential that the exchange rates between various Empire currencies should remain stable. This can only be achieved in the long run if the monetary policies of the various members of the Empire follow substantially the same lines. If the Bank of England deflates while the Commonwealth Bank of Australia inflates, it is inevitable in the long run to allow the Australian pound to depreciate in terms of the pound sterling and of other Empire currencies. Drastic changes in inter-imperial exchange rates would inevitably disturb trade relations within the Empire. In any case, it is difficult to imagine systematic and reciprocal support between Empire Central Banks unless their monetary policy is more or less uniform. This uniformity should not, however, be achieved through the one-sided influence of the Bank of England on the Dominion Central Banks. There should be co-operation in the real sense of the term, which implies reciprocal influ-

A PLEA TO LOOK AROUND

POSSIBILITIES IN OTHER MARKETS

SANCTIONS AND INTRIGUES

By Francis Williams

City Editor: The "Daily Herald," London

(By Air Mail)

(Special for "INDIAN FINANCE")

London, Oct. 21.

Although this is hardly the time perhaps to think of international investments with the European sky so over-clouded by war anxieties, the intelligent investor should, I suggest, begin to give consideration to other markets than London before long.

Recovery, it is true, is still halting in most of the continental countries even more than in Great Britain ; but the disparity between industrial security values in some of those markets and in London is so considerable that a transfer of capital form one market to the other is bound to take place eventually.

For example, indices just published by the League of Nations suggest that the average of leading industrial share values in London is now back to the 1928 level.

I know that most investors, and particularly those who are still holding shares which have slumped heavily since the last boom period, will find difficulty in believing this ; but, on the evidence of the London and Cambridge Economist Service which prepares an index of 92 leading industrial shares, it seems to be the case.

That index does not, of course, include widely speculative securities nor those in mushroom companies which slumped most heavily of all.

But it does represent the average value of what may be called solid British industrial shares.

Now let us turn to a consideration of the position in other international markets.

In the United States, again taking the 1928 level as 100, the index at present still stands at only about 62.

On the Paris Bourse, it only stands at about 46 and in Holland, despite the fact that the Amsterdam Market is an important centre for international investment, it only stands, again taking 1928 as 100, at 26.3.

There is thus an amazing disparity between share values in leading international centres.

That disparity will, of course, remain so long as there is lack of confidence in the position of the countries in which those centres are located.

So long as France and Holland continue their present deflationary monetary policy in order to defend the gold standard, no substantial industrial recovery for example is possible ; and, without domestic industrial recovery, there is unlikely to be sufficient Stock Exchange confidence to bring much of a rise in security values.

But this disequilibrium cannot exist for ever ; and the investor, who, at this stage, takes pains to examine the records and possibilities of some of the leading industrial shares in France and in Holland and also of course in the United States, may, I believe, find that he has spent the time very profitably.

So far as the London Stock Exchange is concerned, prices are apt to fluctuate somewhat hysterically on the City's reading or misreading of the outlook in the Italian-Abyssinia conflict and as regards the League's attitude to that conflict.

At the moment, there are reports, not merely in the City but elsewhere, and some of them, apparently with a strong basis of fact, that not only France but Britain is preparing for some sort of deal with Italy under which sanctions imposed by the League will continue to be of a fairly ineffective nature and Italy will be given an assurance of a fair slice of Abyssinia when she agrees to call off her troops.

Colour is added to these reports by the fact that Conservative speakers, including Lord Mottison, who gained his Peerage for his publicity activities during the War Loan Conversion scheme, have suddenly discovered that it is a "crime against civilisation and moral law" to supply arms to the Abyssinians.

This appears as a somewhat curious time to make such a discovery in view of the fact that the League has not long decided to allow an export of arms to Abyssinia, and suggests that efforts are being made to see that while lip service is paid to the League, nothing is done seriously to inconvenience Mussolini in his "missionary" effort to implant civilisation in Abyssinia by the medium of the machine gun and the bombing plane.

The fact that the election date has been now fixed has also created uncertainty in the Stock Market but as, for Conservative Party reasons, the election is to be short and sharp, this disturbance will not last very long.

An election fought during a period of international crisis is, however, bound to have some repercussions abroad and we may expect to see the flight from the £ which has been substantial during recent months although hidden from the public eye to a considerable extent by the operations of the Exchange Equalisation Account, which has been selling gold to maintain the £'s value—substantially increased during the period of the election.

When one considers that the present Government came into office avowedly to defend the £, the true irony of this position can be appreciated.

Speaking generally, industrial activity seems to be more or less maintained, the machinery, motor and rayon industries being particularly busy.

Nothing yet, however, has been done seriously to tackle the problem of the distressed areas and indeed a scheme for building a new steel plant in Jarrow, the most depressed area of all, is likely to be blocked by the massed forces of the existing vested interests in the steel trade.

The possibility of a slump in the buidling industry in the Spring also gives those economists and financial observers who look beyond the immediate moment continued cause for anxiety. It is an anxiety which I personally share.

(Continued from previous page)

ence on the basis of "give and take." In deciding upon their monetary policy, the British authorities have to pay due attention not only to the interests of Great Britain but also to those of the whole Empire. For instance, even if, from the point of view of the United Kingdom, it were desirable to stabilise sterling in the near future—which is most certainly not the case—such a decision should not be taken unless and until our authorities are satisfied that this step would also be in accordance with the interests of the Dominions. This consideration is duly appreciated at Whitehall. Indeed, in the course of a recent statement, the Chancellor of the Exchequer laid particular stress upon the necessity of postponing stabilisation from the point of view of safeguarding the interests of the raw-material-producing Dominions. If only monetary policy were regarded in the same spirit of understanding by the Bank of England, there would be no difficulty in establishing close and friendly relations with Empire Central Banks.

OVERSEAS' NEWS: By Air Mail

Week ended Oct. 19

GREAT BRITAIN

GENERAL ELECTION

Foreign affairs have for a time surrendered priority of public interest to the preliminaries of the general election which is to be held on November 14—a week after the Royal Wedding and three days after the Armistice. Government made up its mind, rather suddenly and surprisingly, to go to the electors for sanction to maintain national unity in regard to its foreign policy, though, with the Government and the Opposition in harmony on the proceedings at Geneva, there is no need for the haste. Actually, an appeal to the country might give a wrong impression to the Foreign Departments of the Governments in Europe. Instead of presenting the solidarity of British opinion at a critical stage of European diplomacy, the under currents of a general election might force to the surface mere party politics. A certain uneasiness might well be read into the decision of Government. If Government want a mandate for League sanctions, the election would not strengthen Government, as there is no difference of opinion, worth reckoning, on the subject. And if Government want a mandate for re-armament, an election would place the voters on a cleft stock. Vital issues may, as often happens, at election time, be side-tracked—a contingency which would not help to mobilise international forces on the side of world peace.

The cardinal question at present is not whether Great Britain re-arms or does not re-arm ; but whether re-armament is to be determined in consonance with collective agreements and on the basis of collective security. May be, the inner mind of Government is slipping away from the sense of security of collective armament agreements—a not unreasonable mentality in view of the happenings at Rome and, in a lesser degree, at Paris. And a Government, which calls itself national, is anxious to feel the public pulse on unilateral re-armament on a scale to be determined by the country. That would of course be a definite negation of the policy now pursued by Sir Samuel Hoare and Mr. Anthony Eden at Geneva ; it would be a repudiation of all those sentiments that have made Great Britain for the last two months the bulwark of the League Covenant. Possibly, the trend in Europe is a significant shadow of coming events and Government, more informed than the public, are taking the quickest opportunity to align Great Britain to fundamental changes in Europe, the portents of which are visible in an ugly manner. Unless the unexpected happens—the chance of politics—a National Government, only far more national than the present, will arise from the ashes. True, the obscurity that hangs on Government's election campaign has not lifted: there are rumours of considerable differences of views in the Cabinet on the supreme need of re-armament. Mr. Chamberlain's speech is, in many informed circles, taken to represent a section of the Cabinet who would have adequate re-armament at all cost.

The South Wales Miners' Federation has decided by a large majority not to call a stoppage and to instruct all men on strike to resume work. The "stay-in" strike, which threatened to involve 176,000 men, comes to an end. Vital decisions will have to be taken at a national delegates conference of the Miners' Federation of Great Britain, which has been called to consider the situation arising out of the demand of the Federation for an increase in wages throughout the country of 2 shillings a day, to be followed by a national agreement. The first meeting of the Federation concluded without reaching a decision and, at the second, it was suggested that the Prime Minister or the Secretary for Mines might be approached before coming to a decision. Earlier, the Government, through the Mines Department, had intimated that, in view of the attitude of the owners, it was impossible to force a national wage decision except by some measure of compulsory arbitration which the Government believe is not acceptable and not desirable. The Conference will probably be adjourned for a fortnight, while the Executive of the Federation confers with the Government. The Mining Association, representing the owners, has made no official statement.

A surplus of £3,201,504 of revenue over expenditure is disclosed in the Exchequer Return for the week ending Saturday October 12. In the corresponding week of last year, there was a surplus of £2,754,114. Total ordinary revenue for the week was £12,009,295 against £9,323,705 a year ago. Some £2,500,000 was received from income-tax, while Customs and Excise together contributed a little more than £6,200,000. Of the expenditure total of £8,807,791, about £1,000,000 was required for National Debt requirements, almost the whole of the remainder being absorbed by the Supply Services.

Employers in the weaving section of the Lancashire cotton industry have decided on a joint conference with representatives of operatives for discussing the question of reducing the wages of ancillary workers. Approximately thirty thousand operatives are affected by the decision, which was made at a meeting held by the Central Committee of the Cotton Spinners and Manufacturers' Association. It is understood that the suggested wage reductions range from five to fifteen per cent. This variation is due to the fact that a number of sections of the operatives are affected and

Air Mail Week

their wage rates accordingly differ. Ancillary workers include the bulk of operatives who were not affected by recent wage reductions under the legalised agreement with operative weavers. They include winders and beamers, twisters and drawers, tape sizers, warp dressers, and loom overlookers.

Leaders of the Operatives' Trade Unions will strenuously oppose any cut in earnings. Mr. John Lee, Chairman of the Northern Counties Textile Trades Federation, which includes all Trade Unions covering ancillary workers, has stated that "any further attack on wages in the cotton industry will be strenuously opposed at the present time, when the cost of living is rising and wage increases are being secured in other industries. I am surprised that employers should even consider such a step when the wages of cotton operatives are already depressed below the level of other workers." Included in ancillary workers are 5,000 overlookers.

The City has not, so far, jibbed at the list of financial sanctions against Italy. As far as banking is concerned, the sanctions do not prescribe exchange dealings or the remittance of funds to or from Italy, which is operating in the normal way, subject to such restrictions as are imposed by Italy. The sanctions inhibit the opening of further bank credits or the extension of overdraft or other facilities on behalf of Italy; actually this inhibition is no more than locking an empty stable. London Banks have for some time been reducing their Italian credits and refusing to open fresh credits as a matter of prudence at the steady deterioration of Italy's credit. All the League has done is to endorse the City's banking policy. If an embargo is placed on Italian assets in London or on the remittance of funds, the City will not demur.

The accumulation of funds in the public deposits in the Bank of England has made money distinctly less abundant. For the first time for many weeks there was calling by the clearing banks for making-up purposes on the first four days of this week. Clearing banks are very reluctant to buy bills, which has increased the demand for loans, as bill-brokers are having to carry more bills themselves. The demand for money has been good.

Last week's Treasury bill tender rate was 12s. 1.82d. per cent., against 12s. 8.05d. per cent. the week before. Only £41 millions of bills were allotted out of the original offer of £45 millions. This week's tender is cut down to a maximum of £40 millions; three months' bank bills are quoted at 5/8-19/32 per cent.

U. S. A.

BUSINESS PROSPECTS

Wall Street has not been immune from the repercussions of the Italo-Abyssinian war. A revival which arises mainly from business confidence cannot but have a set-back from war news. The fall in prices has however been slight after the rather nervous advance a week ago, induced by fears of credit inflation. Stock prices are very little below those reached in the middle of September. The longer view is more obscure. Three major influences are operating—first, the position in Europe: second, the neutrality of the United States and, third, political stability. President Roosevelt is following the line of least resistance in regard to the first and second—a happy mean between isolation and support of the League. He will not find it so easy to adapt the United States to the more drastic measures which the League is framing—the President cannot, for instance, exclude Italian exports. His policy is to eliminate all interest in the war and, in this, the Neutrality Act will take him far, though not as far as he would like. Unless, therefore, there is a major military upheaval in Europe involving this country, business here is not likely to be prejudiced by Signor Mussolini's adventure in Abyssinia. The flight of capital from the old to the new Continent will continue and Wall Street will receive most of it.

The third condition is very likely to materialise. Politics next year will centre round the Presidential elections and, with Huey Long gone, the result is not in doubt. And, though a re-elected President Roosevelt might not carry *in extremis* his programme of "change the Constitution," the recovery that is emerging from the seething sea of political ferment would be a steadying element. The *New York Times* Weekly index of business activity touched 88.4 last week—a higher level than any since the summer of 1933 and 18 per cent. higher than the corresponding week of 1934. The progress of capital industries is continuous and constructional work is expanding. There is, therefore, a reasonable prospect of the recovery wave carrying the country on a crest of gathering volume and velocity.

During the week ended October 9, New York member banks' loans to brokers were reduced from 879 to 825 millions dollars. The latest return represents a drop below those for September which ran up to above 900 millions dollars. Other loans by member banks against securities remained unchanged at 742 millions dollars. Large arrivals of gold for the same week included 19.8 millions dollars from France; 11.4 millions dollars from Holland and 9.9 millions dollars from England. Engagements for shipment reported on October 12 and 16 were 14.9 millions dollars from France and 10.7 millions dollars from England. Total engagements from September 9 to October 9 are estimated at 350.8 millions dollars. At the week-end, the rally in Paris exchange to within the gold export point led to some cancellation of shipments; but the influx shows no signs of abating.

This is not due solely to the war atmosphere in Europe, but is the complement of major movements of capital which began last year. Over the past twelve months, American gold stocks have risen by about 1,200 millions dollars. The money market view is that most of this gold has not come out of the monetary gold stocks of other countries, but is new metal plus a transference of gold hoarded in Europe. Over the first half of the year, there was an active trade balance of only 29 millions dollars, which was much more than offset by gold imports of 802 millions dollars and silver imports of 79 millions dollars. The official estimate puts the net influx at 100 millions dollars of long term funds and at 560 millions dollars of short term funds. These estimates naturally leave room for discrepancies, as it is impossible to distinguish between the repatriation of American funds and the influx of foreign money. The rising trend of imports suggests that the dollar is no longer undervalued in terms of typical commodities.

Opening the way to the projected settlement of trade relations in the Pacific, the United States and Japan has concluded a "Gentlemen's Agreement," under which Japanese cotton and textile exports to the Philippines will be limited to 45,000,000 square metres a year for the next two years. Immediately after the conclusion of the agreement, Mr. Francis B. Sayre, Assistant Secretary of State in charge of trade agreement programmes, started work on a similar agreement for the limitation of Japanese textile imports into the United States.

Mr. Morgenthau, the United States Secretary of the Treasury, will proceed from Spain and Portugal to Paris, where, as I hinted last week, important "conversations" will take place with financial magnates. President Roosevelt's ban on Americans sailing on Italian ships at their own risk will necessitate the return of Mr. Morgenthau on a French or British liner. It is not yet known if these war restrictions will also necessitate a visit to London, where Mr. Morgenthau might collect authoritative views of Britain's monetary policy.

GERMANY

EXPORTS EXPAND

The problem of Germany's food shortage is causing some concern to the authorities. Already the Police Chief has carried out many personal inspections of the meat and beef markets to ensure that no attempt was being made to hoard supplies. Two officials were dismissed for failure to observe the law regarding the prices. Dr. Goebbles, the Propaganda Minister, has sought to reassure the people by declaring that the supplies of main foodstuffs were sufficient. Nevertheless, he had to warn house-wives to tighten their belts temporarily and spoke, in detail, of the attempts made by the authorities to maintain a regular supply of all articles of food, including arrangements for imports of pigs. Whether his speech will succeed in allaying the fears of the people remains to be seen ; for, as he himself has said, the available quantity of foreign exchange has been used in maintaining a regular stream of import of raw materials, with a view to support the work creation programme and check unemployment, in preference to an import of food products. The preference may appear to be ill-placed, but with Germany raised as a first rate military power, the patriotic fervour is expected to give some consolation for a material want.

The improvement in the German trade balance registered in the past two months has been maintained in September. The export surplus has grown to Rm. 50,000,000 in August and an import surplus of Rm. 1,500,000 in September, 1934. The total volume of trade showed a slight increase. Export, mainly due to the exports of raw materials, especially that of coal to Italy, showed a rise from Rm. 367.6 millions in August, 1935, to Rm. 373.0 millions in September, 1935. Imports have practically remained stationary at Rm. 3,199 millions. Imports from Russia, Italy and Holland declined, but those from Belgium, Denmark, South Africa increased. This steady expansion of the foreign trade of the country during the past four months, reveals the beneficial effects of Dr. Schacht's "New Plan." The export subsidising scheme, which is now working for well over four months, should also be credited with its due share for the progress recorded. In the six months ended September 30, 1934, the foreign trade of Germany recorded a huge adverse balance of Rm. 213 millions. For the corresponding period this year, this adverse balance has been converted into an export surplus of Rm. 119.1 millions—a significant change. Of the fund of 1,000 million marks created for this expenditure, up till now, about Rm. 600 millions have been spent on an export total of Rm. 1655 millions. The balance of the fund may probably be used up in the coming months and, unless fresh circumstances should arise to falsify hopes, this steady expansion must continue for some months to come. As far as the scheme has worked, there has been little or no action taken by the foreign countries to view German Goods with odium, as in the case of Japanese materials. The threat of German dumping, though forming a good subject for academic discussions, has not become a practical problem to evoke opposition. Dr. Schacht could not have failed to examine this aspect of the question and can be relied upon to adjust his subsidy in a manner which will least provoke opposition from foreign competitors.

Another important feature that the foreign trade returns reveal is that the problem of raw materials does not occupy such a prominent place in the national economy as it did some time back. This is evident from the mere fact that the export surplus, which the country has now at her disposal, is being utilised, not in increasing the imports of raw materials, as should have been done, had the shortage been felt keenly, but in the reduction of her foreign trade debts. While the score or so of Clearing Agreements that Germany concluded with foreign countries worked well, as a convenient medium of repayment of interest on Dawes and the Young Loans, they also resulted in an increase of foreign commercial indebtedness, temporarily amounting to a little below Rm. 1,000 millions. The shrinkage in the volume of trade, which in turn brought about a series of strict exchange and transfer restrictions, had necessitated a postponement of the liquidation of this commercial debt. Now that the position is showing signs of improvement, Dr. Schacht has, wisely, of course, devoted the available surplus,

in bringing down the indebtedness incidentally proving to the world that his economic policy has nothing of the ulterior motives that are credited to him usually by foreign economist-politicians.

CANADA

THE GENERAL ELECTIONS

The Canadian General Election resulted in a sweeping victory for the Liberals under the leadership of Mr. Mackenzie King, who will be the Premier for the third time. The results, announced, record such a complete victory that Mr. King and his party command a majority of seven to three in the Dominion House of Commons. The latest figures available as to the state of the Parties are as follows:—

Liberals ...	167	(93 in last Parliament)
Conservatives ...	41	(133)
Social Credit Party ...	17	(None)
Commonwealth Co-operative Federation ...	8	
Independent Liberal ...	4	
Independent Conservative ...	1	
Reconstruction Party ...	1	
Other Groups ...	4	
Still Doubtful ...	2	

Returns to hand indicate that the number, voted, will probably constitute a record for the Dominion. Among 3,326,000 Canadians who voted, 1,508,000 polled for the Liberals. The conservatives secured 1,017,000; the Reconstruction Party, 334,000; the Commonwealth Corporation Federation 230,000; the Social Credit Party 100,000; and the other parties 67,000. No statement has yet been issued as to when Mr. Bennett will hand over the Government to Mr. Mackenzie King. A feature of the elections was that no less than twelve conservative cabinet ministers were defeated, although Mr. Bennett was re-elected for his constituency in Alberta, the stronghold of the Social Credit group.

Mr. Bennett, on behalf of his Conservative Party, has promised much for the Canadians, if he ever returned; but evidently, his promises were too belated having been made just on the eve of the elections, so as to savour much of an election tactics. When in 1930, Mr. Bennett attained power, the only cure that he could offer for the economic ills, Canada was suffering from, was "higher and still higher protection," as leading the way not only merely to high profits but also to high wages and employment. Canada duly had a comprehensive and drastically high tariff under his regime: but he had to admit that, in spite of high tariffs, the depression had deepened. Agricultural prices were falling: even industrial profits were shrinking. Budget deficits, both in the Provincial and Federal Governments, have been growing. In the Imperial Conference, Mr. Bennett pleaded for a preferential treatment for Canadian wheat, and succeeded in getting the United Kingdom to impose duty on foreign wheat, imported into Great Britain: but it did no good to the condition of the Canadian wheat growers. The deliberations at Ottawa and the resultant diversion of certain small proportion of Empire's overseas trade into inter-Imperial channels, certainly profited Canada to a great extent; but they were too insignificnt to lift the country from out of the depths of depression. The almost barren programme and futile experiments have already begun to tell upon the populace, when the Conservative Party lost some of the bye-elections. Last but not least, came the rift in the lute, when Mr. Steveres, the Minister of Trade, charging the Government with "unfair and unethical practices" and certain business interests, resigned from the cabinet to form his own reconstruction party. On the eve of the elections, having taken stock of the course of events during the last four years, Mr. Bennett has grown wiser. He had boldly asked Canada to endorse his five years of stewardship during a period of acute and world-wide economic distress. Though he claimed that the conservative policy had enabled Canada to weather the depression as well as any other nation in the world, he promised a modern "New Deal" programme, if re-elected. Judging from the events, his frantic appeal made little impression, and though finding a place in the Commons, he has practically staged his exit from the executive.

Mr. King will now be at the helm of affairs, and the chief plank of the Liberal Party, of which he is the leader, will be freer trade and the lowering of tariffs. His policy included the abolition of "extravagant increases in tariff" and all "unwanted extra taxes on imports such as exchanges and dumping duties." Among other Liberal promises, are a publicly-owned Central Bank (in lieu of the New Bank of Canada which is free from Government interference), the appointment of an investment control board to prevent exploitation of the public by watered stocks and worthless securities, and the ending of artificial price control. Mr. King is of the opinion that Government interference in economic matters has tended towards a dictatorship, and would, therefore, advocate a re-assertion of personal liberty and a more equitable distribution of wealth. Another outstanding plank of his policy is the increase in public works programme. Mr. King, though confident of the economic rectitude of his programme, has been led to promise many things, and he attributes his victory as a direct response to the Liberal protest against all forms of dictatorship whether they incline towards Socialism, Fascism or Sovietism, as also equally against endless, dangerous experiments in matters of Government. As could be gleamed at present, Mr. King's victory may lead to a re-orientation of the Imperial economic policy and a revision of the fatal closed-door policy, so foolishly initiated at Ottawa. Perhaps this may prove to be the central item of interest in his administration during the next four years.

JUTE AND JUTE GOODS

JUTE

Calcutta, October 31, 1935.

The jute market during the week under review registered a sharp rise. The principal reason for the strength in the jute market is the continued paucity of imports in the up-country centres. It is believed that as a result of the propaganda carried on in the mofussil, cultivators this section are selling their produce in small quantities.

Foreign buyers are reported to have taken a moderate amount of interest. Local mills have been entirely out of the market for the last fortnight or so. Owing to their inability to sell forward delivery contracts and the low price of heavy goods, mills are not likely to buy freely at the present level of prices.

There was considerable activity in the *Phatka* market. A prominent operator, who had a considerable short account, came out as a buyer. From a bear he has turned into a bull. This reversal of position was responsible for the sharp rise during the last two days.

Some dealers report a slight increase in the volume of up-country imports. Till there is a considerable increase in arrivals any appreciable break in jute values is quite unlikely.

In the Loose Jute section, the market is firm in sympathy with stronger advices from up-country, where imports are small and prices advancing. Practically no business has been reported. The nominal quotations are on the basis of Rs. 6 per maund for Indian Jat 4's.

The *Pucca* Bales section ruled firm. Earlier in the week a fair amount of business was done in Reds and Hearts at Rs. 38 and Rs. 26 respectively per bale. Daisee 4's for Outports sold at Rs. 28-4 and for Dundee at Rs. 30-8 per bale. Later, towards the close, a small shipper business has been done on the basis of Rs. 36-4 per bale for Firsts November 15 shipment.

The *Fatka* market has been active, with prices advancing. A rise of about Rs. 3 was recorded in the course of the week, the highest quotation being Rs. 38-4. At the time of writing the market is firm roundabout Rs. 38-4.

JUTE MANUFACTURES

Calcutta, October 31, 1935.

The hessian market has been steady without much business passing. The scarcity of near goods prevents the market from declining. Mills have been anxious to sell for forward deliveries, but little business was done owing to absence of buyers.

The attention of foreign buyers was confined to odd lots for near deliveries.

Shipments for the current month are very good and it is expected that the stock position at the end of this month to be published shortly will reveal a reduction of 2 crore yards.

Near goods of all descriptions continue to be very scarce and all qualities are quoted at considerable premium over forward.

It is reported that two important members of the Indian Jute Mills Association have addressed a joint letter to the Committee of the Association asking for an assurance from the Committee that no agreement between the members to restrict production will be made by a majority, if there is no agreement with the outside mills. The Committee is said to have discussed the letter. No definite decision was arrived at and a General Meeting has been called on the 11th November. The members of the Committee favour approaching the Government for help. Well-informed circles believe there is little hope of any legislation to help the industry. There were rumours in the market that the above two mills may resign owing to their difference of opinion with the Committee.

Business reported were very small and confined to near positions only. 11 Porters Ready sold at Rs. 10-9 to Rs. 10-11, while Rs. 10-4 was paid for April/Sept. shipment. Ready 40" × 8 oz. sold at Rs. 8-14 and 40" × 7½ oz. at Rs. 8-12 basis.

Heavy Goods were dull and featureless with very little business passing. B. Twills were done at Rs. 22-10 January/June delivery. Liverpool Twills and Cornsacks Ready are quoted at Rs. 26-8 and Rs. 23-2 respectively.

JUTE BREVITIES

War Office Order for Sand Bags.

"The War Office," says a report in the *Dundee Textile Report*, "is stated to have been enquiring direct from manufacturers for 4,200,000 sand bags."

River Plate's Hessian Requirements.

"For the past three seasons Continental manufacturers have been able to supply an appreciable share of the River Plate requirements, which used to be practically monopolised by the Calcutta Mills", says a report in the "Jute". The journal adds, "To-day, German, Czechosslovakia and Belgium are active competitors, in that order. Dundee has not participated in the hessian orders for grain bags, but has supplied this fabric in increased quantities for the meat trade." Shipments from Calcutta to River Plate this year are expected to amount to 85,000 bales of 2,000 yards, in addition to some 25,000 bales from Europe. In 1933-34 Plate requirements of hessian amounted to about 110,000 bales.

Jute Cultivation Research in Russia.

The Russian Textile Research Institute has been carrying out during the past few years a number of pieces of research work on the possibility of acclimatising certain textile plants on Russian soil. Various types of hemp, such as *Hibiscus cannabinus*, the so-called Chinese jute, *Abutilom*, ramie and other plants which were considered possible yielders of textile fibres were cultivated in various districts, the total area under cultivation being almost 50,000 acres. Special engineers have been engaged in preparing machinery to treat the fibres, and new machines for decortication, degumming and cottonising have been produced by them. Further investigations have been made into further uses for fibre wastes, certain products resulting from decortication being treated to yield alcohol, oils and essences.—*Jute*.

COTTON AND COTTON GOODS

COTTON

Calcutta, October 31, 1935.

There is no important development to report in the Bombay cotton market during the week under review. The market has been ruling quiet with a declining tendency. Attention of most of the operators have been diverted from speculative zest to the pure of the intervening Divali festivities. Moreover, the bullish enthusiasm over the war factor has considerably cooled down since the speeches of British statesmen which indicated that military sanctions are unlikely. Operators, in general, are hesitant to enter into fresh commitments in view of the uncertainty regarding the future trend of the market. Export enquiry has dwindled and at present is confined to occasional lots for Japan.

Broach April/May has declined to Rs. 213-8 on October 29, but towards the close, on reports of cloudy weather in the districts and encouraging advices from New York, the market steadied up, Broach April/May spurting up to Rs. 216-4. The closing rate was Rs. 215-12. Oomra Dec./Jan., closed at Rs. 198-4 and Bengal Dec./Jan. at Rs. 150-12.

Speculative fervour has abated considerably in New York and prices are maintained practically owing to continued trade buying on a satisfactory scale. The price-level at the close was, however, 15 points higher than last week. Considerable activity was displayed by trade interests on October 23, when a killing frost seemed imminent in Texas and Oklahoma. On receipt of the report heavy buying emanated from foreign operators and prices were pushed up, spot touching 11.40 and December 10.98. Prices, however, eased off on the next day as the frost did not create any damage to the cross. The heavy hedge-selling was absorbed by good trade demand. Towards the close prices improved substantially, middling spot quoting 11.35, December 10.96 and March 10.88.

The Census Bureau of the Department of Commerce has issued its sixth Ginning Report, which places cotton ginned up to October 17, at 6,590,000 bales.

The Liverpool market has been maintaining a steady tone. The strength of the spot market due to low stocks, good trade demand together with the continued strength of Egyptian cotton, imparted a bullish feeling in the market. Though there were hedge-selling, all sales have been absorbed by the trade. The spot rate, after touching 6.52 earlier in the week, declined to 6.46 at the close, while December and March closed at 6.13 and 6.09 respectively. The Egyptian section remained very strong on keen competition with prices tending upwards. Sakel spot touched the highest at 9.14, while October closed at 8.67.

The area under cotton in the Madras Presidency up to the end of September has been estimated at 1,152,000 acres as compared with 733,900 acres in the corresponding period last year or an increase of about 57 per cent. The increase in area is marked in the Deccan where the area increased from 476,000 acres to 811,500 acres owing to a favourable season. The condition of the standing crop is reported to be satisfactory in all districts.

In C. P. and Berar the cotton crop outturn for 1935-36 has been estimated by the Department of Agriculture at 79 per cent. of normal, against 77 per cent. estimated at this time last year. Whereas the yield in the Nagpur and Wardha districts, from which hail the C. P. No. , Arvi and Hinganghat cottons, has been estimated at between 82 to 90 per cent. of the normal, that in the Berar districts of Akola and Buldhana has been estimated at 67 per cent. and 82 per cent. of the normal respectively. The conservative nature of the Berar estimates has been attributed to the uncertain course of the monsoon this season.

The Department of Agriculture, United Provinces, estimates the area under cotton during 1935-36 at 572,000 acres, compared with 705,000 acres, the actual acreage of last year. The outturn has been estimated at 75 per cent. of the normal. "The crop prospects at the end of September are not as disappointing," says the Department, "as they were during August when there were defective rains and drought in many places."

PIECEGOODS

Calcutta, November 1, 1935.

The bullish sentiment of last week continued during the current week and a large volume of inquiry, covering a wide range of styles, has been dealt with. The advent of winter season improved the demand of cold weather materials, in which a satisfactory business is reported. As stocks are not heavy, dealers expect improvement in prices as well as the offtake, when the season advances.

Trade in Indian goods have been more active. But bulk orders have not been witnessed except in one or two large lines of grey shirtings and grey drills. Mills are very anxious to clear their stocks and are reported to effect sales, in some cases, at even below production costs.

Japanese productions also met with good demand. Fresh contracts in grey shirtings, white nainsooks, white shirtings and artificial silk fabrics have been successfully negotiated for shipment January/April.

In Lancashire section, sales have been effected in useful lines of umbrella cloths, range nainsooks and white mulls for shipment January/April. Retail transactions in white yarn dhooties, dyed fancies and some specialities also transpired.

In the yarn section, though no appreciable expansion in the turnover has taken place, the bullish feeling continues. In Japanese section 600 bales of 40s. have been reported, while the only reported transaction in Indian yarns has been one of 300 bales of counts 20s. to 32s. for forward delivery. Business in British yarns have been practically negligible.

In Bombay, conditions are very encouraging. The offtake in Indian goods is satisfactory. Though bazar prices have improved, the all-round improvement in demand experienced last week has not received a set-back. Japanese cloths are in good demand. Clearances continue on a good scale and prices are firm. The low stocks of Japanese goods are helping at present, but huge arrivals at low rates are expected shortly. In British goods, buyers are no doubt busy. There have been a good deal of enquiry, but many of them have been rejected by manufacturers as they considered the offers too low. The yarn section has been active and a moderate turnover resulted. The firm replacing prices may induce buyers to cover their future requirements and dealers are hopeful of an expansion in clearances shortly.

BULLION

GOLD

Calcutta, October 31, 1935.

A quiet but steady tone prevailed in the Bombay gold market during the past week. The absence of any stimulating news from abroad and the intervening Divali holidays restricted business to a great extent. Operations were of a colourless nature and price movements were confined within a narrow range. Ready and first settlement closed at Rs. 34-15, while second settlement was quoted at Rs. 34-14-9 at the close.

Arrivals average about 10,000 tolas a day, while stocks on hand are unchanged at Rs. 1 lakh. The daily off-take continues at 3,000 tolas.

The price of gold in London declined to £7-1-3½ on October 24, and rising to £7-1-6½ on the next day remained steady at £7-1-6 on the following days. Towards the close the rate has receded to £7-1-4.

There has not been any appreciable fluctuations in the cross rates. The Sterling-Franc rate moved between 74.54 and 74.60, while the Sterling-Dollar rate moved between 4.91 7/8 and 4.91 9/16.

Gold bars valued at Rs. 1,66,66,499 were exported to foreign countries from Bombay to-day by s.s. "Kaisarihind". The total value of gold exported since Britain went off the Gold Standard, amounts to Rs. 2,49,97,58,551.

The total exports of gold from the United Kingdom for the week ended 18th October 1935, amounted to £6,249,000 of which £5,928,000 was shipped to U.S.A. and £184,000 to France. The total imports of the metal into the United Kingdom during the same week amounted to £2,350,000 to which Africa contributed £1,612,000, India £564,000 and France £29,000.

London—Air Mail week ending October 16.

The Bank of England gold reserve against notes amounted to £193,673,266 on the 9th October, as compared with £193,642,833 on the previous Wednesday.

In the open market the total amount which changed hands at the daily fixing during the week was about £2,800,000, most of which was taken for the United States of America, prices having ruled at about dollar parity. Shipments of gold from France to New York have tended to diminish.

The following were the United Kingdom imports and exports of gold registered from mid-day on the 7th October to mid-day on the 14th October.

SILVER

Calcutta, October 31, 1935.

The silver market has been steady during the earlier part of the week, after the Divali holidays, prices took a definite turn downward, on receipt of less encouraging advices from London. A decline of more than Rs. 1-4 was recorded as compared with last week's closing rates. The market lacks enthusiasm and operators are patiently awaiting fresh incentives from foreign centres. A quiet tone prevails at the close, Ready quoting Rs. 66-4, first settlement Rs. 66-6 and second settlement Rs. 66-11.

Stocks on hand are unchanged at 35,000 bars. Arrivals are negligible while the daily off-take continues at 10 bars. Total imports last week amounted to Rs. 59,469 in coin.

In London, the spot rate was very steady at 29 5/16d., while the forward rate has gradually receded from 29¼d. to 29d. at the close. America was a steady buyer throughout the week. China was the chief seller, but India appeared as a buyer and seller.

The New York spot rate was unchanged at 65 3/8c. The London-Shanghai rate has steadily declined from 1-5 3/8 to 1-3¼ at the close.

The exports of silver from the United Kingdom during the week ended 18th October, 1935 amounted to £1,780,000 of which £1,746,000 was shipped to the United States and £23,000 to the Netherlands. The total imports of the metal into the United Kingdom during the same week amounted to £1,965,000 to which Japan contributed £2,22,000, Hongkong £1,478,000 and British India £43,000.

London—Air Mail week ending October 16.

Until October 16, when the forward quotation eased 1/16d. prices during the week under review had remained unchanced at 29.3/8d. cash and 29./716d. for two months' delivery.

There have been no new features, purchases for the American Treasury still being the chief support, but there has been buying by the Indian Bazaars, although the same quarter also made re-sales ; there were further offerings from China and some selling by speculators to liquidate bull commitments.

The market has been rather quiet, but the tone is quiet, steady and no change of importance is anticipated in the near future.

The following were the United Kingdom imports and exports of silver registered from mid-day on the 7th October to mid-day on the 14th October :—

TEA

CALCUTTA AUCTIONS

Calcutta, October 31, 1935.

At the auctions of teas for export on 28th instant, the total offerings amounted to 27,199 packages, out of which 21,350 packages sold at an average price of Rs. 0-9-7, which is 1 anna 2 pies higher than the corresponding auction last year. Quality showed slight improvement, Assam teas in particular being of a useful standard both in leaf and liquor. Good teas and common kinds showed little change in value. For all other teas prices marked an irregular decline of 3 to 6 pies for mediums.

At the auctions for internal consumption on 29th inst. about 18,300 packages were submitted for sale, out of which 10,700 packages were Dusts and the remainder leaf and other grades. A good market prevailed for all grades. There was little change in price from last week.

The following are the full particulars of sale No. 20.

LONDON AUCTIONS

The total offerings for the week ending 31st October 1935 at the London auctions, comprise 53,700 packages of Indian, 20,400 of Ceylon and 5,500 of Java teas.

Indian Tea.

At the auctions on October 28, the total packages submitted for sales amounted to 28,900 packages. The market was very irregular and easier. Common kinds showed a decline of ⅛d. to ¼d. per lb., Plain medium Assams were ¼d. to ½d. per lb. lower and all others irregular except best qualities.

Ceylon Tea.

At the Ceylon Auctions on October 29, the market was rather easier, partly due to decline in quality. Prices for low-grown tea were a farthing down, mediums from a farthing to a half-penny and better class a halfpenny to a penny per lb.

Java & Other Teas.

At the auctions on 24th instant 5,600 packages of Java and other teas were submitted for sale. Demand was quiet with prices irregular. Leaf grades and tipey teas were steady.

Tea Average.

The following were the average price of tea per lb. in the London market during the week ending October 24, as compared with the week previous:—

			Week Ending October, 17	Week Ending October, 24
Indian Tea (Northern)		...	15.34d.	14.75d.
Indian Tea (Southern)		...	12.79d.	12.68d.
Ceylon Tea	...	...	16.76d.	16.59d.
Java Tea	...	...	13.15d.	12.56d.
Sumatra Tea	...	...	11.05d.	a0.41d.

SUGAR

Calcutta, October 31, 1935.

Conditions in the local sugar market are quiet and prices have declined by 2 to 3 annas as compared with last week. Java Refined Ready is quoting Rs. 10-11, while White Ready and Steamer are ruling at Rs. 10-9 and Rs. 10-2 respectively. In the Desi section White (1st Crystal) is quoting Rs. 10-4 to Rs. 10-8 and Brown (2nd Crystal) Rs. 10 to Rs. 10-4.

In Bombay, the bullish sentiment has received a check. Selling of a profit-taking nature by outsiders, commission agents and jobbers pressed down the prices. Upcountry buyers were practically out of the market. In the absence of any further political complications in Europe, operators are rather in a disposition to watch the situation. Under pressure of selling the market dropped by 6 annas. Last week's turnover amounted to 6,300 tons.

Nivas in Java is quoting F4.30, at which rate about 15,000 tons are reported to have been sold.

The Cawnpore market is practically depleted of old crop and new crop positions are easier by ½ to 1 anna.

Arrivals:—The s.s. Kenya brought with 2,500 tons Mozambique sugar. The s.s. Sirsa and Subedar are due shortly with 1,500 tons each.

Stocks in the main ports are:—

(In bags: 10 bags = 1 ton.)

		1935		1934	
Calcutta	...	(24th Oct.)	20,910	(24th Oct.)	24,950
Bombay	...	(25th Oct.)	60,000	(25th Oct.)	67,000
Karachi	...	(25th Oct.)	25,500	(26th Oct.)	90,000

Rangoon	...	(21st Oct.)	15,300	(22nd Oct.)	1,180

MADRAS MARKETS.

Madras, October 29, 1935.

The Piecegoods market remains quiet, and business is limited to retail sales. Most upcountry buyers have already met their seasonal requirements, and the recent advance in prices has not been maintained. Yarn prices remain steady, but business is now on a restricted scale owing to seasonal slackness. A small forward business is reported.

METALS

The local market remains dull with downward tendency, and there is considerable selling pressure. Sterling quotations have gone back to £44 per ton for English Yellow Metal and £40 for Dittmann sheets against £44-2-6 and £40-5 a week ago, and £52-10 for Copper sheets against £53 a week ago. Local prices are lower at Rs. 153 per candy for "Yellow Metal" sheets and Rs. 183 per candy for Copper sheets.

GROUNDNUTS

The Groundnut market has been dull since the beginning, of the week under review. London quotations for Coromandel Machined opened on Monday last at £15-8-9 November Sellers and £14-10 December sellers, and thereafter rapidly declined to £14-5 November sellers and £13-2-6 December Paid on Friday. The latest cable advices report that there are sellers at £13-17-6 November and £13-5 December. Shippers' buying limits have been reduced to Rs. 33-8 for Machined and Rs. 27-4 and Rs. 28 for Ordinary per French Candy of 531 lbs., ex-coast godowns. At Vizagapatam, shippers who canvassed forward contracts at Rs. 12-4 per bag of 164 lbs., Machined kernels for November 15 delivery, have reduced their buying limit to Rs. 10 per bag of 164 lbs. for the same position. At Pollachi, values have declined to Rs. 29-8 for Rose variety Machined, per French candy, ex-sellers' godowns, and one rupee less for Red variety Machined. The downward tendency will be somewhat arrested when there is less selling pressure in the Vizagapatam area and as more space is chartered for November/December shipment. The acrage under the Groundnut crop this year is only slightly above that of last year, though weather conditions have been more favourable. The market is likely to react to the bullish crop position when the main crop begins to move early in the new year.

The Kernel freight market continues to rule firm with a good demand for November/December shipment. One booking is reported for end October loading from Madras/Cuddalore to Hamburg at 32s. 6d. per ton of 20 cwts. A Charter has been fixed for December loading at 30s. (Per ton of 20 cwts.) As Liner space is not available shippers are trying to charter their requirements.

Arrivals of Groundnut kernels into Madras for the week ended October 26, 1935 amounted to 15,024 bags or 1,182 tons against 16,868 bags or 1,328 tons in the preceding week and 9,521 bags or 750 tons at the corresponding week of last year.

Exports of Groundnut kernels from the Madras presidency during the month of September, 1935 totalled 13,113 tons valued at Rs. 21,44,061 as compared with 39,977 tons valued at Rs. 42,91,131 for the corresponding month of last year, due to smaller offtake by the United Kingdom and the continental countries.

HIDES AND SKINS

Air Mail advices from London report that the rapid advance in the Madras market enabled Curriers to sell their stocks of rough kips at a profit, as Madras shippers were unable to accept the bids of buyers. Owing to the nervousness created in the local market by the news that Curriers were re-selling rough kips at prices considerably below those ruling at origin, London brokers have been inundated with selling orders and values have, as a consequence, dropped to 2d. above the minimum selling rates for all weights and grades. Prices locally have registered a further decline of fully one anna per lb. and about 40,000 pieces have been cleared towards the close of the week at the lower price-level. Tanned Buffalo hide values have also declined by 6 pies per lb. for Heavy weights and by 3 pies per lb. for Light weights, but demand from the U.S.A. and the Home market continues on a fair scale. Tanned Buff Calf skins, on the other hand, have been in brisk demand and values for these have been in brisk demand and values for these have gone up by 6 pies per lb. The market for Tanned Cow Calf skins continues steady and values are higher by 3 pies per lb.

Tanned Sheep sales closed firm on Monday last. Madras Sheep registered an advance of 5d. to 6d. while Bombay Sheep showed a rise of 2d. to 3d. on last sales' closing prices. 570,000 Madras sheep and 83,000 Bombay sheep were sold. Since the public sales London quotations of Tanned Goat are 1d. to 2d. lower and demand is slow, prices in the local market have declined by half an anna per lb. There is a steady demand from London for Tanned Sheep.

NEW INDIA INSURANCE—IDEAL INVESTMENT

Shares of industrial companies fluctuate with the ups and downs of the industries concerned. Giltedge itself is tossed hither and thither by intrigues of politicians, tactics of speculators or antics of Finance Ministers. Bank shares have but a steady tenor, as the business of banks does not ensure the automatic and progressive growth, which is the dominant characteristic of insurance companies.

Shares of insurance companies have this unique feature—that they give a definite and satisfactory in relation to yield on giltedge, with which alone return satisfactory they should be compared; and that they are definitely assured of gradual, but inevitable, appreciation in capital value, as the business of insurance itself is like a snow-ball that must, and cannot but, gather more and more volume.

If you wish to earmark portions of your savings for your children, you cannot do better than buy shares of good, first-class insurance companies, tie them up, and let them grow into more and more value. By the time the children have crossed their teens, they may find the investment with double, or treble, or even quadruple of the original outlay. The difficulty, however, is to get insurance shares at a price, which is not several times the paid-up price. Take the Oriental. The Rs. 200 share is quoting Rs. 4,200. Or take the Empire of India. The Rs. 175 share cannot be got for less than Rs. 2,800.

MARKETS QUIETER

(By Special Cable)

(By R. Gordon Cummings)

London, October 31.

Markets are quieter after earlier activity.

We expect little business until after election.

The New India shares are specially worthy of attention as, at their price, they are only two-and-a-half times the paid-up value.

Of the New India, we wrote last year, that is, on December 22, 1934, as follows:—

> The New India Assurance Company is the largest composite insurance office, started under powerful auspices, controlled by an illustrious board of directors, run by expert and efficient staff, assured of influential local connections and of favourable treaty arrangements, and able to claim splendid achievements in the past and to hope for still better and more rapid progress in the future.

The position has, as was to be expected, improved much further in the latest accounts, which were published recently.

The Fire Fund was 98.5 per cent. last year; it is now 101.5 per cent. The Marine Fund was 128.1 per cent. last year; it is now 129.1 per cent. The Accident Fund was 95.3 per cent. last year; it is now 100.7 per cent. These are reserve proportions which can compare favourably with leading British offices.

Life Fund was Rs. 15.45 lakhs last year; it is now Rs. 26.34 lakhs. Total funds have increased by Rs. 14.95 lakhs to Rs. 1,80.90 lakhs.

Most of the investments are in giltedge or first-rate trustee securities. The book value of the securities is below market value by anything like Rs. 20 lakhs. This Inner Reserve is a factor of compelling importance.

MARKET FIRM

(By Special Cable)

New York, October AE.

Markets closed firm. Motors and Steels were higher.

This receives added significance from the fact that the Investment Reserve of Rs. 5.92 lakhs, created in earlier years, is kept intact.

The dividend this year was Rs. 1-4-0 per share, as compared with Rs. 1-3-0 last year, Rs. 1-2-0 in 1932-33 and Rs. 1-1-0 in 1931-32. There is thus a gradual and definite stepping-up of dividend.

We may repeat that the dividends in the coming years must show steady and even rapid rise—the more emphatically so after the life section begins to make its full quota of contribution. All the reserves are ample; further augmentation of reserves would be financial purism carried to excess.

On the present price, the yield is something like 3¼ per cent., tax-free. To get so attractive an yield on a first-class insurance share, like the New India, is not an opportunity that will stay there for ever.

Within a year, the Oriental has gone up from Rs. 3,860 to Rs. 4,200; Empire of India from Rs. 2,505 to Rs. 2,800. So may New India register a sure and certain annual climb.

The New India shares are to be commended as the ideal investment for children, because it is a well-planned company, whose business is destined to make increasing headway, and whose shares must, like all good insurance shares, show progressive appreciation.

Worth-While Investments:

INDIA

A FIRST-CLASS PUBLIC UTILITY SCRIP

BENGAL ASSAM STEAMSHIP COMPANY

(By "Watch-dog")

Another of the navigation companies under the managing agency of Messrs. Andrew Yule and Company which is worth our attention is the Bengal Assam Steamship Company.

Registered in 1895, the Company is engaged in the carriage of jute, coal and general cargo between East Bengal and Calcutta. Consequently, its profits are dependent upon the nature of business activity. The depression has had its toll of the earnings of this Company also and this will be quite evident from the table given below. Profits have fluctuated with the amount of business activity and they have been at their lowest in 1932. There has been a gradual improvement since then:—

Year ended		Profit Rs.	Allocation to funds Rs.	Depreciation Rs.	Carry forward Rs.	Dividend per cent
1925	...	4,80,723	1,00,000	2,00,000	11,124	15
1926	...	4,45,084	...	2,55,130	30,078	15
1927	...	6,20,096	1,00,000	2,50,000	29,175	25
1928	...	6,26,218	1,00,000	2,50,000	34,393	25
1929	...	6,85,066	1,00,000	2,50,000	48,459	20
1930	...	6,97,692	1,00,000	2,50,000	75,151	15
1931	...	4,11,320	50,000	1,50,000	65,471	10
1932	...	3,82,722	...	1,75,000	52,193	10
1933	...	5,75,231	50,000	2,50,000	76,424	10
1934	...	6,41,105	50,000	2,80,000	1,01,841	10

The general policy of the Company has been highly satisfactory and the balance sheet for the year ended October 31, 1935 must make very good showing. The balance sheet figures for the last two years are given below:

Liabilities—

			1934 Rs.	1933 Rs.
Capital	...	...	23,00,000	23,00,000
Reserves	...	...	9,25,000	8,30,000
Sundry liabilities		...	6,78,211	5,78,733
Profit & Loss	...	...	3,22,841	2,97,424
Total		...	42,26,052	40,06,157

Assets—

			1934 Rs.	1933 Rs.
Block (net)	...	...	30,05,336	30,27,724
Stores	...	...	2,184	574
Outstandings		...	1,80,494	1,75,520
Investments	...	...	6,79,923	5,29,081
Cash	...	...	3,58,115	2,73,258
Total		...	42,26,052	40,06,157

The capital authorised and issued is Rs. 25 lakhs, Rs. 20 lakhs being in 20,000 ordinary shares of Rs. 100 each and Rs. 5 lakhs in 7 per cent. cumulative preference shares of Rs. 100 each. The capital subscribed is Rs. 23 lakhs, Rs. 20 lakhs being in 20,000 ordinary shares of Rs. 100 each and Rs. 3 lakhs in 5,000 shares of 7 per cent. cumulative preference of Rs. 100 each on which Rs. 60 has been called up. These preference shares carry claim to repayment of capital.

In April, 1929, the capital of the company was increased to its present figure by the capitalisation of Rs. 10 lakhs standing to the credit of Reserve Fund and creating thereby 10,000 ordinary shares of Rs. 100 each ranking for dividend as from 1st May, 1929. These shares were distributed as free bonus to the existing shareholders of one share for each share held.

The reserves are Rs. 9.25 lakhs as against Rs. 8.3 lakhs in 1933. Rs. 8.5 lakhs belongs to the General Reserve Fund and Rs. 75,000 to the Fleet Replacement Fund.

Sundry liabilities are Rs. 6,78,211 against Rs. 5,78,733.

On the assets side, the gross block is Rs. 78,89,028 against Rs. 76,31,416. The depreciation policy is in approved Clive Street style; and the block has been depreciated by Rs. 48,83,693 to Rs. 30,05,335.

Outstandings are Rs. 1,80,494 against Rs. 1,75,720 in 1933.

Investments are higher at Rs. 6,79,923 against Rs. 5,29,081. These are all in Government of India securities and are shown in the books considerably under market value.

BRITISH COMPANIES IN INDIA

By R. Gordon Cummings

Once again the number of announcements in respect of British companies operating in India are on the large side compared with those of recent weeks. In addition to the usual analysis of industrial and other results I am drawing attention this week to the remarks of another authority in the tea and rubber industries.

* * *

A Further Authoritative view on Tea and Rubber.

Last week I summarised some of the most important points on the outlook for tea and rubber put forward by Mr. H. J. Welch, the chairman of Malayalam Plantations. Since this speech was made, Mr. H. Eric Miller, the chairman of *Harrisons and Crosfield*, has given his considered views on the outlook. As *Harrisons and Crossfield* are one of the largest produce firms in this country and the East, the views of Mr. Miller are worth serious consideration, more particularly as he is connected with many of the most successful rubber and tea producing companies.

Dealing with the position of tea, he stated that "A very satisfactory feature of the changed position is that good quality teas are coming into their own again and show a relatively greater improvement. The greater prosperity which this country has enjoyed during the past twelve months has enabled people to spend a little more freely and to indulge their fancy for a somewhat higher grade of tea, because the public are beginning to realise that the cheapest tea is not the most economical.

"The advertising which has been done by the propaganda department of the International Committee in this direction has undoubtedly helped.

"The potential producing capacity of the existing gardens is well ahead of current world consumption. Co-operative efforts to expand consumption are a main plank in the functions of the International Tea Committee, but the present agreement runs only till 1938, and as the industry cannot, even in the best event, hope to be able to dispense with regulation of exports by that time, it is essential in the interests of all concerned that the agreement should be continued for a further period thereafter."

As Mr. Miller is a member of the International Rubber Regulation Committee he must necessarily be very guarded in his views on this commodity. Despite this restriction on his free speaking I consider that two of his comments are worthy of attention.

Dealing with the outlook for rubber he pointed out that "With absorption continuing at its present rate a further steady reduction in stocks is assured. It is known that stocks held by manufacturers in a number of countries where exchange difficulties are acute have been reduced to the bare minimum, and as the greater part of the world's reserve supply available to meet immediate demand from any quarter would have to be taken from U. K. stocks, the actual position seems to me stronger than is generally recognised."

Coming from such an authority I feel that my previous arguments on the more promising outlook for tea and rubber are fully justified. Time alone will of course be the test.

* * *

Braithwaites & Co., Engineers Report.

In view of the speculation now rife in Indian business circles on the question of which firm will be successful in securing the Howrah Bridge contract, the annual report for the twelve months ended March 31st last of *Braithwaite & Co. Engineers* is of interest. This company has now concentrated most its interests in India through control of Braithwaite & Co. (India).

Compared with a loss of £4,745 in the previous years there is a net profit this time of £3,850 after crediting a reserve of £12,612 not now required. For the third year in succession no dividend is to be paid on the £150,000 7½ per cent. cumulative preference capital, while for the fourth successive year the £217,832 issued ordinary capital goes dividendless, leaving a debit of £6,560 to carry forward on profit and loss account, compared with a £10,410 debit brought in. The last ordinary dividend was 4 per cent. in respect of 1930/31.

Commenting on the results, the directors state that the hopes of improvement referred to in the previous year's accounts have been justified, particularly during the last quarter of the financial year. In the current year the volume of orders has so far been satisfactory and the level of prices has been maintained.

Coming to the balance-sheet, fixed assets, including a valuation of £359,352 placed on the investment in the Indian subsidiary, are little changed at £447,740. Floating assets, mainly owing to a rise of £52,660 in contracts in progress, have risen from £96,792 to £143,507. On the liability side creditors have been reduced, but bank loans have risen by £42,053 to £78,874, while total liabilities are now £123,080, compared with £87,238 at the previous year end. General reserve is unchanged at £100,000, but this time a depreciation reserve of £6,895 appears.

Taking the rupee at the arbitrary value of 1s. 6d. a summary of the Indian company's balance-sheet shows that the issued capital remains unchanged at £424,484, but that the debit balance on profit and loss account has been increased by the 1934 loss of £26,043 to £109,528. Fixed assets have risen slightly to £159,143, but floating assets have fallen from £310,992 to £228,118, while liabilities are down from £125,326 to £72,305, making net floating assets of £155,813—a reduction of almost £30,000. In their report the management of the Indian company state that the results for the twelve months to December 31st 1934 cover provision in respect of all contracts obtained at unremunerative prices. They hope that continued improvement in conditions in India will result in the avoidance of further loss.

* * *

Interest Aroused in Projected Indian Steel Developments.

Considerable interest has been aroused in the City of London over the proposal to erect new steel works in India, estimated to cost about £11,000,000. Previous rumours are now substantiated by the formation of the *Bengal Steel Corporation* with a capital of Rs. 15 crores.

* * *

Anglo-Burma Tin Profits.

On several occasions in the past I have drawn attention to the promising prospects of *Anglo-Burma Tin Company*. The annual report for the year ended June 30th last records another sharp increase in working profits, which at £37,880 break a fresh high record, comparison being with £28,691 in 1933/34, £20,414 in 1932/33, and £11,029 in 1931/32. After providing for all charges net profits for the past year are £30,306. The dividend for the year is, as already announced, 35 per cent., compared with 30 per cent. for the previous twelve months. Making allowance for the year's distribution and writing off £5,989 from property account and for prospecting, there is a balance of £5,728 (£5,736) to carry forward.

Although the issued share capital, all in 5s. shares, remains unchanged at £66,200, the 7 per cent. debenture stock outstanding has been reduced by £5,000 to £10,000.

The company owns alluvial tin properties in Tavoy, Mergui and Palaw districts of Lower Burma, consisting of approximately 5,245 acres on mining leases. In 1932 the Government of Burma sanctioned the issue of a new consolidated lease over the company's properties at Heinda, Tavoy, which now extend to approximately 2,100 acres. This lease will run for 30 years from September 1st, 1932. The other mine in operation is Thabawleik, Mergui District (about 1,750 acres), which is being worked under tribute. In 1934 the company purchased two leases at Shanthe, Palaw District, covering approximately 1,277 acres and operations have commenced.

* * *

An Indian Coffee Company.

There are only a few Indian coffee growing companies known to the London market. One of these is *Mangles Bros. Coorge Coffee Estates,* which owns a total area of 1,650 acres in the Coorg district. For the year ended July 31st, 1935 net profits, including those on realisation of investments, amounted to £3,939, from which is deducted £50 transferred to depreciation fund and to which is added £1,737 brought forward, making a total of £5,176. An interim dividend of 2 per cent. was paid in July last and a final of 3 per cent., again making 5 per cent. for the year, is now proposed, leaving, £1,311 to carry forward.

The issued capital is £77,296 in 5s. shares. Block account stood at £59,246 at July 31st last. Reserves now total £13,500, while liquid assets exceed £43,500.

* * *

Indian Brevities.

Including ½ per cent. from reserve the distribution on *Bengal-Nagpur Railway* stock is 2 per cent. for the past half year. As the interim payment was at the same rate the total dividend for the past financial year is thus brought up to 4 per cent.

The recent activity in the ordinary shares of *Attock Oil* has been explained by the directors' announcement that the Dhulian well has struck a good show of oil at 7,448 ft., has been tested, and, while some oil is present, it is not in commercial quantity and the well will be deepened. At the same time it is also announced that the deep test at Khaur has been carried down to 5,408 ft. and brought in with an initial oil production of approximately 12 barrels per hour.

* * *

Consolidated Tin Mines of Burma.

This Company, which owns 17 mines covering about 12,130 acres in the Indo-Malayan mountains of Burma has not done so well during the 12 months ended June 30 last, trading profits of £23,034 comparing with £40,206 in the previous 12 months. Adding a credit balance of £948 brought forward there is available £23,982, from which is deducted a 2½% dividend on the £856,000 ordinary capital, leaving £2,776 to carry forward.

In their report the Directors state that estimated ore reserves as at June 30, 1935, proved, or partly proved, as a result of the development campaign of the past two years, amount to 59,847 tons having an average assay value of 2.07 per cent. mixed concentrates. It is pointed out that large additional ore bodies are available for future development. Owing to the delay in executing the order for an engine and generator, the mill at the Hermyingyi property did not commence operations until May last. A substantial addition to the present output is now being obtained from this source.

Assam Railways & Trading Report.

The property of *Assam Railways and Trading Company* consists of the Dibru Sadiya Railway, which is 114 miles long, collieries, timber concessions, sawmills, and brick works, all held under concessions or leases from the Indian Government. The Company also holds 4,193 £20 shares (£15 paid up) in the River Steam Navigation Co., 40,000 shares in Makum (Assam) Tea Company, and a controlling interest in Namdang Tea Company. The Government of India has the option of acquiring the railway in 1941, or at subsequent intervals of ten years on payment of 20% in excess of its value as a dividend paying investment to the Company.

In their report for the 12 months ended 31 March, 1935, the directors state that gross Railway earnings of Rs. 19,91,949 show an increase of Rs. 76,852 over the figures for 1933-34. Expenditure has, however, increased from Rs. 11,25,544 to Rs. 12,30,169. Although the number of train miles run rose by 2,330 to 371,763, the number of passengers carried fell by 40,260 to 1,372,829.

Converting Rupees at 1s. 6d. each, net revenue for the past year from railway working was £57,133, compared with £59,216 in 1933-34. To this figure is added £44,441 (£44,931) profit on general trading account, and dividends, interest etc., including £5,905 (nil) from interest suspense account, making a total of £117,671 (£108,802). After deducting income tax, £10,000 (same) for renewals and depreciation, and transfer £5,000 (nil) to reserve for contingencies, net revenue is £88,030, compared with £86,429 a year ago.

Debenture and note interest takes £61,300, and preference dividends £15,400, leaving, after adding £40,535 brought in, an available balance of £51,865. From this amount £3,510 (nil) is written off the cost of redeeming half of the 6% notes and £3,000 (same) is written off new issue expenses, leaving £45,355 to carry forward.

The balance-sheet shows that expenditure on the railway increased during the year by £3,499 to £1,024,810, while other fixed assets now stand at £715,920. A strong liquid position is revealed and reserve accounts have accumulated to £336,410.

The authorised and issued capital is £1,160,000, comprising £80,000 in 8% cumulative pre-preference "A" shares of £10 each, £150,000 in 6% cumulative preference shares of £10 each, £630,000 in cumulative 8% "A" stock, and £300,000 in "B" stock. 5½% debentures outstanding are unchanged at £1,000,000, but the £120,000 6% Notes have been reduced to £60,000. No dividend has been paid on the "A" stock since June 1931, while the last dividend on the "B" stock was 10% in respect of the year to March 31st, 1931.

* * *

South Indian Railway.

During the year to March 31st, 1935, gross earnings of the *South Indian Railway* rose to Rs. 5,06,91,469, from Rs. 4,93,18,238 in 1933-34. After deducting working expenses, net earnings are Rs. 2,17,10,007 (Rs. 2,10,12,275).

The Company's share of surplus profits for the year was Rs. 2,62,198, against Rs. 1,89,304 in the previous year. After deducting Indian taxation the net amount remitted to London realised £15,498, compared with £10,995. A final dividend of 1½% is to be paid from surplus profits, making, with the guaranteed interest of 1¾%, a total for the half-year of 3¼% (4¼%). Including the distribution for the first half-year total dividends for the 12 months are 6½%, compared with 8%, representing 3% (4½%) from surplus profits and 3½% (same) from guaranteed interest.

THE WEEK IN THE EXCHANGES

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Friday.

Business in the Calcutta Stock Exchange during the week under review has not been so uneventful as it was last week. A drop in the price of 3½ per cent. Government Papers happened in mid-week, but as the session closed, recovery followed. The daily bulletins of the London Stock Exchange reveal a distinct turn for the better in market sentiment, especially in India Government Sterling Securities, and it is apparent that the Italo-Abyssinian conflict has been ignored. The announcement made yesterday of the League's likely decision of banning Italian exports will undoubtedly have an effect on the commodity market, and this will at the same time give an impetus to the share market. It is believed that if this policy of continuing economic sanctions alone, instead of armed interference, is continued, Government Securities will also have a brighter aspect.

In Jute shares, an uncertain market prevailed. Prices after moving between very narrow limits, sagged at the close. This is due mainly to the sudden rise in price of jute to Rs. 38-3 without any corresponding rise in the hessians, and buyers were nervous. To stop bear raids the Committee of the Calcutta Stock Exchange has issued notice that deliveries of forward transactions in Howrah, Kamarhatty and National Jute shares (as well as 3½ per cent. Government Papers) are to be effected on the due dates. Rumour is current that the Indian Jute Mills Association has practically agreed to allow the members to work their Mills 54 hour a week from 1st April, 1936, and this is likely to be confirmed in a General Meeting which will be held on 11th instant.

While quieter conditions were reported in Coal, Cotton and Tea shares, Sugar shares continued firm. The money market continues easier but the rates in respect of the weekly sales of treasury bills have hardened. Reserve Bank rate was 3½ per cent.

The Calcutta Stock Exchange rooms will remain closed on Monday the 4th and Tuesday the 5th instant on account of Gopastami and Jagadhatri Puja.

Government Securities.—The rapid rise in 3½ per cent. Government Papers reported in these columns last week was somewhat checked, and after touching Rs. 93-14, dropped down to Rs. 92-4, apparently due to profit taking. Recovery on strong London advices soon took place, and the rate closed at Rs. 93-4 on Thursday. 4 per cent. Loan 1960-70 closed better at Rs. 108, 3 per cent. New Loan 1951-54 was dealt in up to Rs. 98, 5 per cent. Loan 1945-55 after fluctuating between Rs. 117-11 and Rs. 118-4 closed very firm at Rs. 118-1. 3 per cent. Government Papers also came to business around Rs. 82-12.

Debentures.—An increase in the quotations of all the shorter-dated Debentures, especially in Port Trusts and Municipals, was apparent. Among the longer-dated issues 5½ per cent. Municipals 1955 was placed at Rs. 131, 6 per cent. 1955 at Rs. 126-2 and 3¾ per cent. Port Trusts 1965 at Rs. 99-4. 4 per cent. 1908-38 Port Trusts changed hands at Rs. 102 (small lot), and 3½ per cent. C. I. T. 1965s were available round about Rs. 96. It is reported that the Calcutta Corporation will shortly approach the Government for permission to raise a Debenture Loan carrying interest at 3½ per cent. and having a currency of 17 years from January 1, 1936.

Amongst Industrials, a small lot of 5 per cent. Clive Buildings 1914-64 was dealt in at Rs. 101 and 6¾ per cent. Rohtas Sugars 1933-43 hardened up to Rs. 104. 5 per cent. Darjeeling-Himalayan Railway Extension Debentures changed hands at Rs. 100-8.

Preference Shares.—Comparatively little business was recorded in this section and the rates showed no material change. Amongst Jute Mills issues Unions were marked at Rs. 145-8, Lothians at Rs. 143, Barnagores at Rs. 64-8, New Centrals at Rs. 146-8 and Northbrooks at Rs. 145. In other industrials, Burrakur Coals were wanted at Rs. 128, Titaghur Papers at Rs. 160 and Bengal Timbers at Rs. 150, but with nothing offering. Allahabad Banks changed hands at Rs. 137 (c.d.), Bengal Telephones at Rs. 14-6, Associated Hotels at Rs. 84 and Bengal Papers (50 paid ups) at Rs. 66 (small lot).

Other Investment stocks.—Bank shares continued to have firm support. Reserve Banks after recording Rs. 125 yesterday closed easier at Rs. 123-8. Imperial Bank fully paids were crossed at Rs. 1,500, and Contributories closed at Rs. 382. Several other transactions were also recorded, which include Central Banks at Rs. 34-4, Ballygunge Bank at Rs. 101 and Bank of Behar at Rs. 53-8. In Railway shares, inspite of fair inquiries the turnover was on a limited scale. Bankura Damodars were at Rs. 90, Darjeeling Himalayans at Rs. 66 (small lot), Mymensingh Bhairab (Rebate) at Rs. 94 and Baraset Basirhat at Rs. 41. There were sellers of Chaparmukh-Silghat, Dehri Rohtas and Futwah Islampur, but with nothing doing. In Shipping issues, I.G.N. were marked at an easier rate of Rs. 97, Calcutta Landing and Shippings at Rs. 14-8 and Port Shippings at Rs. 16. Of others, Triton Insurances recorded a sale at Rs. 216-8.

Cottons.—This section continued to be featureless, the rates ruling in the previous week being unchanged. New Victorias closed at Re. 1-5, Dunbars at Rs. 118, and Kesorams at Rs. 3-7.

Coals.—Conditions quieter than the week before was noticed, and the prices appeared to be a bit weaker. Equitables were maintaining their old rate of Rs. 35-4, a small lot of Amalgamateds changed hands at Rs. 22, Bengals were wanted at round about Rs. 259, but subsequently closed firmer at Rs. 260-8, Talchers had sellers round about Re. 1, and Raneegunges closed at Rs. 31.

Jutes.—A very uncertain market was noticed, and owing to the fact that raw jutes prices went up considerably without any proportionate rise in hessian a decline in the prices of shares was reported towards the close. Howrahs and Kamarhattys in particular were moving in narrow limits, the former after fluctuating between Rs. 51-12 and Rs. 49-8 suddenly dropped down to Rs. 48-2, but at the close recovered to Rs. 48-8, and the latter after touching Rs. 512-8 on Monday dropped down to Rs. 476, but closed firmer at Rs. 480. Of others, Anglo-Indias dropped down to Rs. 407, closing at Rs. 413, Ballys were at Rs. 180, Clives at Rs. 24-14, Nationals at Rs. 21-13, and Nuddeas at Rs. 46-12. All these indicate prices lower than what was reported last week. Besides these facts constant rumours about the working hours engineered by a few unscrupulous speculators with selfish motives tended to create a panic in the market, which has already been rendered weak and easily amenable to such tactics.

Electricals.—No change was noticeable. The transactions included Agras at Rs. 105, Bengal Telephones at Rs. 17-11 ex. div., Benares Electrics at Rs. 14-12 and Upper Jumnas at Rs. 11-8.

Engineerings.—Indian Irons and Bengal Irons again enjoyed fair turnovers, but towards the close sellers being predominant prices were below best, and on Thursday not a single transaction could be put through due to buyers not agreeing to sellers' limits.

The closing rates were Rs. 8-13 and Rs. 3-13 respectively. On the other hand Burn & Co. suddenly became conspicuous, and a quick rise resulted in their closing at Rs. 245-8. While Indian Standard Wagons changed hands at Rs. 52-8, Marshalls were again maintaining their old rate round about Re. 1-2.

Sugars.—Definitely firmer undertone was evident in Sugar shares, although few transactions took place. Carews changed hands at Rs. 20-8, Rohtas at Rs. 12-10, Bastis at Rs. 197, Cawnpores at Rs. 35-12, and Rohtas at Rs. 12-14. Murree Breweries improved from Rs. 175 to Rs. 188 with buyers over. There were no sellers even at these enhanced rates.

Miscellaneous.—Paper shares again came in for at good business. Titaghur Ordinaries were dealt in Rs. 23 and Deferreds at Rs. 9-12, Bengal Papers at Rs. 97-8, and India Paper Pulps at Rs. 180. Burma Corporations were quoting Rs. 7-9, British India Corporations maintaining their last week's rates, closed at Rs. 3-12. Indian Wood Products again showed some slight improvement and were dealt in up to Rs. 21-12 and Midnapur Zemindaries closed at Rs. 65-8.

Teas.—A disinterested market was apparent, due to the rather lower prices obtained at the Calcutta and the London sales. Reduced rates in most cases were necessary to effect sales, which included Central Cachar at Rs. 75, New Terai at Rs. 10-8, Poobong at Rs. 18-4, Bishnauth at Rs. 27-8 and Dimakusi at Rs. 26-14.

MADRAS STOCK EXCHANGE

(*By Wire*)

(From Our Correspondent)

Thursday evening.

Money.—Money has been in plentiful supply during the week with borrowers not interested in calls over 1 per cent.

Government Securities.—3½ per cent. Paper opened steady at Rs. 93 and after a rise of 8 annas suffered a decline to Rs. 92-11, owing to the practical absence of change in sterling. Paper experienced only minor fluctuation towards the close. It closed strong at Rs. 93-5. Medium-dated issues were in great favour, there being keen enquiry for 5 per cent. 1939/44 and 5½ per cent. 1938/40 loan at Rs. 108-12 at which rate business was put through. 3 per cent. 1951/54 loan was taken up at Rs. 97-8 and 3½ per cent 1947/50 loan at Rs. 103-8, 4 per cent. 1960/70 excited investment interest at Rs. 107-15 and Rs. 108 while 5 per cent. 1945/55 loan was in sustained demand at Rs. 118, business resulting at Rs. 118-1. Mysore loans were in strong request with 3½ per cent. 1951/58 being done at Rs. 102-10 and 4 per cent. 1953/'63 at Rs. 106-13. 5 per cent. 1955 were in favour at Rs. 119.

Banks.—Reserve Banks were the centre of activity at Rs. 122 and Rs. 123 ; Mysore Banks were taken up at Rs. 270, while Hindustan Banks came in for business at Rs. 30.

Public Utilities.—Vellores were done at the improved price of Rs. 15 cum-dividend whilst West Coast electrics were taken up at Rs. 10-2 cum-dividend. Vizagapatam electrics changed hands at Rs. 50 and Rangoon electrics were active at Rs. 27-1.

Mills.—Vasantas were the favourite scrip with brisk buyers at Rs. 110-12, Buckingham and Carnatics were sought for at Rs. 216.

Planting.—Peermades were absorbed at Rs. 20-2 and Highland Produce at Rs. 15-4. United Nilgiris were transacted at Rs. 81. Rubber shares were lifeless.

Miscellaneous.—Tata Iron and Steel ordinary shares and deferred shares roused speculative interest at Rs. 145 and Rs. 550. The closure of settlement commitments steadied the price of the ordinaries at

Rs. 144-4. Cements were inactive in the absence of further news regarding the merger. Industrial investment trust shares were dealt in at Rs. 48 while Singareni Collieries were taken off the market at Rs. 6-12. The markets closed buoyant.

BOMBAY STOCK EXCHANGE

(*By Wire*)

(From our Correspondent)

Thursday evening.

Money.—Call money was easy throughout the week at ¼ per cent. with lenders over.

Government Securities.—Last week's improvement was maintained during this week also and this section closed firm. 3½ per cent. Paper closed strong at Rs. 93-6. Medium-dated and short-dated loans also moved up. 3 per cent. 1941 was quoted at Rs. 102-7 ; 3½ per cent. 1947/50 at Rs. 103-10 ; 3 per cent. 1951/54 at Rs. 97-12 ; 4 per cent. 1943 at Rs. 107-6 ; 4½ per cent. 1955/60 at Rs. 113-12 ; 5 per cent. 1939/44 at Rs. 108-13 ; 5½ per cent. 1938/40 at Rs. 108-12 and 5 per cent. 1945/55 at Rs. 118.

Shares.—There was some improvement noticeable in this section also but towards the close there was some profit taking in evidence. Prices as a result closed lower.

Textiles.—In view of our last week's recommendation there was some rise in this section and even though prices closed lower as a result of profit-taking they were higher than last week's levels. Bombay Dyeings were quoted at Rs. 776-4 ; Central Indias at Rs. 266-4 ; Centuries at Rs. 233-12 ; Gokaks at Rs. 175 ; Kohinoors at Rs. 206-4 and Swadeshis at Rs. 166-4.

Hydro-Electrics.—There was an appreciable rise in Tata powers which were quoted at Rs. 1,515. Andhra Valleys also were higher at Rs. 1,595 but Tata-Hydros were a shade lower at Rs. 160-10.

Steels.—Tata Deferreds were affected by the profit-taking and as such they lost most of their gains during the week. They closed at Rs. 560 after being quoted as high as Rs. 575. The Ordinaries were marked down from Rs. 146 to Rs. 144 and Second Preferences to Rs. 157-4.

Cements.—This section was rather easier and prices were in most cases lower. Bundis were at Rs. 34-8 ; Gwaliors at Rs. 115 ; Indians at Rs. 451-4 ; Katni Deferreds at Rs. 2,050 ; Ordinaries at Rs. 358-12 ; Okhas at Rs. 256-4 ; Shahabads at Rs. 475 and United at Rs. 119-8.

Miscellaneous.—Bombay Burmahs ruled fairly steady on the declaration of a slightly better dividend than that of last year. They closed at Rs. 367-8. Belapur Sugars were at Rs. 336-4 ; Bombay Steams at Rs. 283-2 ; Bombay Telephones at Rs. 192-8 ; Bombay Trams at Rs. 145-5 ; Scindias at Rs. 12-15 and Premier Constructions at Rs. 75-8.

Banks and Insurance.—With the strength in the gilt-edge section higher prices also obtained in this section. Imperial Bank fully paids were at Rs. 1,505 and Contributories at Rs. 378-12 ; Barodas at Rs. 97-12; Bank of Indias at Rs. 124 ; Central Banks at Rs. 34-8 ; Reserve Banks at Rs. 124-4 and Unions at Rs. 5-7-6.

In the insurance section, Orientals were at Rs. 4,300, New Indias at Rs. 37-12 and Vulcans at Rs. 6-14.

NEW YORK STOCK EXCHANGE

Firm conditions were prevalent on the Wall Street market. The close was easier on account of profit-taking, General Motors and U. S. Steels being slightly down. Coppers were marked down.

	$
General Motors	52¼
Anaconda Copper	20⅝
U. S. Steel Common	46

LONDON STOCK EXCHANGE

After earlier activity markets have assumed a quieter tone on the London Stock Exchange. In the Gilt-edged section, both Indian Loans and Home Funds advanced. The improvement was noticeable even from the beginning of the week. There was a slight setback in mid-week, but prices again closed higher. 3½ per cent. stock 1931 was at 95½, 4½ per cent. 1958/68 at 114, 4 per cent. 1948/53 at 106½ and 2½ per cent. Consols at 83¾, 3½ per cent. Conversion at 105 1/8, 3½ per cent. War Loan at 104 and Victory Bonds at 113 5/8.

Among other sections, Minings improved. Teas and Rubbers were unchanged. Oils were marked down and Rails sagged. Industrials were rather quiet but prices were well maintained.

UNCERTAINTY PREVAILS

GILT-EDGED RISE

By R. Gordon Cummings

By Air Mail

Special for "INDIAN FINANCE"

London, October 21st, 1935.

While the past seven days has witnessed some uncertainty and indefinite fluctuations in most markets, the opening of a new Account this morning led to some expansion of business following better political advices over the week-end. There has been a reasonable rise in most markets, but apart from Giltedged many prices have not held their best.

Gilt-edged stocks have risen sharply and close at the best, 2½ *per cent. Consols* being 82⅝, *War Loan* 104½, 3½ *per cent. Conversion* 103½ and *Local Loans* 91¾. *India Loans* have improved in sympathy, while Corporation Stocks and Colonial issues are better.

After being reactionary, Home Rail stocks have been in better demand at higher prices. *Great Western* ordinary is 45, *London Midland and Scottish* 17¼ and *Southern* deferred 18½. Exceptionally, *London and North-Eastern* 2nd preference is lower at 19. There has been little doing in Foreign rails, although *Argentine* issues are fractionally higher.

Business in industrials has been of better proportions, with many shares showing slight improvement on the week. Amongst the leaders, *Amalgamated Metal* are 24s. 6d., *Associated Cement* 58s., *Boots Drug* 47s. 9d., *British Aluminium* 42s. 6d., *Dunlops* 35s. 6d., *General Aircraft* 6s. 6d., *Imperial Airways* 48s., *Imperial Chemical* 35s. 3d., *London Brick* 78s., *Radiation* 69s., *Salt Union* 40s., *Tate and Lyle* 82s., *Turner and Newall* 56s. 9d., *United Molasses* 19s. and *Electric and Musical Industries* 24s. 6d.

Tobacco shares have recovered from earlier weakness, *British-American* being 111s. 6d., *Carreras* 158s. 6d., *Imperial Tobacco* 137s. 6d. and *Tobacco Securities* ordinary 85s.

Textiles have been assisted by better sentiment and the hope that the Lancashire cotton trade has now seen the worst. *Coats* are 61s., *English Sewing Cotton* 44s., *Bradford Dyers* 8s. 6d. and *Calico Printers* 8s. 3d. In the Rayon section, *British Celanese* ordinary have recovered to 12s. 6d. and the 2nd preference to 22s. 3d., while *Courtaulds* are 53s.

Iron and Steel shares are showing signs of recovery after earlier dulness. Leading quotations include *Allied Ironfounders* 37s. 6d., *Baldwins* 8s., *John Brown* 18s., *Dorman Long* 19s. 3d., *Guest Keen* 31s., *Imperial Smelting* 15s. 3d., *Staveley Coal* 46s. 9d., *Stewarts & Lloyds* 32s. and *United Steel* 31s. 6d. At one time, armament and shipbuilding shares were well below the best, but *Vickers* close at 18s. and *Hawthorne Leslie* at 20s.

There is a firmer tone in Breweries, where *Guinness* close at 136s. 6d., *Watney* at 71s. and *South African Wines* at 51s. There has not been much doing in Electrical Equipment shares, *Associated Electrical* being 34s. 6d., *British Insulated Cable* 87s. and *General Electric* 62s. 6d.

Shipping shares are somewhat below the best, *Furness Withy* being 17s. 6d. and *P. & O.* 18s. 6d. The outstanding movement in the Motor market has been a sharp rise to 80s. in Standards. *Fords* are little changed at 35s. 3d.

Encouraged by the stronger tone in the commodity and the brighter outlook for the restriction scheme, there has been more buying of Rubber shares at rising prices. Tea shares have kept remarkably firm.

In view of the extensive fluctuations in the market prices of the various metals, base metal shares have been reactionary. Still, however, Tin issues are well supported on every minor setback. There has been a little more doing in gold mining markets, but as yet the volume of business is nothing to what it was some months ago. One or two of the Australian shares, such as *Commonwealth Mining* and *Great Boulder Mining & Finance* have been in demand. Although the West African gold market looked as though it were developing activity at one time during the week, there is little change in quotations, *Ariston* being 7s. 9d. and *Gold Coast Selection Trust* 21s.

The opinion is held that Australian gold shares are about ready for sustained activity. This market has remained very quiet despite continuing advices of a satisfactory nature coming to hand from the newer developing properties. Eventually interests behind the leading shares will see to it that market values more adequately represent future potentialities.

A Market Opinion on the Outlook.

In my notes of last week I devoted some space to giving my opinions on the probable early trend of stock markets. So far there has been little noticeable change in most sections.

Under the circumstances, however, it is interesting to compare my remarks with those of one of the leading firms on the London Stock Exchange, who state in their latest monthly review that "There has not been any noticeable selling pressure of any weight, but the scarcity of buyers made it difficult for markets to absorb the normal supply of stocks, and prices were lowered as a protective measure over a wide range of securities. Though a fair measure of recovery has occurred [recently] markets will continue unsteady until the Italo-Abyssinian situation is clarified and it is possible to take some sort of view of the immediate future. At present neither the private or institutional investor is disposed to do anything. The more speculative operator, if he is acting at all, is on the 'bear' tack."

Referring to the effect of League action on markets they conclude by saying "Many, however, would be likely to look at the grave underlying possibilities of the European situation, and we suggest, might well decide that Europe provided no safe abiding place, and that, little as it may relish some aspects of the American situation, it would, on the whole, be safer on the other side of the Atlantic."

A further factor to take into account is the forthcoming General Election, which will be held in the middle of November. Although the City is confident that the Government will be returned there is sure to be considerable uncertainty until the issue is decided.

Hence, I cannot but again emphasise the wisdom of acting cautiously, more particularly in the case of high priced stocks and out and out speculative issues.

Motors and Air-Ways.

Coincident with the opening of this year's Motor Show at Olympia, which, judging by all reports, is so far one of the most successful ever held, the *Standard Motor Company* has issued a preliminary statement of profits for the twelve months to August 31st last. After allowing for all expenses and transferring £35,000 (£20,000) to tax reserve, net profits are £122,546, compared with £86,795 in 1933/34. The dividend is maintained at 10 per cent., but the cash bonus is increased from 5 per cent. to 10 per cent., making 20 per cent., compared with only 15 per cent., in all. After again allocating £50,000 to reserve the carry forward will be increased by £24,000 to £56,612.

In the light of my oft-repeated suggestions that *Standards,* and *Fords,* were the safest selections in the Motor market, the above results give me considerable course for satisfaction.

Imperial Airways, which operates its well known air lines throughout Europe and the Far East, has also published preliminary figures for the year to March 31st last. After providing £192,960, against £191,335 in the previous year, for obsolescence, net profits are £133,769, compared with £61,072 in 1933/34, and £35,394 in 1932/33. In addition to a dividend of 6 per cent. the directors are this time paying a bonus of 1 per cent., making 7 per cent. altogether. The £1 ordinary shares have kept firm at around 47s. 6d.

Dividends in Scrip.

I have on several occasions in the past freely ventilated my opinion on the dangerous policy being adopted by many companies of distributing regular scrip dividends in the form of ordinary shares to their shareholders. I have pointed out that such a policy cannot continue for ever, while, so long as it is followed, it tends to create a fictitious market value for the equity shares.

I can, however, approve of the policy proposed this year by the directors of *Venesta,* the manufacturers of plywood, tea chests, etc., with branches in this country, India, and elsewhere. As the company will require all its surplus liquid resources for repayment of £100,000 6½ per cent. notes on January 1st next, and will need funds for further capital expenditure, it is considered essential to conserve liquid resources.

In view of the substantial profit of £82,245 earned during the twelve months to June 30th last, compared with £95,121 in the previous year, the directors feel that ordinary shareholders should receive some form of distribution, especially as earnings on the ordinary capital were equal to 21.6 per cent. and no dividends had been paid for the previous four years.

They have adopted a very sensible method of getting over the difficulty by proposing the distribution of a 5 per cent. capital bonus. This is a custom which is frequently followed by American companies, but it is a rare instance in this country. Now that the way has been opened up I fully expect that the directors of other companies in a similar position will follow suit. I only hope, however, that the practice is not abused.

Three Promising Speculations.

Some time ago I briefly referred to the lock-up merits of *A. W. Consolidated Stock Trust* 5 per cent. income debenture stock, at the then price of around £17. Since then these debentures have steadily risen to £26, but despite this appreciable rise I can still recommend a purchase.

The company, which is controlled by Armstrong Whitworth Securities, has only one remaining asset 750,000 4 per cent. second non-cumulative preference shares of £1 each in the controlling company. Up to July last it held preference shares in Vickers-Armstrong, but these were sold and a partial repayment made on the income debenture stock, of which there is now outstanding about £1,000,000 nominal.

Influential people in touch with the situation tell me that the Armstrong-Whitworth Security shares are worth at least 10s. each, if not more. Even at 10s. the break up value of each £100 of A. W. Consolidated debenture stock is £37½, or almost £12 above the present market price.

There has been some very knowledgable buying of late of the 6½ per cent £1 cumulative preference shares of *Associated Dyers & Cleaners,* a company controlling several well-known dyeing and cleaning concerns. After considerable activity up to 8s. 6d. they have fallen back to 6s. 3d.

No dividends have been paid on this capital since April 1932, but as there is no debit balance on profit and loss account, the way is paved for a resumption of payments so soon as profits justify this course. I gather that earnings in the current year are running at a level which should easily permit of one year's dividend arrears being paid early next year. If this proves to be correct the preference shares will look ridiculously cheap at anything below 10s.

Another company which has recently recovered from three years of poor trading is *Maden & Ireland,* shoe, slipper, etc., manufacturers. In his case preference dividends are paid up to September 30th, 1934, leaving only the past year's dividend outstanding. The issued 7½ per cent. preference capital is £175,000. Profits for the twelve months to September 30th, 1934 were £15,445, or £5,273 more than the sum required to pay one year's preference dividend. I see no reason why earnings should not be maintained during the current year.

The next report is due within a fortnight, and I am confident that the full preference dividend will be paid, thus clearing the way for a resumption of distributions on the £70,000 ordinary capital.

The £1 preference shares can be bought at par, while the 1s. ordinary shares are obtainable at 1s. 3d. A combined purchase is recommended.

A few words on Tea Shares.

It is too early yet for any of the Indian tea companies to announce their interim dividends for the current year. In the case of companies operating in Ceylon, the interim dividend season has however, opened with some very satisfactory announcements. For instance, two prominent companies have raised the distributions by ½ per cent., while a third company is paying 2 per cent. against nothing at this time in 1934.

The hope is thus raised that the Indian companies will be in a position to pay more than a year ago. No doubt, despite the recent slight falling off in prices, the directors of many companies will be encouraged by recent highly satisfactory auction results.

Tea auctions prices after rising sharply for several weeks, now appear to be slightly on the down grade. This falling tendency may, however, be only temporary; and judging by market reports the level for the current season should certainly be much higher than for the previous twelve months.

Buying of tea shares should be selective, purchasers necessarily having to confine attention to those issues with a free market, such as *Consolidated Tea and Lands, Budla Beta, Anglo-American Direct Tea* and *Kanan Devan Hills Produce.* Favourable opportunities are also offering amongst tea-cum-rubber producers like *Malayalam Plantations* and *Rubber Plantations Investment Trust.*

Iron & Steel Shares.

Shares of Iron & Steel companies have suffered a marking down during the last few days, first of all on a falling away in interest in this section, and secondly on fears that the Government will institute some form of control over profits should the decision to increase armament expenditure involve the spending of large sums of money.

While it would necessarily be essential to curtail, if not entirely eliminate, profiteering, I do not for one moment think that profits on any class of goods connected with armaments will be reduced to below existing levels obtained on other classes of steel goods. The iron and steel industry has been enjoying a steady return to prosperity. Annual reports for the past year have in every case shown decided improvement. But since the beginning of this year conditions have taken a further turn for the better with the result that profits must now be running at still higher levels.

The present setback in prices provides investors with a suitable opportunity of picking up cheap stock. They can quite safely buy leading shares, such as *United Steel, Guest Keen & Nettlefolds, Staveley Coal & Iron,* and amongst the smaller priced issues, *Burnell & Co.,* 5s. ordinary.

Shares of armament companies, by which I mean concerns mainly dependent upon armaments for their livelihood, should however be sold on the next burst of activity. In particular profits should be taken on *Hadfields* and *Vickers* ordinary shares.

Cable & Wireless Traffic Recovery.

A decided recovery is shown in the September traffic index number of *Cable & Wireless,* the figure being the highest for any September since 1930. The actual figure for September 1935 is 75.5, which compares with 70.3 in the corresponding month of 1934, and 67.1 in August last.

Comparing the index figures for the first nine months of 1935 with the same period of last year, the monthly average is approximately 0.71 more. Although this increase is not very large it should mean a moderate improvement in net profits. Moreover, net revenues should benefit this year from a likely reduction in working expenditure.

It may be recalled that approximately one-third of the 5½ per cent. preference capital is to be repaid in cash when the proposed capital reduction scheme is approved by the Court. By this repayment arrears of preference dividends on the stock repaid will be cancelled. For the year-ended 31 December last the distribution on the preference stock was 4⅛ per cent. A similar distribution for the current year can be taken as a certainty, while an increase to 4½ per cent. or more is extremely probable.

The preference stock can now be bought at par. Assuming a dividend of 4½ per cent., it makes an attractive purchase for those looking for capital appreciation during the next year or two. From the speculative point of view the "A" ordinary stock is worth picking up at 25, compared with a highest price during the current year of 30½.

Market Pointers.

Latest *Home Railway* weekly traffic returns again show a satisfactory improvement, total revenues having risen by £35,000 compared with the same week of 1934. Revenue from passenger traffic improved by only £1,000, but goods revenue jumped by £34,000.

The interim dividend on *British Shareholders' Trust* ordinary shares is being maintained at 3 per cent.

The *General Steam Navigation Company,* which is controlled by the Peninsular and Oriental Steam Navigation, has acquired the share capital of Moss-Hutchison Line. The fleet of the latter company consists of 16 steam and motor vessels totalling 33,046 tons.

There has been some knowledgable buying of *Shell Transport & Trading* £1 ordinary shares. It is expected that interim dividends will be resumed in December. Those in touch with the position fully expect that the interim payment will be satisfactory.

During the next week or two the report of of *Associated British Maltsters* for the 12 months to August 31st last will be published. In the meantime the 5s. ordinary shares keep very steady at 10s. 3d. I expect that the dividend will be increased from last year's 10 per cent. to possibly 15 per cent.

BOURSES IN AIR MAIL WEEK

Paris.

There was no definite trend noticeable in the movements on the Bourse during the week. They were at one time encouraged by the favourable news from Wall Street and at another time depressed by the political news from Geneva. On October 15, there was some strength noticeable and greater number of transactions were recorded. Thomas Houston spurted up to 155 and others followed under the lead. But the improvement was not kept up and the Bourse closed with an undecided tone.

On the Coulisse, Diamond Shares were quoted lower, De Beers Preferred being low at 1,010. Mining values tended to improve and Rand Mines and Sub-Nigels were quoted at 569 and 920 respectively.

	Oct. 11	Oct. 14	Oct. 17
4½% Rentes, 1932 "A"	86.20	85.90	85.75
4½% Rentes 1932 "B"	87.40	87.15	84.85
Banque de France	9,050.00	8,970.00	8,840.00
Credit Foncier de France	3,080.00	3,075.00	3,057.00

Rand Mines	564.00	563.00	569.00
Sub-Nigel	916.00	915.00	920.00

Berlin.

Weak conditions prevailed on the Bourse during the week and prices at the close were uniformly lower than those prevailing at the beginning of the week. There was a slight halt to the downward trend on October 15, but thereafter the decline continued.

	Oct. 11	Oct. 14	Oct. 17
Reichsbank	173.00	172.25	172.50
Farbenindustrie	151.90	149.75	148.40

WALL STREET IN AIR MAIL WEEK

MARKETS RISE ON INFLATION FEARS

CHRYSLERS HIGHER

By F. Rocke.

By Air Mail

Special for "INDIAN FINANCE"

The wave of buying that was in evidence at the end of last week continued this week also and an alround improvement was witnessed with the exception of rails. Chryslers again led the Motor and Motor Accessory group gaining nearly four points. Amusements shares also were higher. The Dow Jone's Industrial Index went to a new high of 136.26. Some utilities were assisted by the New York Supreme Court's decision upholding the lower court's verdict barring a referendum on the municipal power plant proposal. Towards the close of the week, however, markets were irregular as a result of profit-taking and some short selling. The markets were closed on Saturday on account of Columbus Day.

On the Bond Market, with the close of the refunding operations there was some demand for Treasury issues and prices moved narrowly. High grade corporation issues were firm and speculative obligations were comparatively quiet. On the Foreign list Germans rose and Italians fell.

About $1,000,000,000 bonds were refunded as a result of the Fourth Liberty refunding offer and demands for cash payments amounted to $250,000,000. The refunding operations have come to an end and no more Treasury Bonds are callable until 1940, when $353,000,000 may be called.

Inspite of the improvement in car loadings figures last week, Rails lagged. Union Pacific was at one time over 3 points down on doubts as to the maintenance of the present dividend rate. There was some improvement in this section later, particularly in those in the grain producing States.

The net earnings for the month of August for the Pennsylvannia Rail Road are $881,000 equal to 7 cents per share against 9 cents per share for the same period of 1934.

New York, New Haven and Hartford Rail Road has decided to apply for a $5,000,000 loan from the Reconstruction Finance Corporation in order to meet taxes and equipment trust maturities at the end of the year.

There was nothing particular in the oil section. An important conference is being held in New York to consider the problem of the marketing of the Bahrein Island oil output.

The daily average production of crude oil in the United States in the week ended October 12, was 2,781,750 barrels against 2,719,600 in the previous week according to the figures of the American Petroleum Institute.

Gasoline Stocks in the United States on October 12, totalled 41,937,000 barrels.

Utilities were featureless. Some of them were assisted by the decision of the Appellate Division of the Supreme Court of New York on Friday upholding the verdict of the lower court barring a referendum on the desirability of the construction of a municipal power plant in New York City. Otherwise there were no important movements.

American Telephone and Telegraph third quarter net earnings equal $1.69 per share against $1.51 in the third quarter of 1934. First nine months net income equal $4.85 per share against $4.82 per share in the corresponding period of 1934.

The domestic Copper sales have fallen down but American Copper producers are planning to increase the domestic output coinciding with any negotiations abroad to increase the international quota. It is estimated that domestic production has increased by 10,000 tons a month since the Code was abandoned in June.

World stocks of refined copper declined during September by 18,000 tons to 531,000 tons. American stocks fell 7,520 to 241,000 tons.

World production of refined copper during September totalled 113,000 tons against 113,500 tons in August, of which America produced 42,000 tons and 37,000 tons respectively.

The Anaconda Copper Mining Company issued $35,000,000 4½ per cent. Debentures on Tuesday at 98½. Investors seem to hesitate to subscribe in view of the poor record of the copper industry in recent years.

According to the Iron and Steel Institute steel mill activity was at 50.4 per cent. of capacity during the past week against 49.7 per cent. of the previous week. The increase has been due to the increased demand from the automobile industry.

Price reductions are made by almost every firm in the automobile industry. Reductions ranging from $50 to $100 on the "La Salle" models are announced by Cadillac Motors.

Pontiac motors announces that prices of the company's 1936 models will remain unchanged, but reductions of upto $30 will be made in respect to the higher priced models.

Chevrolet Motors has completed its $25,000,000 expansion programme for the expanding to capacity of ten assembly plants by 25 per cent. thus permitting productions of 6,000 cars daily.

Business Pointers.

Freight loadings for the week ended October 5, totalled 706,900 cars an increase of 76,100 cars over the previous week and a rise of 75,600 cars over the corresponding period of 1934.

Cotton Consumption in the United States in September was 449,126 running bales against 294,696 in September, 1934.

Brokers' loans fell $7,000,000 in the week ended October 16, to $818,000,000.

THE TINNEVELLY-TUTICORIN ELECTRIC SUPPLY CO., LTD.

NOTICE

The Fourth Annual Ordinary General Meeting of the Shareholders will be held at the Registered Office of the Company, No. 14, Old Court House Street, Calcutta, on Wednesday the 6th day of November, 1935, at 3 p.m., for the purpose of receiving and passing the Directors' Report and the audited Accounts for the year ended 31st March, 1935, and transacting such other business as may be brought forward.

The Share Transfer Books of the Company will be closed from 1st November, 1935 to 6th November, 1935, both days inclusive.

OCTAVIUS STEEL & CO., LTD.,
Managing Agents.

Calcutta, 25th October, 1935.

THE DEOLI COAL COMPANY, LIMITED.

The Directors beg to submit the Audited Accounts of the half-year ended 31st August, 1935.

The Revenue Account shows a loss of Rs. 8,284-2-10 which on being transferred to Profit and Loss Account leaves a debit balance of Rs. 22,981-10-2 to be carried forward.

Raisings were better than in the previous half-year but despatches were much smaller.

Directors:—A. Aikman, O. M. Jatia and David Ezra.

Managing Agents:—Messrs. Andrew Yule & Co., Ld.

Comparative statement of balance-sheet to the last three consecutive half-years:—

	Half-year ended 31-8-1935 Rs.	Half-year ended 28-2-1935 Rs.	Half-year ended 31-8-1934 Rs.
Liabilities.			
Capital ...	4,50,000	4,50,000	4,50,000

THE JAINTY (CENTRAL) COLLIERY LIMITED.

The Directors beg to submit the Audited Accounts for the halfyear ended 30th June, 1935:—

The Revenue Account shows a profit of Rs. 1,074-5-0 and the Profits and Loss Account, after debiting interest Rs. 197-4-1 and charging depreciation Rs. 11,134-1-8, shows a debit balance of Rs. 10,257-0-9. After adding this sum to the balance standing to debit of Profit and Loss Account as at 31st December, 1934, this account shows a deficit of Rs. 1,09,481-3-11 to be carried forward.

Comparative figures of Raisings and Despatches for the half-year under review and for the corresponding period of 1934 are set out hereunder:—

	Raisings Tons	Despatches Tons
January to June 1934 ...	11,628	10,476
January to June 1935 ...	10,294	12,105

Directors:—W. L. Armstrong and Meneck A. Davar.

Managing Agents:—Messrs. Villiers Limited.

THE BULAND SUGAR COMPANY, LIMITED.

The Directors beg to submit the Audited Accounts for the period ended 31st May, 1935.

The erection of the Factory is proceeding satisfactorily, and it is anticipated that crushing will commence as soon as cane is sufficiently mature.

No revenue accounts are appended as the Company has not yet commenced any trading activities.

An agreement has been entered into with the Raza Sugar Company, Limited whereby all cane growing, and transportation by Light Railway system to both Factories, will be undertaken in partnership, and for this purpose the Agricultural Company, whose audited accounts are appended, has been formed.

Directors:—Homi Mehta, F. Maxwell, R. E. Grant Govan, Phiroze Sethna, B. H. Zaidi, Chimanlal G. Parekh, C. E. M. Judge, R. S. Symons and A. S. Reddeyar.

Managing Agents:—Messrs. Govan Brothern (Rampur) Limited.

SINGARAN COAL SYNDICATE, LIMITED.

The Directors beg to submit the Audited Accounts for the half-year ended 30th June, 1935 :—

From the Report of the Auditors it will be found that no Depreciation has been written off this half-year. This is due to the fact that the assets of the Company have been written down to their present-day's valuation under the Capital Reduction scheme.

The Capital Reduction Scheme has been sanctioned by the Hon'ble High Court and the Directors are requested to forward share certificates to the office for noting the capital reduction therein.

Comparative figures of Raisings and Despatches for the half-year under review and for the corresponding period of 1934 are set out hereunder—

		Raisings Tons	Despatch Tons
January tq June 1934	...	20,054	16,723
January to June 1935	...	19,338	21,060

Directors.—W. L. Armstrong and J. N. A. Basu.

Managing Agents.—Messrs. Villiers Limited.

THE RAZA SUGAR COMPANY LIMITED.

The Directors beg to submit the Audited Accounts for the year ended 31st May, 1935 :—

The Revenue for the year was Rs. 3,49,199-11-0 and after setting aside Rs. 1,34,291-4-0 as provision for Excise, and allocating Rs. 95,888-12-1 to Depreciation, there remains a balance of Rs. 1,19,019-10-11 which together with a sum of Rs. 23,895-12-5, carried forward from last year makes a total of Rs. 1,42,915-7-4 which the Directors recommend should be disposed of as follows :—

		Rs.	A.	P.
In payment of Dividend at the rate of 6% per annum	...	90,000	0	0
To writing off the balance of the charges during construction ...	...	27,513	0	0
Carry forward	...	25,402	7	4

The quality of cane in Rampur State and surrounding districts in the past season was poor, and sucrose recovery correspondingly disappointing, with the result that sugar factories situated in Western United Provinces and Eastern Punjab have generally experienced an unfavourable season. In the circumstances the results achieved by this Company are considerad satisfactory.

The failure of the crop in Western United Provinces resulted in heavy purchasing in the Rampur State by outside mills, this intensive competition causing an unduly high rise in price of the raw material.

An agreement has been entered into with the Buland Sugar Company Limited, whose factory is now being erected in Rampur, whereby all cane growing, and transportation by Light Railway system to both factories, will be undertaken in partnership, and for this purpose the Agricultural Company, whose audited accounts are appended, has been formed.

The Directors recommend that the shares of the Company which are at present Rs. 100 each be sub-divided into 10 shares of Rs. 10 each, and separate notices of an Extraordinary meeting to consider this proposal are being issued with this report.

Directors.—R. E. Grant Govan, Phiroze Sethna, Homi Mehta, Masud—ul-Hasan, B. H. Zaidi, R. S. Symons, F. Maxwell and R. M. Chinoy.

Managing Agents.—Messrs. Govan Brothers (Rampur) Limited.

THE DELHI CLOTH & GENERAL MILLS CO., LTD.

The audited Balance Sheet and Profit and Loss Account for the year ending 30th of June, 1935 :—

The profits for the year together with Rs. 4,505-14-8 brought forward from the last year amount to Rs. 16,58,198-1-11 which in view of the difficulties noted below, the Company consider as quite satisfactory and propose to dispose of the same as under :—

Dividend at the rate of Rs. 25 per Ordinary share free of Income-tax, payable in the shape of the face value of Rs. 25 bearing cumulative interest at the rate of Rs. 4½% free of Income-Tax ...	10,00,000	0	0
Dividend on Preference shares @ Rs. 1/2 per share	45,000	0	0
Welfare Work	30,000	0	0
Bonus	30,000	0	0
Pension Fund	25,000	0	0
Charity	12,000	0	0
Income-Tax	2,50,000	0	0
Depreciation	2,00,000	0	0
Reserve	50,000	0	0
Balance to be carried forward	16,198	1	11
Total ...	16,58,198	1	11

The margin of profit in Delhi is falling considerably and increasing difficulty in selling the products is being experienced year after year.

The profits of the Daurala Sugar Works are very meagre indeed. Both the farm and the Factory were worked comparatively very economically, but on account of the forward sales of sugar and the unprecedented low recovery due to disease, heavy frost and other causes, the net earnings were very poor. The recovery in the west U. P. was not more than 6 per cent. The frost destroyed more than half the cane on the Farm also.

The results of the working of the Lyallpur Mills of the first few months have not been satisfactory at all. This was due to the tremendous fall in the prices of cotton of which the Company held large stocks and the difficulty in obtaining trained labour. Although, at very heavy cost, the Company have met with reasonable success in training local labour, it will be at least two or three years before labour will be nearly as efficient as even in Delhi. In spite of all these difficulties, the Lyallpur Mills will be able to show better results for the current year.

As mentioned in the last report, applications for 5333 new Ordinary Shares of the Delhi Cloth & General Mills Company Limited, are being invited from the residents of the Punjab. The list of applications will be kept open until the end of this month.

The total investments on the Lyallpur Mills, including outstandings, stocks, machinery and building is very heavy indeed. This has put a great strain on the liquid resources. The Company, therefore, propose paying the dividend in the form of one Preference share bearing cumulative dividend at the rate of 4½ per cent. per old Ordinary share free of Income-Tax.

There is no change in the position of the law suit for Rs. 4,11,691-2-10 referred to in our previous reports.

Shankar Lall—Secretary.

Comparative Statement of balance sheets for the last three Consecutive years.

		Year ended 30-6-1935 Rs.	Year ended 30-6-1934 Rs.	Year ended 30-6-1933 Rs-

Cash	...	69,229	1,47,764	1,03,389
Total	...	1,54,83,903	1,17,30,556	1,05,61,554

(*Continued from page* 1378)

Cash in hand is higher at Rs. 3,58,115 against Rs. 2,73,258.

The total liquid assets are Rs. 12,20,716 against Rs. 9,78,433.

Thus the balance sheet position is impregnable.

The profits for the year ended October, 1935 were Rs. 6,41,105 against Rs. 5,75,231 in 1933. Rs. 2,80,000 was set aside for depreciation against Rs. 2,50,000 ; Rs. 50,000 as against the same in 1933 was transferred to Reserve Fund and Rs. 64,688 has been transferred to Fleet Replacement Fund against Rs. 30,000 to Fleet Insurance Fund. The carry forward is higher at Rs. 1,01,841 against Rs. 76,424 and the dividend declared was 10 per cent. the same as in the previous year.

The profits for the last year are nearly back to the level of 1930, the highest one during the last ten years when a dividend of 15 per cent. was declared. The amount carried forward is the highest during the last decade. The profits for the year ended October 31, 1935 should be higher than those of last year. We can look forward to a stepping-up in the dividend.

At the present price of around Rs. 206, the yield on the ordinary share is 4.854 per cent., free of tax.

A first-class Public Utility Scrip.

INVESTMENT BREVITIES

The profit on revenue account of the Kalapahari Coal Company for the half-year ended August 1935, is Rs. 2,725 against Rs. 7,484 the previous half-year. A sum of Rs. 5,000 has been transferred from the Reserve Fund against nil the previous half-year and Rs. 1,327 has been set aside for depreciation against nothing previously. The same dividend of five per cent. per annum has been declared and the carry forward is Rs. 1,926 against Rs. 1,521.

* * *

The profits of Delhi Cloth and General Mills for the year ended June 1934 are Rs. 16,53,693 against Rs. 13,68,003 the previous year. Rs. 2 lakhs has been set aside for depreciation against Rs. 3 lakhs previously and Rs. 50,000 have been transferred to reserve against Rs. 2 lakhs in 1934.

* * *

The dividend is in the shape of a second preference share of Rs. 25 each per ordinary share bearing interest at 4½ per cent. against 48 per cent. in 1934. The carry forward is higher at Rs. 16,198 against Rs. 4,506.

* * *

The profit on revenue account of the Chitavalsah Jute Mills Company is Rs. 3,62,575. The amount set aside for depreciation is Rs. 60,000 and the amount transferred to reserve is Rs. 70,000. The sum carried forward is Rs. 44,142.

* * *

The profits of the Raza Sugar Company for the year ended May 1935 are Rs. 2,14,909 against Rs. 2,61,652 in 1934. The amount set aside for depreciation is Rs. 95,889 against Rs. 1,62,756 and the dividend declared is 6 per cent. against 5 per cent. The carry forward is Rs. 25,402 against Rs. 23,896.

MONTHLY REVIEW OF TRADE AND FINANCE

Vol. No. XVI. AUGUST, 1935.

The trade returns of British India for the month of August, 1935, have shown increases both in imports and exports as compared with the preceding month. Total imports amounted to Rs. 11,19 lakhs as compared with Rs. 10,06 lakhs in July, 1935, and Rs. 10,68 in August, 1934, showing thereby an increase of Rs. 113 lakhs or an increase of 11.2 per cent. over that of July and an increase of Rs. 51 lakhs or 4.8 per cent. over that of August, 1934. Exports showed only a slight improvement of Rs. 1 lakh the total exports amounting to Rs. 11,81 lakhs. Re-exports declined by 4 lakhs from Rs. 27 lakhs to Rs. 23 lakhs during the period under review, but at the same time showing an increase of Rs. 3 lakhs over that of the corresponding period last year.

With a good increase in imports, and only a slight improvement in exports, the balance of trade has fallen from Rs. 2.01 crores in July, to Rs. 62 lakhs in August and compares so unfavourably with Rs. 1,44 lakhs last year. The total visible balance of trade, however, has increased from Rs. 7,92 lakhs in July, to Rs. 8,31 lakhs during the period under review, as compared with the remarkably low figure of Rs. 2,67 lakhs during the same period last year. This is mainly due to an increase in exports of gold, silver and currency from Rs. 6,19 lakhs in July to Rs. 7,80 lakhs in August and also a similar fall in imports of gold silver and currency from Rs. 28 lakhs to Rs. 11 lakhs in the month of August. Treasure on private account including currency notes thus showed a net export of Rs. 769 lakhs as against Rs. 5,91 lakhs in July and Rs. 1,23 lakhs last year. Exports of gold amounted to Rs. 6.77 crores as against Rs. 6.04 crores in the preceding month and Rs. 1.09 crores in August, 1934. Exports of silver rose both in value and in weight.

Taking the first five months of the year as a whole, *i.e.*, from 1st April to 31st August, exports of merchandise recorded a slight decrease of 28 lakhs from Rs. 62.09 crores in 1934-35 to 61.81 crores in 1935-36. Imports total Rs. 54.53 crores against Rs. 51.59 crores in 1934-35, an increase of 2.94 crores and compare favourably with Rs. 59.73 crores in 1933-34. These figures exclude the value of Railway materials (Rs. 11 lakhs, Rs. 18 lakhs and Rs. 33 lakhs in the first five months, April to August, 1933, 1934 and 1935 respy.) imported direct by the state railways working under company management which was paid for in the ordinary way and not therefore taken into account in arriving at the balance of trade. The balance of trade in merchandise has declined from Rs. 11,82 lakhs in 1934-35 to Rs. 8,96 lakhs in 1935-36 against Rs. 14,40 lakhs in 1933-34. Balance of transactions in treasure private also showed a decline of Rs. 2,80 lakhs from Rs. 20,52 lakhs and now stands at the figure of Rs. 17,72 lakhs; consequently the balance of trade has fallen from Rs. 32,34 lakhs to Rs. 26,68 lakhs recording a fall of Rs. 5,66 lakhs.

As compared with August, 1934, the imports of food, drink and tobacco in August, 1935 increased by Rs. 1 lakh to Rs. 1,04 lakhs, raw materials by Rs. 29 lakhs to Rs. 1,50 lakhs and manufactured articles by Rs. 22 lakhs to Rs. 8,44 lakhs. Under food, drink and tobacco imports of rice not in the husk fell by 14,300 tons to 9,800 tons and in value by Rs. 8 lakhs to nearly Rs. 7 lakhs, while rice in the husk rose from 10,500 tons to 14,900 tons in quantity and from Rs. 5 lakhs to Rs. 9 lakhs in value. Sugar 16 D.S. and above (including beet) decreased by 2,200 tons to 17,300 tons in quantity and by Rs. 2 lakhs to Rs. 17 lakhs in value. Under raw materials, the imports of kerosene oil rose by 408,000 gallons to 6.2 million gallons in quantity and by Rs. 4 lakhs to Rs. 23 lakhs in value. Imports of mineral oils other than kerosene also advanced to 13.3 million gallons valued at Rs. 30 lakhs which meant a rise of 3.1 million gallons in quantity and of Rs. 3 lakhs in value. Raw cotton (chiefly imported from Kenya Colony, Anglo-Egyptian Sudan and Egypt) showed an increase of 200 tons in quantity and of Rs. 7 lakhs in value and stood at 4,500 tons valued at Rs. 42 lakhs. Under manufactured articles, imports of cotton yarns and manufactures together rose by Rs. 12 lakhs to Rs. 187 lakhs. Twist and yarn rose from 2.0 million lbs. to 4.5 million lbs. in quantity and from Rs. 20 lakhs to

Rs. 37 lakhs in value. Under cotton piecegoods, grey goods fell from 26.5 million yards to 25.2 million yards in quantity and in value from Rs. 36 lakhs to Rs. 34 lakhs, white goods from 22.7 million yards to 21.5 million yards and from Rs. 43 lakhs to Rs. 42 lakhs, while coloured goods recorded an increase in quantity from 27.8 million yards to 31.7 million yards, but the value fell off from Rs. 61 lakhs to Rs. 56 lakhs. Imports of machinery—prime-movers other than electrical, advanced from Rs. 10 lakhs to Rs. 20 lakhs. The number of motor cars imported amounted to 1,003 and that of motor lorries, buses and vans to 729 as against 1,110 and 776 respectively in August, 1934. The value of motor cars imported in August, 1935, amounted to Rs. 18 lakhs and that of motor lorries, buses and vans to Rs. 11 lakhs as compared with Rs. 19 lakhs and Rs. 10 lakhs respectively in the corresponding month of the preceding year. There were noticeable increases under cycles and parts (+Rs. 8 lakhs), jute machinery and copra or coconut kernel (+Rs. 7 lakhs each) and chemicals and copper wrought (+Rs. 3 lakhs each) while there were decreases under woollen piece-goods (−Rs. 10 lakhs), coal tar dyes and coconut oil (−Rs. 7 lakhs each), artificial silk piecegoods and cotton machinery (−Rs. 6 lakhs each) and soap (−Rs. 5 lakhs).

Compared with August, 1934, exports of food, drink and tobacco in August, 1935, declined by Rs. 29 lakhs to Rs. 3,63 lakhs. Shipments of rice, not in the husk, declined from 111,000 tons to 103,000 tons in quantity put the value rose from Rs. 78 lakhs to Rs. 84 lakhs. Shipments of wheat decreased from 5,953 tons to only 163 tons in quantity and from Rs. 498,000 to Rs. 23,000 in value. Shipments of coffee rose from 32 cwts. to 1,579 cwts. in quantity and from Rs. 2,000 to Rs. 119,000 in value. Exports of tea declined from 41 million lbs. valued at Rs. 2,73 lakhs to 36 million lbs. valued at Rs. 231½ lakhs. Exports of raw tobacco rose from 2.2 million lbs. to 3.3 million lbs. in quantity and from Rs. 7 lakhs to Rs. 12 lakhs in value. Exports of fruits and vegetables, dried, salted or preserved, rose from 900 tons valued at Rs. 3½ lakhs to 1,000 tons valued at Rs. 12½ lakhs. Raw materials and produce, exported, decreased by Rs. 26 lakhs to Rs. 433 lakhs. Under this group shipments of raw cotton shrank from 32,000 tons to 22,000 tons in quantity and from Rs. 1,76 lakhs to Rs. 1,21 lakhs in value. Of the total shipments of 22,000 tons, Japan, the largest purchaser, took 8,500 tons or 38 per cent., the United Kingdom 3,800 tons or 17 per cent., Italy 2,800 tons, Germany 2,100 tons, France 1,200 tons, Belgium 900 tons and China 800 tons, the remainder being despatched mainly to Spain, Poland, and the Netherlands. Consignments of raw jute decreased from 47,000 tons to 43,000 tons in quantity but the value increased from Rs. 64 lakhs to Rs. 76 lakhs. Exports of lac rose from 25,000 cwts. to 29,000 cwts. in quantity but the value declined from Rs. 14 lakhs to Rs. 9 lakhs. Shipments of oilseeds dwindled from 75,000 tons to 44,000 tons in quantity and from Rs. 86 lakhs to Rs. 72 lakhs in value. Despatches of groundnuts fell from 38,000 tons to 33,000 tons in quantity but the value rose from Rs. 37 lakhs to Rs. 55 lakhs. Linseed declined considerably from 25,000 tons to 2,000 tons in quantity and from Rs. 33 lakhs to Rs. 3 lakhs in value. Rapeseed dropped from 2,000 tons valued at Rs. 2 2/3 lakhs to only 27 tons valued at Rs. 4,000. The quantity of Castor seed seed exported remained stationary at 7,000 tons but the value rose from Rs. 9 lakhs to Rs. 10 lakhs. Exports of raw skins improved from 1,100 tons valued at Rs. 13 lakhs to 1,600 tons valued at Rs. 23 lakhs and raw hides also showed an increase of 500 tons in quantity and of Rs. 2 lakhs in value. Exports of raw wool rose from 2.4 million lbs. valued at Rs. 9 lakhs to 3.4 million lbs. valued at Rs. 14 lakhs. Exports of teak wood improved in quantity from 2,900 c. tons to 3,600 c. tons and Rs. 6½ lakhs to Rs. 7 lakhs in value. Manganese ore rose from 29,000 tons to 85,000 tons in quantity and from Rs. 5 lakhs to Rs. 15 lakhs in value. There was also an improvement of Rs. 3 lakhs in the case of wolfram ore and of Rs. 4 lakhs under pig iron. Manufactured goods increased by Rs. 23 lakhs to Rs. 3,72 lakhs. The number of gunny bags exported improved from 37.6 millions to 39.2 millions and the value from Rs. 98 lakhs to Rs. 1,05 lakhs. Gunny cloth, on the other hand, fell from 104 million yards to 89 million yards in quantity and from Rs. 104½ lakhs to Rs. 94½ lakhs in value. Exports of tanned hides rose by 500 tons in quantity and by Rs. 6 lakhs in value and tanned skins increased by 40 tons in quantity and by Rs. 2 lakhs in value. Exports of cotton piecegoods improved from 6 million yards to 7 million yards in quantity and from Rs. 17 lakhs to Rs. 20 lakhs in value. Paraffin wax advanced from 2,400 tons valued at Rs. 10 lakhs to 3,700 tons valued at Rs. 15 lakhs. There was also an improvement of Rs. 4 lakhs under coir manufactures and of about Rs. 2½ lakhs under pig lead, while cotton twist and yarn declined by Rs. 3 lakhs.

The share of the United Kingdom in imports fell from 41 per cent. in August, 1934, to 39 per cent. in August, 1935, and that in exports fell from 38 per cent. in August, 1934, to 36 per cent. in the month under report. The shares of Germany, Japan and

Investor's Supplement

Vol. XVI. No. 18 SATURDAY, NOVEMBER 9, 1935 Price Re. 1

AGAIN OPTIMISTIC—BUT GUARDEDLY OPTIMISTIC

The giltedge market looks like coming into its own. All conditions are propitious for a continuance of the rises recorded in the past fortnight.

First.—Sir Osborne Smith is returning to India on November 10. He may be trusted to keep an alert watch over the money and giltedge markets and to prove a trustier friend of investors. We may repeat that the return of the Governor of the Reserve Bank is a bullish factor of prime importance.

Second.—There has been persistent demand for every manner of giltedge stock—short-term, medium-term and long-term. All this demand remains more or less unsatisfied. There is hardly any scrip on offer. Prices have risen two and three points without buyers being able to pick up any large parcels of securities. This unsatisfied demand must, ere long, overflow into 3½ per cent. Rupee Paper.

Third.—The technical position in the government securities market is very sound. There are no weak bulls or tired bulls. The rise has been healthy and in accordance with genuine demand. No setbacks need, therefore, be apprehended.

Fourth.—There is a more hopeful psychology in all markets. War scares have done their worst and can do no more harm.

Let us paint the reverse side of the picture.

In the first place, our authorities have shown utmost callousness in the past. They have never lifted a finger to arrest a catastrophic fall. They have never felt that they owe any duty to investors. What is there to indicate that they will not show the same indifference in the future ?

In the second place, the market has suffered from recurrent shocks of great violence. Operators and investors are, therefore, unable to shake off their scepticism of higher prices. They are not prepared to follow the market beyond certain price limits.

In the third place, London reports may well prove unsettling in the next few days. The eve of the General Election is a disturbing period. The City interests are always prone to misconstrue Socialist victories. Till the Election is out of the way, a policy of caution is the safest.

In the fourth place, the war news about Italy and Abyssinia may take an alarming turn if the bigger Powers are drawn into the vortex of the war. It is still necessary to keep a sharp look-out in the direction of European developments.

Weighing these arguments for and against, we believe that rise is quite on the cards ; we must warn, however, against speculators biting more than they can chew.

So far as investors are concerned, the present may, perhaps, mean an opportunity that may not recur. Those who are looking out for investment of surplus funds can do worse than buying 3½ per cent. Paper at current rates.

SLOWING UP BUSINESS

(By Special Cable)

(From R. Gordon Cummings)

London, November 7.

Earlier strength of markets has not been held up. Coming election is slowing down business.

MARKETS ACTIVE

(By Special Cable)

New York, November 7.

Markets were active and strong.

A leading authority in the know of market movements and trends told us, the other day, that he saw nothing which could arrest 3½ per cent. Paper advancing to Rs. 97. We agree. We also cannot see anything which can impede this onward march.

But we have no confidence whatsoever in the credit policy of the Government or of the other monetary authorities. They have, times without number, pursued a suicidal policy and adopted suicidal tactics.

Could we but have more assurance about the intentions and plans of the authorities, we shall unhesitatingly support a real bullish view of the future.

We may conclude as we began. There is more hope of a wholesome credit policy and of wholesome credit operations with Sir Osborne Smith back at his post in India.

Below are given the prices of the leading giltedge stocks as they ruled six weeks ago and as they ruled to-day.

	November 8 Rs.	September 25 Rs.
3½% Paper	94 4 0	89 6 0
3½% 1951/54	98 14 0	97 1 0

The Weekly Air-Mail contributions of Mr. R. Gordon Cummings and Mr. F. Rocke and the accounts of the Bourses on the Continent did not arrive up to the time of going to press owing to the 'plane being held up on the way. These features do not, therefore, appear this week.

Worth-While Investments:

INDIA

GOOD YIELD ON A GOOD SCRIP

KALEESWARAR MILLS LIMITED

(By "Watchdog")

Almost all the cotton mills in South India and especially those situated in the Coimbatore District area seem to be planned well and working efficiently. On an earlier occasion, we recommended, in these columns, the purchase of the shares of the Vasanta Mills. We may now add to our bouquet by recommending the shares of the Kaleeswarar Mills Limited, Coimbatore.

This Company is managed by a board of directors and the secretary is Mr. P. S. Sathappa Chettiyar, the leading magnate of the locality.

The balance sheet position as at December 1934 is given below; and, from a glance, one would be convinced of the extreme soundness of the concern.

The balance sheet position as at end of December, 1934 is as follows:—

	1934 Rs.
Liabilities—	
Capital	6,50,000
Reserve	18,09,621
Other funds	1,17,998
Debts	1,91,038
Profit & Loss	1,32,731
Total ...	29,01,388
Assets—	
Block (gross)	28,71,299
Depreciation	16,04,445
Block (net)	12,66,854
Stock, Stores etc., ...	7,63,898
Book Debts	4,27,552
Advance	1,500
Cash	4,41,584
Total ...	29,01,388

The Capital authorized is Rs. 9 lakhs in 9,000 shares of Rs. 100 each and the Capital issued and paid-up is Rs. 6.5 lakhs in 6,500 shares of Rs. 100 each.

The total funds are Rs. 19,27,619. The General Reserve is Rs. 16,09,621. The Dividend Equalisation Fund is Rs. 2,00,000. Reserve for bad and doubtful debts is Rs. 20,000 and provision for Income-Tax and Supper-Tax Rs. 50,000. Charity, gratuity, and welfare funds amount to Rs. 47,998.

Sundry liabilities are Rs. 1,91,038. The Company finances its stocks without resources to a loan.

On the assets side, the gross block value is Rs. 28,71,299 which has been depreciated by Rs. 16,04,445 to Rs. 12,66,854.

Stores and spare gear are Rs. 63,117. The Stock-in-trade is Rs. 7,00,781.

Outstandings are Rs. 4,29,052.

Cash and other balances amount to Rs. 4,41,584.

The total liquid assets are Rs. 16,34,534, which is 2½ times the paid-up capital—a very comfortable position indeed.

The net profit for the year ended December, 1934 was Rs. 2,36,358. The amount set aside for depreciation is Rs. 97,087 and bonus to staff is Rs. 9,660. Rs. 675 has been set apart for charity for the development of local industries. A dividend of 20 per cent. has been declared, which absorbs Rs. 1,30,000. The carry forward is Rs. 2,056.

At the present price of around Rs. 282½, the yield is 7.1 per cent. tax-free. A very high yield for such a first class scrip like this.

INVESTMENT BREVITIES

The net profit of the Benares Electric Light and Power Company is Rs. 62,913 against Rs. 62,985. The amount set aside for depreciation is Rs. 50,886 against Rs. 50,191 the previous half-year and the amount written off for interest is Rs. 15,000 against Rs. 5,000. Nothing has been written off against preliminary expenses and brokerage on placing shares against Rs. 10,000 the previous half year. A dividend of 6 per cent., has been declared the same as last half-year. The carry forward is Rs. 11,916 against Rs. 11,988.

* * *

The profit on revenue account of the Bareilly Electricity Supply Company is Rs. 62,825 against Rs. 52,250. The amount set aside for depreciation is Rs. 21,534 against Rs. 21,230 the previous half-year. Rs. 10,000 against nil has been placed to reserve. A dividend of 5 per cent. has been declared. The carry forward is Rs. 7,613 against Rs. 5,731.

* * *

The profit on revenue account of the New Swadeshi Sugar Mills for the year ended June 1935 is Rs. 3,65,968 against Rs. 2,92,837. The amount set aside for depreciation is Rs. 87,000 against Rs. 80,000 the previous year. Rs. 10,000 as against Rs. 60,000 has been credited to Reserve Fund. The dividend has been maintained at 6 per cent. The carry forward is Rs. 357 against Rs. 2,874.

* * *

The profit on revenue account of the Oudh Sugar Mills for the year ended July 1935 is Rs. 5,75,399 against Rs. 3,91,799 the previous year. Rs. 1,25,000 has been set aside for depreciation against Rs. 80,000. Rs. 25,000 against Rs. 95,000 has been transferred to reserve and a dividend of 6 per cent. on the total number of shares against a dividend of 7 per cent. on 7,632 shares and a half-dividend of 3½ per cent. on 2,350 shares has been declared. The carry forward is lower at Rs. 637 against Rs. 3,828.

THE WEEK IN THE EXCHANGES

CALCUTTA STOCK EXCHANGE

(From Our Correspondent)

Calcutta, Friday.

Once again holidays intervened and business at the Calcutta Stock Exchange this week was confined to three full working days only. The political situation in Europe is practically unchanged. While the Italian Press, it is reported, is still exhorting the nation to take reprisals against Britain by boycotting her products, a more conciliatory Anglo-Italian atmosphere is apparent. Meanwhile the date for General Election in Great Britain is drawing near, and judging by the optimistic attitude of the London Stock Exchange there would seem to be little doubt that a return to power of the National Government is fully expected. This has led to a further strength in India Government Securities in London, resulting in a sharp rise in giltedge section here. Jute mills shares on the other hand, remained in a very unsettled condition and the turn-over was below normal. The result of next Monday's meeting of the Indian Jute Mills Association is awaited with interest, but it is believed in well informed circles that the proposal of working 54 hours a week from 1st April, 1936, will be confirmed. The Association has informed the Government of Bengal, with reference to their letter of August 12, that a rationalisation of the jute mill industry is not practicable at present, adding that as its working agreement with the non-member mills ends on March 31, 1936, a scheme will have to be put into operation by that date if the danger of gross overproduction were to be avoided. The Committee of the Association has urged the local Government to request the Government of India to receive a delegation for the purpose of discussing the position with them in greater detail. In view of the fact that the Government always takes much time in coming to a decision it is feared that months will pass before the date of the interview will be fixed, and in the meantime the unsatisfactory position of the jute shares will continue.

In the engineering section, the definite announcement of the promotion of Bengal Steel Corporation at Kulti (with a capital of £11,250,000) which it is reported, will take its pig iron from the Bengal Iron and the Indian Iron & Steel Companies (as was mentioned in these columns in the issue of September 21), attracted attention, and the demand for shares of these two concerns increased. Other sections remained more or less unchanged.

Money market continued to be steady but dull, and the Reserve Bank rate was 3½ per cent. as usual.

Government Securities.—A sharp rise was recorded in this section. 3½ per cent. Government Paper gradually rose to Rs. 94-6, but at the close eased down to Rs. 93-13. 3% New Loan closed at Rs. 98-12 ; 3½% Loan 1947/50 at Rs. 103-15 ; 4% 1960/70 at Rs. 108-12 ; and 5% 1945/55 at Rs. 119. There was also good enquiry for others, but owing to scarcity of sellers hardly any business was possible.

Debentures.—Strong demand for Calcutta Port Trusts and Calcutta Municipals continued. Of the former 3¾% 1935/65 changed hands at Rs. 99-12 ; and 4% 1915/75 at Rs. 103-4 ; and of the latter the only transaction recorded was a lot of 3½% 1935/65 at Rs. 96-4. There were quite a number of buyers for 3½% 1935/65 Calcutta Improvement Trusts which closed at Rs. 96-12. Of the industrials, 6½% Hukumchand Jutes were dealt in at Rs. 102-8.

Preference Shares.—Buyers for selected issues, especially for first class jute shares, were predominent. Business recorded in Ballys at Rs. 138, Hukumchands at Rs. 110 ; Lawrence at Rs. 146 ; Hooghlys at Rs. 19 (ex-dividend and Waverleys at Rs. 62. Of others, Bengal Telephones were quoting at Rs. 14-5, Associated Hotels at Rs. 85. Cawnpore Sugars were crossed at Rs. 150 ; and British India Corporation Preference changed hands at Rs. 143. Allahabad Preferences were in demand at Rs. 136 (ex-dividend) but no shares were in offering.

Other Investment Stocks.—A still further improvement in Bank share prices was noticed. Reserve Banks were continuing firm around Rs. 124-8. Imperial Bank fully paids rose up to Rs. 1525 and Contributories were wanted at Rs. 385. Central Banks closed as high as Rs. 34-12 and two lots of Ballygunge Banks came to business around Rs. 101. Railway shares came in for good demand but owing to scarcity of sellers not much business was done. Kalighat-Falta recorded a deal at Rs. 91, Hoshiarpur-Doab at Rs. 92 and Dehri-Rohtas at Rs. 10. In shipping issues, I. G. N.'s recorded a slight improvement over last week's rate, and closed at Rs. 97-8, while a small lot of Port Shippings were dealt in at Rs. 16. Bengal Assam Steamships were wanted at Rs. 218-8.

Cottons.—Considerable activity in New Victorias was recorded which was dealt in round about Rs. 1-8. Other shares remained unchanged with Bengal Nagpurs quoting at Rs. 14-6.

Coals.—A steady market but with a small business passing, was reported. Aldihs closed at Rs. 3, Amalgamateds at Rs. 21-4, and Burra Dhemos at Rs. 3-1. Equitables improved to Rs. 36 and Standards to Rs. 32-8. Bansras on reports of reconstruction of the company sharply spurted to Rs. 4.

Jutes.—The position continued to be very uncertain in this section and the volume of business was small. Owing to paucity of transactions it was very difficult to quote many shares. Howrahs were fluctuating between Rs. 48-15 and Rs. 48-3, closing at Rs. 48-7 (cum-dividend), whilst Kamarhattys were quoted around Rs. 473. Anglo-Indias came to business at Rs. 396 on Wednesday, but receded at the close to Rs. 390. Ballys had buyers at Rs. 185, Budge Budge at Rs. 260 and Nuddeas at Rs. 46-8. Belvederes came to business at Rs. 321 and a small lot of same changed hands on Thursday at Rs. 323. The attention of buyers is drawn to the sound financial position of this mill. It is good to buy these shares for investment purpose. Clives were slightly easier at the close at Rs. 24-9 and Nationals changed hands at Rs. 21-8.

Electricals.—Bengal Telephones were slightly better than last week, and closed at Rs. 18. A small lot of Dacca Electrics changed hands at Rs. 19 and Jubbulpore Electrics were crossed at Rs. 11-12.

Engineering.—Good demand was in evidence for both Bengal Irons and Indian Iron & Steels, the former closing at Rs. 4 and the latter at Rs. 8-14. A further rise in these two shares is anticipated. Burn & Co., were quoted at Rs. 244 and Kumardhubi Engineerings at Rs. 2-10. A lot of Tata Irons was dealt in at Rs. 149.

Sugars.—A steady market was reported. Transactions included Bulands at Rs. 11-14, Carew & Company's at Rs. 20-10, Cawnpore at Rs. 35-10, Murree Breweries at Rs. 191 and Samastipores at Rs. 9.

Miscellaneous.—Paper shares continued to have steady support, Titaghur Ordinaries closed at Rs. 22-14 and Deferreds at Rs. 9-13, Bengals were quoting at Rs. 98-8 and India Paper Pulps changed hands at

Rs. 181. Burma Corporations were firm at round about Rs. 7-12, B. I. C. Ordinaries at Rs. 7-4 and Midnapore Zamindaries were wanted at Rs. 64. Firpos were a shade easier from their last levels closing at Rs. 10-8.

Teas.—A dull and disinterested market prevailed owing partly to profit-taking and also due to the slightly lower prices obtained at the Tea Sales both in Calcutta and in London. Transactions included East Indias at Rs. 11-1, Kalacherras at Rs. 35, Tezpores at Rs. 9-6 and Teloijans at Rs. 6-12.

BOMBAY STOCK EXCHANGE

(*By Wire*)

(From our Correspondent)

Thursday Evening.

Money.—Money continued easy with interbank call quoting at ¼ per cent.

Exchange.—This section was quietly steady with banks selling T.T. at 1s. 6 7/64d. November-December; 1s. 6 1/8d. January-February, 1936; 1s. 6 7/64d. March-April; and 1s. 6 3/32d. May September.

Securities.—The securities market followed in the wake of the London giltedged market and 3½ per cent. Paper, which was around Rs. 92/8 a week ago, firmed up on better sterling advices and was done as high as Rs. 94/2 and closed at Rs. 93/13. Short-dated and medium-dated securities were in keen demand and most of them showed a substantial rise compared with quotations of the previous week. 5 per cent. 1945/55 has firmed up from Rs. 118 to Rs. 118/12 at the close. 4 per cent. 1943 is better at Rs. 107/12; 5 per cent. 1939/44 is higher at Rs. 109/2; 5½ per cent. 1938/40 closed at Rs. 108/14; 3 per cent. 1951/54 at Rs. 98/12; 1960/70 at Rs. 108/14; and 3½ per cent. 1947/50 at Rs. 104/2.

Share.—With the rise in securities there was an alround improvement in the share market except the cement section and as in last week steels were particularly active with ordinaries and deferreds touching high levels.

Textiles.—Though this section was firm in the beginning of the week it closed easier. Bombay Dyeing dropped from Rs. 782 to Rs. 756/4 at the close. Century closed at Rs. 224/6; Colabas at Rs. 138/2; Gokaks at Rs. 176/4; Kohinoors at Rs. 203/2; Swans at Rs. 110; and Swadeshis at Rs. 160.

Hydro-electrics.—This group has been quietly steady throughout the week with minor reactions now and then. Tata Powers moved between Rs. 1,500 and Rs. 1,540 and closed at Rs. 1,518/12. Andhra Valleys were fluctuating around Rs. 1,600 and closed at Rs. 1,602/8. Tata Hydros have been sticky at Rs. 161.

Iron and Steel.—Steels have registered a gradual and sustained rise though closed slightly lower than the highest touched on account of profit-taking. Tata Ordinaries improved from Rs. 144 to Rs. 154/8 and closed at Rs. 150/4. Tata Steel Deferreds rose from Rs. 560 to Rs. 620 and closed at Rs. 596/4. *We consider to-day's reaction as healthy and we do not expect any reactions worth mentioning. On the other hand we favour as mentioned previously accumulation of Ordinaries for we are confident that in the coming months Steel Shares would register very high levels.* On investment demand for Tata Steel

Rs. 160 and closed at Rs. 159. Production for the month of October was at maximum capacity.

Cements.—Continued delay in the completion of the merger scheme has been responsible for the dormant feeling in this section. We, therefore, do not recommend fresh commitments in this section; but we would positively favour retention of holdings of good cement shares like Bundis, Katni Deferreds, Okhas and Gwaliors. Indian Cements after touching high of Rs. 460 closed higher at Rs. 468/12 and we favour liquidation at current levels. Bundis closed at Rs. 33/12; Gwalior at Rs. 117/8; Indian Cement at Rs. 448/12; Katni Deferred at Rs. 1,950; Katni Ordinary at Rs. 350; Okhas at Rs. 245; Punjab Ordinary at Rs. 23; Shahabad at Rs. 472; and United at Rs. 115.

Miscellaneous.—Belapurs have been steady and closed at Rs. 346/4. On good speculative activity, Bombay Burmahs were done as high as Rs. 392/8 and closed at Rs. 387/8. The new shares closed at Rs. 132/8; and Bombay Steams were lower at Rs. 282/8. We still favour realisation. Bombay Telephones were higher at Rs. 105 and we favour investment purchases. Scindias were up at Rs. 13/12 whilst Bombay Petrols were marking time at Rs. 3/12/6. Premier Constructions were neglected at Rs. 76¼. Speculative fever in Alcocks has subsided and are now at Rs. 216/4.

Banks and Insurance.—In sympathy with the security section these shares have moved up. Imperial Bank of India fully paids closed at Rs. 1,537/8 as against Rs. 1,500 last week. The partly paids were better at Rs. 383/12. Reserve Banks were steady at Rs. 124. Bank of Indias closed at Rs. 124/12. Central Banks have improved to Rs. 35/2. Barodas were steady at Rs. 97/8.

In the insurance section Orientals were firm at Rs. 4,375 and New Indias were steady at Rs. 40.

MADRAS STOCK EXCHANGE

(*By Wire*)

(From Our Correspondent)

Friday evening.

The securities market witnessed hectic trading during the week under review. 3½ per cent. Paper did not respond as well as the other loans. Considerable business passed in almost all the issues with a noticeable lack of sellers at the close even at the considerably enhanced prices. 3½ per cent. Paper closed at Rs. 93-14; 4 per cent. 1960/70 at Rs. 108-12; 5 per cent. 1945-55 at Rs. 118-12 and 3 per cent. New Loan at Rs. 98-12. Mysore Loans attracted an equally good attention with prices marked up. Business was on a small scale owing to the lack of scrip at the close. There were good buyers for 5½ per cent. Loan at Rs. 108 and 6¼ per cent. at Rs. 116. Cochin Loan went through at Rs. 108-12. The debenture issue market was dull in the absence of sellers. In the preference section, Spencer & Co. 'A' were taken up at Rs. 10-8 whilst Vasanta Preferences were in keen demand at Rs. 108. Tata Iron and Steel Second Preferences were done at Rs. 159.

Banks.—Bank shares rose in sympathy with gilt-edge securities. Imperial fully paids rose to Rs. 1,540 and the Contributories to Rs. 385 whilst Reserve Banks were a bright counter at Rs. 125. Bank of Indias were done at Rs. 124, whilst Indo-Commercial 'B's were wanted at Rs. 26-12 with no sellers. Indo-Commercial 'C' shares improved to Rs. 20-6. Bank of Hindustans were taken up at Rs. 30-8 and Bank of Mysores at Rs. 272.

Public Utilities.—In this section, Vellores improved to Rs. 15-4 cum-dividend whilst West Coasts were noted at par ex-dividend. East Tanjores were fractionally easier at Rs. 109 whilst Madras Telephones did not attract buyers at Rs. 20.

Mills.—These were steady with the exception of Vasantas which were in keen demand at Rs. 110-12.

Sugar.—This section was dull.

Cement.—Like the Sugar section this section was also dull with hardly any transactions done.

Planting.—The planting section also was lifeless excepting a deal in Peermade Tea at Rs. 20-4 cum-the first interim dividend of 5 per cent. free of Income-Tax.

Miscellaneous.—This section was the most active. Tata Steel Ordinary which rose to Rs. 153-8 before reacting to Rs. 148 closed at Rs. 150. Tata Deferreds were equally prominent rising to Rs. 620 at one time closing quieter at Rs. 605. Scindias were done on several occasions at Rs. 14.

LONDON STOCK EXCHANGE

There was increased activity on the Stock Exchange at the beginning of the week, but markets have closed easier. The undertone was firm. Giltedge was steady to firm and some advances were recorded earlier in the week. 3½% Indian Stock 1931 were quoted at 95½, 4% 1958/68 at 113½ and 2½% Consols at 84⅞, 3½% Conversion at 111, War Loans at 116⅜ and Victory Bonds at 114¾.

Among other sections there was a general improvement in Home Rails. Great Western Ordinaries were quoted at 18 and Southern Deferred at 20. Oils also improved. Anglo-Iranians were prominent being quoted at 70s. 10½d. Teas and Rubbers were steady. Minings were steady bu they were irregular towards the close. Nundydroogs were quoted lower. Industrials were featureless.

NEW YORK STOCK EXCHANGE

The market was active and strong. General Motors were higher on declaration of extra dividend.

THE OUDH SUGAR MILLS LIMITED

The Directors beg to submit the audited accounts for the year ended July 31, 1935 :—

After payment of Commission, Debenture Interest, depreciation etc., there remains a balance of Rs. 1,11,528-10-1 at credit of the Profit and Loss Account, which the Directors recommend to dispose off as under :—

1. To pay a dividend on 9,982 shares at Rs. 6 per share free of Income-tax	Rs.	59,892	0	0
2. To make provision for Income-Tax	,,	26,000	0	0
3. To place to Reserve Fund ...	,,	25,000	0	0
4. To carry forward ...	,,	636	10	1
Total ...	Rs.	1,11,528	10	1

The additional machinery ordered out last year worked satisfactorily during the year under report, but owing to the levying of excise duty and fixing of the cane prices as well as a shorter cane season and lower prices of sugar, the profit is considerably reduced.

The Managing Agents have given up a sum of Rs. 26,572-0-6 out of the sum of Rs. 57,539-12-6 being commission due to them.

Directors.—Rameshwardas Birla, Shriram Jhunjhunwala, Bishwambharlal Maheswari, Ramnivas Ramnarain and Pingle Vankat Rama Reddy.

Managing Agents.—Messrs. Birla Bros. Ltd.

THE TINNEVELLY-TUTICORIN ELECTRIC SUPPLY COMPANY LIMITED.

The Directors beg to submit their Report and the Audited Accounts for the year ended 31st March, 1935.

Accounts.—The Revenue Account shows a loss of Rs. 1,12,383-9-10 (including depreciation amounting to Rs. 42,982-5-1) which, added to a balance of Rs. 24,541-10-8 brought forward from last year and deducting Rs. 2,315-10-0 being the profit realised on the sale of Investments, gives a balance of Rs. 1,34,609-10-6 to be carried forward at debit of Profit and Loss Account.

Finance.—A Mortgage Debenture Loan of Rs. 5,50,000 was authorised before the close of the year under report and the same was issued in full on the 1st April, 1935. The Debentures are of Rs. 500 each and carry interest at the rate of 5 per cent. per annum.

Progress.—The agreement for the supply of electricity to the Municipal Council for street lighting was completed during the year and supply was commenced in January, 1935, the connected load at the end of September being 13.8 K. W. The scheme for the electrification of the Madura Mill which was referred to in the last Report did not materialise.

Tinnevelly-Palamcottah.—Since the close of the year under review contracts to provide electricity for street lighting have been entered into with the Municipal Councils of Tinnevelly and Palamcottah at the end of September the total connected street lighting load in these towns was approximately 17 K. W.

Consumers Connected.—The following table shows the number of Consumers and the Connected load as at 31st March, 1935 :—

	Number of Consumers	Connected load in K. W.
Tuticorin Domestic ...	557	291.803
Tuticorin Industrial ...	11	48.900
Tuticorin Street Lighting ...	...	3.240
Tinnevelly Domestic ...	408	234.555
Palamcottah Industrial ...	9	20,425

The following figures show the number of units sold monthly since the Company started supply :—

April		13,377
May		18,165
June		24,189
July		25,230
